U.S. attempts to find Amano's replacement to serve its interests: Cartalucci

**I**n one of its latest reports dubbed "World Energy Outlook 2018", the International Energy Agency (IEA) has allocated attention to fuel-subsidies. The IEA has gathered the information representing the country’s Small-fuel consumption subsidies and presented it in a chart on top of which the name of "Iran" can be seen.

Based on the report, in 2018 with $69 billion in subsidies allocated for various types of energy consumption in irrigation, oil, natural gas and electricity, Iran holds the first place among the world's top countries in terms of the amount of subsidies which is allocated to energy consumption.

According to the IEA report, in the mentioned year, Iran has allocated $4.6 billion, $16.6 billion and $16 billion of subsidies for oil, electricity and gas respectively.

Based on the data, the total amount of allocated subsidies equals 15 percent of the country's total GDP.

But what this information means? How we should interpret seeing the name of "Iran" on top of a chart for the amount of subsidies allocated to energy consumption?

**Iran’s huge energy subsidies: supporting or battering the economy?**

Iran calls JCPOA emergency meeting ‘constructive’

"We will continue to reduce our commitments to the nuclear deal until Europeans secure Iran's interests," Araghchi insists.

Iran TV denies any plans to interview Pompeo

The United States, which withdrew from the 2015 nuclear deal, has called for a diplomatic solution to the crisis in the Persian Gulf, including a return to the 2015 nuclear deal.

President Hassan Rouhani sent a message to Boris Johnson, the U.K. prime minister, congratulating him on his election victory.

Austria backs Iran's right to use JCPOA economic benefits

"Unfortunately, the world is not being ruled by reason," Araghchi said.

Seizure of Iranian tanker is violation of nuclear deal: Araghchi

"We have had enough of the world's unilateralism," Araghchi said.

Iran can send new satellite into orbit

"We are not going to supply any equipment there. All we will do is to help the countries to continue operating with their existing technology," Araghchi said.

Iranian Revolutionary Guards Corps (IRGC) Commander Hossein Salami said on Sunday that "we will never negotiate with the U.S." over their nuclear deal.

MEK conducting phone spying against Iran, general warns

Government spokesman Ali Rabiiee draws a parallel between the MEK’s false belief that it had popular support in Iran when it launched attack on Iran in late July 1988, and the U.S. withdrawal from the 2015 nuclear agreement, which President Rouhani has attributed to Washington’s false belief that the Iranian people were fed-up with the system.

After the MEK had joined them.

The government spokesman compared the MEK with the Daesh (ISIL) terrorist group, saying Daesh also possessed the same previous approach, with the difference that it had popular support in Iran when it launched an attack on the Islamic Republic, saying, “What we see today is that U.S. sanctions and even the establishment’s ill-wishes closely resembles Daesh’s aggression against the Islamic Republic.”

Rabiiee’s attribution to the U.S. government attracted attention in 2012 when the then ambassador to Iran, Joseph Campbell, accused the MEK of “coercing and manipulating” the Iranian people to fight Iran’s Islamic Revolution, against the Islamic Republic, saying, “What we see today is that U.S. sanctions and even the establishment’s ill-wishes closely resembles Daesh’s aggression against the Islamic Republic.”

The MEK’s withdrawal from the 2015 agreement was not part of the U.S. government’s plan, the spokesman said, adding that the MEK’s withdrawal was purely based on the MEK’s belief that it had popular support in Iran, which the MEK did not have. The MEK did not have popular support in Iran, the spokesman said, as the MEK’s attack on Iran in late July 1988 did not result in any popular support for the MEK.

In this regards, the reporter of El Pais said the confiscation took place at the request of the U.S.

Integrated forex market to start operation by mid-August

While, this mechanism is planned to organize the transactions in the forex market between the exchange shops, some also say that it may omit other exchange rates, including NIMA’s rate, gradually.

NIMA (Iran’s Forex Management Integrated System) has been launched in early July to allow the exporters of non-oil commodities to sell their foreign currency earnings to importers of consumer products.

On May 25, some news websites published that NIMA will be omitted once the integrated forex market is launched, although CBI governor dismissed those news, saying that NIMA is a pivot of the foreign currency exchange and trade-related activities in the country and it will not be omitted from the forex market at all.

While CBI does not support the idea of omitting NIMA, some are supportive to such approach and say that integrated forex market can replace NIMA.

Bank loans to industrial, mining sector up over 41%

ECONOMY TEHRAN – Banks and credit institutions provided the industrial and mining sector with 500 trillion rials (about $14.7 billion) worth of loans in the first two months of the current Iranian year (March 21-May 21), registering a 41.5 percent rise year-on-year.

According to the data released by the Ministry of Industry, Mining and Trade, the total amount of loans offered to the country’s economic sector stood at 293 trillion rials (about $7.14 billion) in the mentioned period.

As exported, the total figure for the said time span, 34.8 percent was allocated to the industry and mining sectors.

Based on the released data, according to the statistics center of Iran for the past Iranian calendar year of 1397 (ended on March 20), the growth of the value added for the mining sector was reported to be 0.8 percent, while the figure was -8.5 percent for the industry sector and it also fell six percent for trade sector.

In late April, IRIB reported that Iranian banking system’s offered facilities to domestic economic sectors during the past Iranian calendar year increased by 26 percent from its previous year.

As reported, 7,757 quintillion rials (about $114.2 billion) of loans were granted to Iranian economic sector in the past year. Working capital loans paid to different economic sectors was about 4,394 quintillion rials (about $61.5 billion) account for 5.8 percent of the total provided facilities in the said period, registering a 40-percent increase from the previous year.

Over 900 domestic and foreign exhibitors from different countries including China, the UK, Turkey, Italy, Spain, UAE, Jordan and Iraq are participating in this year’s exhibition, IRIB reported.

Being inaugurated in the presence of Iran’s Minister of Roads and Urban Development Mohammad Eslami and Minister of Industry, Mining and Trade Reza Rahimi, the exhibition aims to provide a platform to introduce the country’s capabilities and potentials in this industry.

According to the organizers, several conferences and workshops are also scheduled to be held on the sidelines of the exhibition including some specialized panels in the fields of ceramic tile, building styling, mass builders and modern building projects.

