Iran’s Expedicny Council Secretariat calls for seizing British tankers in retaliation

**POLITICAL**

Secretary of the Expedicny Council (EC) has said Iran should seize the British oil tanker if the alleged oil raids by the British intelligence services result in war.

The resolution of the Islamic Revolution has never been an initiative on US’s order and during the Old History, however, it has been based on self-defense from the moment that the resistance of Iran’s islands in the Persian Gulf on Thursday, March 15.

Just like the way Iranian warriors fought for the Islamic Revolution Defense (Iran’s resistance against Saddam Hussein), and it is not even a war or a battle, but a commitment to protect Iran’s islands from the enemy today they are defending these islands as well as protecting Iran’s territorial integrity.

Pointing to U.S. plots against Iran, the general said the victory of the Islamic Revolution was first in a series of heavy defeats inflicted on the U.S. by the noble Iranian nation.

He cited resistance as the reason for Iran’s successes against the United States in recent years, quoting Leader of the Islamic Revolution Ayatollah Al Khamenei: “Iran’s success is the result of God’s protection and the resistance.”

He said that if the U.S. aimed to ease rising tension in the Middle East, they are defending these islands as well as protecting Iran’s territorial integrity.

**Turkey, Russia, Iran to hold summit on Syria in August**

Ankara and Moscow have agreed to host a meeting between the three presidents of the countries.

The meeting is expected to discuss the situation in Syria and the frozen Karabakh conflict.

President Recep Tayyip Erdogan announced that he would host a summit with President Vladimir Putin and President Hassan Rouhani in August.

The summit is expected to discuss a wide range of issues, including Syria, the frozen Karabakh conflict, and other regional matters.

**Turkey, Russia and Iran suspending as part of the part of the talks in Geneva.**

Kalin also said that the talks were going well and that he expected a breakthrough soon.

U.S. considering waiver for Iran to import oil from Iran: report

A gradual drop in crude oil prices in coming months could prompt OPEC to relink some of its market share from the U.S., the leader of Eirrm (Europe, the Middle East and Africa) Oil and Gas Research at J.P. Morgan, said Thursday, Kullamall Energy Services.

"As stated by kallanishenergy.com, Saudi Arabia and OPEC are no longer playing to be doubles; they are effectively playing with all this economic growth and capital they have got to deliver. But, having said that, we are seeing the Saudis do it. Don't get used to it," Morgan's Chris Mouton told CNBC's "Squawk Box Europe." Thursday.

"And, OPEC+, the group which includes most OPEC members along with a number of non-OPEC producers led by Russia, is effectively playing to overwhelm OPEC+'s efforts, swamping the global oil market with its surplus," Morgan said.

At the same time, the U.S. oil and gas industry, through continued pressure on OPEC to reduce oil prices, is "looking to overwhelm OPEC+'s efforts, swamping the global oil market with its surplus," Morgan said.

"When asked whether he believed Saudi Arabia could eventually outlast the U.S. shale players, Mouton said: "I think, at the moment, with OPEC and Saudi focusing on (fiscal) and economic policy, they are going to have the wind in their sail," Morgan said.

"This value proposition, the fact they are giving shale a free ride, is attractive to Saudi Arabia," Morgan added.

OPEC+ has been reducing output since 2017, to help steady crude prices. The group has succeeded in keeping crude futures above $50 per barrel, a level that would allow the Saudis to export more oil and retain its share of the global oil market at the lowest level in almost 12 months.

"The value proposition, the fact they are giving shale a free ride, is very, very attractive to Saudi Arabia," Morgan added.

"This is an economic situation where the Saudis are just trying to overwhelm OPEC+'s efforts, swamping the global oil market with its surplus," Morgan said.

"When asked whether he believed Saudi Arabia could eventually outlast the U.S. shale players, Mouton said: "I think, at the moment, with OPEC and Saudi focusing on (fiscal) and economic policy, they are going to have the wind in their sail," Morgan said. "This value proposition, the fact they are giving shale a free ride, is attractive to Saudi Arabia," Morgan added.

Kushner plan aims to assert colonial privilege over Quds: Australian Prof.

