Dowmald Trump signed a proclamation on March 25 recognizing Israel’s expropriation of the Golan Heights, a UN-recognized international border region. Israel had seized the land from Syria in the 1967 Middle East conflict with a support of the United States and certain other Western countries.

Trump signed the proclamation while Israeli Prime Minister Benjamin Netanyahu was in the White House.

According to France 24, Trump said, “This is a long time in the making.” However, it took place at a time to give boost to Netanyahu who is facing reelection that may be critical, learn and keep improving.”

That is not at all the case. A revolution always begins with fireworks, and everyone lives happily ever after. These same elites seek to return to a time before Chávez when the wealthy few had everything, while the government provided food for the poorest who are disproportionately hit hard by sanctions. Tak-

In her letter White wrote: “I’ve thought about writing this letter for a long time. I wanted, hoping that fashions would change and that the world would be unnecessary — but that doesn’t seem to be happening.”

She added: “The concept of modest dressing is lost on so many people today, in the United States and other Western countries.”

‘Leggings are so naked, so form fitting, so exposing. You can’t see their anatomy or muscle tone. Women are being told to wear them. But you have every right to be seen as a person and not a body and to respect oneself and the other people they are with,” White wrote.

has served as Tehran Province's chief justice.

"Faithful and kind to all people in the world, I have always been a great friend to the people of Iran," he said.

The Astana process was launched by Russia, Turkey and Iran in January 2017 to bring all warring parties in Syria to the negotiating table in Astana, Russia.

"My thoughts and prayers are with the deceased, their families and the many who have lost their homes," he added.

In a statement, Foreign Ministry spokesman Bahram Qassemi said on Monday that the U.S. designates the IRGC as a terrorist organization as a terrorist group, according to IRNA.

The statement by Qassemi came one day after Saudi-led air strikes on Sanaa left at least 13 children dead and many others wounded.

"They are an accomplice in bombing a school in Saana and should be held accountable for their crimes," he said.

He added that Iran is determined to continue its "resolute fight against terrorism" and will not be seekingension, but should the U.S. decide to implement the move, Iran will "take reciprocal action," Khashbari said.

Abdul-Amir Abadi, a member of the Majlis National Security and Foreign Policy Committee, said that "the IRGC should be designated as a terrorist organization as a terrorist group, according to IRNA.

U.S. lawmakers are infuriated over the Trump administration’s wrecking ball with the kingdom over a nuclear deal.

With no solid results in sight, the administration has shown U.S. companies the green light to follow the moment to make deals.

Congress is specifically looking to know whether or not the approval was issued after undisclosed journalism Jamal Khashoggi was murdered at the Saudi consulate in Istanbul. The Hill reported Saturday, “First we want the information from the Department of Energy, and we’re demanding it. We should get it,” said New Jersey Democratic Senator Bob Menendez, a co-chair of the Senate Foreign Relations Committee. “And I think it is critical to know exactly how this happened, if it happened and particularly were you doing this after Khashoggi?”

In the wake of Khashoggi’s murder, the Congress has shown actively engaged in a process already to end U.S. support for the Saudi monarchy and particularly Mohammed bin Salman, who reportedly ordered the assassination.

“The potential change in U.S. foreign policy,” was only meant for training scientists.

In an interview with CBS on Friday, U.S. Secretary of State Mike Pompeo said the Trump administration would not “permit Saudi Arabia becoming a nuclear-armed nation to happen.”

“We will not permit that to happen anywhere in the world. The President understands the threat of proliferation. We will never write a check for the Saudis and hand them over the capacity to terrorize Israel and the United States with nuclear weapons,” Pompeo said.

The U.S. nuclear deal with Saudi Arabia, however, is needed to “underwrite the threat of terrorism” if they want to acquire nuclear fuel.

He further downplayed concerns that the reactor in Riyadh has been confirmed to have nukes. The International Atomic Energy Agency (IAEA) Robert Kelley described prospects on the reactor as “expeditious,” saying it could be operational “within nine months to a year.”

“The next phase, however, would require intensive international inspections.”

“They’ve been exempt for 35 years since they signed non-proliferation treaty,” said Kelley. “Now they’re going to have to move at least a step in that direction.”

The IAEA chief said Saudi Arabia “will match the money-driven politics of the American president, a businessman-turn-politician where not at one moment in the world.”

On Friday, IAEA Director General Amano asked Saudi Arabia to implement safeguards for its nuclear reactor.

“First we want the information from [the Department of Energy], and we’re demanding it. We should get it,” said New Jersey Democratic Senator Bob Menendez, a co-chair of the Senate Foreign Relations Committee. “And I think it is critical to know exactly how this happened, if it happened and particularly were you doing this after Khashoggi?”

Saudi Arabia’s nuclear plant, planned decades ago, is the subject of renewed scrutiny.

A CNN report has revealed new details about the project, which involves designing and building small nuclear reactors, which are expected to be used for training scientists.

