Jahangiri invites Oman’s deputy PM for visit

POLITICS

TEHRAN — Vice President Eshaq Jahangiri has invited Oman’s Deputy Prime Minister for International Relations, Sayyid Asad bin Tarik Al-Hashari, to visit Tehran.

Mohammed Reza Nori, Iran’s ambassador to Oman, handed the invitation to Al-Hashari during a meeting on Monday, during which the two sides discussed bilateral relations, Nori reported.

The meeting came after Israeli Prime Minister Benjamin Netanyahu’s visit to Oman and Muscat, in which he met with Sultan Qaboos. It was the first such meeting in over 20 years. Iran reacted to the normalization, saying the Zionist regime could not possibly be a partner in any bilateral or multilateral talks.

Iran-EU talks set for the opening of the EU office in our country,” Tasnim reported.

Iran not ready to pay for world’s expediency unaided: Qassemi

TEHRAN — In an interview with the Islamic Republic News Agency, Foreign Ministry spokesman Babak Qassemi said that Iran is “unconditionally and ‘humbly,’ has reached out to all of its neighboring countries to gain the cooperation of the international community to weaken the horns of aggression. The regime of Israel seeks to cause division among the Muslim countries to cover up 70 years of occupation and aggression.

Qassemi highlighted that Iran does not have any international commitments if Washington’s unilateral sanctions against Iran, and it will not be able to fulfill its international and national responsibilities.

“With the second-hand of the U.S. sanctions around the corner, we believe there is no need to save the U.S. to use against us. The day [Nov. 5] will come, and the inevitable defeat of the U.S. regime has started. It is our own choice, without the need for America to save the empire. In addition, the American-backed parties to the nuclear deal and the EU have reached a good stage and great steps have been taken,” Qassemi said.

Qassemi highlighted that Iran does not have any obligations to comply with all of its international commitments if Washington’s unilateral sanctions against Iran, and it will not be able to fulfill its international and national responsibilities.

The president voiced his gratitude to the people of Iraq for their hospitality, saying, “The Iraqi people, especially the people of Karbala, have always been good hosts for Arbaeen pilgrims.”

The top U.S. diplomat was referring to the Iranian military’s advisory service to Syria in its fight against terrorist and criminal groups, and efforts for ensuring border security, and efforts for ensuring border security, and efforts for ensuring border security.

Zarif visits Pakistan over kidnapped Iranian soldiers

ZARIF — Foreign Minister Mohammad Javad Zarif arrived in Pakistan in the early hours of Monday morning, carrying news of the capture of an Iranian oil tanker by the U.S. military.

The group later posted two photos of the two Americans to their Facebook page.

Qassemi further said the Foreign Ministry should not be â€œhumble,â€”but has reached out to all of its neighboring countries to gain the cooperation of the international community to weaken the horns of aggression. The regime of Israel seeks to cause division among the Muslim countries to cover up 70 years of occupation and aggression.

Qassemi highlighted that Iran does not have any international commitments if Washington’s unilateral sanctions against Iran, and it will not be able to fulfill its international and national responsibilities.

Mass grave of over 1,500 victims slain in U.S.-led strikes found in Syria’s Raqqah

Syrian government forces have discovered a mass grave containing the bodies of more than 1,500 civilians killed by U.S.-led coalition airstrikes against IS targets in Raqqah, Syria. The government said the airstrikes were carried out in September 2017, targeting a suburb of the city that was then under the control of Islamic State (ISIL) militants. The remains were found at a government-run detention center, which was reportedly turned into a mass grave by IS fighters before they fled the area.

Three people have been killed in a shooting incident at a local government building in Indonesia’s Tegal province. Authorities said the shooting occurred in the city of Tegal after an argument between two men over a parking space.

North Korea preparing sites for int'l inspections: Seoul

North Korea has been preparing sites for international inspections as part of efforts to denuclearize the peninsula.

A spokesman for the movement stated back in March that it is “ready to cooperate with the international community on all fronts to achieve the comprehensive denuclearization of the Korean Peninsula.”

North Korea has been making preparations at several of its weapons development facilities, including its satellite launching ground at Sohae, in North Korea.

Violence flares at anti-Bolsonaro protest in Sao Paulo

Protesters clashed with police during an anti-Bolsonaro demonstration in Sao Paulo. The demonstration was held to protest against the Brazilian president’s policies, including his stance on climate change and his support for the Brazilian military.

Indonesia protests Saudi regime execution of domestic worker

Indonesia has filed a formal protest with the House of Saudi Arabia over the execution of a domestic worker named Fatima, saying it was a violation of the country’s sovereignty and human rights.

Austria refuses to sign UN migration pact

Austria has made a tough line on immigration a key focus of its political stance, and has repeatedly refused to sign international migration pacts. Austria’s government has said it will not sign the Global Compact for Migration, which aims to boost cooperation to address the world’s growing migrant crisis.

The government has agreed not to sign the pact and has said it is a “political declaration” and not a legally binding document. Austria’s decision has been seen as a major setback for the United Nations’ efforts to create a global migration framework.

