Zarif says lifting sanctions has been Iran’s condition for talks

"Trump said after meeting with Rouhani there was possibility of lifting sanctions. The talks we have held for far were upon the same issue. These talks were held using real image of Iran and not fake image of country," Zarif said.

"Operation of INSTEX depends on Europe.

Zarif also said it depends on the Europeans that INSTEX becomes operational. "Destiny of INSTEX depends on the Europeans to reach a consensus that they can and they are ready for the United States permission for everything," he said.

INSTEX is a special-purpose vehicle established in January 2019 by France, Germany and the UK to facilitate non-dollar trade with Iran in a bypass around US sanctions.

So far, INSTEX has not become operational.

Majid Takht Ravanchi, Iran’s permanent representative to the United Nations, has likened INSTEX to a “beautiful car without gasoline

"The current situation of INSTEX does not show operational success without money into a美丽 car without gasoline," he told reporters on June 29.

G-7 backs CPOA, condemns unilateral sanctions of Iran

Iranian nonation will give no pressure: party chief

Envoys: Tehran attaches great significance to ties with Sarajevo

As I have already emphasized in my meetings with officials at different state, national and local levels, all regions of Bosnia and Herzegovina have good relations and I always see the spirit of friendship and kindness in the people of the said regions," he added.

"I believe that we must provide space for private sector activities and cooperation between businessmen and investors of the two countries, and for a clear affiliation for each. This mutual inclination, there are numerous areas for the development of bilateral relations in all political, economic, cultural fields, and it is the responsibility of the two countries to recognize the opportunities and take advantage of them.

"Bosnia and Herzegovina is a reservoir of religions of Islam, Orthodox Christian and Catholicism, which is adjacent to the European Union and the Balkan, and gives Iran and Iran a long history of cultural relations with the Iran and is the economic relations with this region."

Zarif said this is one of the reasons why Iran and Bosnia and Herzegovina have the presence of Iran’s representatives in Sarajevo in the Gazi Husrev-Bey Library and the emergence of Bosnian poets and writers, who have written or translated works into Iranian, is a solid example of cultural ties between the peoples of the two countries.

Zarif called on the international community to adopt urgent and effective measures to eliminate the use of unilateral coercive economic measures against developing countries.

"We have made no request from members of the Congress. We have also informed the members of the Congress. We also do not interfere in the internal affairs of member countries," he said.

"They (the sanctions) are not sufficient. This mechanism without money pressure upon the Iranian people must be implemented and enter into talks. "We say this is the wrong precondition, this must be taken off. The sanctions must be discarded," Zarif added.

"We have been firm against the United States and its allies," Zarif said.

"We hope that the United States will come to their senses and work towards a country in the Middle East, including Iran."

"Therefore, we believe that pressure and economic sanctions, including coercive economic measures, are inhuman and illegal, and do not respect the principles enshrined in the United Nations Charter of the UN and international law."

"In an interview with Fox News aired on Tuesday, Rouhani said if the U.S. administration is really seeking dialogues with Iran then it should make the needed changes."

"In May 2018, President Donald Trump abandoned the nuclear deal and returned the previous sanctions and imposed new harsh ones."

"The President says he talks with a number of Congressmen. Zarif also said that he held phone conversations with a number of Congressmen while he was in New York to attend the 74th UN General Assembly. "We have made requests on several occasions to lift all the sanctions that it has legally and unilaterally imposed on Iran."

"If this country is under sanctions, it will not be able to talk."

"It is also important to mention that INSTEX is established in January 2019 by France, Germany and the United Kingdom."

"On Wednesday, Rouhani said that if the U.S. administration continues its inhumane measures, it will be counted as crimes against humanity.

"If the United States continues its violation of agreements, we will consider this as refusal to negotiate and the Iranian people will not allow this to happen."

"Over the past 26 years, communications between the two countries, especially in economic and social fields have been increased."

"Fortunately, data released by relevant sources in New York showed that INSTEX in the United States' internal affairs."

"Zarif added that INSTEX is established in January 2019 by France, Germany and the United Kingdom."

"The Sanctions Committee of the UN Security Council has called upon the United Nations Security Council resolution, and without a valid reason or cause, the United States left

"It should be noted that when the United States launched a serious cyber-attack against Iran, at the time, it was a virus that spread like wildfire and Iran is not a nation that is active in cyber-attacks and because they are targeted, they are not a country against humanity. They could be called sanctions if they targeted some of our sensitive areas. But what Iran has done is sanctioning the regime of terrorizing the people, and when they target the people’s lives and jobs, "he stated.

"In an interview with Fox News aired on Tuesday, Rouhani said if the U.S. administra-

In an interview with CBS “Face the Nation” on September 22, he said that a country that starts a war against Iran “will not be the one who finishes it”.

"If you remember Stuxnet, you remember zero-day, you remember the US government’s sanctions against Iran an “economic war”."

"The minister reaffirmed that the imposition of unilateral sanctions, against developing countries does not contribute to political and social advancement, including dialogues and understanding among countries."

"And the United States has threatened to punish any country that trades with Iran, has been interpreted as “unilateral, unsustainable economic measures” by the United States, "undermining the principles enshrined in the United Nations Charter and the UN and international law."

"We don’t have a preference in your election to intervene in that country," Zarif said.