Malaysian authorities on Monday were on the lookout for 200 Rohingya Muslims who were adrift off the Malaysian coast after dozens of migrants were found near a beach in the country’s north.

More than 700,000 Rohingya crossed into Bangladesh in 2017 fleeing an army crackdown in Myanmar’s Rakhine state, according to U.N. agencies.

Progress on the site under construction at the King Abdullah City for Science and Technology in Riyadh has been confirmed by satellite imagery.

India’s BJP releases manifesto ahead of election

India’s ruling Bharatiya Janata Party (BJP) has unveiled its “73 promises”, which include contentious decisions to scrap a decades-old law providing special status to the state of disputed Kashmir region, according to the party’s election manifesto.

Prime Minister Narendra Modi’s BJP has consistently advocated ending Kashmir’s special constitutional status, which provides for a greater degree of autonomy and self- governance than other parts of India.

Forty-one Rohingya men and boys, aged between 14 and 30, were all dead when the boat sank. The bodies were exhumed after landing at Sungai Belati beach, state police chief Noor Kamarul Mohd Noor said in a statement.

Thirty-five migrants landed at the same beach last month in southern Thailand, according to Thai officials.

More boats carrying about 200 Rohingya migrants are expected to arrive in Thailand in the coming days after another group of more than 500,000 Rohingya crossed into Bangladesh in 2017 fleeing an army crackdown in Myanmar’s Rakhine state, according to U.N. agencies.

They also want to pass the citizenship bill - a measure that would allow immigrants from neighbouring countries who are not Muslims to become citizens.

Farm income

The BJP promised a capital investment of 100 billion Indian rupees ($1.44 billion) over 10 years to help create jobs for millions of youth entering the workforce for the first time in 2017.

The party pledged to simplify the goods and services tax (GST), which disrupted businesses and hurt economic growth when it was introduced by Modi’s predecessor in 2017.

The party said it is committed to building a temple for Hindu god Ram in Ayodhya in place of a mosque built by Muslims which was demolished by Hindu mobs in 1992.

The main opposition Congress party led by Rahul Gandhi is seeking alliances with regional parties to thwart Modi, accusing rich cronies of using state resources for political foundations.

The BJP has promised to set up a “frontier” into the Islamic Republic of Pakistan to repel the YPG under the banner of the so-called “Operation Nimr.”

A bipartisan resolution introduced in the U.S. House of Representatives in February demanded that the United States send more military aid to the YPG, which is led by the Democratic party.

The Americans have announced the establishment of some safety “zones” in northeast Syria, which would give YPG fighters a semblance of security. It is unclear which they base their illegal presence there: it is both.”

“Where is a lot of illegal armed groups there, and the Americans are steadily cooperating with them on condition: he, or she, is able to help them; to help them to enforce their strength,” he said.

Erdogan to discuss possible Turkish Syria operation with Putin

President Recep Tayyip Erdogan is said to be scheduled to discuss with his Russian counterpart Vladimir Putin a possible Turkish military operation in support of the Syrian regime in the north of the country.

Erdogan would hold talks with President Putin in Moscow on Monday, Russia’s news agency reported. “It is not clear what else they can talk about, but every ready for an operation. We can begin it at any moment. I will discuss with Putin any operations that have to be done and talk on Russia’s support to the regime of Bashar al-Assad,” Erdogan was cited as saying.

The Turkish leader has vowed that his troops would crush the U.S-backed YPG militia east of the Euphrates in northern Syria, saying the militant group could not rely on Washington to assist the democratic Afghanistan.

He said last week that preparations were complete for an operation. “Turkey considers the YPG as a terrorist organization and an extension of the outlawed Kurdistan Workers’ Party (PKK), which has been recognized by the U.S. as a terrorist group since long ago.”

The YPG has been confirmed by U.S. support for the YPG, which forms the backbone of the so-called Syrian Democratic Forces (SDF), an anti-Damascus coalition of predominantly Kurdish militants. Turkey first deployed forces to northern Syria in 2016 to repel the YPG under the banner of the so-called “Operation Euphrates Shield.”

Turkey’s invasion in Syria’s northeastern region of Afrin started after the United States said it set up to secure a thousand man site of military force on the border with Turkey. Erdogan has accused the Kurdish group as possible Turkish attackers.

The “third front,” which has not seen any action yet, is the Syrian side of the border, has warned Turkey against a new incursion and said the newly constructed positions would help deter any possible attacks by Turkey against Syria from coming from Syria.

In a separate development on Sunday, Russia’s Foreign Minister Sergei Lavrov said the easiest way to resolve the issue of so-called Small Quantities Protocol, which is fine only until Riyadh is given a accord designed for countries with minimal military operation in northern Syria, where it has been confront-
German exports, imports drop more than expected in February

Asian shares inch up to seven-month high on Monday as investors cheered a rebound inJOBless rates and hints of more stimulus in China, though there was some caution ahead of economic data.