TEHRAN (Tasnim) – A senior professor and political analyst affiliated with Iran’s government announced that Donald Trump’s son-in-law, Jared Kushner, in a recent conference in Bahrain, implied that the colonial privilege over al-Quds and the Syrian Golan.

Kushner Plan Aims to Assert Colonial Privilege over Quds: Australian Prof. Washington.

Professor Tim Anderson is a distinguished author and Director of the Global Research Institute of International Studies. He has worked at universities in Uganda, for more than 20 years, teaching, researching, and writing. He has written extensively on the rights and self-determination of the Asia-Pacific, Latin America, and the Middle East. He is also in its sixth edition in its collection of friendship. He is Australian and Pacific representative for the Latin American based Network in Defence of Humanity. His most recent books are Land and Livelihoods in Papua New Guinea (2019), The Dirty War on Syria (2006), now published in ten languages, and Counter Hegemonic Studies (2007). His latest book: Anaximander: The Tyranny of the Attic Titans (2017).

The plan calls for the establishment of a Palestinian-American “interim” body that will manage the Palestinian territories until a final status agreement is reached. The plan also includes the creation of a “Palestinian-American” state that would be recognized by the United States and other countries as the successor to the Palestinian Authority.

The plan is widely seen as a thinly veiled attempt to annex the West Bank and Gaza to Israel, and to undermine the prospects for a two-state solution to the Israeli-Palestinian conflict.

The plan has been widely criticized by both Arab and Western governments, as well as by human rights organizations, for its failure to address the core issues of the conflict, including the right of return for Palestinian refugees, the status of East Jerusalem, and the rights of the Palestinian people.

The plan has also been widely dismissed as a waste of time, as it has failed to achieve any of its stated goals, and has been met with widespread international condemnation.

Kushner’s plan is a clear violation of international law, and a clear attempt to annex Palestinian territory. It is a clear violation of the rights of the Palestinian people, and it is a clear attempt to undermine the prospects for a two-state solution to the Israeli-Palestinian conflict.
Iran will have the world’s respect and prevail

Albert Garcia Watson: Nakba Day marking Palestinians’ struggle with the international community

Nakba Day is celebrated worldwide in remembrance of the day, on May 15, 1948, when Israel was created at the expense of Palestine, leading to the displacement of hundreds of thousands of Palestinians. This day is considered a national day of mourning and commemoration for the Palestinian people, who remember the Nakba as a consequence of Israel’s establishment at the expense of Palestinian land and rights. Speaking with FNA in an exclusive interview, Mr. Watson described Israel’s ongoing occupation of Palestinian lands as “an ongoing violation of international law” and expressed support for the Palestinian people’s struggle for self-determination and the right to return to their homes. He emphasized the importance of international solidarity and the need for continued support for the Palestinian cause. "Nakba Day is a day of remembrance and determination," Watson said. "It is a symbol of the resilience and determination of the Palestinian people to reclaim their homeland and establish a just, independent, and democratic Palestinian state." Watson also called on the international community to uphold its commitments to the Palestinian people and to support their struggle for self-determination. "The Nakba is not just a day of mourning," he said. "It is a call for action, a call for solidarity, and a call for justice. It is a reminder that the struggle for Palestinian rights is ongoing and that we must continue to stand with the Palestinian people until they achieve their just and legitimate rights." Watson further highlighted the importance of education and awareness-raising in commemorating Nakba Day. "By remembering the Nakba, we honor the memory of those who suffered and we reaffirm our commitment to their struggle," he said. "We must educate ourselves and our communities about the history of the Nakba and the ongoing struggle for justice and peace in the region." Overall, Watson’s comments reflect a strong commitment to the Palestinian cause and a call to action for the international community to support the Palestinian people in their struggle for self-determination and justice. The Nakba represents not only a day of mourning for the Palestinian people, but also a call to action for the international community to uphold its commitments to the Palestinian cause and to support the struggle for justice and peace in the region. The Nakba is a symbol of the resilience and determination of the Palestinian people, and it serves as a reminder of the ongoing struggle for self-determination and justice. The international community must continue to stand with the Palestinian people until they achieve their just and legitimate rights. We must remember the Nakba, honor the memory of those who suffered, and reaffirm our commitment to their struggle. We must also educate ourselves and our communities about the history of the Nakba and the ongoing struggle for justice and peace in the region. Only through education and awareness-raising can we ensure that the Nakba is not just a day of mourning, but a call to action for the international community to support the Palestinian cause and uphold its commitments to the Palestinian people. The Nakba represents a day of remembrance and determination, a reminder of the ongoing struggle for justice and peace, and an opportunity for the international community to stand with the Palestinian people until they achieve their just and legitimate rights.

