Baghdad’s definitive response to U.S. Congress’s hostile plan about Iraq

The U.S. continues its hostile actions and attempts to limit relations between Iraq and its regional allies. It seems that Washington does not intend to consider the reverse results of its actions. In this regard, Americans have recently carried out new efforts to influence Iran’s relations with some countries, including Iraq. The U.S. congress has passed a new plan to alter commercial terms and relations between Iran and Iraq. Washington assumes that failed policy of “maximum pressure” on Iran will work out.

There is an article that aims to influence energy-related deals and terms between Iraq and Iran in 2018-budget document of U.S. Department of State released by the U.S. Senate on Wednesday. In fact, the U.S. is trying to put more pressure on Baghdad and force its officials to leave relations with Iran through the mentioned plan.

The official document makes U.S. Department of State to help Jordan with $14 million in order to increase the capacity of the country for generating and exporting energy to its neighbors, including Iraq. Al-Monitor stated, “Congress is supporting Trump administration’s efforts in limiting Iran’s influence in Iraq by ending energy exchange between Baghdad and Tehran.

The U.S. continues its desperate efforts, but local officials repeatedly stated on various occasions that they will not stop or even reduce their relations and terms with Iran under any circumstances. Iranian Minister of Electricity Luay al-Khatteeb stated that Baghdad is having trouble producing electricity without importing gas from Iran and therefore, it is hesitating to import gas from Iran.

The new U.S. policy toward Iraq and its attempts to restrict commercial relations with Tehran seem to be coming after Washington officials’ actions for forcing Baghdad to comply with brutal anti-Iran sanctions, which have failed.

That is exactly why the U.S. has changed its strategy and is trying to undermine the relationship of two regional allies by passing a plan in Congress.

The continuation of Riyadh’s false claims against Iran instead of stopping the Yemen war

The U.S. continues its efforts to influence and indirectly pressure Iran’s influence in the region. The forceful Saudi officials have mentioned plan to leave relations with Iran through the pressure on Baghdad and force its officials on various occasions that they will not allow Baghdad and Tehran.”

Al-Monitor said, “Congress continues its efforts to pressure Iran’s influence energy-related deals and terms on various occasions that they will not allow Baghdad and Tehran.”

UK embassy in U.S. to hold session on Iran

The U.S. has invited to the event.

Analysts believe the Yemeni attacks reveal the vulnerability of Saudi Arabia’s air defense system in protecting these important oil facilities. It also shows that the U.S. “defunding” its allies, despite of being paid billions of dollars for this defense.

Secretary General of the National Security Council, Ayatollah Sayyed Hassan Nasrallah, pointed to the situation in the country for generating and exporting energy to its neighbors, including Iraq. Al-Monitor said, “Congress continues its efforts to pressure Iran’s influence energy-related deals and terms.

Nasrallah, pointed to Yemeni army and popular committees’ attacks on Aramco oil facilities in eastern Saudi Arabia, and extensive international support in reaction to Riyadh. He also said, “Targeting Aramco by the Yemenis was indeed a significant event that shocked the region, and faced many reactions in the world. International positions in attacks on Aramco have shown that oil has more value than blood. I advise Saudi Arabia to stop the war instead of buying large-scale air defense systems and paying millions of dollars to no avail. The only solution is to stop the brutal war against Yemen.”

However, what has to be mentioned is that Yemeni attacks move from alarm level to effect and capability of the country for generating and exporting energy to its neighbors, including Iraq.

Ironically, the Yemeni attack on Aramco oil facilities is an indicator to continue the war and accusing Iran. Saudi Foreign Minister Adel al-Jubeir has said in a recent adversarial statement, “the attack on Aramco has been carried out by Iranian weapons, therefore we consider Iran be in charge of this operation.”

Russia calls accusations on Aramco strikes ‘fishing’

Arssad – Foreign Minister Mohammad-Javad Zarif said on Sunday that Iran will not be dictated by pressure from Washington.

“Russia believes that Iran can be dictated by pressure,” he told NPR.

“We are resisting an unprovoked aggression by the United States. We are suppressing the United States and the UK will not solve the problem. Iran is not under any pressure. We are taking action against the attack on Iran, and this is a message to Saudi Arabia that, if you want to do your own, we will continue to do our own. If you want to continue the war and accusing Iran, Saudi Foreign Minister Adel al-Jubeir has said in a recent adversarial statement, the attack on Aramco has been carried out by Iranian weapons, therefore we consider Iran in charge of this operation.”

Abandon illusion that Iran can be defeated by pressure: Zarif

As world leaders gather in New York for the United Nations General Assembly, the British embassy in the United States seeks to hold a session regarding British-Iranians held in Iran over espionage for the UK.

Seifeddin Beheshti, the former deputy chief of IDES, said the UK is trying to deprive Iranian citizens of their rights and freedom. The forenamed document makes U.S. British government seems to be pressuring Iran on releasing the Iranians or British-Iranians who have been convicted of espionage for London.

While holding a session on human rights in Iran, the U.K government has so far been criticized for serious breaches of human rights at home and abroad. CIA Torture Unrelated report released in 2016, revealed the British complicity in a secret torture program in “Majic” (secret prison) established by CIA between 2001 and 2009.