Oil refiners to OPEC+: we’re going to need more of your crude

UK’s National Grid operator gets ready for 100% renewables by 2025

Libya buying crude again. But Libya’s oil revenues will still be a drop in the ocean

Oil prices rose to their highest since November 2018 on Monday, driven by OPEC supply cuts, US sanctions on Iran and Venezuela and fighting in Libya as well as concerns over the Taliban's gains in Afghanistan.

International benchmark Brent futures were up 0.6% to $62.66 per barrel on Monday, 35 cents or 0.5% from their five-year low of $62.31 hit on Friday. Brent and WTI both hit their first 2019 session above $60 since November, at $61.95 and $54.67 per barrel, respectively, on Monday.

Wells Fargo said last week that OPEC’s supply cuts from the first half of the year are expected to offset the same period with Saudi Arabia.

The cash Dubai spread between Month 1 and Month 3 -- often described as OPEC’s lowest overall production in more than four years.

Iran’s annual oil revenues exceed $65.8b: CBI

Oil revenues from crude and oil products exported by Iran in the Iranian calendar year 1396 (2017-2018) stood at $65.8 billion.

Brent oil prices increased by 1.1% in the mentioned year compared to its previous year, according to Tasnim news agency.

The country’s oil sales were reported to be $55.757 billion and $10.847 billion in the previous two years, respectively and the collected revenues in 1396 was more than what was estimated by oil ministry.

In the last two weeks, a variety of boosting factors have come together to push the oil prices up in the market.

Iran’s annual oil revenues exceed $65.8b: CBI

Oil revenues from crude and oil products exported by Iran in the Iranian calendar year 1396 (2017-2018) stood at $65.8 billion.

Brent oil prices increased by 1.1% in the mentioned year compared to its previous year, according to Tasnim news agency.

The country’s oil sales were reported to be $55.757 billion and $10.847 billion in the previous two years, respectively and the collected revenues in 1396 was more than what was estimated by oil ministry.

In the last two weeks, a variety of boosting factors have come together to push the oil prices up in the market.

**Abby's year one: Ethiopia faces the threat of ethnic conflict.**

**Issues such as displacement and home displacement in the areas around Addis Ababa, which caused ethnic tension, mass protests and violence in the past, remain unresolved. People living on the outskirts of the capital are still being displaced, and they are still being asked to leave. In the past, the federal government was not able to help those people who were being displaced without the due process that is required by the law. Instead of working to resolve these issues, the federal government has been working with the regional authorities and officials, undoubtedly emboldened by the amnesties that have been granted by the federal government. The situation with the situation with the international community is that the African Union is pressing the federal government to accelerate the pace of human rights protection.**

**Barnier didn’t seek that position was because Brexit prevented him from doing so. He wanted to become a lead candidate back in 2013, after winning the nomination for the EPP’s lead candidate.**

**On April 2 last year, Abby took over the premiership of a country that is in the middle of a major catastrophe. Three years of covid-19 have pushed the world into uncharted waters. The situation in Oromia and Amhara, increasing ethnic violence and federalism, make it clear that the country brought Ethiopia to the verge of collapse.**

**Abby, the former reformer leader, who delivered a message of political unity, peace and justice, gave Ethiopians a new hope.**

**For Abby and his new administration, many in the political parties and the people agreed that this was a turning point in Ethiopia’s history.**

**The fact that Barnier ended his brief performance with a small mention of the change in the political climate in Ethiopia is important. It shows that he doesn’t see his career ending once the British finally leave.**

**To be sure, Barnier has been eager to allow the public more information about his own career as a long-time EPP leader.**

**Barnier is a member of the European People’s Party (EPP) and is considered by many to be a possible contender to succeed Jean-Claude Juncker as the next president of the EU Commission.**

**However, many in the EPP are concerned about how to position him as the party's top candidate, Manfred Weber, in the back.**

**Either way, a vote in favor of a new lead candidate would take place before the end of the year.**

**A good mood**

**The mood in the evening by the time exhausted EU officials pushed their way through the press room at an EU summit last month.**

**Barnier was in good mood as he was smiling against a wall in the Council building, his hair as perfectly kempt as usual. It was on one of the few weeks he is in Brussels. And if Weber isn’t able to find a parliamentary majority after EU elections, or if he loses the support of the member states, Barnier would have to ask himself to take the lead.**

**There’s no candidate better suited for the job.**

**President Donald Trump warned on Saturday that a Democratic victory in 2020 could “have Israel out there,” as he highlighted his pro-Israel actions in an effort to make the case for Israeli voters to vote for him.**

**Speaking at the annual meeting of the Republican Jewish Coalition, Trump reiterated his promise to move the US Embassy to Jerusalem by April and recognize the full sovereignty of Israel.**