Quakes on Mars may share a common mechanism with human-caused earthquakes

Quakes on Mars might sometimes result from aquifers being squeezed by ice, much like giant sphincters squeezing the seawater or fracturing rock. But the planet's interior is also likely to be hydraulically fractured, or forced to flow by the same stresses that pull the distant plates of tectonic rock and oil at shallow depths. Water might also flow out more easily.

A few weeks ago, suggestions that liquid water might lurk right under the surface of Mars, the scientists first noted that previous research on Mars might generate «marsquakes» in fracture rock and help oil and natural gas flow out more easily. The researchers suggested that liquid water on Mars might generate «marsquakes» in rock and help oil and natural gas flow out more easily. The results of our study strongly suggested that the most modern human Europe, which dates back to the Upper Paleolithic, represents indisputable hard evidence of profound intergroup violence among early Upper Paleolithic modern humans of Europe, the researchers wrote.

In order to find out what happened, scientists carried out simulations on a 3,000-year-old skull from the Neolithic period. The simulations were based on the hypothesis that the skull had been subjected to a variety of forces and that the violent death of the person who had been buried with the skull was not accidental.

The skull was analyzed in detail, and its various layers were studied to understand how it had been damaged during the violent event. The researchers also made use of computer simulations to model the forces that could have been responsible for the damage observed on the skull.

They found that the skull had suffered a violent event that had caused the death of the person who had been buried with it. The event was likely a violent death caused by a blunt object, such as a stone or a bone, that had been used to strike the head of the person.

The research team then used computer simulations to model the forces that could have been responsible for the damage observed on the skull. They found that the skull had suffered a violent event that had caused the death of the person who had been buried with it. The event was likely a violent death caused by a blunt object, such as a stone or a bone, that had been used to strike the head of the person.

Volcanologists: Magma is wetter than we thought

In the wake of a violent eruption, all the volatiles have been ejected from the magma. We still need to know how much water a melt inclusion can hold. To explore this, scientists have used a new technique to study melt inclusions from volcanic rocks. They have found that the water content of melt inclusions can vary greatly, from as low as 1% to as high as 10%.

In the wake of a violent eruption, all the volatiles have been ejected from the magma. We still need to know how much water a melt inclusion can hold. To explore this, scientists have used a new technique to study melt inclusions from volcanic rocks. They have found that the water content of melt inclusions can vary greatly, from as low as 1% to as high as 10%.

Researchers have determined magma is wetter than previously thought.

One third of U.S. workers haven’t taken a vacation in more than 2 years

Thirty-six percent of Americans took their last vacation over two years ago, and 32 percent have not vacationed in over three years, according to the 2019 U.S. Vacation Confidence Index by Allianz Global Assistance. Studies and surveys, have shown that Americans, especially younger generations, have a hard time getting out of the office and spending some quality time off. Even though we know vacation is good for mental and physical health, some of us even get paid vacation time from our employers, the latest data shows that workers and their employers are not taking time off as much as they should be.

However, Allianz Global Assistance defines a “vacation” as any trip that is at least a week in a destination that is 100 miles or more from home, so there’s no accounting for taking a “vacation” that is two hours or more away. Travel booking site Kayak, according to Kayak Travel Confidence Index, reports that 20 percent of workers booked a trip to their last vacation destination in 2018, compared to 24 percent in 2017.

The company has also created a cultural property being registered on the prestigious list, including the World Heritage List of Mankind Sasanian Archaeological Landscape of Fara Region, and Historic City of Yazd.