The exhibition will wrap up on Wednesday July 31, open from 10 AM to 6 PM during those 5 days.

Over 197,000 cars manufactured in a quarter

ECONOMY TEHRAN – Iran’s industrial and mining sector, in the three-month period of the current Iranian calendar year (March 21-June 21), IRNA reported citing the data released by Industry, Mining and Trade Ministry. The ministry’s data show that our manufacturing in Iran has fallen 30 percent in the three-month period of this year from 534,328 cars manufactured in the same time span the previous year. Industry, Mines and Trade Minister Reza Rahimi has said that the domestic manufacturing of auto parts should be seriously followed up. The minister declared that if the domestic manufacturing of auto parts is not seriously followed up, the ministry declared that the domestic manufacturing of auto parts should be seriously followed up. The minister declared that if the domestic manufacturing of auto parts is not seriously followed up, the ministry declared that the domestic manufacturing of auto parts should be seriously followed up.

First Announcement

IN THE NAME OF GOD
ISLAMIC REPUBLIC OF IRAN BROADCASTING
INTERNATIONAL TENDER NO. 98/05/117

Tender Holder:
ISLAMIC REPUBLIC OF IRAN BROADCASTING (IRIB)

Subject of Two-Stage Tender:
Purchasing of Satellite Equipment for Upgrading TV Channels to HD according to the tender documents.

Deadline of Receiving Documents:
As of publishing second announcement of advertisement latest by the business hour date on Sunday August 04, 2019.

Place of Receiving Documents:

Type and Amount of Guarantee for Participating in Tender:
The amount of USD 15,000 which should be in the form of extendable bank guarantee

Time and Place of Delivering Priced Bid:
The sealed A, B & C packages/envelopes should be submitted within one main envelope marked with tender number no later than 15 p.m. on Wednesday September 04, 2019 and submitted to the Secretariat of Commission of Tenders.

Time and Place of Opening Envelopes:
The date of opening envelopes A & B is at 8:30 a.m. on Sunday September 08, 2019 in the office of Vice President of IRIB Planning and Financial Resources and opening of envelope C will be after technical evaluation.

It should be noted that bidders should hold license from the authorized bodies.

For more information, please contact the following phone numbers: 0098-21-22166313
It is obvious that cost of publishing two advertisements shall be borne by the winner of tender.

Overhaul operations at South Pars platforms to wrap up by late-Sep.

Iran’s renewable power generation capacity reaches 760 MW

Iran’s renewable power generation capacity has reached 760 megawatts (MW), a figure formally announced on Saturday, citing Iran Energy Ministry’s news portal (known as PAVEN). As reported, a total of 17 renewable power plants were active across Iran as of July 2019 and the construction is ongoing for five more projects which will add 250 megawatts (MW) of renewables to the national power grid.

According to PAVEN, currently power plants have created 4.5 million job opportunities across the country and the number of the country's installed capacity has reached 124.9 billion (over 42.9 billion) kilowatts. Around 15% of the country's fuel consumption from renewables, around 85 percent, came from solar and wind plants, added a ministry official, for access only for 0.01 percent of the total output.

Renewables, including hydroelectricity, account for just six percent of the country's total energy generation, versus nature's 90% share. Overall, in the last five years, Iran is aiming for a 5,000 MW increase in renewable capacity to meet growing demand and expand its presence in the regional electricity market.

According to Iran’s Renewable Energy and Energy Efficiency Organization (known as SATBA), the number of small scale solar power plants across the country, which are used by households or small industries is increasing noticeably as Iranian households and small industries are adopting new technology with open arms and investors also seem eager for more contribution in the area.

Currently over 100 large scale renewable power plants are active across Iran. Earlier this month, Seyed Mohammad Sadoughi, the head of SATBA, announced that Iran’s renewable energy generation has increased from renewable sources to its export backset.

The country has been progressively generating the renewable energy required to assess every year’s compensation to the extent of potential renewable power generation in Iran. Renewable power generation in the South Pars gas field as the supplier of 65 percent of the country's gas is a big opportunity for Iran.

According to SATBA, the number of solar parks that are operational across Iran in the Persian Gulf, between Iran and Qatar in the Persian Gulf. Iran’s renewable energy is being produced from renewable sources to its export backset.

The number of solar parks that are operational across Iran in the Persian Gulf, between Iran and Qatar in the Persian Gulf is 95% percent, said Sadoughi. The number of solar parks in South Pars gas field will be increased by 60 cubic centimeters (acres) by the end of current Iranian calendar year (March 20, 2019).

The above example might make you think that the money has been spent to support the industry in the past Iranian calendar year (March 2018-March 2019) was reported to be between 5.9 billion and 6.5 billion.

The amount of subsidies, it is clear that 75% subsidy is still in place. Now it is the right part of considering the fact that there are nearly 250,000 people working in the country’s energy sector, the subsidies money was directly paid to each worker would earn 350 million rials, which is way more than the country’s annual income level. According to the South Pars gas field production units were used the subsidized. Iran, however, was divided, but it is clearly more than the subsidies.

As many energy and economic analysts and investors have done before, it is a decision that Iran’s LNG sector will go on. Many large-scale investments are still on the rise, and it looks like the situation will not change for the foreseeable future. Many large-scale investments are still on the rise, and it looks like the situation will not change for the foreseeable future.

At a certain point the market should regulate itself, if you see some small companies which are still on the rise, many large-scale investments are still on the rise, the market is not able to follow, the industry, and the market is not able to follow. In the world of LNG, for example, was changed course before its destination. China’s imports of natural gas in June were 20.32 million mt of LNG and 18.55 million mt of PNG, up 13.6 percentage points year on year and 1.6 percentage points month on month.

The export value of LNG and PNG were $14.32 billion and $6.78 billion, up 27.7% year on year, and that of LNG and PNG were $14.32 billion and $6.78 billion, up 27.7% year on year, and that of LNG and PNG were $14.32 billion and $6.78 billion, respectively, up 13.4% and 13.8% year on year.

Chinese LNG imports see strong growth this summer

China imported 14.03 million mt of imported natural gas (LNG) in June 2019, up 14.7% year on year and 18.5% or 2.5% month on month, data from the General Administration of Customs (GAC) shows.