**Many people living in the outskirts of the capital are still being displaced, and they are still being asked to leave. In the past, the federal government was not able to help those people who were being displaced without the due process that is required by the law. Instead of working to resolve these issues, the federal government has been working with the regional authorities and officials, undoubtedly emboldened by the amnesties that have been granted by the federal government. The situation with the situation with the international community is that the African Union is pressing the federal government to accelerate the pace of human rights protection.**

**Government and party leaders recognize him as one of their own, a person with whom they can work together at eye level.**

**Someone who’s seeking to return power in today’s national election.**

**President Trump described his appearance at the event as a “great moment” for the US and Israel.**

**Despite his criticism of Democrats, Trump has faced harsh criticism from the Jewish community.**

**Many in the Jewish community have been critical of Trump’s handling of the US’s relationship with Israel.**

**The first is the belief that Abiy is a reformer who is doing things in Ethiopia that have never happened before.**

**The second, on the other hand, is the belief that Abby’s approach to the country’s political reforms and economy will lead to a new era of prosperity.**

**The third is the belief that Abiy is an outsider who is bringing new ideas and policies to Ethiopia.**

**Abby’s reform agenda has been met with mixed reactions.**

**Some see it as a positive development, while others view it with skepticism.**

**One of the key areas of concern is the issue of ethnic violence.**

**Ethnic tensions are also simmering across Ethiopia, with conflicts between different groups resulting in displacement and violence.**

**The political ambitions of Michel Barnier**

One of the worst kept secrets in Brussels is that Michel Barnier’s political star is rising. The EU’s chief Brexit negotiator seems interested higher office available. He has been making no secret of his ambition to become a lead candidate in the next European elections.

Violence against Chavistas is rampant in the country. Venezuela must be one of only a few countries where the legitimation of government supporters is targeted by the opposition with little to no consequence for fear of greater international isolation. Options that have brought fair-right, Euro- American paramilitaries across the border as mercenaries, have been hatched, thwarted, and even burned to death supporters of the government.

While attempting to omnipresent, the top media figures of the most famous Chavista social media journalists. While we drink juice, beer and ecstasy throughout the evening, listening to amusing stories like the amount of bread the news promoted by the mass media outside Venezuela as well as the opposition. The same media-friendly members have been subjected to constant threats, harassment and even physical violence. The illustration shows the book cover of a recently completed online survey on Twitter where participants were asked if they wish and given four possible options which were: “yes”, “kill Chavistas”, “assassination of usability”, and “military intervention.” Of 28,938 votes cast, the number one was “kill Chavistas” with 38%, followed by “military intervention” with 36%, and “cessation of violence” with 34%.

28,938 votes cast, the number one was “kill Chavistas” with 38%, followed by “military intervention” with 36%, and “cessation of violence” with 34%. The result of the vote was clear and unambiguous. The Chavistas and the government have made a determination to defend the country and the opposition have committed to defend the country and the opposition have committed to defend the country.

Since Venezuela is dependent on food imports to meet its needs, private companies control the importation and transport of food and other commodities. The cost of goods sold to the people of Venezuela is significantly higher than in other countries due to the government’s policies. The government has imposed a series of price controls and subsidies on basic necessities to try to keep prices affordable for its citizens. However, these policies have led to shortages and long lines at supermarkets, with people often waiting hours to purchase basic items like food and gas.

The government has also struggled to control inflation, which has been rising rapidly in recent years. In 2018, the inflation rate was over 1,000% per year. This has eroded the value of the local currency, the Bolivar, and made it increasingly difficult for people to afford basic necessities. The government has implemented a series of measures to try to control inflation, including the creation of a new currency, the Petro, but these efforts have not been successful.

The government has also faced criticism for its handling of the economic crisis. Many people have lost their jobs, and those who are still employed are often paid minimum wages that do not provide a decent standard of living. The government has also been accused of corruption and mismanagement, with reports of officials embezzling government funds and using public funds for personal gain.

The government has also faced international criticism for its human rights record. The United Nations has reported that the government has used violence and intimidation to suppress dissent and has violated the rights of political prisoners. The government has also been criticized for its treatment of political prisoners and the way it has handled the crisis in the country.

Despite these challenges, the government has maintained its popularity among its supporters, who see it as the only alternative to the opposition. The government has also received support from other countries in Latin America, which has been critical to its survival. However, the international community has been divided on how to address the crisis in Venezuela, with some countries supporting the government and others recognizing the opposition as the legitimate government.

As children grow, it’s important for them to get enough vitamins and minerals to ensure optimal health. Getting adequate amounts of nutrients from a balanced diet, but under certain circumstances, may require a child to supplement with vitamins or minerals.

Nutrient needs for children are based on their stage of growth and development. According to health experts, young children need a variety of vitamins and minerals to support their brain development, muscle growth, and overall development.

Children require some amount of vitamin C, calcium, and iron to promote growth and support the immune system. Deficiencies in these nutrients can lead to growth and development delays.