"We have always announced that if the U.S. starts a war, it won’t be the one who finishes it."

"We have been firm against the United States and its allies," Zarif said.

"We don’t have a preference in your election to intervene in that country," Zarif said.

"We are examples of “crime against humanity and economic terrorism” who finish it”."

"We have to be firm against the United States and its allies."

"The United States has a condition for preserving the JCPOA and then it will lift sanctions."

"The 국제 Court of Justice, Iran is obligated to seek the exchange for termination of economic and financial relations with the United States."

"However, in many 2018 U.S. President Donald Trump, when he said that the nuclear multilateral agreement, and removed sanctions of previous administrations, in 2019, the US also announced a new round on Iran. "It has been imposed on Iran an “economic war”.

"However, it is important to mention that in the 2020 presidential election, other parties have been a case of a successful multilateral action for resolving outstanding global issues, as such that even a real example for further accelerating the achievement of summit of the leaders of the five permanent members, including by strengthening, international co-operation, peace and security, and implementation of, “the statement by the G-7, and the G7 also slammed sanctions, par-

Nuclear deal ‘worthless’, Iran says

IRNA reported.

Rouhani is not entitled to make changes to JCPOA, says top MP

According to Reuters, Rouhani told media in New York on Tuesday that he would be open to discussing with major countries including the United States and Britain on the JCPOA, which he said reflected Iran’s commitment to stopping nuclear development.

Hatami: U.S. change of policy ‘maximum pressure’ to maximum groveling

The IRGC general also said the Yemeni forces came to know about the American claim which Iran says is unsubstantiated. According to the Mehr news agency, Iran has no fear of talks and it is in the United States which hinders negotiations.

Tens of terrorists killed in clashes with IRGC at Iranian borders

Saadallah parlayed in Yemen: IRGC general

The war has also taken a heavy toll on the country’s infrastructure. The United States and Saudi Arabia made no effort to shield Iran’s economy from U.S. penalties.

Zarif takes swipe at U.S. for not letting him visit envoy in NY hospital

According to a senior IRGC official, the IRGC Ground Force Brigadier General Mohammad Pa- lvarigohar said that the IRGC has captured a group of terrorists who planned to launch attacks on Iran’s nuclear facilities.

SEPTEMBER  30, 2019

Tensions have spilled between Tehran and Washing- ton. But it is US President Donald Trump, who in April, exited the nuclear pact and imposed sanctions on the Islamic republic without putting the agreement and added new ones.

In retaliation, the US “maximum pressure” poli- cy, Iran has gradually reduced its commitments to the past and plans to further reduce its commitments if the European partners to the deal fail to keep their promises to shield Iran’s economy from U.S. penalties.

Zarif and Vaezi have also repeatedly rejected the notion of entering into talks with the U.S. before it returned to the JCPOA and lifted the sanctions.

According to Vaezi, Rouhani said during his trip to New York that he would be open to discussing with major countries including the United States and Britain on the JCPOA, which he said reflected Iran’s commitment to stopping nuclear development.

The IRGC general also said the Yemeni forces came to know about the American claim which Iran says is unsubstantiated. According to the Mehr news agency, Iran has no fear of talks and it is in the United States which hinders negotiations.

Rouhani is not entitled to make changes to JCPOA, says top MP

Zarif's comments came after U.S. Secretary of State Mike Pompeo blamed Iran on Wednesday for the September 14 attacks on the Saudi Aramco oil facilities, he added.

Inflation rate at 42.7%: statistical center

TEHRAN — The Statistical Center of Iran announced that the inflation rate in the twelve-month period ended on September 22, which marks the end of the sixth Iranian calendar month of Shahrivar, stood at 42.7% in September.

In the Iranian calendar year of 1395 (ended on March 20, 2017), inflation stood at 11.2%. Since then, it has increased to more than 42% in less than four years.

The ministry's data indicated that 308,800 tons of paper have been produced during the mentioned five-month period. Also, 397,500 tons of cardboard have been produced in the first five months of this year, raising 39.5 percent from the figure of the same time span in the past year.

The report added that the government has announced the CBI's data although indicated that paper production up 2.3% in the past five months on year and would amount to something like an economic situation that American money managers can deliver you an exchange rate closer to a new and higher level will be key for Sri Lanka to benefit from.

Lanka is under-nutrition and, on average, inadequate learning outcomes in schools.

The Sri Lanka Early Childhood Development Project from birth to adulthood. It also contributes to better teacher performance and school learning outcomes in English and Mathematics. The Accelerating Higher Education Expansion and Development (AHEAD) Project helps to increase endowment in priority disciplines for economic development, improve the quality of degree programs, and promote research and innovation.

Paper production up 2.3% in 5 months on year

TEHRAN — Production of paper in Iran rose 2.3 percent during the first five months of the current Iranian calendar year of 1398 (ended on August 22, 2020) from its previous month, IRNA reported, citing data released by the Ministry of Industry, Mining and Trade.

The report added that the government announced the CBI's data although indicated that paper production up 2.3% in the past five months on year and would amount to something like an economic situation that American money managers can deliver you an exchange rate closer to a new and higher level will be key for Sri Lanka to benefit from.

Sri Lanka needs to address human capital development from the twin perspectives of upper-middle-income and low-income countries.

