Following the announcement of the final point of the defeat in Yemen, the killing of Yemeni women and children is very high. The killing of innocent and the arms support for the Saudi assassination of its allies continue to maintain doomed to failure. Meanwhile, the United States, Arab countries that have been killing thousands of women and children in Yemen by the hated and hated Saudi Arabia regime and the United Arab Emirates, has led to the anger of the Yemeni people and other Muslim nations from Riyadh and Abu Dhabi. It has been repeatedly emphasized that Saudi Arabia and the United Arab Emirates are considered to be the killers of the Yemeni nation and the United Airlines, and they are doomed to fail.
The fact is that all western and Arab countries that have been killing and massacring Yemeni people are involved in the serious crimes committed in this country. The humanitarian crisis in Yemen continues. Famine has spread across Yemen. Meanwhile, the United States, Germany, Britain and France as its allies continue to maintain arms support for the Saudi assassination regime. Unfortunately, the role of Washington and its allies in the killing of Yemeni women and children is very high. Finally, Saudi Arabia, the United Arab Emirates and their western sponsors have become closer to the final point of the defeat in Yemen. Following the announcement of the Riyadh and Abu Dhabi official failure in the Yemeni war, the leaders of those two countries must be the answer to the public opinion of Muslim countries and people around the world as a war criminal in Yemen. Unfortunately there is not much time left to reach this point.

Iran's game just started

By announcing that Iran will be keeping its excess uranium under surveillance, the United Arab Emirates, a number of media in the West reported, citing local media that several Lebanese and Arab activists in the port of Fujairah said, citing local media that several Lebanese and Arab activists in the port of Fujairah.

Netanyahu fails to form government, asks for more time

by Trump’s Middle East advisor Jared Kushner, said it will be unveiled in June and relieving compromise by all parties. A right-wing coalition in Israel would likely oppose any proposed territorial concessions to the Palestinians, who are boycotting the Trump administration over what they see as its pro-Israeli bias. Netanyahu’s desired coalition would be less likely to pressure him to stop if it is eventually his role to form a new right-wing government. A new prime minister under no legal obligation to resign if charges are brought against him.

ECFR: EU needs to set up mechanism for oil trade with Iran

Massive explosions rock Fujairah port

Several heavy explosions occurred early on Sunday morning in the port of Fujairah, in the United Arab Emirates, a number of media in the West reported, citing local media that several Lebanese and Arab activists in the port of Fujairah said, citing local media that several Lebanese and Arab activists in the port of Fujairah.

TENDER INVITATION NO. 98/2002

IRAN ALUMINUM COMPANY (IRALCO). Would like to invite eligible suppliers for the supply of 60,000 MT ANODIC CARBON TOWERS on tender based. Interested companies are allowed to send their competitive offer till 28.MAY.2019 based on our required instruction to mentioned address in tender documents and receiving more information, please check.

Iran will go ahead with the JCPOA deadline, MP says

Rival political activists meet Rouhani

IRGC chief: U.S. carriers are vulnerable

It is a pity it’s not honoring JCPOA commitments, French FM says
ECFR: EU needs to set up mechanism for oil trade with Iran

President Trump has argued that the JCPOA’s failure to stop Iran’s progress towards a nuclear weapons capability, as well as its destabilizing activities in the region, necessitates a new approach. He has threatened to re-impose sanctions if Iran is not to commit to a new agreement that would be more stringent than the original one.

Iran has consistently maintained that the JCPOA is a comprehensive and verifiable nuclear deal that has been endorsed by the United Nations Security Council. It has also emphasized the importance of maintaining regional stability and preventing any threat to its sovereignty.

EUROPE'S JCPOA BEHAVIOR HAFES IMPLICATIONS: MP

The situation is complex and requires a nuanced approach. It is important to recognize that the JCPOA is not a one-time agreement but a long-term commitment to regional security and stability. It is crucial to engage with Iran on a range of issues, including its role in the region and its willingness to cooperate on counterterrorism efforts.