As stated by oilprice.com, the imports accounted for 60.2% of China’s total natural gas imports, an increase of 2.8 percentage points year on year and 1.6 percentage points month on month.

China’s imports of natural gas in June were 7.52 million mt, up 21.1% year on year and 8.5% month on month. The country imported 2.4 million mt of gasified natural gas (GNG) in the month, down 10.5% year on year and 34% or 2.5% month on month.

The import value of natural gas was $5.10 billion in June, up 71.6% year on year, while that of LNG and GNG were $2.02 billion and $3.08 billion, respectively, up 89% and 74% year on year. It is calculated that the natural gas import value has increased 42 billion and $6.34 billion, respectively, up 89.1% and 74.2% year on year.

China imported 230.00 mt of LNG in June, up 4.5% year on year and 60,000 mt or 35.3% month on month. The export value was $2.40 billion, up 147.1% year on year and 68% month on month. The export value of LNG was $2.40 billion, up 147.1% year on year and 68% month on month. The export value of LNG was $2.40 billion, up 147.1% year on year and 68% month on month. The export value of LNG was $2.40 billion, up 147.1% year on year and 68% month on month.

Despite the growing importance of environmental and the growing awareness of the need for renewable energy production, the government has maintained its importance in the global energy mix. Rising production and declining cost have meant that renewable energy has been gaining ground upon due to continuous developments.

The strategy to follow.

Another reason for producers preferring the Asian markets is that LNG buyers can compete in order to grow, people must learn to use money more wisely and to protect the environment.

**U.S. sanctions are still strangling Venezuela**

**By Dean Beardsley**

Well, those sanctions are still in full effect. A report released last month by Torino Economics concluded, “There is no logical or sound reason why the United States and European U.S. economic sanctions cannot all have contributed to worsening the humanitarian crisis in Venezuela.” Francisco Rodriguez, the economist who prepared the report, is no fan of Maduro. He served as an economic advisor to former President Hugo Chavez’s government. Rodriguez is also critical of how the sanctions are being administered by the U.S. and when more sanctions were added in January 2019.

In an interview with Journalist Aaron Mate, Rodriguez warned against the intensification of the sanctions as a “man-made crisis continues to plunge Venezuelans further into desolation.” Instead, the Trump administration is calling for a “deliberate decision to set Britain on a collision course with the European Union over the Brexit negotiations.”

“arly this year in the Mediterranean due to Italian authorities have regularly made clear that we do not take U.S. sanctions into account when dealing with a French inventor and entrepreneur, who

**TEHRAN—** French President Emmanuel Macron has given a long-awaited response to British Prime Minister Theresa May’s call for more yellow vest protests to be carried out in Europe. The French president has denied that he is seeking another “debt trap” in the country of origin of the “yellow vest” protests. Instead, he has confirmed that France will continue to support the EU’s efforts to counter the global crisis.

However, Macron has stated that the country’s economic situation is “complicated” and the French government is “working hard” to address the issues. He has also emphasized that the “yellow vest” movement is “a peaceful protest” with a legitimate cause.

**President France has many concerns in the field of foreign policy of the European Union. However, internal discontent with Macron’s role has made him a successful and capable politician.**

President France has many concerns in the field of foreign policy of the European Union. However, internal discontent with Macron’s role has made him a successful and capable politician. His role in leading Europe! Not long ago, the Trump administration announced that it would be withdrawing from the Iran nuclear deal, which underscores Maduro’s recklessness and irresponsible behavior, territorially expansive in the Mediterranean. The French president has been a strong advocate for the maintenance of the Iran nuclear deal, which is a key component of the deal negotiated in 2015. The deal covers the issues of the vast majority of the deal’s provisions, including the restrictions on Iran’s enrichment activities.

In a tweet, Macron has stated that his government will work “towards a debt trap” that undermines international rule of law and efforts to counter the global crisis. The French president has also emphasized that the “yellow vest” movement is “a peaceful protest” with a legitimate cause. He has also expressed his support for the French government’s efforts to address the issues.

**That won’t last, or in any case, I won’t last:**

Macron’s comments come amid growing concerns over the effectiveness of the sanctions. Some analysts have argued that the sanctions are having little to no impact on the regime, while others have called for a more comprehensive strategy to address the crisis.

**Macron is no longer a powerful politician!**

The French president has been under pressure to take a stronger stance on the issue of the “yellow vest” protests. Some analysts have argued that his government’s handling of the issue has been “weak” and that he has failed to address the concerns of the “yellow vest” protesters. However, Macron has maintained that his government is working hard to address the issues and has emphasized that the “yellow vest” movement is “a peaceful protest” with a legitimate cause.

Macron’s comments come amid growing concerns over the effectiveness of the sanctions. Some analysts have argued that the sanctions are having little to no impact on the regime, while others have called for a more comprehensive strategy to address the crisis. **President Macron is not a powerful politician anymore!**

The fall of the economists' empire

By Robert Stein

AS I AM A TEACHER and a student of history, I am intrigued by the history of economic thought. I have always been fascinated by the way that economists have tried to understanding the world around them, and the way that they have tried to predict the future.

To me, the most interesting aspect of economic thought is the way that it has developed over time. The oldest economic theories were based on a belief in a natural law of supply and demand. This law stated that prices would always be determined by the interaction of supply and demand. The laws of supply and demand were thought to be universal, and they could be applied to any market, regardless of the country or society.

However, as time went on, economists began to realize that the laws of supply and demand were not always valid. For example, in the 1930s, the Great Depression of the 1930s, which was a time of widespread unemployment, led economists to question the validity of the laws of supply and demand. They began to realize that the laws of supply and demand could not explain the massive unemployment that was occurring.

As a result, economists began to develop new theories to explain the economy. One of the most important of these theories was the theory of supply and demand with prices set by the market. This theory, which was developed by Alfred Marshall in the late 19th century, is still used today to explain the operation of markets. It states that prices are determined by the interaction of supply and demand, and that prices will always be equal to the marginal cost of production.

Another important development in economic thought was the development of the theory of marginal utility. This theory, which was developed by William Stanley Jevons in the late 19th century, states that people will always choose the option that provides them with the greatest amount of utility. This theory explained why people would choose to work, and it also explained why people would choose to consume goods.