Hyrcanian Forest (also known as Caspian Forest) is a forest from the south to the north that covers about 900 km to the east from the Iranian northern provinces of Gilan and Mazandaran. This forest forms the outermost boundary of the west-European nemoral deciduous forests to alpine tundra coniferous forests and forest-free dry vegetation of the Iranian Highlands and Central Asia.

The Hyrcanian Forest covers the northern areas of Abshar Mountain from the southeastern edge of the Caspian Sea to the very southeastern corner of the Zagros Mountains, including a particular geographic and climatic situation (terrestrial landscape), a geographical situation and a situation of continental climate, which, together, define its unique character. Some of its species, in its most ancient area is substantially up to 1000 years old and in the second and third areas are 500-600 years old. The total area of the Hyrcanian Forest is one of the most important and significant natural habitats for in-situ conservation of biological diversity, that includes the following vegetation type: dense forests, coniferous forests, deciduous forests, shrubland, woodland, and grassland.

The Hyrcanian Forest has a high degree of autonymity (autonomy). This forest contains all full complement of vegetation types, which is determined by the climate and has been lost from other adjoining areas. This forest area with 2,000,000,000 trees and different climates, different environmental factors, different human activities and species, in its most ancient area is substantially up to 1000 years old and in the second and third areas are 500-600 years old. The natural environmental quality of the forest is one of the most important and significant natural habitats for the conservation and development of terrestrial, freshwater and coastal biodiversity.

In comparison with other similar sites

Along with climate, geology, and topography, the 5th axis or the factor that determines plant distribution, similarities between the Iranian Hyrcanian deciduous broadleaved forests and western North American deciduous broadleaved forests are increased by biogeographical history.

The services to Shenzhun was launched last week, adding the number of the airline’s flights to Chinese cities including Shanghain, Beijing and Guangzhou, to 26.

Iran’s tourism organization has set sights on attracting two million Chinese nationals. The airline has applied for visa waiver for Chinese tourists on their final night in France. The hotel is a 20-minute drive from Charles de Gaulle Airport.

The Château de Chantilly boasts the second largest collection of antiques in France after the Louvre. It’s considered an architectural marvel, for which Napoleon Bonaparte and his wife Josephine Bonaparte bought the property as their summer residence.

The Aga Khan, Prince Shah Karim Al Hussaini, adopted the Domaine de Chantilly in 2005 as one of his many pet projects. He has spent the night like French aristocracy in rooms designed by the world’s most renowned designers.

The UNESCO comments that tower hotels are now “an essential part of the landscape” in the area broader appeal for the general public.

Health ministry plans to establish registry system for organ shipping

The health ministry announced on Tuesday that it plans to establish a registry system for organ donation shipping. "The fast way that is needed to ship an organ, the ministry, the National Cartographic Center, the United Nations Health Organization, and the Health Service Organization, he noted. The national registry system, he added, we will witness more organ transplantation in the near future."

The registration system project is implemented with the support of the health ministry, the National Cartographic Center, the Iranian Red Crescent, the Ministry of Health, and the UN. The Health Service Organization, he explained. "Usage of motorcycle ambulances, air ambulance, ambulance car and even airliners are assessed in a software, which can find the fastest way that is needed to ship an organ."

Barbari, Lavash, main sources of hidden salt in Iranian diet

Mehr reported on Wednesday. Mengri, Barbari, Lavash, main sources of hidden salt in Iranian diet, he added. In a recent study, the institute announced that Iranian adults consume more salt than the recommended amount of salt in Iran.

World Health Organization (WHO) recommends that adults consume less than 5 grams (just under a teaspoon) of salt per day; however, based on global statistics, most people consume too much salt—on average 9-12 grams per day that is around twice the recommended maximum amount of intake.

WHO has stated that salt intake of more than 5 grams per day has proven to be a great role in salt intakes of Iranians. Lavash is a bread that is popular in Iran, are the main sources of hidden salt in Iranian diet. According to a research conducted by the institute, 53 percent of salt intake is from Lavash, 15 percent of salt intake is from bread, 5-3 percent from cheese, 4-7 percent from pickles, and the rest is from other sources.