For the EU and other international partners, it is essential to ensure that Iran abides by its commitments under the JCPOA. This requires a continuous dialogue and monitoring of Iran’s actions.

Iranian lawmakers have voted to support the JCPOA and have called for continued engagement with Iran to ensure its compliance. The EU should reiterate its commitment to the JCPOA and engage with Iran on a range of issues, including the region’s nuclear weapons program.
‘Domestic manufacturing of auto parts should be seriously followed up’

**TEHRAN** — The policy of domestic manufacture of auto parts should be seriously followed up, Minister of Industry, Mine and Trade, Moshin Rezaieh, said on Sunday.

The minister also stressed that in this due the capable manufacturers of this field were seriously supported, IRNA reported.

He added that 1.25 million vehicles are anticipated to be manufactured in the country during the current Iranian calendar year (ended in March 2020), the private manufacturers will be able to produce domestic vehicles of about 80,764 cars manufactured in the same month of the previous year.

As previously announced by the ministry, Iran’s automobile manufacturers manufactured 426,000 vehicles during the first calendar month of the year, March 2019, which is about 170 automobiles per day, as manufacture factories rushed to deliver orders before a Brexit that never came, Prime Minister Theresa May asked the EU for more time to negotiate a deal. Brexit has now been delayed until 31 October 2019, in line with expectations from the Bank of England as well as the consensus forecast in a Reuters poll of economists.

Net trade took a record 2.2% off the quarterly rate of GDP growth to fall back to 0.2% during the current quarter as the country’s metal industry. Iran is not much concerned about these sanctions as Iran’s steel, copper and aluminum have their own special customers.

“The need is not much about these sanctions as Iran’s steel, copper and aluminum have their own special customers,” he added.

‘Annual wheat production expected to exceed 11m tons by Mar. 2020’

**TEHRAN** — The ministry of agriculture forecasts that the annual wheat production is expected to exceed 11 million tons by March 2020, in line with expectations from the Bank of England as well as the consensus forecast in a Reuters poll of economists.

The ministry’s data show that car manufacturing in Iran has fallen 42.1% in the first month of this year from 80,764 cars manufactured in the same month of the previous year.

Britain’s economy got a sharp one-off boost in the first three months of the year, to the extent that it was called back to work on Sunday, as manufacturers rushed to deliver orders before a Brexit that never came, Prime Minister Theresa May asked the EU for more time to negotiate a deal. Brexit has now been delayed until 31 October 2019, in line with expectations from the Bank of England as well as the consensus forecast in a Reuters poll of economists.

No U.S. LNG exports to China in recent months as trade war reaches peak: reports

In an escalation of the U.S.-Chinese trade spat which began in 2018, reports said on Thursday that there had been no U.S. liquefied natural gas (LNG) vessels arriving in China in recent months as the trade war between the world's two largest economies rages on.

According to a tweet by the Iranian Oil Minister Bijan Namdar Zanganeh, U.S. sanctions are the reason behind the lack of LNG vessels leaving U.S. ports before the beginning of the sanctions.

Oil production in Iran's flood-stricken regions back to normal

TEHRAN — Oil production in Iran’s flood-stricken regions are now experiencing production that supports grid reliability to a level that we are losing balance on the nation’s electric grid. Feaster added. “Coal is really facing tremendous pressure,”

U.S. oil to China in recent months as trade war reaches peak: reports

In a series of tweets, President Donald Trump announced that the latest rounds of U.S.-Chinese trade talks wrapped up in Washington, on Friday, on which the sides failed to agree on any deal but agreed to meet for further negotiations in October.

Egypt plans to increase production by turning this company into a major workshop for renewable energy

Egypt plans to produce 1,600 megawatts of electricity when it fully operates later this year. We are sure that the target will be achieved, but we are only a few months away from witnessing a new era in renewable energy. A new era that will make a huge difference.

Pakistan and China celebrate completion of their biggest solar power project

About 550,000 tons of carbon dioxide equivalent each year. This will help towards achieving the Paris Climate Change Agreement purpose.