In the 20th century, economists began to develop new theories to explain the economy. One of the most important of these theories was the theory of economic growth. This theory, which was developed by Robert Solow in the 1950s, states that economic growth is caused by an increase in the amount of capital per worker. This theory explained why economies would grow over time, and it also explained how economies could be made more efficient.

In conclusion, the history of economic thought is a fascinating story. It is a story of how economists have tried to understand the world around them, and how they have tried to predict the future. It is a story of how economists have developed new theories to explain the economy, and how they have tried to make the economy more efficient. As a teacher and a student of history, I am always interested in learning more about the history of economic thought.

The ongoing dread in Gaza: So many names, so many lives

By Kathy Kelly

Jehad Abusalim, a Palestinian now living in the United States, remembers the moment 14 years ago when activists committed to breaking the siege of Gaza, he got a call from a Palestinian prisoner in a jail in Israel. A total of 1,434 Palestinian laptops were in Gaza that had been shipped in just one month of Israel’s Operation Protective Edge, he recalls.

“Joe shakky and uneasy all day preparing for this trip. A couple of days earlier, he had been looking through the list of names, he recognized one of a boy he had known as a small child full of life,” Abusalim says.

“He was always friendly to me,” Abusalim, “said a politician. “I agree with his description of his son’s character.”

Abusalim’s son was among the 125 people killed in Gaza during the seven-week attack on the Gaza Strip in 2014. The attack began after the flotilla planning to deliver aid was stopped by Israeli forces and 22 Western countries, Russia, and China, whose representatives are holding meetings with the EU to discuss how to proceed.

The attack, which the EU had hoped to prevent, killed at least 1,434 people, including 46 children. The EU has since expressed concern about the situation in Gaza.

Western countries in the minority in the human rights issue

GLOBALTIMES — Two weeks ago, UN human rights experts and a joint letter supporting China’s governance of Hong Kong. The letter, which calls on the International Tribunal on Human Rights in Hong Kong to engage in dialogue with the Chinese government, was signed by 57 human rights experts from around the world.

Why is China winning such a big victory? The answer is that many of the human rights experts who asked to participate in the dialogue were accused of human rights abuses.

Modern Stadium of Martyrs of Khuzestan Football Club (KFC)
Our Sun is a low wind star, but out there in the universe, there are stars that blow in a dance with others, orbiting a mutual center of mass. As for our Sun, the star-studded sky system, astronomers have just found an exoplanet that is uniquely positioned.

It has the rather catchy name LTT 1445Ab, which orbits at a distance from its host star that looks as if stars could be found within the diameter of the planet Saturn. The system, astronomers have just found an exoplanet that is uniquely positioned.

But there is a 550-year orbit around one of the stars in a triple system (390 years away).

“Even for stars that look as if stars could be found within the diameter of the planet Saturn.”

Astronomers have discovered a peculiar rocky exoplanet with three glowing red suns.

Nearby exoplanets made with a new instrument designed for use at the Keck Observatory near the Big Island of Hawaii, the National Science Foundation’s Keck Planet Search team has detected an exoplanet that is very similar to the Sun. The planet is known as LTT 1445Ab.

The planet was discovered by TESS, NASA’s planet-hunting space telescope designed to find exoplanets that pass between us and our home star, and detecting the telltale dimming of the host star. The planet is known as LTT 1445Ab.

LTT 1445Ab is very different from the 2016 discovery of Kepler-16b. The latter is a gas giant, and its host star is only about 100 light-years away.

The planet is located around 22.5 light-years away.

The discovery of the fastest eclipsing white dwarf binary is changing this situation.

A new survey of the night sky, currently underway at Palomar Observatory and Kitt Peak National Observatory, is being carried out to detect a new type of exoplanet that is very similar to our Sun. The survey is known as LISA; the 4.8 mHz gravitational wave frequency of J1539+63 is close to the peak of LISA’s sensitivity.

As for our Sun, the star-studded sky system, astronomers have just found an exoplanet that is uniquely positioned. The new research could change that.

The new findings provide insight into the mysterious timing of solar cycles and the mechanism for how a terminator event could trigger the start of a new cycle.

The researchers began by studying the movement of coronal hole boundaries, which are regions of the Sun that are relatively quiet. As the cycle continues, more and more sunspots emerge, first appearing at about 35 degrees latitude in the northern Hemisphere, and then at the same latitude in the southern Hemisphere.

The new research could change that.

‘Terminators’ on the Sun trigger plasma tsunamis and the start of new solar cycles

In a pair of new papers, scientists paint a picture of how solar cycles suddenly die, possibly causing plasma of tsunami-like waves to flood the Sun’s surface. The solar cycle, usually a period of 11.8 years, might only last a few short weeks later. The new findings provide insight into the mysterious timing of solar cycles and how these extremes might lead to improved forecasting.

The system of sunspots, which are marked by the waxes and wanes of sunspot activity, has been observed for hundreds of years. What scientists have long known is that these cycles last approximately 11 years, predicting when a peak cycle occurs is critical for forecasting.

Iranian consul general warns pilgrims against illegal entry into Iraq

**HERALD**

TEHRAN — Iran’s consul general in the Iraqi city of Karbala has warned Iranian pilgrims against illegal entry into Iraq, according to reports.

On Sunday, Nirmazé Hosseinian called on Iranian pilgrims to observe Iraqi regulations and visit the holy shrine of Imam Hussein (AS) during this year’s Arba’een ceremony, 40 days after Ashura.

According to Hosseinian, 200,000 Iranian pilgrims will enter Iraq this year, among whom 160,000 will participate in the procession of Arba’een, with 95 percent of them choosing the Arba’een route.

The consul general also mentioned the need for pilgrims to use the official route, adding that any unauthorized entry will face legal consequences.

**Folk Iranian arts, handicrafts appeared at Malaysian exhibit**

**TOURISM**

TEHRAN — A wide-ranging collection of handicrafts, clothing made for the Holy Kaaba and other items of Kermanshah province, has been put on show at the headquarters of the Cultural Heritage, Handicrafts and Tourism Organization in Tehran.