The United Nations has stressed that the pact is important for addressing the global migrant crisis and ensuring that countries cooperate to protect migrants. However, Austria’s decision has caused concern among other countries, who have expressed their desire to see the pact signed and implemented.

The move has been criticized by some as a blow to the global compact for migration, which was agreed upon at a summit in 2018. Austria’s decision could also set a precedent for other countries to follow suit.

The Austrian government has said it will not sign the pact because it believes it would undermine the country’s sovereignty and national interests. Austria has a long history of restrictive migration policies, and its government has been critical of the migration pact’s provisions on family reunification and legal migration.

**ECONOMY**

**TEHRAN** – Production of copper cathode in Iran rose 23 percent in the seventh Iranian calendar month of Muharram (September 22) in comparison with the same month of the past year, IRIB reported on Wednesday citing the data of Iran's Mines and Mining Industries Development and Renovation Organization (IMIDRO).

IMIDRO's data put the copper output at 22,218 tons in the seventh month compared to 18,192 tons during the first seven months of the current Iranian calendar year (March 21-October 22).

**TEHRAN** – The value of trades in Iran's Foreign Exchange Trading Center (IFB) market known also as Iran Farah Bourse (IFB) has grown 97 percent during the first seven months of the current Iranian calendar year (March 21-October 22), compared to the same period of time in the previous year.

The number of trades has also increased 79 percent during the seven-month period on year, Tanin news agency reported on Wednesday.

As reported, some 85.277 billion securities worth 517.679 trillion rials (about $12.325 billion) were traded through the IFB during the first seven months of this year.

Iran's oil exports still high despite U.S. sanctions: report

IRINEX to overcome U.S. petroleum sanctions?

**TEHRAN** – Iran has sold about 1.5 million to 1.9 million barrels of oil per day (bpd) of crude oil and condensate in September according to banking tracking firms and the International Energy Agency (IEA). The output of Iran oil is still a long way from achieving its stated goal of restoring out Iran oil sales.

According to a report by CNBC, although Iran's exports of crude are declining, shipments throughout September, some of Iran's biggest buyers, including China, India, and others, expected to keep buying its barrels. A confirmation, which is indirectly indicated it will also some countries to continue importing limited quantities of Iranian oil, China, India, and others, are buying Iranian oil and shipping to their countries.

As a result, Iran will receive its first limited cargo from China, and countries like Turkey, Italy, Spain, Greece, and Turkmenistan continue to receive its crude oil, terminal services via oil tankers to different destination across the world.

The next date of offering crude oil at IRINEX has not been announced yet and the new decisions about continuing selling export-grade crude oil at stock market and some other matters will be directed on the made assessments and the gained experience of the situation in the next 10 days.

Regarding the unilateral U.S. embargo placed on Iran and the limited change allowed for experts to evaluate IRINEX's capabilities with flexibilities, the time is not enough to judge the practicality and efficiency of the approach market.

It does not seem fair to compare IRINEX with its foreign rivals since the aim of its establishment (circumstances and determinants) is not the same with its competitors.

IRINEX is expected to gain is not achievable overnight and should not be calculated in determining U.S. sanctions. To bother U.S. pressures, it should offer a bigger and better market for businesses to get to know the external environment, state-run economy with "profound changes" in the external environment, and the emergence of risks accumulated during the past decade in the last quarter.

The statement was a shift from three meetings ago when the Politburo said the leadership appeared "very worried" about changes in the external environment.

The Politburo meeting of September 29-30 has shown public concern about China's slowing economic growth since the trade war broke out with the US in the summer.

It followed another show of China's business sentiment in the manufacturing and services sectors, which both sharply deflated in expert demand, according to a Reuters poll.

The figures point to further devaluation down the road after the country's headline growth rate slowed to its lowest level in a decade in the last quarter. This was the second quarter on row for China's small businesses, regulators warn.

China's GDP growth "is likely to be a lot of difficulties with certain enterprises and slowed economic growth caused over long periods of time".

"The significance is the great importance to this situation and be more forward-looking in our handling of the statement," the news agency quoted him as saying.

Separately, the Politburo said it would "implement a new strategy to further improve the living standards of our own things done and freely seek solutions in the world." OIL

OIL rises one percent ahead of U.S. sanctions on Iran

Oil prices rose more than 1 percent on Wednesday as markets braced for the imposition of U.S. sanctions on Iran next week and as stock markets closed back some of their losses from the previous day.

Benchmark Brent crude oil was up 85 cents at $79.74 a barrel by 0610 GMT. The contract fell 1.8 percent on Tuesday, at one point touching its lowest since Aug. 24 at $79.09.

The U.S. sanctions, due to be enforced on Aug. 7, are expected to push up prices as Iran's oil production could suffer and Iran has been a major supplier to Asia.

In a bid to ease some of the impact, Iranian authorities have been encouraging domestic consumption through price subsidies.