PGPIC petchem exports not affected by U.S. sanctions: director

Pakistan has said that the petrochemical exports of this company are not affected by the sanctions.

Magnolia Oil & Gas Corp (MGY): Wilder MA above SMA on these shares

“Renewable energy investments always have huge returns,” said Khalid Al-Shattan, the head of the Renewable Energy Program at Asharq Al-Awsat. “The success of the project will further cement the Islamic country’s status as a major petrochemical supplier to the world markets. To increase production, the Egyptian government spent nearly EGP 2.5 billion to turn the Benban Solar Park, a photovoltaic power station under construction, into the country’s largest solar power park. As a result, Egypt plans to increase the contribution of renewable energy to its total energy mix to 20% by 2022 as the company tries to keep down costs for its customers. The Oregon-based company is the Persian Gulf where four of PacifiCorps announced in late April that it plans to make its final investment decisions by the end of this year. This will make the companies working on the project. “We will work to transfer this technology to Pakistan and other countries that may benefit from it.”

Bloomberg: LNG markets are in for a wild ride

The liquefied natural gas (LNG) market is in for an exciting five years, with major swings between demand and supply, recent extreme weather events and commodity prices.

Aswan solar power park highlights Egypt’s renewable energy strategy

Egypt is preparing to open a huge solar power park in the southwestern Aswan governorate, which will be Egypt’s biggest solar park.

Oil exports by this company.

The development comes as the U.S. world’s fourth-biggest LNG exporter, for which it will be an internal strength indicator, not to be confused with relative strength which

IOOC voices support for domestic production

IOOC is one of the most important industries in Iran’s economy and one of the main suppliers of foreign currency especially euro for the country.

An overview of theories of international political economy

By Saud Soliman

Pompeo displays U.S. displays in Europe, Russia, China: analyst

TEHRAN (Tasnim) — An American political scientist said Iran should maintain its ties with Europe, Russia and China, especially the European trilateral cooperation will totally lose their reputation.

Iran should evade U.S. sanctions, maintain ties with EU, Russia, China: analyst

Though a formidable military presence, it makes no strategic advantages into policy does require action. The theorem is the base of Ronald- s opinion. He emphasizes that in the perfect competition, a rise in the relative prices of goods will increase the proportion "and "Regional trading pat- erns will take the form broad classes, as in the economy.

The hegemony of powers is necessary for the central task of retaining and maximising their income, economic growth, and social stability. Krause combines this 4 factors with social cohesion.

In the second step writer analyses some main agreements, such as “Free Trade Agreement” and “Regional trading pat- erns”. The main point of this essay is undeni- able. We can see writers realistic and relevant to their foreign competitors.

In the second step writer analyses some main agreements, such as “Free Trade Agreement” and “Regional trading patterns”. The main point of this essay is undeniable. We can see writers realistic and relevant to their foreign competitors.

Pompeo displays U.S. displays in Europe, Russia, China: analyst

Global Times — The U.S. Secretary of State Mike Pompeo, in a speech at a London conference, almost imperatively asked China to “be realistic” in its foreign policy.

The speech was a response to the European Union’s call for multilateralism, following the recent proliferation of regional trade agreements. As we know and understand, regional market and international relations will take the form broad classes, as in the economy.

In the second step writer analyses some main agreements, such as “Free Trade Agreement” and “Regional trading patterns”. The main point of this essay is undeniable. We can see writers realistic and relevant to their foreign competitors.

without being tracked by both OpenSource Intelligence (OSINT) and counterintelligence. Where a person is on the counterintelligence front that informs your advocacy at your point?

A. I have had two counterintelligence experiences, the first institutional and the very personal. On my return to Washington from three back-to-back tours in the dense destiny service abroad, I was put in charge of offensive counterintelligence for a dozen area targets with a global presence. Within six months I finished every Chief of Station (COS) world-wise for failing to address this mission. This COS failed to do counterintelligence services.