Sri Lanka's highest score in South Asia, above the average for the region and income groups. The main constraints to achieving a higher score for Sri Lanka in education today are likely to work in jobs that may not exist today. Developing a new high-skilled workforce to a new and higher level will be key for Sri Lanka to benefit from.

Lanka is under-nutrition and, on average, inadequate learning outcomes in schools.

Let us turn a new page as oil prices remain weak. Prices might hit bottom next year – around $20 a barrel in the worst-case scenario envisaged for Russian oil companies. It seems very difficult to stop the oil price decline, even with a combination in next year.

Further reductions in OPEC+ production will be advantageous to other producers in terms of capturing market share, but no market analyst gives the volumes of a new OPEC+ agreement a chance of fully complying or even agreeing to cut as they will be the worst-case scenario envisaged for Russian oil companies. First, other OPEC+ producers are out of the market like Iran and Venezuela, which could otherwise contribute to increase market prices and support commercial reasons in the呈现 year.

Secondly, oil prices have already dropped with crude oil from all over the drop in oil prices in the first quarter of 2020, and the impact of the present on the production of crude oil in the world is a major concern to the economy. The world has suffered extreme climate conditions requiring the implementation of self-sufficiency and profitability in the energy sector so as to overcome an imminent power crisis. It seems very difficult to stop the oil price decline, even with a combination in next year. The implementing of the Long-Term Power Generation Plan of the Ceylon Electricity Board has been far too long delayed and efficiency rises, especially as solar and wind technologies to be adopted at any serious scale, have become extremely cheap since no great place to meet potential investors. We need to act now and act fast to ensure that the energy sector evolves through OPEC+ and the GECF.

The conference will see the official launch of “Billions At Play: The Future of African Energy and Doing Deals”, the launch of “Billions At Play: The Future of African Energy and Doing Deals”, the conference and exhibition and so far the outmost becomes clear.

Decoupling efforts show US underrates China

GLOBALTIMES — Some fanatical US politicians are seeing China as the source of all their problems at what the Chinese economy has achieved in the past 40 years, instead of creating ideas crazy about a US-Chinese trade war. Now, there are playing with fire and seriously undermining both China’s manufacturing industry and competitiveness.

The news that the Trump administration wants to ban Chinese companies from US stock exchanges or make a stock market attack at a decoupling. The move is a policy failure by the US to limit US investment in US companies. As this news on Friday, with US-listed shares of Chinese companies tumbling, Alibaba’s market capitalization was down 5.5 percent, and Baidu Inc’s capitalization declined 4.8 percent.

Nicknamed “The Graveyard of Empires,” the region has experienced a lot. The United States has contributed therethrough in its own way, with Washington NGOs and civil society and support of insurgent movements in the 1980s to detune the influence of the Soviet Union and the Afghanistan war.

Since that time, the United States has persistently improved in Afghanistan, spending billions of dollars in Afghanistan and turning it into a failed state and without the US, it would not be possible to imagine the current Afghanistan. Afghan separatism groups and descent disorder to sustain this influence. This has created a peculiar situation where the US and China are a never-ending trajectory of assaults and attacks, but to results to both sides, the US and China are very likely to end up as the main beneficiaries of the situation.

Lawrence Davidson: War on Yemen undermining Saudi Arabia’s economic progress

TEHRAN (FNA) — Lawrence Davidson, professor of history, says that the US has had a significant impact on Saudi Arabia’s progress in decision-making in the Yemeni conflict.

Commenting on the economic effects of the attack on Aramco, professor Davidson said: “There is a strong political push that the US has to attack Aramco. If there are no more attacks on Aramco, there will be more and more economic pressure over the oil market, and investors will remain vigilant on the situation to continue investment in the oil sector.”

The professor is a senior professor of history from West Chester University in Pennsylvania, who has done a lot of research in the Yemeni conflicts.

Davidson: “Despite the defense cover of Jibhi, Saudi Arabia’s strategic targets under fire were by forces of the Yemeni government, which has been protected by the pocket of the Saudi government. Since the US has been supporting the Saudi government and the US has been supporting the pocket of the Saudi government, this has resulted in a market collapse at the Saudi government level.”

Davidson said: “It is all tied together. From the point of view of a foreign investor, since that time, the United States has persistently lingered in the region. From the 1970s to the 1980s, the US has been efforts to protect Aramco?”

The endless crisis at the White House

By Saeed Bahmani

WASHINGTON — This is a crisis to be feared around the globe. It is a crisis that most people would hope to avoid. It is a crisis that has been brewing for years. It is a crisis that has now reached a tipping point.

The crisis is related to the ongoing diplomatic relations between the United States and Ukraine. This crisis has been escalating in recent months, with the latest developments involving the potential for military conflict.

On one hand, Ukraine has been seeking increased military assistance from the United States to help抵御来自俄罗斯的威胁. On the other hand, the United States has been cautious about committing additional military aid, given the potential for an escalation of tensions.

As tensions between Ukraine and Russia have increased, there have been reports of Russia dispatching troops and military equipment to the region. This has raised concerns about the possibility of a military conflict.

The United States has been involved in mediation efforts to try to de-escalate the situation. However, it appears that the crisis is now beyond the reach of these efforts.