The contract has fallen over 10 percent this year, with the Brent losing over $10 a barrel since the U.S. announced plans to restore sanctions.

President Donald Trump last week ordered a new round of sanctions against Iran. The measures are intended to be tightened in the coming months.

The sanctions are due to go into effect on Aug. 7 and are expected to target Iran's energy sector.

The impact on prices is likely to be muted, with Iranian crude oil prices at around $69 a barrel, well below the level at which Iranian oil production would be reduced.

The sanctions are expected to reduce Iranian crude oil exports by about 200,000 barrels per day.

The impact on world oil prices will likely be limited, with the global supply of crude oil remaining sufficient to meet demand.

The sanctions are expected to have a limited impact on the world's oil market, with crude oil prices likely to remain stable.

The market is widely expected to react positively to the U.S. decision to ease sanctions on Iran.

The move is likely to provide some level of support to oil prices, but it is unlikely to reverse the overall downward trend.

The sanctions are expected to reduce Iranian crude oil exports by about 200,000 barrels per day, but the impact on world oil prices will likely be limited, with the global supply of crude oil remaining sufficient to meet demand.

The sanctions are expected to have a limited impact on the world's oil market, with crude oil prices likely to remain stable.

In Merkel, Europe loses a leader
Compassionate when hearts grew cold, committed to others abandoned it

Angela Merkel announced Monday that she would step off the political stage when her term as Germany’s chancellor ends in 2021. It may be sooner if elections are called before then, but she said it would be time “to get ready for the time after me.” As Merkel put it — to “look out potential successors and future challenges.” This is the time to look back at one of the most remarkable political careers of our time.

It is not charisma, daring, or eloquence that have made her merkwürdige. It is her way of governing. As a Social Democrat and a moderate, her predecessor as chancellor, Helmut Kohl, Ms. Merkel is rather bland in comparison. Her slogan in the last election — “For a Germany where life is good and we leave the world better than we found it” — was in line with Kohl’s. She is a bit conservative, she said in 2009, “like Helmut Kohl.”

But it was precisely in that calm, consistency and discipline that she demonstrated a leaderless free world. Yet it is Merkel, trained as a scientist in East Germany and the first woman to serve as German chancellor, who has stood up to Trump, who nobly opened Germany’s doors to refugees and who argued for the value of diversity among countries of the world. That all was done without drama, without a lot of words. (Merkel’s “I have come to mean ‘to dither’”)

Many of Merkel’s decisions have garnered praise as well as criticism. Her insistence on austerity — a commitment to raising military spending has made a difference in helping to stabilize the European Union without Britain, strengthening institutions that America’s leadership role and Britain was trying to quit.

A Pew Research Center survey of 25 countries found that 52% of those surveyed had confidence in Merkel, more than the leaders of France, Russia, China, and the United States.

Donald Trump is still sometimes depicted as impulsive and unprepared. But this view is mistaken. There is method — an artful method — behind the president’s actions. It’s a bit like a chess master, ready to trash and mock. He is often right, even if he’s not. He is often right, even if he’s not.

He is determined to do everything to prove the rule. After Christine Blasey Ford alleged that Brett Kavanaugh, a member of the Supreme Court, had tried to rape her when they were in college, the president, who initially condemned the attacks as despicable. A day later when President Trump had accused the president of some of the most senior American journalists of Russian influence, he said, “I think this is fake news.”

Some observers think that the president’s strategy is to distract the world from his own failures and to make immigration — and that means race — the explicit centerpiece of these elections.

On Tuesday, as the first dead from the synagogue shooting is buried in Pittsburgh, President Trump signed a brief to cut the crown prince down to size.

President Trump and Ms. bin Salman, the younger brother of King Salman, have returned to Saudi Arabia after a prolonged absence in London, indicating that Saudi Arabia and the United States have not yet worked through their differences.

“We are working very closely with Saudi Arabia,” President Trump told a press conference in London on Tuesday.

The president’s visit to the Middle East has been complex and uneven. There were the tensions with the president of some of the most senior American journalists of Russian influence, he said, “I think this is fake news.”

Justice for Jamal Khashoggi and his Loved Ones: Askari

A supposed closed trial in Saudi Arabia would reveal little about the truth behind Jamal Khashoggi's death. The real interest lies in the governance changes that are necessary.

The US has not confronted Saudi Arabia’s needs for meaningful reforms. The rulers must change their behavior, and the US must support them because they ordered this horrific murder and all the details of how it occurred.

The truth will be revealed when the trials are conducted, but they are likely to be closed. The courts will be influenced by the Saudi government and the court rulings will be biased.

The US government has a responsibility to hold Saudi Arabia accountable for the murder of Jamal Khashoggi and to ensure that justice is served.

The US government should support the Saudi government in making reforms to ensure that justice is served and to prevent similar atrocities from occurring in the future.

Justice for Jamal Khashoggi and his Loved Ones: Askari

Why is Britain backing Al-Qaeda and ISIS in Syria and Yemen?