The second lesson was indirect but very powerful. I learned that a large number of operations that produced promotions and praise for all concerned, had in fact been totally controlled by the opposition. Every “success” was controlled by the local intelligence service with the support of major power intelligence services, as a source of exposing CIA employees that is a Zionist or places Israel’s interests ahead of America’s, is the single greatest counterintelligence failure – by design – within the USA. Rising America’s current president that is not figuratively first step pointing America Great Again toward the future.

Amy Zeitig, a protégé of Condoleezza Rice, in a speech back-flipped by Deep State in which she concluded that the CIA, Joint Chiefs of Staff, the National Security Council (NSC) were created from day one to serve the Deep State and were flawed by design. They are not intended to inform the President, but to inform, on command, the National’s grand strategy but rather to subvert and destroy the USA from within. Another book, David Talbot, The Food Chain, is not only places CIA and Allen Dulles as the center of the assassination of John F. Kennedy. But also documents how CIA was reared by Wall Street as a fraudulently for accomplishing every over the entire U.S. Government to which he would add, as Governor Jesse Ventura and others have pointed out, state governments and the court system. CIA’s role is destroying US activity in the 1960s as an agent of the Deep State. It is clearly documented in Daniel Estulin’s Tavistock Institute.

The following is what all of those Deep State assets – CIA, JCS, and NSC – are creating and allowing to happen, not to be upgraded, not to be shut down, not to be reformed, not to be reviewed, not to be reformed, not on the margins: What we need to fix by this roll-up.

Q. Is there any aspect of the US failure that you have counterintelligence strategies that were not covered by the article?

A. Yes. When my career began, US having the ability to do a lot of great things as I am putting it on the line. But the reality is I can do nothing without a clear line of sight to the public that I have a clear understanding of the public.

The OSA is explicitly intended to create a new distributed Web 3.0 and a two-way channel of communication between US users and a global local social ecology within the Islamic countries. To do this, the OSA and the Iran are now censoring everyone who does not speak Farsi. The OSA with Thin Thread would also do the FBI is incapable of doing: quickly discern; and the FBI with Thin Thread would also do the FBI is incapable of doing: quickly discern.

Methane-consuming bacteria could be the future of fuel

Known for their ability to remove methane from the environment and convert it into a usable fuel, methanotrophic bacteria have long fascinated researchers. But, how exactly, these bacteria naturally perform this task and their reaction has been a mystery.

Now an interdisciplinary team at Northwestern University has found that the enzymes responsible for catalyzing the methane-to-methanol conversion catalytic reaction is a reaction that occurs in the environment and is not understood. This finding could lead to the design of a new, human-made catalyst that mimics the activity of these bacteria, which could have a wide range of applications.

"The identity and structure of the metals involved in this reaction are unknown," said Brian Stone, Weinberg Family Distinguished Professor in the journal Science.

"Our study provides a major leap forward in understanding this key process that could one day lead to a new type of cellular oxygenates, and "Amphoteros" research has confirmed that these bacteria can produce "a few dozen" more carbon dioxide than what was previously predicted.

"This finding could lead to the design of a new, human-made catalyst that mimics the activity of these bacteria, which could have a wide range of applications.

"The identity and structure of the metals involved in this reaction are unknown," said Brian Stone, Weinberg Family Distinguished Professor in the journal Science.

"Our study provides a major leap forward in understanding this key process that could one day lead to a new type of cellular oxygenates, and "Amphoteros" research has confirmed that these bacteria can produce "a few dozen" more carbon dioxide than what was previously predicted.

Scientists with the U.S. Army have developed a new type of battery that can produce twice as much energy as what current models are predicting.

"Rapapid methanotrophic bacteria aren’t just releasing more greenhouse gases than we thought, but also producing more carbon dioxide than we thought," said Tomlinson. "We are now looking at the possibility of developing an even more effective system to capture carbon dioxide from the atmosphere."
Iran ready to host Muslim tourists during Ramadan

TEHRAN — The Carpet Museum of Iran is hosting an exhibition of handwoven rugs, which have been specifically woven for welcoming Muslims.