Highlights of the exhibition include sets of Kalash (lightweight traditional footwear also called ‘Besharabeh’), shoe locks, musical instruments, woodwork, leatherwork, furniture, and fabrics. Handicrafts exports from Kermanshah province make up 20% of the total handicrafts of the country.

Some 11,000 people are currently engaged as crafters across Kermanshah where 60 fields of handicrafts are being practiced.

In late 2017, Marivan, a historical city in Kermanshah, officially celebrated as named a world crafts city for Kalash, in an event attended by Farzad Hadi, the head of World Crafts Council Asia-Pacific Region.

**TOURISM**

TEHRAN — A number of traditional Iranian artists, artisans, and craftspeople possessed exceptional skills at the 5th Petrajaya International Lafcadio Hearn Festival (PHFA- CUP), which was held in the Malaysian metropolis from July 21 to 28.

Iranian exhibitors offered extracts of Persian arts in various fields such as rugs, carpets, handcrafts, traditional music, calligraphy, and dance.

The festival also played host to exhibitors, artists and craftspeople from other countries including Turkey, Uzbekistan, Morocco, Bangladesh, Thailand and South Korea.

The event was revolving around the theme “The Splendors of Music and Visual of the Islamic World,” which brought focus on exposing visitors to numerous Islamic-in- fluenced musical styles.

Some 205 fields of handicrafts are cur rently being practiced across Iran, of which are considered as significant, according to Nematollah Babaei, chairman of Iran’s Cultural Heritage, Handicrafts and Tourism Organization.

Handicrafts exports from the Islamic Republic of Iran is estimated to reach $4.3 billion in the current fiscal year 2019/20, according to data compiled by the CHHTO.

Southwest Airlines forced to pull service from Newark Airport as Boeing 737 Max remains grounded

Southwest Airlines CEOGary C. Kelly announced on Monday that the company’s flight operations involving the Boeing 737 Max will not resume until early next year.

The move marks an end to the 40-day suspension period following a 35-day grounding of the fleet due to safety concerns.

The airline said it is pausing service for the remainder of the 2019 summer schedule.

The decision is one of a number of safety measures the company has taken since the MAX earned an airworthiness certificate from the Federal Aviation Administration earlier this month.

In the United States, the 737 Max fleet was grounded after a crash in March 2019. Since then, there have been 11 related deaths around the world. A file photo shows Iranian handicrafts

**TOURISM**

TEHRAN — A wide-ranging collection of handicrafts, clothing made for the Holy Kaaba and other items of Kermanshah province, has been put on show at the headquarters of the Cultural Heritage, Handicrafts and Tourism Organization in Tehran.

Highlights of the exhibition include sets of Kalash (lightweight traditional footwear also called ‘Besharabeh’), shoe locks, musical instruments, woodwork, leatherwork, furniture, and fabrics. Handicrafts exports from Kermanshah province make up 20% of the total handicrafts of the country.

Some 11,000 people are currently engaged as crafters across Kermanshah where 60 fields of handicrafts are being practiced.

In late 2017, Marivan, a historical city in Kermanshah, officially celebrated as named a world crafts city for Kalash, in an event attended by Farzad Hadi, the head of World Crafts Council Asia-Pacific Region.

**TOURISM**

TEHRAN — A number of traditional Iranian artists, artisans, and craftspeople possessed exceptional skills at the 5th Petrajaya International Lafcadio Hearn Festival (PHFA-CUP), which was held in the Malaysian metropolis from July 21 to 28.

Iranian exhibitors offered extracts of Persian arts in various fields such as rugs, carpets, handcrafts, traditional music, calligraphy, and dance.

The festival also played host to exhibitors, artists and craftspeople from other countries including Turkey, Uzbekistan, Morocco, Bangladesh, Thailand and South Korea.

The event was revolving around the theme “The Splendors of Music and Visual of the Islamic World,” which brought focus on exposing visitors to numerous Islamic-influenced musical styles. How to plan for weight loss — a detailed guide

When it comes to weight loss meal plans, the magnitude of effort you put in is crucial. Here are a few tips to keep in mind when you search for the most suitable plan.

**Creating a calorie deficit in a nutritious way**

A good weight loss meal plan should follow some universal criteria:

- It should include a variety of protein and fiber. Proteins and fiber-rich foods help you feel fuller longer, reducing cravings and helping you feel more satisfied.
- It should limit processed foods and added sugar. Rich in calories yet low in fiber, these foods contribute to fast weight gain.
- It should include essential fats such as polyunsaturated and monounsaturated fats that help reduce triglyceride levels and lower cholesterol.
- It should include a variety of vegetables and fruits. Both are rich in fiber and low in calories, and adding them to your diet can help you feel full.

**Building on nutrient-dense meals**

To incorporate these tips into your weight loss meal plan, start by planning your meals for the week. Choose a variety of whole grains, lean proteins, and plenty of vegetables and fruits. Each meal should contain a balance of protein, healthy fats, and carbohydrates.

**Pick a meal planning method that fits your needs**

There are various ways to meal plan, so be sure to pick a method that best fits your lifestyle and preferences.

- **Pick a daily routine**
  - Decide in advance what you need for each meal and snack.
- **Pick a weekly meal plan**
  - Plan your meals for the week in advance.
- **Pick a specific meal time**
  - Set a specific time for each meal.

**Consider snacks**

Eating healthy snacks between meals is essential. Choose healthy, low-calorie snacks that provide a boost of energy without adding extra calories.

- **Consider munchies**
  - Many people find themselves snacking when they are stressed or bored. To avoid this, try to find healthier alternatives.

**Eating a variety of foods is instrumental in providing enough nutrition**

- **Consider starchy vegetables**
  - Starchy vegetables such as sweet potatoes, corn, and potatoes are a good source of dietary fiber and essential nutrients.
- **Consider lean meats**
  - Lean meats are a good source of protein and can help keep you full for longer.

**Measuring portions**

It’s easy to overeat when you’re not paying attention. To avoid this, try to measure your portions accurately. You can use a food scale to help you do this.

**Eat slowly**

Eating slowly can help you feel full for longer. Take your time when you’re eating, and make sure to savor each bite.

**Drink plenty of water**

Drinking enough water can help you feel full and reduce your calorie intake. Aim to drink at least eight glasses of water a day.