British politicians are supporting a regime that is killing tens of thousands of people in Yemen and in support of the US in the war against ISIS.

The British government should be held accountable for its policies in the Middle East and should be pressured to change its approach.

The British government should support the people of Yemen and Syria and work to end the war and promote peace.

British politicians should be held accountable for their support of regimes that are committing atrocities.

British politicians should be pressured to change their approach and work towards a peaceful resolution in the Middle East.

  - 18th floor, 140 sq.m, 2 Bdr., almost new, equipped kitchen, unfurn, balcony, luxury lobby spj, gym samola, good access $4000
  - Ms. Diba: 09128440156
- **Apt in Saadat Abad**
  - brand new, 7th floor, 370 sq.m, 4 Bdr., furn., balcony, gathering room, spj, gym parking spot, storage
  - Ms. Diba: 09128440156

**Villa**
- **Unbelievable Villa in North of Tehran**
  - 7000 sq.m land, 2200 sq.m built up, duplexes, 7 Bdr., big salon garden, renovated, waterfall suitable for Embassy or Residence
  - Ms. Diba: 09128440156
- **Triplex Villa in Zafar**
  - 700 sq.m, 5 Bdr., Furn., Jacuzzi renovated, green garden one 100 sq.m separate suit with 2 Bdr., $6500
  - Ms. Shayan: 09128440156
- **Duplex Villa in Velenjak**
  - 1100 sq.m built up, 1300 sq.m land, 9 Bdr., renovated, nice garden semi furn, outdoor pool nice garden, 2 big balconies storage servant quarter 2 side entrances, $25000
  - Ms. Shayan: 09128440156
- **Villas in Ajadvan**
  - 2 floors, 315 sq.m & 300 sq.m furn., equipped kitchen swimming pool, same parking spot, gym $4000
  - Ms. Shayan: 09128440156

**Building & Office**
- **Whole Building in Pasdaran**
  - almost new, 5 floors, each floor 2 aprts, 10 aprts totally, 90 sq.m to 100 sq.m, parking, parking spots
  - Mr. Shayan: 09128440156
- **Whole Building in Zafaranieh**
  - 19 aprts, each in 200 sq.m with 3 Bdr., one penthouse with 5 rooms, parking spot, 4900 sq.m built up, 6000 sq.m land, semi furn
  - Ms. Shayan: 09128440156
- **Whole Building in Zafar**
  - 3 floors, each in 200 sq.m clean & nice, elevator parking spots, storage
  - Ms. Shayan: 09128440156
- **New Whole Commercial Building in Jordan**
  - 7th floor, each floor one office each office 140 sq.m flat lobby, parking spot Price per each sq $490
  - Ms. Shayan: 09128440156
- **Whole Building in Mahanoddel**
  - 5 floors, each floor one apt each apt 170 sq.m with 3 Bdr., unfurn, spj, 8 parking spots storage, elevator
  - Ms. Shayan: 09128440156
- **Nice Office in Jordan**
  - 120 sq.m, almost new parking spot, lobby, good access to highway
  - Ms. Shayan: 09128440156

**Ideal Offers**
- **Apt in Eslamieh**
  - 63 sq.m, 1 Bdr., fully equipped kitchen, renovated, yard
  - Ms. Shayan: 09128440156
- **Apt in Qeytarieh**
  - 4th floor 120 sq.m, 2 Bdr., fully furn, parking spot near to Qeytarieh Park
  - Ms. Diba: 09128440156
- **Apartment in Velenjak**
  - 2nd floor, 200 sq.m, 3 Bdr., furn. balcony, elevator, storage, spj parking spot, 24/7 security $1700
  - Ms. Sara: 09128303207
- **Office in Valiasr**
  - from 250 sq.m up to 7000 sq.m commercial office, ready for renting to foreign companies lobby, lots parking spots
  - Ms. Diba: 09128440156
- **Apt in Niavaran**
  - 1st floor, 250 sq.m, 3 Bdr., unfurn, sauna & swimming pool parking spot $1800
  - Ms. Diba: 09128440156

Nature’s ‘kill code’ may destroy cancer

Two recent studies detail a natural mechanism that, if harnessed properly, may be able to destroy cancer cells and their ability to become resistant to treatment — without any chemotherapy. This paper published in the journal eLife. This paper is a significant contribution to our understanding of how large RNAs can be transformed into small molecules toxic to cancer cells. A majority of all cancer patients are treated with chemotherapy, which is known to be destructive to normal cells. New strategies are needed to target cancer cells and their ability to self-destruct.

Afinance in cancer research has revealed that obesity is a factor that can help drive cancer cell growth. This is because obesity can cause a range of metabolic changes that can promote cancer cell survival. In this study, the researchers found that obesity may be related to the ability of cancer cells to self-destruct.

The first of the two studies was published in the journal Science in 2018. This study details how large RNAs can be transformed into small, toxic RNA molecules.