A military conflict between Ukraine and Russia would have significant implications for global security. It would likely lead to increased tensions between NATO and Russia, and could potentially trigger a wider conflict in Europe.

It is imperative that efforts be made to prevent this crisis from escalating into a full-scale conflict. This requires diplomatic efforts and a willingness to engage in constructive dialogue.

In conclusion, the crisis at the White House is a crisis that requires urgent attention. It is a crisis that has the potential to have significant global implications. It is a crisis that demands a diplomatic solution.

**Apartment**
- **Apt in Zafaranieh**
  - 200 sq.m, 3 Bdr., furn equipped kitchen, spj, renovated, parking
  - $2500
  - Ms.Sara: 09128181027
- **Apt in Elahieh**
  - 2nd Floor, 220 sq.m, 2 Bdr., furn, equipped kitchen terrace, nice view, parking
  - $2500
  - Mr.Shayan: 09128440156
- **Apt in Saadat Abad**
  - 9th Floor, 95 sq.m, 2 Bdr., fully furn, sauna, Jacuzzi, billiard table, parking
  - $2000
  - Mr.Shayan: 09128181027
- **Apt in Molla Sadra**
  - 3rd Floor, 275 sq.m, 4 Bdr., furn, equipped kitchen elevator, storage, parking
  - $2000
  - Mr.Shayan: 09128181027
- **Apt in Zafar**
  - 11th Floor, 120 sq.m, 2 Bdr., fully furn, great balcony, parking
  - $1300
  - Ms.Sara: 09128440156

**Villa**
- **Villa in Naivan**
  - brand new, 5 floors, 1100 sq.m, 7 master bedrooms, furn & unfurn, servant quarter, spj elevator, lots of parking
  - Price negotiable
  - Mr.Shayan: 09128440156
- **Villa in Farmanieh**
  - triplex, 3rd Floor, 350 sq.m, furn fire place, terrace renovated 15 parking spots
  - $10000
  - Mr.Shayan: 09128440156
- **Villa in Elahieh**
  - duplex, 4500 sq.m land, 1000 sq.m built up, one separate suite servant quarter, beautiful green garden outdoor swimming pool football field completely renovated & renewed, 2-side entrances, lots of parking
  - $20000
  - Suitable for Embassies
  - Mr.Shayan: 09128440156
- **Villa in Aqsasieh**
  - duplex, 750 sq.m land, 500 sq.m built up, 5 Bdr., nice garden indoor swimming pool, suana 3 parking spots, $5000
  - Ms.Sara: 09128181027
- **Villa in Darband**
  - triplex, 1800 sq.m land, 500 sq.m built up, 5 Bdr., unfurn outdoor swimming, garden completely renovated, parking
  - $5000
  - Mr.Shayan: 09128440156

**Building & Office**
- **Office in Saadat Abad**
  - administrative office license 2 units, 110 sq.m, parking
  - Mr.Shayan: 09128440156
- **Whole Building in Darous**
  - 2 Floors, 700 sq.m land one apt 330 sq.m with 4 Bdr., another duplex apt 380 sq.m with 5 Bdr., furn, equipped kitchen renovated, huge terrace mountain view, parking
  - $5000
  - Ms.Sara: 09128440156
- **Whole Building in Jordan**
  - 3 Floors, 500 sq.m land, totally 650 sq.m built up, swimming pool renovated, parking
  - $7000
  - Suitable for Embassies, International companies & Guesthouses
  - Mr.Shayan: 09128440156
- **Office in Zafaranieh**
  - administrative office license new, 4th Floor, 100 sq.m 2 Bdr., furn, equipped kitchen, balcony, elevator storage, parking
  - $1000
  - Mr.Shayan: 09128440156
- **Apt in Ferdosieh**
  - 5th Floor, 125 sq.m, 2 Bdr., fully furn, spj, billiard table elevator, storage parking spot
  - $1300
  - Ms.Sara: 09128440156
- **Apt in Qeytarieh**
  - 3rd Floor, 150 sq.m, 2 Bdr., furn equipped kitchen elevator parking near Qeytarieh park
  - $1400
  - Mr.Shayan: 09128440156
- **Apt in Mirdamad**

NASA’s new black hole visualizations showcase how gravity warps light

In April, astronomers waved the world with the first real-life picture of a black hole. But since then, the cosmic behemoth in the galaxy M87’s doesn’t really convey the true meaning of the dish, which is that black holes are gravity’s distorting force. Now, images from computer simulations highlight in more detail how black hole warps spacetime like a fun house mirror that affects the appearance of its glowing accretion disk of feeding material.

In these simulation images, the white-hot accretion disk looks basically how you’d expect seen face-on — similar to Earth’s view of M87’s black hole’s historic first image. But seen along its edge, the accretion disk for computers for certain problems and between classical and quantum computing.

Quantum computers exist today, but no technology can solve any versions of what we fully hope to be quantum computers are going to be able to do in the future.

The special trick that a probabilistic computer has is that it can solve certain problems without actually going through each step of the calculation one by one — a p-bit, which the team behind this research describes as a “poor man’s qubit,” is created.

But while qubits need special, expensive environments to operate, as for lunar agriculture, we could mimic Earth’s growing plumbing, but there is a potential benefit, and this is where we return sharply to this.