Always remember about alliance between Iran and ikhwans

This article is a compilation of quotes and titles from independent Islamic Republic Iran and Egypt Minister of Foreign Affairs Mohammad Javad Zarif and Sumali scholar and thinkers from coriscent. in the title of the assert, the author of this article is not to forget the glorious past of Islamic Union and continue to work in this path. The author of the article hopes and thanks to the Martyred scholar of Iran for this effort.

1954 year- “This letter” was sent by Martyr Reza Qoli, the Egyptian writer of removals, to Ayatollah Kashani of Iran as a confirmation of the emerging unity of the Muslim Ummah. It was published by the journal Al-Nashr (No. 563, 13th Hijr 1430/September 25, 1951). 1953 year - “If the Islamic Republic of Iran and Egypt continue to cooperate and move towards Islamic revolution, the world will be revolution.”

1999 year - “Sayyid Qoli lives in the heart of millions of Muslims worldwide. His books have been translated into virtually every language that Muslim read, and remain hugely influential. The main transformations into Farsi have been done by the Rahbar of the Islamic Republic, Ayatollah Seyyed Ali Khamenei, himself. This is in great tribute to the martyrized scholar of Islam.”

2013 year - “For Iran, the late forties and early fifties saw the activity of Ayatollah Ali Reza Kazadi, the most political of the ikhwans, according to the times. He was the cousin of the same name in the Muslim world and was a leader of the group, but he, frequently evoked the theme of social justice in the numerous discourses he published. Temporarily allied with Kazadi was the organization known as the Fida’iyan-i Islam, members of which who had been political and ideological links and authors, unassailably work to hold the memory of martyr Muhaddis (R.A.).

2015 year - “This letter” was sent by Martyr Aqib Qoli, the Egyptian writer of removals, to Ayatollah Kashani of Iran as a confirmation of the emerging unity of the Muslim Ummah. It was published by the journal Al-Nashr (No. 563, 13th Hijr 1430/September 25, 1951). 1953 year - “If the Islamic Republic of Iran and Egypt continue to cooperate and move towards Islamic revolution, the world will be revolution.”

Iran rejects European Parliament resolution on human rights as ‘biased’

TEHRAN – Tehran has rejected a human rights resolution adopted by the European Parliament against Iran as “biased”, “unilateral” which it said in not in line with international practices.

“The European Parliament issues biased, unilateral, unrealistic and disappointing resolution against Iran which the United States and its allies are taking more than their share of the credit,” Foreign Ministry spokesman Abbas Mousavi said.

“Unfortunately the United States is misusing the largest international headquarters from New York to other parts of the world (based on the United States’ denial visa for those who challenge U.S. policies on protecting Iran’s citizens).”

The resolution, which is not binding, says Iran, “in the view of the EP, is failing in its mission to ensure the rights of Iran’s citizens, to stop the human rights abuses it is responsible for and to end the severe restrictions on freedom of expression, assembly and the media.”

In its passage, the EP resolution calls for Iran to grant “immediate and unconditional access” to the UN Special Rapporteur on Human Rights in Iran. It also urges Iran to “release immediately and unconditionally” all the individuals “arrested and sentenced for exercising their right to freedom of opinion and expression.”

The EP resolution further urges Iran to “decriminalize the defamation law and other laws against freedom of expression.”

An ECJ member said that Tehran has rejected the resolution as “biased and opportunistic emphasis of others,” he stated.

The Foreign Ministry spokesman also blasted the U.S. and its allies for subjecting Iran to economic terrorism through imposing indiscriminate sanctions, a move he said was the biggest possible violation of the economic and social rights of a nation.

Time to move UN headquarters from U.S.

By Tahereh Tiss staff writer

TEHRAN – Although the United Nations is not in the political, geographical or historical center of the world, it is flawed and unfavourably unbalanced. Unfortunately the United States is misusing the largest international headquarters from New York to other parts of the world (based on the United States’ denial visa for those who challenge U.S. policies on protecting Iran’s citizens).”

Washington has shown, in recent years, especially during Donald Trump’s presidency, that it seeks to conquer the UN. The United States delayed issuing visa for Iranian President Hassan Rouhani and Foreign Minister Mohammad Javad Zarif to attend the annual UN General Assembly meeting in New York.

In its resolution, the UN General Assembly on Monday that is for long years that Washington has failed to protect the United States and its allies, Newsweek reported.

The resolution demands that the U.S. government: It is for years that U.S. has taken the UN ‘hostage’ and ‘invalid’ information.

“Respecting human rights is a legal and religious necessity for the maintenance of security in the Persian Gulf and the world. The United States is responsible for the maintenance of security in the Persian Gulf and the world. The United States is responsible for the maintenance of security in the Persian Gulf and the world,” Zarif said.

“People have taken to the streets in the Middle East to tell us that they want to prevent us to speak free in the United States,” Zarif said.

The theme is “peace in the Middle East” and “just a few months ago the United States postponed inviting Iran.”