There’s now a helicopter service that will get you to any NYC airport in 5 minutes

An early evening flight is a New York City nightmare. The idea of getting trapped in rush-hour traffic on the way to the airport strikes fear into the most stalwart hearts. The minutes tick away, your palms start to sweat, you contemplate jumping flights, and just walking the rest of the way down the highway because it comes faster.

But a helicopter company will now let you—quite literally—fly right over the inconvenience.

BLADE launched five-minute helicopter flights from Manhattan to JFK airport in March. And now the service has announced that it will fly regular service to all New York City airports, including Newark and LaGuardia. Never again need you waste while trapped in traffic.

Expanding our continuous flight service between Manhattan and JFK, we are seeing faster than expected adoption from NYC residents. And now the service has announced that it will fly regular service to all New York City airports, including Newark and LaGuardia. Never again need you waste while trapped in traffic.

Conducting familiarization tours with the aim of introducing travel professionals and operators to the different experiences in Iran, the BLADE service is expected to “activate” the airline said in a statement. “It has been in continuous operation since it was the feasibility study for Manhattan and, not only JFK, but all area airports. Although, of course, it does not come cheap. The service costs $195 per seat per flight. Flights are bookable from the BLADE fly between Manhattan and, not only JFK, but all area airports. Flights are bookable from the BLADE fly between Manhattan and, not only JFK, but all area airports.

Election of tourism minister, Italian media company produce documentary on Egypt

Egypt’s Minister of Tourism Rania al-Mashat said on Saturday that the ministry and Italian news network “MediaSet” have cooperated to produce a documentary film about Egypt on the TV program “Fontainebleau City.”

MediaSet will shoot the documentary on May 22, with the production company stating that the historical monuments in Egypt are fond of Egyptian antiques and civilizations.

They added that famous TV anchor Roberto Abate and journalist Gianni Di Nardo will present the program alongside Egyptian archaeologist Zahi Hawass to discuss the secrets of Egyptian civilization.

MediaSet cooperation with the ministry began in September, around two months before Egypt was honored as the country of tourism on the cultural and historic side of the Egyptian history.

Mashat said that the ministry has also cooperated with CNN to produce films on Egypt.

A recent report by the Arab Travel Market (ATM) revealed that the yearly market in Cairo hit 603 kph (374 mph), comfortably making it the world’s fastest bullet train.

The model’s futuristic design features a cow and a long pointed nose. It will be tested on the line between the cities of Sendoa and Aomori, which are about 280 kilometers apart as the crow flies. Tests will take place after midnight, when the line is quiet, and will occur twice a week.

The ALFA-X marks a new stage of growth for Shinkansen, pushing the world’s highest-speed rail service even faster towards the future.

That model will enter operation in 2020, but its maximum speed of 300 kph — the same as other N700-series trains — will be easily surpassed by the ALFA-X.

The furious of new models coincides with Japan’s preparations to host the 2020 Summer Olympics in Tokyo. No matter what speed the train achieves during its tests, it won’t match the record-breaking pace of Japan Railway’s magnetic levitation, or maglev, trains which hit 603 kph (374 mph) on an experimental track in 2015. Myanmar National Airlines flight miraculously lands safely without any front landing gear

Passengers on a Myanmar National Airlines flight have a brilliant flight crew to thank for miraculously landing safely after the plane’s front landing gear failed to deploy.

Flight U191 from Yangon to Mandalay encountered a problem with its front landing gear at 9:09 a.m. local time with all 82 passengers and seven crew members safely evacuating the plane after it scraped its nose down the runway and came to a complete halt.

On approach, the captain tried to deploy the front landing gear, but found it was malfunctioning and could not be activated, the airline said in a statement.

After circling the airport to burn off fuel, the captain came in for a landing with no front wheel.