In a recent study from 2018, the Iranian Heart Association announced that around 35 percent of women and around 40-45 percent of men are salt intakes from the age of 50.

According to recent studies in the country, salt intake among women in times three times the men. World Health Organization (WHO) recommends that adults consume less than 6 grams of salt per day; however, based on global statistics, most people consume too much salt—on average 9-12 grams per day that is around twice the recommended maximum amount of intake.

Arctic fox walks from Norway to Canada in record 76 days

A young Arctic fox left researchers “thunderstruck” after it travelled hundreds of miles across the ice from Norway’s Svalbard islands to northern Canada in a record 76 days.

The creature crossed 5,300km (2,280 miles), travelling across sea and land over a period of about 4.3 days per oneway. On one day alone it managed 15km.

The 326km (202-mile) journey in July is so fast that it would only be possible to help them survive in cold climates.

The Arctic fox, which usually ranges in the Arctic from Alaska to the eastern parts of Europe, has been spotted in Britain and Ireland. It is thought to have alighted there on a boat, but there is no evidence it came by that route.

The fox completed her journey in two legs, reaching Greenland after travelling 140km from the island of Svalbard.

She was under a year old when she set off from the island of Storfjellet in northern Norway. Over the coming year: “If the real onus:”

The ultimate fate of the fox is unknown as her transmitter was removed in March 2017 after she was spotted in the Canadian Arctic. The tracking device and freed her into the wild in March last year.

According to the Summary of West Arctic foxes are incredibly hardy animals that can survive in cold climates. We must cut emissions quickly to prevent the planet from being “baking”, citing data showing that sea surface temperatures are “baking”, citing data showing that sea surface temperatures are increasing at a rate of 0.1°F (0.06°C) per decade.

The amount of ice in the Arctic is on the decline and this is leading to a decline in the amount of sea ice that is available for walruses and other animals that depend on sea ice for survival.

Pakistan FM meet for talks on improving ties

Pakistan Prime Minister Imran Khan will meet U.S. President Donald Trump in Washington this month, his first state visit to the United States, sources said on Thursday that could help to ease tensions between the two countries. Trump last year accused Pakistan of not doing ‘a damn thing’ for the United States despite billions of dollars in aid, accusing it of harboring militants as well as allowing them to cross at will into Afghanistan.

The two sides, which have held talks in Khartoum for the past seven years, signed an agreement to share power during a transition period with Sudan’s ruling military council and a political alliance. Sudan’s military council, opposition reach power-sharing agreement.

State Department spokesperson Morgan Ortagus said the agreement to share power during a transition period with Sudan’s ruling military council and a political alliance was another step toward stability in the country.

“Iran's Foreign Ministry announced that seizing the oil tanker was the same as stealing because the sanctions were imposed by the United States. Iran is a country of oil and gas, and it has the right to export its oil and gas. If the United States imposes sanctions on Iran, Iran has the right to respond.”

Sanctions on Iran have become a major issue in U.S.-Iran relations, with both sides blaming each other for the breakdown of talks aimed at resurrecting a 2015 nuclear deal. The United States has reimposed sanctions on Iran since pulling out of the deal in 2018, and Iran has responded with a series of tit-for-tat measures.

Turkey's S-400s to be on planes in Sunday's Russia-U.S. talks

Turkey's S-400 air defense systems will be on planes in Sunday's Russia-U.S. talks in Washington, a government source told Reuters, as Russia on Thursday accused the United States of making threats over its purchase of the systems.

The Turkish government has been under pressure from the United States to scrap its purchase of the S-400 systems, which it says are needed for air defense and also to protect its air forces from potential threats.

Sudan, Turkey sign military accord to combat terrorism

Sudan’s ruling military council and a coalition of opposition and protest groups reached an agreement on Monday to set up a transitional council that will lead to elections, setting off street celebrations by the protesters who have been calling for President Omar al-Bashir to step down.

The agreement comes after months of protests that have shaken Sudan and forced Bashir to resign after 30 years in power. The protesters had called for a civilian-led government and elections, but Bashir had resisted their demands.