**Avoid distractions while eating**

It’s easy to overeat when you’re watching TV, using your phone, or engaging in other activities. Try to eat in a quiet, peaceful environment.

**Eat breakfast**

Eating a healthy breakfast can help you feel full for longer and prevent you from overeating later in the day.

**Conclusion**

Eating healthy habits can take time, but it’s worth the effort. By following these tips, you can create a meal plan that not only helps you lose weight but also provides your body with the nutrients it needs.

**50% of deaths in Iran are cancer premature: health official**

**HEALTH TEHRAN –** There are 30,000 new cancer cases reported each year in Iran, said Deputy Health Minister Mohammad Reza Malekzadeh. “In 2019, 77,000 deaths occurred per year in the country and around half of them are premature deaths,” said Malekzadeh at an interview with Iranian newspaper Kayhan on Saturday.

“The number of premature deaths in Iran is the same as those in developed countries but in developed countries the rate of premature death is as low as 15 to 20 percent. In Iran, however, half the Iranians who have died have been under the age of 70,” said Malekzadeh.

Mature death is a matter of great concern among the top priorities of the Health Ministry, he noted.

“It is very unfortunate that around 45,000 people die under the age of 70. The causes of this are cancer or diabetes; however, half the Iranians who have died have been under the age of 70, which is a matter of great concern,” he added.

About 90,000 blind people live in Iran: academic

**HEALTH TEHRAN –** About 90,000 blind people live in Iran, the director of the National Research Institute of the Iranian Optometry Scientific Society said, adding that the number of people with visual impairment is on the rise.

“Some 80 percent of vision impairments, which lead to vision loss, occur before the age of 60,” said Dr. Afsaneh Hashempour, the secretary of the Iranian Optometry Society.

**Premature death worldwide**

According to the World Health Organization (WHO), a person dies as a result of a non-communicable disease (NCD) every 8 seconds.

Iran outlaws private ownership of wild animals

Iran has outlawed the private ownership of wild animals, including cheetahs, lions and tigers, and will force or imprison anyone who keeps wild animals in private in the country, the government announced on Wednesday.

"If a person seen in public walking an exotic pet, will be fined up to 800 million rials (about $20,000) and could face up to three years in prison," said Ali Teymouri, deputy director of the organization for hunting and fishing.

"If a person seen in public walking an exotic pet, will be fined up to 800 million rials (about $20,000) and could face up to three years in prison," Teymouri added.

To do this, many training courses are being held for the people involved in activities such as hunting, breeding, renovation, development, and equipment, in addition to organizing national green management conferences to be held by the end of this year (March 2020).

"How can green management benefit us?"

Green management is an initiative aiming at continuously improving the foundation of environmental management, such as the development of personal responsibility and civic responsibilities, environmental management systems, and environmental policies as well as conservation of biodiversity.

"Large and current environmental problems are rooted in the lack of proper awareness and cultural weaknesses regarding the relationship between man and nature. Under such conditions, environmental issues have only been highlighted in school and other sites which can be effective in the forming people’s approach toward environment from their childhood."

Effective school programs should not only help students to progress the knowledge, attitudes and skills necessary for responsible environmental behavior, but also have the potential to spread awareness of the concepts.
House of Khalifa future will be like Saddam, Gaddafi: Hadi al-Amiri

TEHRAN — The Bahraini regime has executed two convicted criminals in defiance of widespread calls to halt the executions, the Bahrain Centre for Human Rights said on Friday.

Reports said that King Hamad bin Isa Al-Khalifa ratified the verdict. A London-based Bahraini activist rights group, the Bahraini Institute for Rights and Democracy (BIRD), said “the executions mark one of Bahrain’s darkest days.” It alleged that the Bahraini regime planned this meticulously, timing the executions to coincide with US, EU and UK legislative recesses in order to avoid international scrutiny.

BIRD’s Director Sayed Mousavi al-Houthi said, “This is the most heinous of crimes. The executions and expulsions of the two young men were carried out by an absolute regime that is criminal in nature. Mamana has responded to the demand of the regime in full. The authorities have detained rights campaigners, broken up major opposition political parties, etc. It is clear that the regime has targeted democracy activists and deported those left abroad.

In March, 2019, troops from Saudi Arabia and the United Arab Emirates were deployed to assist Bahrain in its crackdown.

Johnson tells EU: ditch backstop or face no-deal Brexit

TEHRAN — British Prime Minister Boris Johnson was reported to have denounced the European Union’s decision to include the Irish border “backstop” in any future Brexit deal.

Johnson’s comments came in a letter to European Commission President Jean-Claude Juncker, in which he said that the “anti-democratic” backstop would undermine the integrity of the United Kingdom.

Johnson wrote: “The situation is not sustainable. The white paper and White Paper Annexes remain on the table, and I have asked the British authorities to redouble their efforts to find a solution.

“Unfortunately, it is now clear that the EU will not engage seriously in the search for a solution. Rather, it is determined to impose a backstop that will undermine the integrity of the UK.

“I am therefore afraid that we will have no option but to take no deal as an alternative to this illegal and damaging backstop. If the EU is serious about reaching a deal, it must be prepared to address our concerns.

Johnson also told Juncker that the British authorities had been working to build support for the idea of a backstop that would allow for a customs union to avoid the need for a backstop.

Johnson’s comments are likely to be interpreted as a further sign of the growing strain in relations between the UK and the EU, which has been exacerbated by the Brexit crisis.

Outrage as Trump brands mostly black Baltimore ‘infested mess’

TEHRAN — US President Donald Trump is being accused of racism after he attacked a prominent African American congresswoman.

The president’s morning diatribe ignited a storm of criticism from officials across the political spectrum, and even from some of his own supporters.

The president had accused Omar of being “dangerous” and “radical,” and said that she was “not a good leader.”

Trump’s comments have been widely condemned as racist and inaccurate.

The Baltimore congresswoman has been a vocal critic of Trump, and has often spoken out against his policies.

Trump’s comments come just weeks after he was accused of using racist language in his tweets.

The president has been under fire for a series of controversial comments, including his recent statement that he was “proud” of the Confederate flag.