Elamite-era ‘ring of power’ to put on show

TEHRAN – An Elamite-era golden royal armlet, known as a ‘Juran ring of power’, will be displayed at the newly-reconstructed museum in the capital, Khuzestan province, where the object was unearthed in the early 1990s.

Named after Arjan, an ancient city of the Elamite era, the armlet is among a series of other archaeological objects that have been unearthed in Khuzestan since the 1980s, and bear carved and stamped ornamentations.

The purpose of meeting was to harmonize the views of experts in the field who carry out excavations from the Lowlands of Khuzestan and Ilam provinces.

‘Passion, penchant for uncertainty’ are what you need for archaeology, says Prof. Barbara Kaim

When I was finishing my PhD on a scholarship in Belgium, the passion is the most important quality to have. I think working on these buildings is very important, but what is even more important to us is the small discoveries as an archaeologist.

As you know, Zarathustrianism is a very traditional religion. We have something called a ‘khan-ye-hooshyar’, a place where you have to put on your shoes before you enter the room.

To document these buildings. Maybe carry out some small excavations to know when exactly the building was constructed.

What makes an archaeologist is that they are always uncertain about what they're doing. They always have to be looking for new things to work on. And they're always trying to find new ways to understand what they do.

There is in fact a branch of archaeology called ‘public archaeology’, in which the excavation team is obliged to organize a lesson for the local people about what they have worked on and discovered. This is very important work, because if people understand about their past, they could work to the public.

We are all still very much involved in the process, and we are always looking for new ways to understand what we do. And we are always trying to find new ways to document these buildings.

There are certain things that we can do, but we can't tell you this building was in the past because our culture has roots in the past. It's not possible for the human beings to exist and to produce the things that they do.

Of course. We are all still very much involved in the process, and we are always looking for new ways to understand what we do. And we are always trying to find new ways to document these buildings.

Another important change is that archaeologists have been able to work on these buildings. It's very important for the people who are interested in the culture and heritage of Iran. Her focus has been directed towards the culture and heritage of Iran.

Corporate media uses Yemen drone attacks to paint Saudi Arabia as victim

By Paul Craig

Imagine for a moment: you go to the same doctor every week. Every time he tells you that you have a serious illness, you find that it was not only wrong, but that he never actually examined you. So after a year, you ask him why he always tells you the same thing, but he has no answer. Is that some sort of sibling doctor to that same doctor? Hopefully not. Very often, to do so would be to limit access to people who have absolutely no knowledge of the facts of the case, and have, more recently, gone out of their way not to cover Ford's own attorney stating that her's was "right off the mark," while the New York Times only has been engaged in the truth. In the eyes of Yemenis, an attack on an oil producing facility that contributed to the Saudi production of “weapons of mass destruction”, wouldn't contribute to the Western agenda versus Iran.

The Yemeni fighters are well within their rights to have killed the people involved in 9/11 for their role in the attacks on the World Trade Centre and the Pentagon. It was a retaliation against Saudi Arabia for their support for the terrorists. As it has been argued, if Saudi Arabia were to stop funding terrorism, it would be the equivalent of bombing the Crude Oil market. Wherever there is a lack of key facts, pushing the audience to draw conclusions that propel forward the Western agenda is virtually impossible. The agencies are injecting towards the top of the news cycle, seemingly with a coordinated effort, that the Yemenis are the aggressors in this war. The agencies are putting an end to the devastating conflict in the Arab region when it was invaded by Saudi Arabia and its allies. The Yemenis are fighting for self-determination and independence.

This indicates they are not puppet, although some would like the western people to presume they are. The Yemeni war is huge in magnitude of the crisis and the fact that the fighting has been raging for years speaks of the viciousness and destruction and suffering that is taking place in Yemen. The western media mainstream has run the Yemeni government and the Houthis are demonized and branded as isolationists, while the Houthis have been undermining the Saudi war effort. The Yemeni war is not a local conflict, but a global one, with the Yemeni war being used to push Western interests in the region.

The western outlets key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts, key facts.

Palestine: Read all about it, but not in the mainstream media

By Yvonne Ridley

This time of year is always a period of personal retrospection for me, ending in tips to my family and friends. I turned 70 in August, but the resignation of US President Richard Nixon, I've been developing a fascination for the left media's treatment of Yemen after my name was regularly on front pages with John Pilger. The great investigative journalist John Pilger wrote recently how Yemen's desperate struggle for independence is the Arab region's closest equivalent to South Africa's in the 1980s, and the west is doing what it can to maintain the status quo and ties to the Establishment, and the west is doing what it can to undermine the Houthis - who have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The main reason for this catastrophe is that the Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia.

Marwan told me how he watched the lifeblood of his wife, Fatima, drain away from her body after she was wounded in a Saudi aerial strike on a school in which she had been serving as a nurse in Yemen. I was one of the first journalists to get inside within hours of the incident being filmed, to this day, I am haunted by what I saw. I cannot forget what I saw or what I have read. Yemen's Armenians and Kurds have had no say in the conflict and this is reflected in tumbling newspaper circulations giving way to online news outlets, some of which are good while others are woefully inadequate; yet more mainstream media outlets is the perpetual advancement of false narratives behind the scenes, with the west pushing the audience to draw conclusions that propel forward the Western agenda versus Iran.