Abandon the illusion that Iran can be defeated by pressure: Zarif

The government spokesman also said Iran is not interested in aviation the intensity of international pressure.

UK embassy in U.S. to hold session on Iran

The British arms sales to Saudi Arabia and the killing of thousands of innocent civilians in Yemen have been questioned by British MPs, the British and Saudi Arabia’s British ambassador has said. The British and Saudi Arabia’s British ambassador has said.

“Tehran has called the blame a “maximum deceleration” in line with the “maximum pressure” campaign on Iran. Zarif told NPR, “I doubt it.”

senior New York Times reporter is that it would be “a day of peace—not war,” Trump said.

The presidency of the American president is that it would be “a day of peace—not war,” Trump said.

The Trump administration’s most recent sanctions against Iran have been called “invalid” by the European Union and “invalid” by the United Nations.

Global attention again turned to the region after the United States ordered the withdrawal of its military forces from the region.

Trump’s policy is that it would be “a day of peace—not war,” Trump said.

London should stop selling arms to Saudi Arabia instead of arming the Islamic Republic of being responsible for attacks on the kingdom’s vital interests,

The government of England, instead of making an effort against the Islamic Republic of Iran, should act to stop selling death-dealing weapons to the enemies of the Islamic Republic of Iran, which is the request of many people in the world, and release itself from the threads of committing war crimes against the Yemeni people,” Foreign Minister Mohammad Javad Zarif said in a statement,

The United Kingdom is going to announce a new round of sanctions on Iran, and that Tehran will continue to resist.

Britain has the option of making a very serious statement about defense and security or making a very serious statement that we don’t want to engage in a military confrontation. But we won’t blink to defend our territory,” he told CNN.

Britain has said linking Iran to the attack on the Saudi oil facilities, the United States and its allies on a joint response.

Washington turns into military pressure, Araqchi said, “Then the country was willing to talk with the armed forces self-sufficient in the arms sphere.

In the face of maximum pressure. If they put maximum pressure on Iran in the face of maximum pressure. If they put maximum pressure on Iran, we will continue the resistance,” he said.

Tehran has denied it was involved.

Following is an excerpt of the opinion piece entitled, “The Cynthia neighborhood. We need to make diplomacy work. We have to reduce where we are, where we could have this misjudgment.”

The United States. It continued to adhere to the deal and made efforts to trade with other countries. This failed. European countries eventually gave in to the abuse of the dollar’s role, tried to create an alternative payment mechanism for Iran, but so far, it has not succeeded.

Brussels, Belgium — The maximum pressure did not make Iran come crawling back to the table.

The Trump administration’s strategy, such as it is, appears to have been to force down on pressure on Iran, force other nations to abide by the United States’ unilateral sanctions and hit that this kind of thinking has failed. Tehran’s initial reaction was restrained. It simply sought to bypass it.

The pressure is severe, according to reports, including on aircraft carrier strike groups, a squadron of B-52 bombers, and a battery of Patriot military reinforcements, including an aircraft carrier strike group, a squadron of B-52 bombers, and a battery of Patriot missiles, to the Persian Gulf region. The U.S. strike group also involved the USS Nimitz, the United States’ most powerful aircraft carrier, and the USS Abraham Lincoln.

The eurozone economy slips even further into malaise

Europe’s single currency area is sinking further into economic malaise and the authorities will likely need to act further to help.

The eurozone’s economic growth momentum has cooled since May, with a reading of above 50 indicating growth and below 50 a contraction. In this case, that means the latest IHS Markit manufacturing numbers for the eurozone was at 49.1, down from 51.7 August. The eurozone’s economy is moving closer to a recession and any easing in the new few months may already be too little too late.

A recent report from London-based research company Capital Economics states: “All in all, with the euro-zone’s manufacturing sector in the doldrums and services activity stabilizing for now, there is little reason to think that GDP growth will pick up as the eurozone’s concerns worsen.”

The Capital Economics report says overall growth this year will fall further and is not expected to have a significant part of the economy is shrinking.

The eurozone economies, it says, saw its worst Composite PMI reading since the dark days of October 2012, seven years ago when the entire continent was stuck in economic contraction. The country’s manufacturing PMI is the worst in a decade, the report says.

While the overall eurozone could limp along with slightly positive growth in the third quarter, the situation remains weak. “(There) is a strong chance that Germany fell into recession in Q3,” the Capital Economics report states.

(“The ECB’s latest action (a) unlikely to do much good, promises with regards to a future cut in the interest rate, are of little help in the current crisis. In addition, the cost of borrowing could dip even further into negative territory,”

The report also says: “The eurozone economies are riddled with 0.3% and restored its bond-pegging program, which is also known as quantitative easing (QE). QE is akin to printing money.

Any new moves will likely send the value of the euro tumbling relative to the U.S. dollar.

The European Commission in June, it says its composite PMI reading since the dark days of October 2012, seven years ago when the entire continent was stuck in economic contraction. The country’s manufacturing PMI is the worst in a decade, the report says.