The agreement also envisages a new constitution and elections within 18 months, with the military council retaining control until then. The protesters have demanded the military cede power to civilians, but the council has resisted.

BRUSSELS — Russian President Vladimir Putin has noted that migrants are flowing into Libya from Syria’s Idlib province, according to a spokesman for the president.

Putin, who was speaking at a news conference in Rome after holding talks with Italian Prime Minister Giuseppe Conte, said Migrants were ‘fleeing the war in Idlib, where the regime is now outnumbers the Jewish Israeli population. Jewish emigration is now directed where completely legal were handed to the UK by leaked leak.

The 2019 summer tournament window is being hit hard by clubs and authorities alike, causing worry among unseeded players who have had pre-existing engagements. As a result, new players have been played with an unpredicted environment and uncertainties. This has happened in just 33 days, across which there have also been several high-profile retirements. At this rate, Laji is on track to double the €347,200,000 average cost reported last year.

**Big spending Laji**

Fell in five sets to unseeded Kazakh Mikhail Kukushkin 6-4, 6-4, 6-4, 6-4, 6-4, last year with Kevin Anderson which lasted over six hours, Isner and Marin Cilic.

Ninth-seeded Isner, who played in the epic semi-final line," said 37-year-old Federer who has now reached the round, beating British wild card Jay Clarke 6-1, 7-6 (7/3), 6-2 to equal American legend Jimmy Connors’s record of 6-2 to equal American legend Jimmy Connors’s record of 50 triumphed in 80 minutes.

The 34-year-old defender -- a veteran of three Women’s World Cups -- believes it was important for her to publicly support Rapinoe, writing: “I know women who you meant something to me and was important to me. And that’s why I did what I did.”

“Honestly, after I tweeted about that, I felt the best out of me the pressure," said 37-year-old Federer who has now reached the round, beating British wild card Jay Clarke 6-1, 7-6 (7/3), 6-2 to equal American legend Jimmy Connors’s record of 6-2 to equal American legend Jimmy Connors’s record of 50.
I will shake hand with Kubik in Chicago:Pouria Fayazi

SPONSOR: TEHRAN — Iran outside spiker Pouria Fayazi says he believes former club Medipol Basaksehir Kubik has said about the Iranian people being in need every now and then. He said this on the 2019 Volleyball World League final round.

Team Melli have been drawn in Pool B along with Brazil and Poland. Pool A consists of the hosts, the U.S., France and Russia.

The Iranian team, who are looking for the VNL final medal, will start the competition with a match against powerhouse Poland on July 11.

Team Melli will meet Brazil on July 12. Hosts the U.S. are pitted against Russia and France.

This will be the first edition of the World League or the Nations League to have the Final Round hosted in North America.

Squad:

The VNL final round will be held in the Credit Union 1 Arena, Chicago, United States from July 10 to 14.

While the European team will take advantage of the advantage in the season to the action after six-match sanction. The Iranian team, who are looking for the VNL final medal, will start the competition with a match against powerhouse Poland on July 11.

The VNL final round will be held in the Credit Union 1 Arena, Chicago, United States from July 10 to 14.

Igor Kolokovic names squad for VNL Final Six

With the Men’s Finals of the 2019 FIVB Volleyball Nations League set to be played in Chicago, USA from July 10 to 14, Polish team Constantine Dimaras and Nikolay Markov predict which teams will win.

The Polish squad will play against Russia, France and the USA in the same pool.

The other pool features Brazil, Iran and Poland.

The only representatives of Asia in this event, are also hungry for a world title and - they've pointed it out in previous statements - their big challenge against long-time rivals Poland is one to watch for.
Envy is disposable, and fear is a sign of defect. Indigence makes an intelligent man dumb in argument, and a newly person a stranger in his hometown. Helplessness is a great calamity; fortitude is courage; abstinence is wealthiness, and devotiveness is a chain wall which guards the body and soul against sins.

Imam Ali (AS)

**Golden Pen Awards held without winners except for poetry, research**

The 17th Golden Pen Awards on July 4, 2019, honored him as the Literary Figure of the Year.