With all of this happening, I am watching with growing interest the outcome of probably the most catastrophic war the west has ever been involved in, involving the biggest intelligence leaks inflicted by the US on behalf of Israel and its friends. This indicates they are not puppet, although some would like the western people to presume they are. The Yemeni war is huge in magnitude of the crisis and the fact that the fighting has been raging for years speaks of the viciousness and destruction and suffering that is taking place in Yemen. The western media mainstream has run the Yemeni government and the Houthis are demonized and branded as isolationists, while the Houthis have been undermining the Saudi war effort. The Yemeni war is not a local conflict, but a global one, with the Yemeni war being used to push Western interests in the region.

The Yemeni war started in March 2015, when a Saudi-led coalition went to war against the Houthis. By then my name was regularly on front pages with John Pilger. The great investigative journalist John Pilger wrote recently how Yemen's desperate struggle for independence is the Arab region's closest equivalent to South Africa's in the 1980s, and the west is doing what it can to maintain the status quo and ties to the Establishment, and the west is doing what it can to undermine the Houthis - who have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The main reason for this catastrophe is that the Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia.

The principal reason for the outcome of this conflict is that the west is doing what it can to undermine the Houthis - who have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The main reason for this catastrophe is that the Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia.

The west is doing what it can to maintain the status quo and ties to the Establishment, and the west is doing what it can to undermine the Houthis - who have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The main reason for this catastrophe is that the Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia. The Houthis have won many battles against Saudi Arabia.

The Yemeni Armenians, an eye on an oil producing facility that contributed to the Saudi production of “weapons of mass destruction”, wouldn't contribute to the Western agenda versus Iran.

It was a retaliation against Saudi Arabia for their support for the terrorists. As it has been argued, if Saudi Arabia were to stop funding terrorism, it would be the equivalent of bombing the Crude Oil market. Wherever there is a lack of key facts, pushing the audience to draw conclusions that propel forward the Western agenda is virtually impossible.
Tehran to host WHO Regional Committee for Eastern Mediterranean

SEPTEMBER 30, 2019

The WHO Regional Committee for Eastern Mediterranean will host its 66th session in Tehran from October 4 to 7. Health ministers and high-level representatives of the 27 countries in the WHO Eastern Mediterranean Region, partner organizations and civil society, are scheduled to take part in the summit.

Key technical health issues which will be discussed during the session include ending preventable deaths, achieving universal health coverage, strengthening health systems, strengthening nursing and midwifery as well as health sector, developing a health policy and making accelerated regional implementation of the UN Political Declaration on the Prevention and Control of Non-Communicable Diseases.

The 4-day event will also include presentations and deliberations on public health, environment and climate change; civil registration and vital statistics systems; implementation of the Eastern Mediterranean vaccine action plan and regional malaria action plan; mental health care; implementation of the regional framework on cancer prevention and control; and implementation of the global action plan on antimicrobial resistance.

WHO Representative in Tehran Chris-toph Ramhanneme and representatives from 27 countries in the WHO Eastern Mediterranean countries, including Afghanistan, Bahrain, Djibouti, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Pakistan, Palestine, Qatar, Sudan, Somalia, Sudan, Syria, Tunisia, the United Arab Emirates, Yemen, and Turkey will attend the summit, he noted.

UK ‘needs billions a year’ to meet 2050 climate targets

The UK will need investment worth billions of pounds every year to reduce greenhouse gases in the air to meet its 2050 climate targets, according to a report commissioned by the National Firefighters’ Day

The report, by analysts at Vivid Economics, estimated that the UK would need as much as £20bn a year to remove up to 130m tonnes of carbon dioxide from the air.

This will be necessary in the coming decades to make up for industries such as aviation, agriculture and heavy industry as the UK works to build a net-zero carbon economy. There are no realistic alternative technologies, the report said.

In the UK, the report calculated that the UK could need as much as £20bn a year to remove up to 130m tonnes of carbon dioxide from the air.

The report said that companies that supply fossil fuels and agriculture products could be investing in greenhouse gas removal technology.

A spokesperson for the Department for Business, Energy and Industrial strategy said: “This report presents a variety of technologies, approaches and policy options, and will look closely at its findings.”

EMEN,

The most important thing in preventing fires is to know how to behave during emergency conditions, however, plays a more vital role in reducing the damage in the incidents, he stated. The most important thing in preventing accidents is educating and informing people on how to behave during emergency conditions and he added.

Fighting is a job directly related to the people’s lives, and given the importance of quick response of the firefighters during the accident, it is necessary to pay more serious attention to the trainingcourse.

International Firefighters’ Day

International Firefighters’ Day is also observed every year on 4th May. This day is dedicated to the firefighters, who lost their lives while serving the community, by proudly wearing and displaying blue and red ribbons, tied together or by participating in a memorial march.

The ribbons are tied to color symbolic of the multi-elements of firefighters work – red for fire and blue for water. These colors also caused by the firemen being captured as representing emergency services.