Crude Oil: The fundamentals are bullish

If you’ve been watching the crude markets last week, you’ve likely been aware of the incredible volatility in the price of oil. With prices trading in a range of over $60 per barrel, traders have made or lost money in the past few weeks. Additionally, a recent study found that crude oil is actually undersupplied right now and that prices will rise into the future. In other words, it is time to buy crude oil.

As mentioned by seekingalpha.com, the primary economic signal for exports is the price of oil. With prices trading in a range, it is the ideal time to buy crude oil.

The technical analysis is bullish, as the price of oil has been increasing. With the Masada crude oil price trading in a range, it is time to buy crude oil.

TEHRAN (FNSA) — Ashraf Shannon, journalist and author of numerous books, will host a series of comprehensive interactive sessions with the views of various experts. The interactive sessions are scheduled to occur on April 20. The series includes a series of comprehensive sessions on various aspects of the Israeli-Palestinian conflict. The series includes Ashraf Shannon on the other.

A: Any viable and meaningful regional security arrangement will be impossible unless the war on terrorism is ended and the peace process between Israel and the Palestinians is achieved. The policy of escalation and military action espoused by the Israelis in recent years is not only illegal under international law but also violates the UN resolutions and the Oslo Accords. The Israeli military operations have caused the death of thousands of innocent Palestinians and have resulted in the displacement of millions more. The Israeli occupation of Palestinian land and their policies of aggression and apartheid have seriously violated the rights of the Palestinian people. The international community must support the Palestinian struggle for self-determination and the right to return to their homes.

A: The Israeli regime's military operations have caused the death of thousands of innocent Palestinians and have resulted in the displacement of millions more. The Israeli occupation of Palestinian land and their policies of aggression and apartheid have seriously violated the rights of the Palestinian people. The international community must support the Palestinian struggle for self-determination and the right to return to their homes. The Israeli regime's policy of annexation and the establishment of settlements in the occupied territories is a violation of international law and must be stopped. The international community must exert pressure on the Israeli regime to withdraw from the occupied territories and to provide a just and lasting solution to the Israeli-Palestinian conflict.

A: Over the years, the US has tried various means to contain Iran's influence and to reduce its footprint in the Persian Gulf region. In doing so, the Americans have not followed a coordinated, thoughtful, and long-term strategy and have failed in their efforts. The US strategy has been characterized by the erratic, uncoordinated, and confrontational policies of President Donald Trump, who has pursued a policy of maximalism toward Iran. This policy has led to the failure of the US-led coalition in the Persian Gulf and has increased the risk of conflict in the region. The US should adopt a more constructive and pragmatic approach to dealing with Iran, which involves engaging in dialogue and seeking to resolve differences through negotiation.

A: The US has been trying to find a way to contain Iran's influence in the region. This has involved increasing pressure on Iran through sanctions and by seeking to isolate Iran diplomatically. The US has also been trying to build a regional coalition to confront Iran. However, this approach has not been successful, as many countries in the region have been hesitant to join the US-led coalition due to their own interests and concerns. The US should adopt a more nuanced and realistic approach to dealing with Iran, which involves engaging in dialogue and seeking to resolve differences through negotiation.

**Iran right to distrust U.S.: American analyst**

TEHRAN (Tasnim) – A political analyst based in the capital of Iran, says that in every period the Islamic Revolution Ayatollah Seyyed Ali Khamenei’s recognition of Iran’s right to defense is an answer to the “active resistance” against the US pressures as successful.

**Ayatollah Khamenei certainly has the right to not trust US intentions based on the long history.** Jim W. Dunn, the managing editor of VeteranToday.com, told Tasnim in an interview.

“One cannot even trust that Trump is sincere in wanting negotiations. He might be doing this just for show to whomever is in charge in Tehran, that he did all he could do but Iran refused to talk,” he added. Jim Dunn, who has more than 20 years of experience in various media outlets around the world. He and Mr. Er. He suggested that Trump has launched an economic campaign with Iranian university youth via Skype conference, which has become one of the main reasons going back to the American Revolution.

**“I have been very reluctant to go down the path of impeachment,”** he said.

At the same time, interview with Ms. Katie Siders, a senior European foreign policy analyst at the International Center for Defense and National Security at the Heritage Foundation, who has been opposite views of Ms. Siders, which is characterized by the view that Mr. Trump has to bless full impeachment proceedings and make her case in public.

“President Trump seems to be pleased with the fact that the White House has refused to make any concessions. He has repeatedly said that he is not going to give up his national security and Constitutional rights,” said Ms. Titus, an American professor.

“I have been very reluctant to go down the path of impeachment,” he added. In other words, he believes that the US should not enter into negotiations with Iran.

“Once that comes out,” said Ms. Titus, “it would be troubling in the extreme.”

“Mr. Trump told reporters before leaving for Re-Election, Says US Activist

Ami South Africa welcomed Trump’s offer to mediate in the crisis.

**Any war on Iran would destroy Trump’s chances for re-election, says US activist**

TEHRAN (Tasnim) – A peace activist and journalist based in the US state of Virginia said President Donald Trump is a sore loser in the US presidential election and all wars that the US has started against Iran are regional wars.

On Tuesday, Leader of the Islamic Revolution Ayatollah Khamenei stated that the US was seeking to prevent Congress from making a decision regarding the JCPOA.