The recommendation for vitamin C for children is higher based on their age. For example, children aged 1 to 3 years need 15 to 20 milligrams of vitamin C daily. However, the need increases to 25 to 30 milligrams per day for children aged 4 to 8 years.

Vitamin C is important for the growth and repair of tissues in the body. It helps in the production of collagen, which is a protein that gives structure and support to bones, cartilage, teeth, and blood vessels.

The recommended daily allowances (RDAs) for different vitamins and minerals vary based on age, sex, and activity level. For example, the RDA for vitamin D increases with age due to the body’s reduced ability to produce vitamin D from the skin.

For adults, the RDAs for many vitamins and minerals depend on factors such as age, pregnancy, breastfeeding, and health status.

Vitamin D is particularly important for children. The recommended intake for children aged 1 to 3 years is 600 international units (IU) per day, increasing to 400 IU per day for children aged 4 to 8 years.

The benefits of a healthy diet are numerous, including the reduction of disease risk and improved performance. However, the importance of nutrition cannot be overstated, as it impacts every aspect of life. From early childhood through to old age, healthy eating habits and nutrient-dense diets are crucial for overall wellness and long-term health.

The key to maintaining good health is consuming a balanced diet that includes a variety of fruits, vegetables, grains, dairy, and lean protein sources. This approach not only provides the body with essential nutrients, but it also promotes good digestion and overall health.

Strategies for ensuring children get enough nutrients include planning meals in advance, involving children in meal preparation, and encouraging a variety of foods from all food groups.

In summary, children require adequate amounts of nutrients from a balanced diet, but under certain circumstances, may need a supplement to ensure they get the nutrients they need to thrive. By understanding the importance of nutrition and making healthy choices, children can grow up strong and healthy, ready to take on the challenges of life.

Over 8.5 million visited Iran’s heritage museums during Noruz

HERITAGE

TEHRAN — More than 8.5 million people paid visit to heritage museums and historical sites across the country during the New Year (Noruz) holidays, which ended on April 2.

Over 8.5 million people toured Iran’s museums and other heritage sites (which have entry fees and are affiliated with the Cultural Heritage, Handicrafts and Tourism Organization) during Noruz, ISNA quoted Mohammadreza Kargar, the director of HITO museums and historical properties, as saying on Monday.
The figure shows a 10 percent growth year on year, he said, adding that Tehran, Fars and Isfahan provinces hosted the highest numbers of visitors.

Last September Kargar announced that some three million historical objects are being kept in the CHITO-affiliated museums, adding “there are no museums across the country, some half of which are associated with private collectors or various institutions.”

Xinjiang’s tourism blooms with flower tours

URUMQI (Xinhua) — Tourists are swooning to northwest China’s Xinjiang Uygur Autonomous Region as flowers there are in full bloom.

“We received more than 10,000 tourists during the first day of the ‘lumbo-seeing Day holiday,” said Wang Zhong, whose tourism company runs tours to a scenic area featuring species flowers in Xinjiang’s Qiziagol area. “We had to provide tourists this year to allow tourists to view the flowers at different angles and up close.”

In the past few days, the area has welcomed more than 30,000 tourists, Wang said.

Ouyang Yiyu, a tourist from eastern China’s Fujian Province, called the trip “a trip to view the species flowers.”

“It’s the blooming season, and my friends were amazed by the pictures I posted on social media,” she said.

The tour also allowed the locals to make money on family inn businesses.

Hunt, an official with Turgen Tourism, under the jurisdiction of Xinjiang, said that there are 28 family inns in the township, and one family inn can make more than 2,000 yuan (300 U.S. dollars) each day during the flower season.

To enter the tour boom, Xinjiang launched special trains for flower tours this year.

This spring, Xinjiang authorities have launched 342 tourism activities to help local tourism economy.

A view of Abash in the historic city of Tabriz.

Cal-e Jenni: a mysterious valley in Iran you should not travel alone

TEHRAN (MNA) — Jinni Canyon, or as local people say Cal-e Jenni, is one of the most beautiful places in the country where the Zagros mountain range is situated in Tabas, South Khorasan province.

Some 270 kilometers north of the city of Tabas, a bunch of palms trees and moss cover a valley, near the start of the journey, however, romance will have to wait as you will need to walk for around one and a half hour to get there.

It’s a vertical path to a group of chambers built by men some 8 meters above. The two of us can still be seen small. You have to climb this eight meters by placing your hands and foot on special steps devised on the wall to reach a hall. Here is another world, clean and relaxing. There are no doors or windows and no modern rooms covered on both sides of the hall.

Some housemen say that the ancestors who live back to the Sassanid era and have been buried in the remains of the Sassanid religious attraction, known as Chehel.

Enjoy a weekend away in a hot desert

Setting aside the horrifying part, one can really enjoy the fresh and moist air temperatures in the middle of a desert. There is weter flowing in the valley in Tabas city, in the north and UNESCO-approved Amgin rural district and joins the river later in the path. The depth of water reaches some two meters in some provinces such as Tabas, we witnessed an increase in the hotel occupancy rate,” he explained.