Video shot from inside the airport showed the plane landing on its back wheels, stalling and then eventually coming down on its nose — sending a shower of sparks down the runway. Miraculously, it slid to a stop before passengers were able to be evacuated by inflatable slides.

“Thank you to the brave flight crew and cabin crew,” said the airline.

Meanwhile, passengers were still on board the plane.

The plane, an Embraer 190, had taken off from Yangon, Myanmar, about an hour flight south of Mandalay.

Republic of Azerbaijan accounts for large portion of exports in Aras Free Zone

Providing the possibility of active presence in regional and global markets, producing and exporting industrial and consumer items, and increasing foreign direct investment in the mainland have been cited as one of the main objectives behind setting up Aras Free Zone. Any kind of producing and exporting goods from free zones is allowed in terms of the total exemption of Aras Free Zone in northeastern of the country, as large as 3,000,000 ha, bounded with three countries of Republic of Azerbaijan, Iran and Russia, and Nakhaan and Siahkal semi-autonomous republic as well as nearness to the three countries of Turkey and Iraq qualitatively, neighborliness with the Commonwealth Independent States (CIS) are thesalient advantages of Aras Free Zone as compared to other zones in the country. Mohnen Naserzad Chief Executive of Aras Free Zone pointed out that the Aras Free Zone Export zone market is also significant. alpha

He pointed out that Republic of Azerbaijan accounts for 77% export share of the zone, standing at the first rank in this classification of zones. In the same way, the Republic of Azerbaijan has given the third place for producing and exporting products of the zone. In the field of metal, machinery and other equipment, a large amount of goods, valued at $28,000,000, Republic of Azerbaijan is at the focal attention of traders and merchants of this neighboring state, following Iran and Turkey. Moreover, Armenia is doing business with Azerbaijan in the field of producing and exporting products. The former two have achieved 95% of the total export in the field of machinery and equipment, while Iran has also achieved 5% of the total export in this field.

Nurses and midwives have been suggested as one in the medical community as a distinct behavioral characteristic associated with an increasing use of computer games or video games that interfere with a person's everyday life.

Almost every country in the world agrees to deal with plastic pollution – except U.S.

Almost every country in the world has signed up to a legally-binding plan to cut plastic waste – with the U.S. as a striking exception. The United Nations announced that countries reached an agreement on Friday which they hope will deter “irresponsible” consumer behaviors.

"It’s sending a very strong political signal to the rest of the world that markets and companies must join the party," said Mr Payet. “Unfortunately, we have made up our minds to deal with the plastic crisis...the initiative, which first was presented by Norway in 2017, now is at a critical stage. It will help establish the global platform for plastic waste," he added.

"If we don’t intervene in this in time, the situation becomes critical - I think that we have to stop all waste, even plastic waste," Mr Payet said.

Victims of extreme weather

(August 5, 1990) John McLean, the BBC’s Correspondent in the Philippines, and Andrew Wood, the BBC’s Correspondent in South Korea, reported on weather conditions in the Philippines and typhoons in South Korea.

The Philippines is accustomed to torrential monsoons: rains and Manila is a low-lying city that is always liable to flooding. But the drought that the country has experienced over the past three days is extraordinary. Much of this city is under water, and those few parts of the city that are not under water are experiencing a severe water shortage and rising flood waters have claimed several lives. The floods have forced tens of thousands of people out of their homes and into makeshift shelters and now they are already crowded into buildings. Typhoon Onna brought winds of more than one hundred kilometers an hour and heavy rains and floods which caused more than 300 people to die and hundreds of people to be left homeless.

Some authorities were reported to have been killed by flying debris, and some have been reported missing. A number of people have been injured by falling trees and boats and have trapped on roofs or in lower floors in their homes.

Several Saudis died as regime forces storm Qatif

TEHRAN — Several political diplomats have been killed in Saudi Arabia when regimes forces attacked the port city of Qatif in the eastern province following the killing of five civilians in the town of al-Ahsa. The attack is the latest in a series of attacks by Saudi forces on civilians in the region.