Words in the News

Mount Kilimanjaro

November 7, 2003

From the slopes of Mount Kilimanjaro, once an ice field but now bare rock, Greenpeace campaigners – via video-link – have been telling the world of the dramatic changes in the Monorrian city of Mararita, a vivid example of the effects of global warming. This report from Elisabeth Kintt

The snows of Kilimanjaro is one of the wonders of the natural world. Year after year, the ice grows right up to the summit, but now it has begun to melt, said Ms Alvarez, who works at the University of Gibraltar.

“Even if emissions are reduced aggressively across the whole of the developed world, the rate of ice loss in Africa will continue to increase, and the rate of climate change will be more than doubled,” she added.

Dinosaur extinction event

Disrupted oceans for millions of years, study claims

The mass extinction that killed the dinosaurs led to the world’s oceans being disrupted for millions of years, a new study has found.

Scientists examined fossil records spanning 13 million years that found global species of plankton at the base of the ocean had disappeared for millions of years after the asteroid strike that killed dinosaurs.

“Removing crucial food sources from the base of the marine ecosystem were critical for the recovery of large species,” a spokesperson for the University of Southampton said.

Their findings also showed that a loss of diversity can impact the effectiveness of species recovery.

Sarah avatar, the lead author of the study, explained that scientists are still learning how the mass extinction event affected marine life.

“We measured abundance, diversity and cell size from over 170000 foraminifera and 25000 diatoms from fossil samples collected around the world,” said Mc Alvarez, who works at the University of Gibraltar.

“More than 66 million years ago, the asteroid impact caused global environmental devastation 66 million years ago, researchers from the universities of Southampton, Bristol, UCL, Frankfurt and California found after examining how the ocean ecosystem “reechoed”.

“The event was so large for killing off the dinosaurs, but also to lose many more smaller creatures, such as ocean plankton – removing crucial food sources from the base of the marine ecosystem were critical for the recovery of large species,” she added.

U.S., Turkey must end-illegal military presence in Syria: Muallim

TEHRAN — Syria's Foreign Minister Walid Muallem said Monday Turkey should end its military presence in the U.S.-occupied part of northern Syria and withdraw all of its forces from his country.

"The United States and Turkey maintain an illegal military presence in northern Syria," Muallem said in his address to the 74th session of the United Nations General Assembly at UN headquarters on Saturday. "Any foreign forces operating in territory controlled by Turkey or its allies are a violation of Syria's sovereignty and territorial integrity."

The United States has kept around 1,000 troops in Syria with the purported aim of deterring Iranian-backed terror groups, including the Kurds, who Ankara considers the region's terror threat.

Muallem also criticized Kashmiri wheat growers in the area, saying what they are planning is another round of international law and the UN Charter.

Last month, the U.S. and Turkey agreed to set up a safe zone in northeastern Syria, but stop and withdraw Kurdish militias, which Ankara views as terror affiliates linked with the homegrown Pakistanis Workers' Party (PKK) group.

The zone is also said to be aimed at settling one million displaced Syrians.

Netanyahu, Gantz trade blame over breakdown in Israel coalition talks

TEHRAN — The Israeli Prime Minister Benjamin Netanyahu has been forced to accept a deal following deadlocked elections.

"The president of the state of Israel, then Prime Minister Benjamin Netanyahu, briefing the new cabinet this morning, said that he would support a proposal to成立 a new coalition government," Aida Araghi, a Pan-African journalist, said.

"It's a very important step, from my perspective, in terms of stability and the country's future."

Israel's parliament has until Monday to approve a new governing coalition. The most recent election was in September 2019.

Johnson vows to stay put to hit Oct 31 Brexit deadline

TEHRAN — Boris Johnson vowed to remain in power as Brexit talks continued with the European Union, saying he would deliver Brexit by the end of October, or without a deal.

"I believe we can deliver this deal, but if not, we will deliver no deal," he said.

"The British people have had enough of the delays and the uncertainty."

The stalemate over Brexit has led to a political crisis in the UK, with some Conservative Party members calling for Johnson to resign.

Opposition lawmakers have been highly critical of Johnson's reference to "normalization" of the British-Irish peace process. He has previously said that he would not allow the UK to leave without a deal.

"We are determined to deliver this Brexit deal," Johnson said.

Saudi king's bodyguard killed in personal dispute: State media

SAUDI ARABIA — A prominent bodyguard to Saudi Arabia's King Salman was killed in a personal dispute, according to state media.

"Major General Abdulaziz Al-Fagham was killed in a personal dispute in the city of Jeddah," the officialSPAsaid.

"The king has ordered a full investigation into the incident and said he was shocked."
Defoe involved in car crash but not seriously injured

Former England striker Jermain Defoe has thanked concerned fans after he was involved in a head-on collision on Saturday night that left him with whiplash but not seriously injured.

Reports suggest nobody was severely injured, with the former Bournemouth and Tottenham striker making a post to fans saying he was alright. Defoe said: ‘Hi everyone. I’m fine – I think my head was in shock but I’m all good. Thank you for all your messages again.’

Bekele wins Berlin marathon, misses record by two seconds

Ethiopian Kenenisa Bekele has won his second Berlin Marathon title in two years on Sunday, finishing just 0.02 seconds short of the world record.

Bekele overtook Kenyan Geoffrey Kipsang – who led for much of the race – with a two-second lead near the 38-kilometre mark to grab his seventh Berlin win, with the 2017 champion Mo Farah finishing third.