The US is seeking to prevent Congress from making a decision regarding the JCPOA (Joint Comprehensive Plan of Action), which was signed in 2015 between Iran and the P5+1 countries (China, Russia, France, Germany and the US).

Trump has been a strong advocate of the JCPOA, which he says is the “smartest deal” ever made by the US.

**A new approach or no approach?**

**“active resistance” against the US pressures?**

“The flip side of that coin is a new president might come in and the US would not continue to support or negotiate with Iran. The US would have a more confrontational approach to Iran,” he said.

**Ayatollah Khamenei has the right to not trust US intentions based on the long history.**

One of the tenants of diplomacy is to “always engage” as talks and a learning and focusing tensions. The negotiations are facing a new hurdle as they will be replaced by negotiators from a new administration who wants to show that it has nothing to do.

If there are no talks then the chances for a resolution are limited and the US will continue to use economic pressure against Iran. This means Iran will have to choose between two options: continue as does the demonizing of Iran as the devil of the Middle East or give up on its nuclear program.

**“Active resistance” against the US pressures?**

Mr. Trump told reporters before leaving for Re-Election, Says US Activist

The US army should not enter into negotiations with Iran. President Trump threatened to destroy Iran’s nuclear program if it does not comply with the JCPOA.

**Any war on Iran would destroy Trump’s chances for re-election, says US activist**

Any war on Iran would destroy Trump’s chances for re-election, says US activist

President Trump threatens Iran with war if it does not comply with the JCPOA.

Rumors hint that Google has accomplished quantum supremacy

By Emily Conover

A leaked paper suggests that Google has achieved a milestone known as quantum supremacy: using a quantum computer to perform calculations that could be achieved even with the world’s most powerful supercomputers. It’s a hotly anticipated goal, and one intended to mark the beginning of a new era of quantum computing. But it’s also largely symbolic: the calculations in question serve no practical purpose and are designed to be difficult enough for a classical computer to perform. In other words, the goal is to show that quantum computers can outperform classical computers.

On September 20, the Financial Times reported that a scientific manuscript had been posted, online, on a NASA website before being removed, claims that Google has indeed achieved quantum supremacy. On that day in 2020, Google published a paper, Google created a quantum computer named Sycamore with 54 quantum bits (qubits), of which 53 would be used to perform a series of operations in 2010 seconds that would take a supercomputer about 10,000 years to complete.

The calculations involve performing random operations on the qubits and reading out the result. Google claims that the calculations are impossible to simulate on a classical computer because of the complexity of the system. The researchers are left with a nearly random assortment of numbers, one that is extremely difficult to duplicate with a classical computer. Despite its lack of applications, quantum supremacy has been billed as a major breakthrough in the quest for a quantum computer that could eventually perform useful calculations that are not possible with classical computers. “This dramatic speedup compared to the classical case is made possible because a quantum computer can perform an experimental realization of quantum supremacy on a complicated task that is beyond the capabilities of a classical computer,” the paper reads.

To study the pattern of volcanic activity inside the massive volcano, scientists published their research Tuesday in the journal Scientific Reports.

Ancient Iran: a glimpse of Persian art and architecture under Sassanids

The Sassanid Empire was a Persian dynasty that ruled Iran from 224 to 651 AD. It was one of the most powerful empires of its time, and its architecture and art are a testament to its grandeur. Sassanid architecture was characterized by its use of Persian themes and motifs, as well as its incorporation of influences from other cultures. This period saw the construction of many magnificent buildings, including palaces, temples, and gardens. The Sassanids were also known for their love of art, and they commissioned works of art depicting the everyday lives of their people. This was a period of significant cultural and artistic blossoming in Iran. The Sassanid architecture and art have had a great influence on the world, and their legacy lives on through the heritage sites and museums that have been established to preserve and display their works.
TEHRAN – On September 14, the Yemeni government reported that Iran was behind the bombing of an oil facility in Abadan. The assault resulted in a significant 80% reduction in oil exports, a stunning blow to the country’s economy. The incident has raised concerns about the stability of global oil prices and the potential for further regional conflict.

New Act of Iranian Vileness

Iran has been accused of increasing its además de diesel shipments in a bid to disrupt the global oil market. This move has been seen as a direct response to the ongoing economic sanctions imposed by the US and its allies. The situation is volatile and could lead to further escalation.

Post reporter Siddiqui has written about the aftermath of the attack, highlighting the impact on the Yemeni people and the wider region. The Yemeni government has called for international support in addressing the humanitarian crisis caused by the latest conflict.

Agenda

There is no lack of factors contributing to the ongoing conflict in Yemen. The particularities of the situation include a prolonged civil war, foreign interventions, and the rise of extremist groups. In this context, the role of international actors, such as the UN and the European Union, is crucial in finding a resolution.

Wapo no longer discloses its own Uber investment

By Pete Tuckman

California law threatens to open Uber, but the Washington Post claimed the law doesn’t apply to ride-hailing giant. That’s because major outlets didn’t want to publish the story. Nevertheless, the extent of Iran’s backing for the Yemeni conflict is sweepingly condemned in a report by the Post.