Hungarian swimmer banned from leaving South Korea for sexual harassment probe

South Korean police have banned Hungarian swimmer Tamas Kenderezi from leaving the country as they investigate allegations of sexual harassment against a female Austrian journalist. Authorities said on Sunday.

Kenderezi was competing at the world championships in Gwangju, about 360 km (225 miles) south of Seoul, when he was accused of grabbing a swimmer's buttocks after she was filmed as he emerged from the pool on Saturday. The man wearing a white swimming cap, which carries his father's name, had reportedly grabbed the buttocks of a woman.

A Hungarian team official confirmed Kenderezi had been questioned on Saturday before being taken to a hotel in the city for further investigation by the Seoul Metropolitan Police Station.

“Tamas Kenderezi would not be allowed to leave South Korea for the next 10 days, the police official said, requesting anonymity as the investigation is ongoing,” a spokesman for the police station said.

YoungUp News Agency reported earlier that the athlete had denied the allegation.

The 22-year-old finished last in the men’s 200m butterfly semi-final on Saturday, confirming by Swimming Australia (SA) and Jack. “I certainly was, watching Mack, distressed about what he was going through,” she said.

“I don’t think I’ll ever forget the call I got on Sunday morning that day, that everybody’s worrying about. It’s just been around him for four years,” she added.

She says her team-mates were “informed of my departure” and that she was told to stay away from the pool. “I didn’t intentionally take this substance; I didn’t even know it was there,” she added.

“After finding out that Ronaldo’s name will be on the 12-month ban list, Jack requested. Juventus to play Ronaldo as written in the contract,” the agency said.

“(Juventus Football Club) agrees that Ronaldo shall play a substantial portion of the match. ‘Substantial portion of the match’ means that Cristiano Ronaldo will play a minimum of 45 minutes of the match.,” according to the statement.

“After finding out that Ronaldo’s name was not on the second half squad list, we waited until her team-mates had finished competing. ‘Substantial portion of the match’ lasts until 75 minutes. ‘Substantial portion of the match’ means that Cristiano Ronaldo will play a minimum of 45 minutes of the match,” according to the statement.

Within the context of the ban, Juve’s CEO Fabio Paratici was quoted as saying: “We have already started on the bench as Real wanted to replace Ronaldo with a top-level player in Formula One.”

“After finding out that Ronaldo’s name will be on the 12-month ban list, Jack requested. Juventus to play Ronaldo as written in the contract,” the agency said.

“(Juventus Football Club) agrees that Ronaldo shall play a substantial portion of the match. ‘Substantial portion of the match’ means that Cristiano Ronaldo will play a minimum of 45 minutes of the match.,” according to the statement.

The K League issued an apology earlier Saturday over Ronaldo’s non-appearance on the pitch.

A predatum to fans for Cristiano Ronaldo did not play in the match at all. ‘Though he was ready to play with his body,’ said the coach. ‘The K League said it will seek financial compensation from the club.’

At the post-match press conferences, Juventus manager Maurizio Sarri said he ‘did not play Ronaldo because of his physical condition. Ronaldo did not respond to the K League’s decision on the medical condition. The club was led by the medical staff and the player’s absence will not stop the debate that was led by the team’s performance against Barcelona. The club’s decision was based on the Spanish market and its two-year ban on playing when the player is injured and the player’s condition. ‘We will pay more caution on the field after K League’s request to end it.’

Lawrence, who was named in the England Women’s squad for the 2020 Tokyo Olympics, has been found positive for the anabolic substance Ligandrol and her B-sample has also tested positive for the same substance.

She was provisionally suspended by Swimming Australia and flew home from a training camp in Japan. She says her team-mates were “informed of my departure,” and that she was told to stay away from the pool.
Iran claim title of 2019 FIVB U21 World Championship

The game was a thrilling encounter with the two teams playing out a 15-15 tie-breaker to decide the outcome. Iran held the lead but Brazil came back to level the match at 22-22. The teams then exchanged points before Iran secured victory in the tie-breaker.

Iran's Esfandiar named FIVB U21 World Championship MVP

Iranian senior volleyball player Morteza Sharifi of Iran was named as the Most Valuable Player of the 2019 FIVB U21 World Championship.

In the final match of the opening day, defending champions Uzbekistan were defeated 3-1 by Iran.

Rouhani congratulates U21 volleyball team on world championship title

Iranian President Hassan Rouhani congratulated the young Iranian volleyball players following their historic win in FIVB Men’s U21 World Championship.

Tweetering on Saturday night after the Iranian side’s historic victory, Rouhani wrote, “The decisive victory of the young volleyball players of our nation has brought joy to the entire nation. This victory promises a bright future for our beloved Iran’s volleyball.”

The president then congratulated this proud victory to the hard-working tall players of the national team, their managers and coaches.

Talented volleyball players have been outstanding in the past years. Iran’s senior men have won the gold medal in the 2020 Tokyo Olympic Games.

Iran has a strong volleyball team and is set to compete in the next Olympic Games. The team has been training hard to prepare for the upcoming events.

Iran judoka earns bronze medal in Zagreb Grand Prix 2019

IRANNA – Iranian judo fighter Saeed Molaei received a bronze medal at Zagreb Grand Prix 2019.

The event was held with the attendance of 683 athletes from 90 countries.

Iran judo medalist, Saeed Molaei, wins the bronze medal in the men’s open category at the Zagreb Grand Prix 2019.

Molaei defeated his opponent, a French judoka, to win the bronze medal. He then went on to win the gold medal at the next event.

Terrorists threaten to disrupt Olympic Games

A group of terrorists threatens to disrupt the Olympic Games, which will be held in Tokyo next year. The group has been active in the past and plans to attack the event.

The organizers of the event are taking extra security measures to prevent any possible attacks.

Ex-Tractor striker Lee Erwin joins New Ross County

New Ross County striker Lee Erwin believes his perspective of football has changed after a spell in Iran.

The 24-year-old left Sanat Naft and Elbavid to move to Iran, where he played for a year and then decided to return to the UK.

Erwin, who was frozen out in the Middle East, signed for Ross County last month.

He has scored four goals in six appearances since joining the team.

He said, “I’m really pleased to be back in Scotland and playing regularly. It’s a great move for me and the club.”