The attack occurred on Thursday morning, according to local media, and left at least 10 people dead and several others injured. The attack was reportedly carried out by a team of Saudi special forces, who entered Qatif town after an hours-long fight.

The attack comes amid rising tensions between Saudi Arabia and Yemen, where the two countries have been at war for more than five years. Last month, Saudi Arabia launched a large-scale military operation against Houthi fighters in the northwestern province of al-Hudaydah, resulting in dozens of deaths and injuries.

The attack on Qatif is likely to escalate tensions between Saudi Arabia and Yemen, and could lead to further military confrontations in the region.

Fresh Saudi air strikes claim lives of seven Yemenis

At least seven people, including women and children, have been killed after Saudi-led air strikes hit a number of civilians in the Yemeni province of Al-Ma'in.

The strikes targeted a number of residential areas in the city of Qatif, which has been under attack by Saudi forces for the past month.

The Yemeni government has condemned the strikes as “categorically illegal” and has called for an end to the violence.

Syrian army takes terrorists in Idlib under heavy fire

TEHRAN — The Syrian army has taken control of the town of Khan Sheikhun in the northern province of Idlib, according to Syrian state media.

Syrian forces have been fighting to retake control of the town, which was previously held by rebel groups, including the Al-Qaeda-affiliated Al-Nusra Front.

The Syrian army’s victory in Khan Sheikhun is seen as a significant blow to the rebels, who have been fighting for control of the region for years.

Sri Lanka terror attacks: Saudi Wahhabi preacher arrested

TEHRAN — An anti-terrorism unit has arrested a Saudi preacher in Sri Lanka over alleged ties to the Islamic State group.

The preacher, identified as Abu Aliyar, was arrested on Tuesday in the city of Aluthgama, according to reports.

Abu Aliyar is a well-known preacher in the Sri Lankan Islamic community and has been involved in several anti-government activities.

The arrest comes amid growing concerns over the role of Islamic State-linked groups in Sri Lanka, where the group has been linked to several bombings in recent years.

The arrest also highlights the ongoing threat posed by terrorist groups in the region, and the need for continued efforts to combat extremism.

Massive explosions rock Fujairah port

TEHRAN — The Fujairah port, a major oil storage facility in the United Arab Emirates, was rocked by massive explosions on Monday.

The explosions, which occurred at around 9 a.m., were reportedly caused by a large tanker that was unloading oil at the port.

The explosions caused widespread damage to the port, and prompted a full-scale evacuation of the area.

The cause of the explosions is not yet known, but authorities are investigating the incident to determine its cause.

Netanyahu can’t ask Germans for help

JERUSALEM — Israeli Prime Minister Benjamin Netanyahu has attempted to engage with European leaders in recent weeks in a bid to secure their support for his diplomatic efforts.

However, his efforts have been met with little success, and it appears that Europe is not willing to provide the type of support that he has been seeking.

Meanwhile, the situation in the Middle East remains tense, with tensions between Israel and Iran continuing to escalate.

The situation is likely to remain volatile in the coming weeks, with a potential for further outbreaks of violence and conflict.
Nadal hoping for clay turnaround after semis exit from Rome

**Mercedes have discussed Ferrari move with Hamilton - Wolff**

Levi Hamilton and Mercedes have discussed the possibility of the five-time Formula One champion one day racing for the German team and such a move would be no drama, team boss Toto Wolff has said.

Hamilton, 33, has a contract with Mercedes until 2021 and has been linked with Ferrari but the German team have equalled Forti great Michael Schumacher's record of seven titles.

"I have to simply acknowledge that probably it's in every driver's head to drive at Ferrari as well," Wolff told reporters at the Spanish Grand Prix.

"But you have to understand that in the historic Formula One brand out there and I totally respect if a driver has the desire to drive at Ferrari. Even within the team we have discussed it and with Lewis we have discussed it and we have agreed on the topic," added the Austrian.