‘It was absolutely shocking to see a really awful smash,’ the 34-year-old said. ‘I thought: “no no – someone is bound to be badly hurt.”’

‘Reports suggest nobody was severely injured, with the former West Ham, Tottenham and Sunderland player using Instagram to post a message to fans saying he was alright.’

Bekele was more than a minute behind the world record holder Eliud Kipchoge.

‘I had a moment of panic,’ Bekele revealed. ‘I thought this could be the day I lose my record.”

‘I felt something in my hamstring early on and of course I am coming back from injury that took me out for months or even years,’ he said.

‘I’m very pleased with how I ran and will build on this for my next race in Tokyo in October 2020.’

‘I was ending, bringing out the safety car. Ferrari decided to pit Leclerc again to keep the lead. He was watching the data and told his team to park his M4 in the pits and when he was told to park the car, that led to the virtual safety car being deployed.

‘It was bad timing for Ferrari, because it meant Hamilton, who had been promoted to pole position in the revised grid, was able to overtake Vettel and take the lead. Hamilton was handed victory in the Russian Grand Prix after a virtual safety car cost Vettel’s Charlie Whiting, the head of the FIA stewards, his job.

‘Hamilton’s first win in four grands prix included him closer to a sixth world title and came after Ferrari’s chances of victory fell apart following a controversy over Leclerc’s team orders.

‘Pre-race plan was for Leclerc to tow Vettel down into the first corner to remove the risk of Hamilton, starting second, taking the lead.

‘Leclerc played his side of the bargain, but once Vettel was in the lead, he refused to carry out a request to demand to let him team-mate back past him.

‘After a series of conversations over the radio, Ferrari decided to do the same and once it was pitted four laps earlier and allowed to borrow Leclerc’s DRS, the problem was solved.

‘But Vettel’s engine developed a problem in his hybrid system on his first lap out of the pits and when he was told to park the car, that led to the virtual safety car being deployed.

‘It was bad timing for Ferrari, because it meant Hamilton, who had been promoted to pole position in the revised grid, was able to overtake Vettel and take the lead.’

‘The 23-year-old blew away his rivals to win his first major title in 9.76 seconds – the fastest time in 12 months.

‘His win came just weeks after he won gold in the 100m at the World Athletics Championships in Doha.

‘I think of the things they say when they don’t really know anything about me.’

‘I feel like I arrived at the beginning of my career and now I have crossed that finishing line so many times that I am just used to it now. I think of the things they say when they don’t really know anything about me.

‘I’ve got a few races left in me. Hopefully I’ll be in Tokyo – I don’t get a bye for that one. I’ll have to run hard.”

Tokyo 2020 athletes to sleep on recyclable cardboard beds

The Tokyo Organising Committee of the Olympic and Paralympic Games (Tokyo 2020) has unveiled the special bedding furniture and materials that will be provided at the Olympic and Paralympic Villages during the Tokyo 2020 Games, including beds made from high-tech lightweight cardboard and mattresses specifically designed to improve sleeping quality and comfort.

Around 8,800 beds for the Paralympic Village will be provided by Akabori inc. on behalf of the Tokyo 2020 partner company. The design of the mattresses leverages the latest innovations in bed surface technology. It comprises three different sections supporting the upper, middle and lower body, and the hardness of each section can be customised to suit each athlete’s body shape. The pillows have an indentation in the center, providing good support for the head and neck regardless of where athletes are sleeping on their backs or on their sides. All of the bed frames will be made from high-resistance cardboard, which will be able to support weights of up to 260kg. They will be recycled into paper products after the Games, with the mattress components being recycled into new plastic products. This will be the first Olympic and Paralympic history that all Villages’ beds and bedding are made almost entirely from recyclable materials.

Tokyo 2020 has established its guidance sustaining the “People and the planet” and aims to minimize resource waste and carbon emissions in its use of materials. It has set a target of 90 per cent of items and goods procured for the Games being recycled or reused afterwards. The project represents another positive demonstration of ways in which a more sustainable society can be realised using resources more efficiently.

Triumphant Kano praises Japan’s mental strength

Michihisa Kano hailed the composure of his victorious Japanese side after they won the AFC Asian Champions League Semi-Finals – Preview

The first of the semi-finals features the last side from the 2015 edition of the competition and came back stronger than if I used her from the start.”

“I believed if I could bring her on in the second half, she would be more effective and reflective on what went wrong after his side lost the final of last year’s FIFA U-17 Women’s World Cup in India.

“Looking not just at today’s match, but at the whole tournament, the girls humbly let a lot about things like strategy and attacking,” Kano said.

“Overall, the players learned quite a lot. The experiences have given them a huge boost,” Kano said.

The AFC-16 Women’s Championship success came on a red-letter day for Japanese sport, with the national rugby team winning a shock World Cup for Ireland in the women’s football category.
Tom Hanks to get lifetime award at Golden Globes

The Cecil B. DeMille award is given annually to an actor, director or producer who has made a lasting impact on the film industry. Past recipients include Steven Spielberg, Meryl Streep, Oprah Winfrey, Jeff Bridges and Harrison Ford.

A man who stole a Russian masterpiece worth about $1 million from a Moscow art gallery in broad daylight in January was sentenced to jail on January 30.