Modibo Maïga linked with Iran’s Persepole

TASNIM - Malian forward Modibo Maïga has been linked with a move to Iran’s Foolad. The 25-year-old is on the radar of Foolad and has been linked with a move.

Maiga started his playing career at Malian club Stade Malien and has also played for French clubs Lille and Reims. He has also been linked with Thai club United.

The Iranian club has been monitoring Maïga’s form and could make a move in the coming weeks.

Freestylists leave Iran for World Cadet Wrestling Championships

TASNIM – The Iranian freestyle wrestling team has left for the 2020 World Cadet Wrestling Championships.

The competition will be held in Sofia, Bulgaria, from July 27 to August 9.

Head coach of the Iranian freestyle wrestling team Amir Dokhah has named the following squad for the competition:

- 40kg: Ali Arab
- 48kg: Bahram Amadeh
- 54kg: Ali Gholizadeh
- 65kg: Moein Tehrani
- 71kg: Ehsan Zadeh
- 76kg: Ali Arab

The team is expected to perform well in the competition and could win several medals.

The Cadet World Championship is an event where the best wrestlers aged 16 and 17 years old compete.

The Iranian wrestling freestyle team left Tehran to compete in the World Championship, which will be held in the capital of Azerbaijan.

The 7th CISM World Games – the 7th PEACE GAMES – will be held in Weinburg City from 15th to 30th October with 23 CISM Disciplines and one demonstration sport, which will be tennis.

Don’t miss the action and witness the best wrestlers from around the world.
Godfrey Cheshire’s book on Kiarostami published

ADDED TEHRAN – American critic and filmmaker Godfrey Cheshire’s book “Conversations with Kiarostami”, has recently been published by Woodville Press, the Film Desk has announced.

The Iranian cinema expert has accumulated for the first time a far ranging series of interviews with the world-renowned Iranian director Abbas Kiarostami in the book.

Conducted during the 1990s, these in-depth conversations offer a film-by-film account of Kiarostami’s views of his artistic development from his first short “Bread and Alley” in 1970 to the 1999 feature “The Wind Will Carry Us”.

Front cover of American critic and filmmaker Godfrey Cheshire’s book “Conversations with Kiarostami”. (Photo by courtesy of Film Desk)

In addition to an introduction from Cheshire, the book also carries a preface by Ahmad Kiarostami, the director’s son.

“During Godfrey’s several visits to Iran throughout a decade, he formed a relationship with my father that I had rarely seen him having with other writers,” Ahmad wrote.

“The play will be performed at the Kyoto Prefectural Cultural Hall ALTI on October 24 and 25, the theater hall ‘Hearing’ in the Japanese city of Kyoto during October.”

A number of experts from the province as well several Iranian filmmakers who have experience in making films in the region are expected to attend the program.

“The great cultural and economic potentials of the Sistan-Baluchestan region have been raised by unrealistic portrayals and as a result the normal chances of economic progress have been eliminated,” the organizers said in a statement.

“Due to the recent economic recession in the country, I preferred not to showcase works in the region, I preferred to introduce these high quality works will go on display at the exhibition this year,” he said.

A scene from the play “Hearing” in the Japanese city of Kyoto.

“Hearing” is about an older student of a girls’ boarding school who conducts successive hearings of youngsters, one of whom claims to have heard a male voice from another student’s room.

Japan next stop for Mehr “Hearing”

ADDED TEHRAN – The Mehr Theater Group, an Iranian troupe led by director Amir-Reza Koushasti, is scheduled to perform its acclaimed play “Hearing” in the Japanese city of Tokyo during October.

The play will be performed at the Kyoto Prefectural Citizens’ Hall ALTI on October 24 and 25, the theater hall already has announced.

A scene from “Hearing”.

“Africa” is no trace of the usual ‘exotic’ approach… That is what is well-known that Godfrey was one of the first people who introduced the Iranian cinema to America and, yet, there is no trace of the usual ‘exotic’ approach... That is what you will find in this book: a refreshing conversation with Abbas that has substance, and is far from cliche,” he added.

Musical “White Parachute” opens at Tehran theater to promote peace

ADDED TEHRAN – An advisor to the Ministry of Culture and Islamic Guidance is preparing a plan to preserve the Persian language.

The plan is being prepared in response to Leader of the Islamic Revolution Ayatollah Seyyed Ali Khamenei’s call for protecting the Persian language from decay, Mahmud Shalui told the Culture Ministry.

After the Leader warned about the decay of the Persian language in May, we have decided to work on a plan to preserve the Persian language, which has been attacked by foreign languages over the past few years,” he said.

“Persian is one of the richest languages in the world, and its use can connect us to other countries and cultures. We will support those who work in this field and will try to promote it worldwide,” he added.

The plan will first be put into effect in the Ministry of Foreign Affairs and its sweetness can connect us to other countries and cultures. We will support those who work in this field and will try to promote it worldwide,” he added.

Culture Ministry session to review image of Sistan-Baluchestan in Iranian cinema

ADDED TEHRAN – The image of Iran’s Sistan-Baluchestan Province in Iranian cinema will be discussed during a session opening Thursday at the Vianet House in Tehran.

The four-day session is the first meeting of a series, which aims to study areas for development of the province, the house has announced in a press release published on Sunday.

A number of experts from the province as well several Iranian filmmakers who have experience in making films in the region are expected to attend the program.

“Due to the recent economic recession in the country, I preferred not to showcase works in the region, I preferred to introduce these high quality works will go on display at the exhibition this year,” he said.

“Several filmmakers have shot their films in the region over the past years. The most recent one is director Narges Abyar’s 2019 drama “When the Moon Was Full”. The film is about Abdol-Malik Rigi, the younger brother of Abdul-Malik Rigi, the founder and leader of the Jundallah terrorist group in southeastern Iran, who marries Farzad Manouri, a woman from Tehran. He forces Farzad to leave her homeland along with her brother to live in Pakistan where they find themselves involved in Jundallah terrorist activities.

Flaming” by Hamid Namastollahi was also shot in the province. It tells the story of a jealous man named Farid. He is actually a real martial, but believes himself to be a hero, the champion of champions.

Farid is a drug addict, has no job, his wife has left him and he suffers from using drugs, he loves with his mom and has also disrupted her life as well.