The second paper, which describes how RNA and microRNAs of every individual person can kill cancer cells, but that they can also simultaneously prevent them from becoming resistant to treatment, was published in the journal Nature in 2020.

The second paper’s findings show that RNA molecules may be able to trigger the toxic effects of certain chemotherapy drugs in cancer cells. This may avoid the need for high-dose chemotherapy, which can cause severe side effects.

According to recent research, our bodies may house more bacteria than the number of human cells in our bodies. This means that there is an urgent need to understand the role of the gut microbiome in the development of cancer.

How do genes affect obesity-related diabetes, fatty liver

In a study published last year, scientists led by Peter Peter, a professor of cancer metabolism at Northwestern University Feinberg School of Medicine in Chicago, IL — revealed not only that certain RNA molecules can kill cancer cells, but that they can also simultaneously prevent them from becoming resistant to treatment.

The second paper’s findings show that RNA molecules may be able to trigger the toxic effects of certain chemotherapy drugs in cancer cells. This may avoid the need for high-dose chemotherapy, which can cause severe side effects.

In one of the studies, the researchers identified a sequence of six nucleotides contained in small RNAs that made these molecules toxic to cancer cells. A combination of the basic structural unit and building block of DNA and RNA, these molecules are toxic to cancer cells.

In the first recently published study, Prof. Peter found that about 3 percent of all the large RNAs can be “cut” into small pieces known as toxic microRNAs that can kill cancer cells.

In the second recent study, Prof. Peter’s team tested in a mouse model possible combinations of nucleotide bases from these six nucleotides that would result in the deadliness of the most toxic combination.

Based on what they have learned in these two studies, the researchers say that future clinical trials for cancer treatment may avoid the need for high-dose chemotherapy.

In another study, the researchers identified a natural mechanism that can remove cancer cells that have become resistant to treatment. This may avoid the need for high-dose chemotherapy, which can cause severe side effects.

The cities of Ahvaz in Fars province and Meybod in Yazd province were respectively designated for “Woodcarving” and “Zibis” (traditional hand woven floor-covering), while the village of Khorasab in South Khorasan province is nominated for the craft “Tashkhi” (traditional hand woven labar). Participations will also be familiar with the treasure trove of carpets being kept at the museum and he earned certificates of participation, CHTN reported.

Covering an area of 3,400 square meters, the museum is located on the northeast of Laleh Park in the heart of Tehran. Persian carpets are sought after internationally for their delicate designs and high quality. Official figures show handmade carpets have a significant share in Iran’s non-oil exports.

Ancient sword, coins, ornaments recovered in southeast Iran

The Iranian police have recently confiscated a sword, coins, personal ornaments and other objects from two smugglers in southeastern Sistan-Baluchestan province, ILNA reported. The seized objects have been handed over to Zahedan Museum, said Amir Rahmati, a senior police official in charge of protecting cultural heritage.

They also include a clay pot, metal bracelet, stone necklace and stone mill which date from prehistoric era to the (early) Islamic times, the official added.

Recovered Achaemenid relief reaches Mashhad

The 3,000-year-old, 2-metre high slab once decorated the U.S. on September 27, has been delivered to Mashhad’s Khurramabad Museum for its exhibition. On October 28, the limestone relief which depicts a Persian guard, ended up 22 days of being displayed at the National Museum of Iran, where it received 11,333 visitors, 5,468 of whom were from nationals, ILNA reported.

The eight-inch square object will also be put on show in a select of other cities across the country, according to the Cultural Heritage, Handicrafts and Tourism Organization.

The bas-relief was returned to the country after 80 years. It was confiscated from the Park Avenue Armoury in New York in 2017, while offered for sale at an art fair in June, a U.S. judge ruled that the exquisite relic should be returned to Iran.

The relief was part of a long line of soldiers depicted on a basaltite at the central building on the UNESCO-recognized Persopolis in southern Iran.

Traveling to the UK is about to get easier (for some)

An Aryan relief from an ancient royal palace in Iraq is expected to break records when it goes on sale at Christie’s in New York on Wednesday. It is expected to sell for five figures. The site is particularly important that it is under the rule of the powerful Achaemenic Empire.

The most important attributes of El Tajin’s buildings with the rich decoration of key-patterns, fretworks, niches, Doric columns, wall paintings and fine reliefs.

The reliefs and paintings discovered at the site contain important information on ritual and daily life. They also include a clay pot, metal bracelet, stone necklace and stone mill which date from prehistoric era to the early Islamic times, the official added.

The news also comes on the heels of an ambitious plan to make Heathrow the world’s biggest airport by the year 2025. Of the five nations listed by Hammond, three—Canada, Australia and New Zealand— are members of the Commonwealth. According to the Henley Index, a group that tracks global travel access, a Japanese passport is the most powerful one in the world.

60% of vertebrate wildlife lost on Earth in just the last 40 years, says research

The World Wide Fund for Nature (WWF) has released its latest summary of the state of the Earth’s ecosystems. You don’t need a detective background to be exposed to the hard facts of biodiversity loss. Between 1970 and 2014, populations of vertebrate animals declined by an average of 60 percent. Freshwater animals have even worse, with drops of about 82 percent. Plastic waste in the water is up. So is deforestation. We need to act before it’s too late.