"We had the discussion when we negotiated the last contract and I think you just have to understand that in our sport that drivers will explore opportunities that exist and benchmark themselves.

"Wolff was said there was no suggestion at all that drivers who want to race for Ferrari at all, there was no suggestion at all but rather there was a lot of talk but said he was relishing the challenge of .

Real Sociedad women end Atletico double dreams with Cup win

Real Sociedad lifted the Copa de la Reina for the first time by coming from behind to beat Atletico Madrid 3-2 in Saturday's women's cup final, giving Atletico the double.

Enrique Gonzalez opened the scoring for Atletico in the 15th minute in what was their worst defeat in a crammed and lively Nuevo Los Carmenes stadium in Granada, having entered a 3-1 win in Atletico's last week to clinch the league title.

The title was awarded this week, and the team's main losses were Kofi Abdija and Jaidi Madji, with the former having been key in Atletico's closing stages, winning his first major trophy.

Sydney FC to face Perth Glory in A-League Grand Final

Former Bolton striker Adam Le Fondre has scored two Premier League goals this season, the second of which sealed Saturday’s 3-0 victory over Arsenal, as his side moved 13 points clear at the top of the English league standings.

Le Fondre, 27, has been a revelation for the Toon this season, scoring nine goals in 16 appearances. He has established himself as a key component in Steve Bruce’s attack, and is expected to continue his impressive form in the upcoming fixture against Perth Glory.

Perth Glory, on the other hand, are currently sitting in fifth place in the A-League, facing a tough challenge against the reigning champions. The Glory have struggled to find consistency this season, with a string of poor performances putting them under pressure.

The match will be a test of their mettle against one of the strongest teams in the league. Sydney FC has been in top form, with a series of impressive performances that have propelled them to the top of the standings. The Glory will need to step up their game to compete with the Sydney FC attack, which is led by the in-form Le Fondre.

Fans of both teams are eagerly anticipating this clash, which promises to be a thrilling match. It will be a test of their tactical acumen and ability to adapt to the ever-changing conditions on the field.

Sydney FC’s confident and attacking style is expected to pose a significant challenge to the Glory’s defense, who will need to work hard to contain the opposition’s attacks. The Glory, on the other hand, will look to their experienced players to provide leadership and guidance to the young squad.

This match will be a crucial juncture in both teams’ campaigns, with the winner emerging as a serious contender for the title. It will be a test of their mental strength and resilience, as they navigate the challenges of the A-League season.

In a battle of titans, Sydney FC is expected to come out on top. The side’s formidable attacking line-up, combined with their strong defense, make them a formidable force to be reckoned with.

The Glory, on the other hand, will need to play to their potential and execute their game plan effectively. They will need to be at their best to compete with the high standards set by Sydney FC.

In conclusion, this match promises to be a thrilling encounter, with both teams giving their all to emerge victorious. It will be a test of their strategies and tactics, as well as their individual and collective skills. Fans can expect a high-quality game, with plenty of action and drama, as these two teams battle for the top spot in the A-League.
Film scores by John Barry to be reviewed in Tehran

**TEHRAN** – The Niavaran Cultural Center in Tehran will be holding a session on Thursday to review film scores composed by renowned English composer John Barry. The event is an initiative by the French Embassy to celebrate the 50th anniversary of the establishment of diplomatic relations between Iran and France.

**“Antigone” coming to Tehran theater**

**TEHRAN** – Iranian director Elham Kheirmand will take Sophocles’ “Antigone” on stage at Tehran’s Hafez Hall on Thursday. Kheirmand will stage the play based on the Persian translation by Nasir Daryanbehbeh, the author of the bestselling cookbook “From Garlic to Onion.”

**Alongside Cannes mainstays, fresh faces try to stand out**

**NEW YORK (AP)** – The 73rd Cannes Film Festival, which opens Tuesday will feature a number of fresh faces who will make Cannes their home, including Pedro Almodovar, whose zombie comedy “The Dead Don’t Die” will open the festival and mark the director’s ninth film in competition in Cannes.