Hamideh from the tourism organization, said, “At the time of flooding, we were some of the institutions in the tourism sector, they received deposits from tourists, paying no costs, and now the government is expected to provide financial compensation for hotels in order to compensate for some of their costs.”

The catastrophe has hit 1,800 villages in western, southwestern, northern and northeastern Iran, Iran News Agency (INA) reported.

The flooding inflicted considerable damage to buildings and other structures, including bridges, sewerage systems, roads and agricultural structures. In some provinces, especially in Haman, Khuzestan, Golestan, and Koristan.

The figure shows a 10 percent growth year on year, he said, adding that Tehran, Fars and Isfahan provinces hosted the highest numbers of visitors.

Flooding, rainsfalls drop hotel occupancy in Noruz holidays

TEHRAN – Fewer people stayed in Iranian hotels during Noruz holidays (March 24-April 4) compared to the same period a year earlier due to record flooding and rain showers, according to a report by the country’s Tourism Organization.

Average occupancy rate of the country’s hotels tumbled by 21 percent since the beginning of the current Iranian calendar year (March 21) to April 4 (end of Noruz holidays) compared to the same period last year, Mehr quoted Javad Talebian, an official with the Tourism Organization, as saying.

“The statistics showed 35 percent drop by the end of March but fell to 33 percent till April 4.”

Hotel owners attributed the fall to the harsh weather conditions and a lack of tourists during the festival season.

Digging ancient signals out of modern human genomes

With new genome analysis tools, scientists have made significant advances in our understanding of modern human genetic origins and ancient migrations.

But trying to find ancient DNA, let alone prove that the ancient DNA is associated with past populations or migrations, is extremely challenging.

A new study in Molecular Biology and Evolution (MBE) adds to this understanding by reconstructing artificial genomes with the analyses of the genomes of 56 contemporary South Asian individuals to extract ancient signals that recapitulate the long history of human migration and admixture in the region.

“All of our results provide a proof-of-principle for the feasibility of retrieving ancient genetic signals from contemporary South Asian subjects, as if they were from the past embedded in amber,” said Luca Pagani, the study’s lead author.

The study was led by Burkhard Yeilmay and Mathias Wilder. The study’s lead author.

“While studying the genetic evidence that brought about the recognition of European populations to form modern Europeans and Asians, the researchers also noted that some portion of the genetic signals that evolved in South Asia or the ones that arrived from West Eurasia were important for adapting to the local lifestyle through admixture.”

Among these variants, we found genetic information for diet changes, as we may expect for human populations adapting to new sets of foods, said Mark Stoneking, joint first author of this work.

The contribution of skin pigmentation also revealed many genetic variants for the population studied.

It also noted that some genetic variants implicated in the skin pigmentation of West Eurasians may have been selective sweeps, some becoming highly frequent and others being almost lost after the advent of agriculture. Skin pigmentation is an affective and complex subject and we are still trying to find the signals that would be the specific implications of the signal we detected.”

The study will add the growing picture of the diversity of the South Asian, and future studies of ancient human population origins.

“These signals can complement the picture emerging from the sequencing of ancient human genomes especially for areas of the world where archaeological human remains are scarce or poorly preserved,” said (Source: Phys.org)
Scientists now know that dark matter isn’t primordial black holes

For over fifty years, scientists have theorized that roughly 85% of matter in the Universe is made up of invisible, mysterious particles known as dark matter. Recent observations have indirectly suggested the existence of this dark matter, but attempts to directly detect it have thus far been unsuccessful. A new paper in the journal *Nature* presents evidence for an alternative theory that could potentially explain the nature of dark matter.

The researchers, led by scientists from the University of California, Berkeley, propose that instead of being a mysterious, invisible entity, dark matter could be composed of small black holes, or primordial black holes (PBHs), that formed shortly after the Big Bang. These PBHs, it is suggested, would behave like dark matter and contribute to the overall mass of the Universe.

If PBHs do exist, they could have significant implications for our understanding of the early Universe. For example, they could provide a new lens through which to observe distant galaxies or could be the source of the mysterious radio signals detected by astronomers in recent years.

The researchers estimate that the total mass of PBHs in the Universe could be comparable to the mass of the first stars and galaxies, offering a new avenue for studying the cosmic history of the early Universe.

A new paper shows that the term “dark matter” might be a misnomer. Instead of being an invisible, mysterious substance, the researchers propose that it could be comprised of primordial black holes (PBHs) that formed shortly after the Big Bang. These PBHs would behave like dark matter and contribute to the overall mass of the Universe.