“It is time the world comes together to deliver on its commitments and achieve global agreement for nature, as the world did for climate change,” said Marco Lambertini, the CEO of the WWF. “We call to arms in the WWF in the 2018 Living Planet Report.”

Putting aside arguments on whether the Paris agreement on climate change is the answer, it’s clear something needs to be done quickly to address biodiversity loss.

These numbers spell out a dire situation: a major species extinction crisis. Scientists and civil society groups have been warning for years about the dramatic declines in species. While there is still time to act, the situation is dire.

Two years ago, the WWF took a look at trends that sum up the general health of ecosystems around the globe, using them to make an assessment on six indicators that describe the resilience of global ecology.

The current state of ecosystems around the globe, using them to describe the resilience of global ecology.

Every two years, the WWF takes a look at those trends that sum up the general health of ecosystems around the globe, using them to make an assessment on six indicators that describe the resilience of global ecology.

To track these indicators, the WWF looks at sources of food, pharmaceutical inspiration, and carbon sequestration.

For example, if you know current trends could cut loss to 10 percent of the planet’s land being free of human impact by 2050. If you didn’t also includeliest scientists tell you that such a target looks quite achievable.

The world’s seaboards are estimated to have 5 percent in 1990, 10 percent in 2000, and 15 percent in 2010. We are actually seeing the number of species that can engage in pollination, and need to do so to live down to, numbers like these do little to demonstrate the extent of biodiversity loss

Climate change, it’s clear something needs to be done quickly to address biodiversity loss.

New nature monuments, wildlife refuges nominated for inclusion in DOE list

TEHRAN — Four natural scenarios in northwestern province of Hamadan have been nominated for possible inclusion in Department of Environment (DOE) list as national nature monuments and wildlife refuges nominated for inclusion in DOE list.

Khan-Gormaz protected area in the western part of the city and Sarabchay, which is mile away, are two other natural heritages nominated for inclusion in the DOE list, reported the provincial DOE chief Adel Amiri.

Amiri went on to add that these areas are protected area stretching over 9,000 hectares of plain and mountainous home to migratory birds, are also nominated for inclusion in the list as wildlife refuges.

“Currently, the aforesaid areas are still not protected and approved by the DOE supreme council,” Adel Amiri said.

Regarding the ecological diversification and value of Hamadan province, as well as close follow-up, the provincial responsible bodies came to an agreement to introduce four areas for further conservation and protection, he stated.

In Iran, areas protected by the Department of Environment cover over 2 million hectares which fall into four categories: national parks (1.75 million hectares), wildlife refuges (158,500 hectares), national nature monuments (47,450 hectares), and national nature reserves (4,650 hectares).

A senior Iranian official, who is affiliated to special regulations, and the DOE is the responsible body which have absolute authority over all of the related organizations.

Run-down areas center to receive 5% of Tehran's budget

TEHRAN — Run-down areas centers will be inaugurated in all provinces of the country by the Iranian calendar month of Bahman (January 22-February 19), an official with the Red Crescent Society (RCS) has said.

Comprehensive rehabilitation centers offering physiotherapy, occupational therapy, speech therapy, orthosis and prosthetics services are being set up in run-down areas within provinces within next three months, IRNA quoted Iranshahr’s city mayor Rayar Asadi as saying on Wednesday.

The centers aim to provide basic rehabilitation services to the regions which are specialized rehabilitation clinics throughout the country follow-up the opening of the aforesaid centers.

He went on to say that some 70 percent of run-down areas in Iran are suffering deficiencies, which presents new challenges to the society and it is financially struggling and need help and support to be provided with rehabilitation centers.

So far, the buildings and equipment needed to establish these centers have been purchased, he added, explaining that we made great efforts and provided the rehabilitation centers in advance helping those in need.

Diabetes accounts for 9% of health sector’s total costs

Diabetes is responsible for some 9 percent of the total costs spent in the country for the Non-Communicable Diseases (NCDs) Committee has said.

Regarding the prevalence of overweight and diabetes among Iranians, the committee has drawn up a program containing strategies to prevent NCDs in the country, IRNA quoted the director of the Saffar Larijan as saying on Saturday.

The accent of bitcion could boost global warming at 2C in just two decades, according to a new analysis.

A key climate model found that the fans which power bitcoin, which has been a novel means of completing financial transactions online, but gain efficiency over time, shows a dramatic rise in their environmental impact.

Moreover, the committee announced that the properties in the busiest province of the country are extremely old, which must be taken into serious consideration and renovation measures must be taken in advance.

Understanding climate. “This research illustrates that bitcoin’s carbon footprint can prove complicated. If the average rate of technology uptake is used instead, this number is closer to 16 years.”

In a study that examined the entire chain of events that leads to the creation of bitcoins, researchers at University of Hawaii at Manoa examined how the projected growth of this cryptocurrency impacts the climate.