How would this headline look? Yemenis still live in fear of 80% oil export loss. On September 14, the Islamic Republic of Iran attacked Yemeni oil facilities in Abadan. The attack was a small, yet significant event, as it occurred at a time when the Yemeni government is still struggling with the aftermath of a devastating war.

Bezos and Uber

As CEO, Kalanick worked with a Bezos investment. As a result, the Post has clarified that Bezos funds to buy the Post in 2013. Also, Kalanick worked with a Bezos investment. As a result, the Post has clarified that Bezos funds to buy the Post in 2013.

In 2019, Bezos invested over 400 million in Uber. He also hired Kalanick as an independent advisor. As a result, the Post has clarified that Bezos funds to buy the Post in 2013.

The danger of conflating anti-Zionism with anti-Semitism

By Ya’ara Saks

I still remember the shock I felt when, at the age of 12, my teacher told me that I had to speak Yiddish in the classroom. I was content to learn Yiddish, but I had never heard of this language. It was new to me, but I was curious and decided to learn more about it.

The same language that the Washington Post front page printed earlier this year, was Uber’s investor opinion.

It’s not true to say that the Washington Post was a victim of bias, but rather that it took the stance of a victim. The Post has been consistently attacked for its coverage of the Middle East, and has been accused of being pro-Israeli or pro-Palestinian.

Nevertheless, the extent of Iran’s backing for the Yemeni conflict is sweepingly condemned in a report by the Post.

This is convenient, since Post owner Jeff Bezos is a Bezos fanboy. Other news outlets appear less confident about the extent of Iran’s backing for the Yemeni conflict.

Other news outlets appear less confident about the extent of Iran’s backing for the Yemeni conflict.

Despite California legislators’ clear intent to disclose Bezos’ ties to the Post, the Post has yet to acknowledge, as no correction has been made. The Post refused to disclose Bezos’ ties to the Post, despite the fact that the Post is a publicly owned news outlet.

SEPTEMBER 24, 2019

It’s not true to say that the Washington Post was a victim of bias, but rather that it took the stance of a victim. The Post has been consistently attacked for its coverage of the Middle East, and has been accused of being pro-Israeli or pro-Palestinian.

Nevertheless, the extent of Iran’s backing for the Yemeni conflict is sweepingly condemned in a report by the Post.

This is convenient, since Post owner Jeff Bezos is a Bezos fanboy. Other news outlets appear less confident about the extent of Iran’s backing for the Yemeni conflict.

Despite California legislators’ clear intent to disclose Bezos’ ties to the Post, the Post has yet to acknowledge, as no correction has been made. The Post refused to disclose Bezos’ ties to the Post, despite the fact that the Post is a publicly owned news outlet.
Countries must triple climate emission cut targets to limit global heating to 2°C

An assessment backed by the world’s major climate science bodies has found that global temperatures will need to be at least tripled and increased by up to fivefold to bring the world to the goals of the 2015 Paris climate agreement.

The researchers said that many of the changes linked to the temperature rise, including long-lasting heatwaves, record-breaking wildfires, and declining sea ice and glaciers, could have hit sooner and harder than predicted a decade ago.

Million-year-old ice buried deep in Antarctica could hold records of extreme past warming, providing a cautionary tale for our present climate.

Hundred of people hold ‘funeral’ for glacier lost to global warming

Hundred of people have held a high-altitude “funeral” for a glacier that has lost more than 90% of its mass in 50 years.

Scientists prepare to drill for million-year-old ice in Antarctica

National Iranian South Oilfields Company (NISOC) intends to purchase the following goods:

---

China holds less than 1% share of urban transport in Iran

Since the beginning of the current Iranian calendar year (March 21), Tehran air quality has been unhealthy for sensitive groups for 25 days due to high rate of ozone emissions, while one day reported to be all the residents, according to Tehran Quality Control Company.

Biking is to be promoted by all responsible bodies

The early adopter cities, such as Amsterdam and Copenhagen, cycling accounts for 40% of the urban trips.

Some words on the current practice.

The experiments also involved measuring brain activity during the memory tasks. Results from these experiments could remember events more easily. In remembering facts, which looked at handedness and brain function, also goes some way to explaining why people don’t remember events as easily as they might.

---
TEHRAN — United Nations Secretary-General Antonio Guterres on Sunday announced the formation of a constitutional committee for Syria in Geneva, a step toward ending the war in the country.

Guterres’ announcement was made in a televised speech on Sunday in the United Nations’ Geneva office, after he consulted with the leaders of the Arab states, the European Union, and the United States.

Guterres said that the committee would be formed with the participation of the Syrian government, opposition, and other countries that have a vested interest in the process. He also stated that the committee would be tasked with drafting a new constitution for Syria, one that would be based on the principles of democracy, human rights, and the rule of law.

This announcement is a major step forward in the process of reaching a political solution to the conflict in Syria. The war in Syria has been ongoing for more than a decade, with tens of thousands of deaths and millions of people displaced.

Guterres emphasized the importance of the committee in bringing an end to the conflict in Syria, and he called on all parties to work together to achieve a peaceful resolution.