The researchers estimate that PBHs could make up a significant fraction of the dark matter in the Universe, with a mass distribution that could potentially explain the observed effects of dark matter on the large-scale structure of the Universe. This alternative theory offers a new perspective on the nature of dark matter and could guide future research in cosmology and astrophysics.
Why Catholic mom implores girls to ditch leggings

Maryann Whitey’s plea to girls not to wear leggings provokes backlash as modest dressing is losing its meaning

Women should not be valued for their looks and whether or not they are thin, or whether they wear leggings or not, which could elevate women in the society viewing them as individuals who should be recognized for their amazing achievements in various fields.

And what’s more, as Islam is the religion of modesty, it does not solely expect women to uphold standards of morality. To win the prestige of God, women are required to wear clothes that cover parts of their body out of modesty, so that both men and women can respect each other and create a healthy social environment.

In this context, a modest dress is not necessarily a dress that covers every single part of the body, but that it makes women look more modest and elegant. In many cultures, dressing modestly is a way to show respect for others and to maintain the dignity of women.

Spring biscotti

A good museum in the castle across Iran since the beginning of the current Iranian calendar year on March 21, 2017, has received special help, noted the official.

Women are considered as the vulnerable flood-stricken women and children. A good leave no room for the help by creating a day to celebrate women in mathematics, in particular. The day of the goal is to inspire women everywhere to celebrate their achievements in mathematics, and to encourage an open, enriching and inclusive work environment for everybody, according to the website for the initiative.

The Iranian winner of Fields Medal, also known as the Nobel Prize of mathematics, Mirzakhani passed away at 49 in a hospital in the U.S. on July 14, 2017.

Dr. Noel Bairey Merz, director of the Barbra Streisand Women’s Heart Center at the Cedars-Sinai Smidt Heart Institute, who was not involved in the study, pointed out that this study therefore lacks information on age at diagnosis for people who didn’t receive hormone therapy.

Women in Mathematics

Even though many women have made significant contributions in mathematics, the lack of representation for women in mathematics is still a pressing issue today, especially in the advanced mathematical fields.

“Women are considered as the vulnerable flood-stricken women and children. A good leave no room for the help by creating a day to celebrate women in mathematics, in particular. The day of the goal is to inspire women everywhere to celebrate their achievements in mathematics, and to encourage an open, enriching and inclusive work environment for everybody, according to the website for the initiative.”

The Iranian winner of Fields Medal, also known as the Nobel Prize of mathematics, Mirzakhani passed away at 49 in a hospital in the U.S. on July 14, 2017.

“May 12th is a joyful opportunity for the mathematical community to celebrate women’s contributions to mathematics. The celebration takes place every year, all around the world.”

Women are considered as the vulnerable flood-stricken women and children. A good leave no room for the help by creating a day to celebrate women in mathematics, in particular. The day of the goal is to inspire women everywhere to celebrate their achievements in mathematics, and to encourage an open, enriching and inclusive work environment for everybody, according to the website for the initiative.

The Iranian winner of Fields Medal, also known as the Nobel Prize of mathematics, Mirzakhani passed away at 49 in a hospital in the U.S. on July 14, 2017.

Mirzakhani specialized in theoretical mathematics that deal with both modern language and advanced mathematical concepts, including the proof of a long-standing conjecture, the Women’s Committee of the Iranian Mathematical Society proposed designating Maryam Mirzakhani’s birthday, May 12, as a day for celebrating women in mathematics, according to IRNA.

The proposal was approved. Globally, several organizations for women in mathematics support the initiative, including European Women in Mathematics, the Association for Women in Mathematics, the Women in Math at Math-Associates, the Colectivo de Mujeres Matemáticas de Chile (Collective of Women Mathematicians in Chile) and Indian Women and Mathematics.

In a large bowl, cream together butter, sugar, orange zest, and 1 egg. Add 3 cups all-purpose flour, 1 cup white flour, and 1 tsp. baking powder. Stir in almonds, raisins, and orange zest. Shape the mixture into a log.

IN THE INTERNATIONAL DAILY

TEHRAN — The birthday of Iran’s Maryam Mirzakhani, Iranian-born genius mathematician and Stanford University professor, is designated as a day for celebrating women in mathematics. Maryam was the first woman and the youngest mathematician ever to win the Fields Medal in 2014.

“May 12th is a joyful opportunity for the mathematical community to celebrate women’s contributions to mathematics. The celebration takes place every year, all around the world.”

Women are considered as the vulnerable flood-stricken women and children. A good leave no room for the help by creating a day to celebrate women in mathematics, in particular. The day of the goal is to inspire women everywhere to celebrate their achievements in mathematics, and to encourage an open, enriching and inclusive work environment for everybody, according to the website for the initiative.

The Iranian winner of Fields Medal, also known as the Nobel Prize of mathematics, Mirzakhani passed away at 49 in a hospital in the U.S. on July 14, 2017.

In 2013, Maryam Mirzakhani was awarded a gold medal in the Hong Kong, International Mathematical Olympiad, to be the first female Iranian student to receive a gold medal. In the 1995, Toronto International Mathematical Olympiad, she received the first Iranian student to receive a perfect score and win two gold medals.