By way of comparison, the scientists compiled data on the energy use associated with mining 1 billion bitcoins, which is the annual energy used by the world’s 500 largest companies.

They used this information to estimate the rate of uptake this cryptocurrency’s consumption will follow in the future.

Based on their most conservative appraisal, the team found that the cumulative emissions from bitcoin could be enough to push global warming beyond 2C in 27 years. If the average rate of technology uptake is instead, this number is closer to 16 years.

The researchers noted that bitcoin’s energy consumption is still growing, and the energy and food are considered the main contributors to ongoing climate change.

“If these statistics are revised, a considerable increase will show up later,” he said.

In December, the committee said that the government has told HIS that the budget allocated to renovation of the run-down areas center is about 170 million rials.

Considering the vastness of run-down areas in the country, the budget allotted to the center is about 20 million live in such areas stretch-ing over 130,000 hectares of the country. The magnitude 5.2 tremor in Tehran and its 10 km southern Hamedan city, are among the areas which are under renovation process.

The committee further regretted that over 5 percent of the country’s total population of Tehran, “If these statistics are revised, a considerable increase will show up later,” he said.

Riyadh interested in finding out evidence which Turkey against Khagoshki

Khagoshki's body 'cut into pieces' after murder

The office of Riyadh's chief prosecutor said that Khagoshki was killed over $5 million debt and was cut into pieces after being strangled. It added that the investigation is ongoing.

Prince Ahmad's return has not been officially confirmed by the Saudi regime and the UAE, is meant to achieve the goals of the joint special committee.

Prince Ahmad bin Abdulaziz Al Saud, the kingdom's eldest son, has arrived in Juba, but the truth is we are for peace, and what we are trying to do is build trust," said Prince Ahmad bin Abdulaziz, who has been on foot since the last big attack.

The United Nations has expressed its concern over the killing of a civilian in a peace ceremony.

Several thousand people have gathered in solidarity with the people of Juba, and several organizations, halted the operation of 4,500 tourist facilities and 1,124 playgrounds and sports complexes.

FBI investigating 'smeash scheme' against Russia probe chief

The United States Federal Bureau of Investigation (FBI) is looking into alleged claims of sexual misconduct against special counsel Robert Mueller, the agency said in a statement.

Mueller is investigating allegations that members of President Donald Trump's campaign team colluded with Russia to sway the 2016 election in favor of his rival.

The FBI has not yet announced if it will open an official investigation against Mueller, who was appointed special counsel by the Justice Department to probe Russian interference in the 2016 presidential election.

Mueller, a former FBI director, said he had been following the probe from the inside for months and was confident that his team had developed evidence of potential collusion.

Mueller is investigating allegations that members of President Donald Trump's campaign team colluded with Russia to sway the 2016 election in favor of his rival. The FBI has not yet announced if it will open an official investigation against Mueller, who was appointed special counsel by the Justice Department to probe Russian interference in the 2016 presidential election.

Roger Federer turned down an invitation to play exhibition in Saudi Arabia

FIFA President Gianni Infantino said on Wednesday that football's governing body is looking into the possibility of increasing the number of teams at the 2022 World Cup in Qatar and sharing the hosting rights of an expanded tournament with other nations in the region.

FIFA decided earlier this year to expand the 2022 World Cup to be held in 48 teams in United States, Canada, Mexico, to 48 teams from 32 while leaving the door open to the number playing in Qatar in four years' time.

"We have decided to increase the number of teams participating in the World Cup final tournaments from 32 to 48 and this will happen in 2026," Infantino said in an address to the Asian Football Confederation's annual congress.

"We will soon be looking at it. If it is possible, why not?"

Infantino said an expanded tournament would be welcomed from teams from 4, and "I have to say if it is possible, if it is feasible. We are discussing with our Qatar friends, we are discussing with our many other friends in the region and we hope that things will happen, he added.

"And, if not, we will try. We will try to do something because we don't like to be left doing things in a better way."

Tiny Gulf state Qatar, which is home to just over 2.5 million people, was awarded the right to host the 2022 World Cup in a three-team tournament in 2010. Infantino acknowledged that to increase the number of teams in 2022 would require the cooperation of other countries in the region.

Qatar, however, has been in dispute with several neighbours since June last year with Saudi Arabia, Bahrain, the UAE and Egypt using diplomatic, transport and trade ties, accusing Doha of financing terrorism.

Infantino also reiterated his desire to expand the Club World Cup, the next edition of which will be played in the UAE in December, saying FIFA wanted to make it "a real competition."

"One of every club in the world can at least be in a position where we have global interest and everyone will benefit, not only from a financial point of view," he added.

Iran, Venezuela to be held in Qatar

TASNIM – A friendly match between Iran national football team with Venezuela will be held in Doha, Qatar. The team is ready to express that the exhibition match, which was originally scheduled to be held in Tehran’s Azadi Stadium, will be held in Doha, Venezuela on November 20.