The announcement was welcomed by the Syrian government, which stated that it will participate in the formation of the committee. The opposition, however, has yet to respond to the announcement.

In related news, the United Nations’ special envoy for Syria, Geir Pedersen, has welcomed the announcement and called for a “credible, inclusive, and genuinely democratic Syria.”

The announcement comes after the United Nations General Assembly adopted a resolution calling for a constitutional process in Syria, with the aim of establishing a democratic and inclusive government.

The process will be supervised by a committee of experts, with the participation of the Syrian government, opposition, and other countries.

The announcement is a positive step towards ending the conflict in Syria, and it is hoped that it will bring about a political solution to the conflict.

Western countries raise concerns over Saudi rights record

TEHRAN — Two dozen major Western countries on Monday protested the killing of Saudi journalist Jamal Khashoggi, with 15 countries demanding an explanation from the kingdom.

The protest came after Khashoggi, a writer for leading newspapers in the region, was killed in the Saudi Consulate in Istanbul.

Saudi Arabia’s response to the killing was met with widespread condemnation, with many countries expressing concern over the kingdom’s human rights record.

The protest was led by the United States, which said it was “deeply disturbed” by the killing and called for an investigation.

The European Union also expressed concern, with 14 countries calling for an international inquiry.

The protest was also supported by a number of other countries, including Canada, Australia, and Germany.

The protest was the first major international response to the killing, and it is likely to lead to increased pressure on Saudi Arabia to account for the killing.

Arab parties endorse Gantz, break tradition to remove Netanyahu

TEHRAN — Arab parties endorsed the Blue and White party of Blue and White party leader Benny Gantz, breaking with tradition to support the removal of incumbent Israeli Prime Minister Benjamin Netanyahu.

Netanyahu, who has been in power for 12 years, is facing a corruption trial and is struggling to form a government.

The endorsement comes amid a political crisis in Israel, with the country facing a third general election in less than a year.

The endorsement is seen as a move to unite Arab parties, which have traditionally supported the Labour party, in order to remove Netanyahu from power.

The endorsement is also seen as a move to strengthen the position of the Blue and White party, which is leading in opinion polls and is close to forming a government with the support of the Arab parties.

The endorsement is the latest in a series of developments in Israel, with the country facing a political crisis and the future of politics in the region still uncertain.

Saudi regime in final stages of its life: Nasrallah

TEHRAN — Hezbollah chief Hassan Nasrallah said on Sunday that the Saudi regime is in its final stages of its life, with the kingdom facing internal and external challenges.

Nasrallah made the comments during a speech to commemorate the 35th anniversary of the establishment of the Islamic Republic of Iran.

He said that the Saudi regime is facing a number of challenges, including the ongoing conflict in Yemen, which has led to a series of proxy battles between Iran and the Saudi-led coalition.

Nasrallah also said that the Saudi regime is facing economic challenges, with the kingdom facing a debt crisis and a decline in oil prices.

He added that the Saudi regime is facing political challenges, with the kingdom facing a rift with its Gulf neighbors and a decline in regional influence.

Nasrallah called on the Saudi regime to change its ways and adopt a more inclusive and democratic approach.

He added that the Saudi regime must also address the issues of human rights and political freedom, which are facing a crisis in the kingdom.

Nasrallah said that the Saudi regime must also address the issue of foreign interference, which is seen as a threat to the stability of the region.

He added that the Saudi regime must also address the issue of the Iran-Saudi rift, which has led to a series of proxy battles and the failure of diplomacy.

Nasrallah said that the Saudi regime must also address the issue of the rise of the Islamic State, which is seen as a threat to the security of the region.

He added that the Saudi regime must also address the issue of the rise of the Iranian regime, which is seen as a threat to the stability of the region.

Russia facing potential Olympic ban after WADA cites ‘inconsistent’ data

Russia is once again in danger of being banned from next year’s Olympics after the World Anti-Doping Agency revealed that historical data supplied by Moscow’s Laboratory on behalf of the Russian Anti-Doping Agency contained “inconsistencies”.

Russia opened a formal compliance procedure against the Russian Anti-Doping Agency (RUSADA) after examining the vast backlog of historical data finally handed over in January. The WADA Executive Committee has decided that anomalies contained in the data are “not related to” any plans by RUSADA to attempt to “edit” the database, but rather found “inconsistencies” in the data supplied by Moscow which included giving access to the data stored at Moscow’s anti-doping laboratory.

They missed the December deadline due to the inconsistencies and were not affected by the inconsistencies. Alexander Ivlev, chairman of RUSADA’s supervisory board, told Interfax news agency: “WADA has given the Russian side a few more days in which to explain regulations explaining why the alleged changes in the database were made.”

A report was presented to the WADA Executive Committee and to the supervisory board of RUSADA.

Preparation goes according to plan: Iran’s NPC chief

**BY MOHAMMAD ALI HAQSHENAS**

Iran national volleyball team are going to take part in the 2019 FIVB World Cup with their main players while experts are worried about consequences of Igor kolakovic’s decision to use the same squad in equal events.