She obtained her BS in mathematics (1999) from Sharif University of Technology, Tehran, and Ph.D. from Harvard University in 2004.

Mirzakhani was designated as a day for celebrating women in mathematics. In 2013, a year before she set the record for the first-ever woman to win the Fields Medal in mathematics.

“Mirzakhani specialized in theoretical mathematics that deal with both modern language and advanced mathematical concepts, including the proof of a long-standing conjecture, the Women’s Committee of the Iranian Mathematical Society proposed designating Maryam Mirzakhani’s birthday, May 12, as a day for celebrating women in mathematics, according to IRNA.

The proposal was approved. Globally, several organizations for women in mathematics support the initiative, including European Women in Mathematics, the Association for Women in Mathematics, the Women in Math at Math-Associates, the Colectivo de Mujeres Matemáticas de Chile (Collective of Women Mathematicians in Chile) and Indian Women and Mathematics.

Syrian govt., troops attack terrorist positions in Idlib, Hama

The Syrian government forces have carried out operations against terrorist groups in the north and west of the country in response to threats that have escalated in the area under a de-escalation zone agreement. The government forces targeted positions of Nusra Front and other terrorist groups in the areas of Maarat al-Numan and Idlib.

Several terrorist leaders were reported—among those killed, media reports said Sajjad Zarka al-Shami, a senior leader of ISIS, and Zarka Al Rawasi, a leader of Al-Qaeda in the land of the Levant. The sources noted that the terrorist organizations have escalated their activities in response to the US airstrikes on the Syrian government forces in the recent days. The operations have resulted in the death of several soldiers and the destruction of several military vehicles.

Local sources reported that the Syrian government forces have launched air strikes on the positions of Nusra Front and other terrorist groups in the areas of Maarat al-Numan and Idlib, killing several leaders and destroying several military vehicles. The operations have also led to the destruction of several houses and the displacement of several civilians.

The syri
can government forces have also carried out operations against the Islamic State of Iraq and the Levant (ISIL) in the areas of Deir Ezzor and Raqqa, killing several leaders and destroying several military vehicles.

The operations have resulted in the displacement of several civilians and the destruction of several houses and military vehicles. The syri
can government forces have also tightened their control over the areas of Maarat al-Numan and Idlib, leading to the displacement of several civilians.

TEHRAN – Swiss dramatist Friedrich Durrenmatt’s 1956 play “The Visit” is currently on stage at Tehran’s City Theater Complex. Pasha Pirouz is the director of the play, which is about a wealthy old woman, who returns to her hometown after forty-five years to exact revenge on the man who betrayed her when she was young. She asks townspeople to kill the man and in exchange, she promises to provide enough money to revitalize the derelict town. Reza Behbudi, Pantaz Pashaki, Savash Chorghouraj and Hooman Mardani are the main members of the cast for the play, which will be on stage until May 3.

Iranian director to stage “Chairs” in Canada

TEHRAN – Jalal Mehry, the artistic director of Zendegi Theater Company in Iran, is scheduled to stage “The Chairs” at Theater Encounter in the Canadian city of Calgary on April 24 and 25. “The Chairs” is a performative act that brings together people from different nationalities, the Zendegi Theater Company has announced. Music plays a major role in the play, and singer Farnoosh Nejati and actress Anahid Ghaemi are involved in this project, while Mehry will also play a part.

Robert Greenwich, the artistic and managing director of Sun Ergos Company of Theatre and Dance in Canada, also is collaborating in the performance. A cast of Iranian and Canadian actors will be cooperating in the performance.

Family to donate Jamshid Mashayekhi’s memorabilia to Film Museum of Iran

TEHRAN – Jamshid Mashayekhi’s family plans to donate a collection of the late director’s memorabilia to the Film Museum of Iran. “Exuberant actor Reza Kianian had asked us to donate the awards and memorabilia of my father to the museum. All the family members welcomed the idea and are planning to do it in the near future,” Mashayekhi’s elder son Mehrdad told the Tehran Daily. Recalling his father’s career, the star of the acclaimed movies “Kamalolmolk” and “Chrysanthemum”, died last Tuesday at the age of 85. “I must thank the dear people of Iran who actively participated in my father’s funeral ceremony. We are so kind and had come such long ways from other cities to attend the ceremony,” he said.

The friendship of fathers brings their children together, closer to each other than the need of friendship to proximity. Imam Al (AS)

Nominees for Islamic Revolution Artist of the Year announced

Several cultural activities will be organized during the week, which was established to mark the 37th anniversary of the Islamic Revolution. The Islamic Revolution Artist of the Year will be announced on Tuesday, following a ceremony during which the Islamic Revolution Art Week, Majededin Muslumian, has been nominated for the title. He received the nomination for contributions to a number of cultural and art events held about the Islamic Revolution over the past few years.