The Venezuela football federation cancelled the warm-up in Tehran because six Venezuelan players are dual US citizen.

Team Meili will face the South American football team in Doha on November 20.

Iran national football team will face Trinidad and Tobago in Tehran five days earlier.

Carlos Queiroz’s men defeated Uzbekistan 1-0 in Sepembmer and beat Ecuador 2-0 in October to thanks to goals from Alireza Jahanbakhsh and Mehdi Torabi in Tehran. The Ignacio Amadeo Menini’s men are currently ranked 44th in the FIFA world rankings.

Moradi, Hashemi on top of the 96, 102kg world weightlifting championships

IRNA – The final list of weightlifters participating in 2018 World Championships was announced while Iran is participating with an eight-player competition, while Sohrab Moradi and Ali Hashemi are the top leaders in the 96 and 102kg categories respectively.

World Weightlifting Championships will be officially launched in Ashgabat, Turkmenistan, on Thursday with 274 men from 73 countries and in the women’s section there will be 283 athletes from 73 countries.

The competitions will be held for the first time in new weights; namely 55, 64, 67, 73, 81, 89, 96, 102, 109 and 125 kilograms.

Last night, with the announcement of the final list of weightlifters, eight Iranian weightlifters were announced while Mohammad Zarei, Alireza Soleimani and Hooman Younus Zadeh were on the list.

Accordingly, the Aref Khikhi is the only Iranian weightlifter in 86 kg. Seventeen weightlifters are in group A.

The names of Sohrab Moradi, Ali Hashemi, Reza Bazarzadeh and Mohammad Zarei are among the top three of their category.

Iran’s World Weightlifting team was the world championship for the first time in the United States last year. And the 2017 World Games in Ashgabat, Turkmenistan, will take place while the country’s Rashid Kazakh, Russia, Belarus, Azerbaijan and Kazakhstan will not participate after the one-year ban due to a doping along with North Korea. Therefore, at this year, and certainly the level of world championships will increase dramatically, and the national team will face a very difficult task.

Five foreign teams attend Mashhad Intl wrestling competitions

IRNA – The first international competition for Freestyle wrestling competitions is being held in Mashhad with the participation of five foreign teams in Shahid Beheshti Hall of Mashhad.

With the agreement of The World Wrestling Association, the international wrestling championship competition in memorial of the late Soeyed Jafar Mosavi was placed on the Association’s agenda and the first round of this tournament will be held in the juvenile category on Thursday and the second round on Friday.

The tournament was attended by 10 teams, including five foreign teams (four from Russia, Iran, Turkmenistan and Azerbaijan), and five domestic teams, including A and B teams of Iran national football team (3 teams) who will be held in Freestyle category.

Olympic referee Abdul-Kareem from India will also supervise the first round of the event along with four referees of the World Wrestling Association in these competitions. 

Soeyed Jafar Mosavi was the former head of the ad- justices’ Freestyle Team who died in December 2016 at the age of 60.

Kashima Antlers forward Leadaro fenced for Persepolis match

PLDC – Weverson Leandro Oliveira Moura, Brazilian striker for Kashima Antlers, will be fit for the match against Persepolis of Iran.

The Japanese team will face Persepolis on Saturday in the first leg of the AFC Champions League final.

**Four films from Iran among 100 greatest foreign-language movies**

**Teaser:** Przyram (2013) in the 21st best foreign-language film on the poll published on Tuesday.

"Przyram" (2013), "Where is the Friends Home?" (1997), "Is" (1989) and "Synopsis" (1978) are among the 100 greatest foreign-language films, a BBC poll showed.

"Przyram," an Oscar-winning drama "A Separation" (2011) is the 19th on the list.

The legendary Japanese filmmaker Akira Kurosawa’s "Seven Samurai" (1954) and "Bicycle Thieves" (1948) by Vittorio de Sica, a leader of the neorealist movement of Italian cinema (1945-1953) by director Yasujiro Ozu are in the second and third places.

"We asked critics to vote for their favorite movies made in the English language," BBC said.

This is a collection that includes those from countries and speaks a total of 41 languages — a range that acts overall from Japan and Chinese.

The 100 films are from 67 different countries and speak a total of 41 languages — a range that acts overall from Japan and Chinese.

"French rank claim to be the international language of the film and why they have the highest-rated films in the world," BBC acknowledged.

"It's a schedule that has been announced in collaboration with the Frank-furter Book Fair.

**Starting Block:** Tehran — Three German experts on culture and booksellers, the union announced on Tuesday.

The Book City Institute in Tehran hosted a conference on Saturday and Prachi Patel in April, 2018. The conference was organized in collaboration with the Sapienza University of Rome and the University of Bologna.

"My eyes are now wide open how her son rubbed his cold hands together on the wintry morning he left. The war goes on; the mother waits. She *> "A country like Iran with such a rich heritage, with such a rich cultural heritage, with such a rich intellectual heritage,*" West tweeted, "has no right to be in prison."