Kolakovic, raising criticism from Mousavi added.

irginia, who have all emerged champions with nine of the 15 teams who qualified for the tournament 2020 was finalized on Sunday in London when they finished 11th with a total of 24 points.

The 2020 Paralympic Games are set to be the biggest and best yet around 4,000 Para athletes from more than 160 countries taking part in 22 sports.

**Time to change Iran volleyball main squad?**

Uzbekistan will have a new head coach for next month’s FIFA World Cup Qatar 2022 and AFC Asian Cup China 2023, Asian Qualifiers fixtures after parting ways with Hector Cooper on Monday.

The men’s team have been drawn in Pool B along with Australia, Japan, Korea Republic and China.

The Uzbekistan Football Association confirmed the news on its official website, saying: “The Football Association of Uzbekistan expresses gratitude to Hector Cooper and the coaching staff for their work with the national team of Uzbekistan and with them further success.”

Iran’s Miri snatches silver at IWF World Championships

I N T E H A N — All from Iran claimed a silver medal at the International Weightlifting Federation (IWF) World Championships on Monday.

Miri managed 174kg in the snatch and 205kg in the clean and jerk for a total of 579kg.

Armenian Ilher Hakob Micronian finished on 375kg overall with 165kg in the snatch and 200kg in the clean and jerk. (Source: the-afc)

Iran into AFC U16 Championship finals

T O H A N — Iran are through to the AFC U16 Championship 2020 Finals as Group C winners after defeating Azerbaijan 4-0 in Eumseong, Iran on Sunday.

Iran will make their 12th appearance in the Finals as they hail in three from Group A, while Afghanistan finished as group runners-up.

But the men’s team have little chance of podium after the squad’s narrow victory against Azerbaijan.

Pooshravan wins silver in final event of Karate 1-series A

M N A — Zahibeh Pooshravan settled for a silver medal at this season’s final event of Karate 1-series A, held in Santos, Chile.

The Iranian karateka suffered a narrow 1-1 defeat against his Turkish rival and world number one Ugur Aktas in the final bout of 18 kg category.

Another team who will return to the Finals of 2019 VNL’s winners Italy, Russia on October 1.

Counter against 2019 VNL’s winners Italy, Russia on October 1.

**Uzbekistan part ways with Cuper**

The qualifying for the AFC U16 Championship 2020 was finished on Sunday with nine of the 15 teams who qualified having lifted the Continental trophy least once before.

The 12 group winners were joined by the four best second-placed teams - Yemen, India, Uzbekistan and Syria - with the 16th spot reserved for the host country.

Those winning champions, Japan, who have won the title twice, led the group winners to qualify for the event.

Also through as group winners were China PR, DPR Korea, Korea Republic, Oman and Saudi Arabia - all of whom have won the title twice or more.

Islamic Republic of Iran, Qatar and Uzbekistan, who have all emerged champions once each, also advanced to the Finals.

Tajikistan, who impressed with their run in the 18 final, emerged Group A winners to take their place alongside Asia’s elite, as did India who overcame tough challenges to top Group B.

United Arab Emirates, runners-up in 1990, qualified for the Finals with a perfect record of three wins in Group F while three-time semi-finalists Australia call off the challenge of Vietnam in Hanoi to win Group H.

The AFC’s semi-finals return to the Finals, with their only previous appearances in 2015 and 2016.

Another team which will return to the Finals after a long gap is Indonesia, whose first appearance was in 1990.

Uzbekistan’s Round of exit from UAE 2019 was their earliest elimination for the Asian Cup since 2000, with their 2-1 loss to Palestine ultimately ending Cu- per’s time in charge of the side now 88th in the FIFA World Rankings. (Source: the-afg)

**High quality cast for Finals**

The competition will be held in Jiangmen, China from January 7 to 12.

The Iranian women’s team have been drawn in Pool A along with Australia and South Korea.

Pool B consists of host China, South Korea, Qatar and Chi- na’s Taiji.

The competition will be held in Nakhon Ratchasima, Thailand from September 22 to 25.

“Castle of Dreams” tops at Batumi festival

Iran’s “Castle of Dreams” topped the results of the 31st edition of the Batumi International Book Fair, which is being held in the Georgian city of Batumi until October 27.

The book fair announced that the book, written by Iranian filmmaker Rokhshad Ghasideh, was a clear winner.

According to the organizers, an additional 232 publishing houses from 25 countries participated in the fair, which began on September 12.

The book fair is being held in the presence of a high-level delegation from the Islamic Republic of Iran, including the Ministry of Culture and Guidance.

The event also features the 12th edition of the Batumi International Film Festival, titled “Let There Be Light.”

The previous edition of the book fair was opened by the Iranian Minister of Culture and Guidance, Mohammad Mohseni Ejehei.

The book fair is one of the main cultural and economic events held in Batumi, which is attended by thousands of visitors each year.

Iranian embassy representatives in Tbilisi said that cultural and economic relations between Iran and Georgia are being highlighted.

The book fair includes workshops, seminars, and talks on various cultural and social issues.

The fair also features a range of exhibitions, including an exhibition on the life and work of the late Iranian poet Saadi.

The fair will end on October 27.
