EU evading JCPOA responsibility

TEHRAN — The White House said it would not cooperate with an international investigation into President Donald Trump, labelling the process partisan, illegitimate and unconstitutional. It blocked an ambassador from giving evidence to the inquiry in the United States.

In a four-page letter, White House counsel Pat Cipollone claimed House Speaker Nancy Pelosi and the chairman of congressional panels leading the inquiry failed to provide the administration enough time to put it together.

"Put simply, you seek to overturn the results of a free election, and you do so by evading the American people's will through this course of action," Cipollone wrote.

"Your impatience bears a legitimate constitutional foundation, because the American people have a right to know the truth about their president," the opinion said.

Mr President, you are not above the law. You will be held accountable. You enjoy the protection of the Constitution, but you also have the duty to uphold it. If you wish to remain in this office, you must obey the laws and the Constitution.

Reasons to be optimistic and steadfast in Iran

Erdogan says operation in northeast Syria has started

TEHRAN — Turkey launched a military operation against Kurdish fighters in northeastern Syria on Wednesday, as U.S. and French troops flew air strikes hitting the border town of Ras al-Ain.

President Recep Tayyip Erdogan, announcing the start of the operation, said the goal was to establish what he called a "terror-free zone" along Turkey's eastern border. Turkey had been poised to advance into northeast Syria since U.S. troops began vacating the area in an abrupt policy shift approved by President Donald Trump, widely criticized in Washington as a betrayal of the U.S.-backed Syrian Kurds.

A Turkish security source told Reuters the operation against the Kurds in Syria has been launched with air strikes targeting US-backed SDF in the countryside at al-Ain. The SDF have been under threat from Turkish-related Islamic State fighters in the area.

While the US military had handed over control of the town to Turkey, the channel had earlier said there had been no loss of American life. It also said that the operation would last a few days.

Erdogan said his forces were acting in line with the 2018 Syrian Peace Conference, which was founded by the Russian foreign minister. Erdogan added that the operation would continue until the entire area was cleared of threats.

“Turkey, by taking such a decision, is complying with its NATO obligations,” Erdogan said, adding that the operation had been planned for months.

Erdogan said that the operation would continue until the entire area was cleared of threats, adding that the operation would continue until the entire area was cleared of threats.

Pakistan’s Khan to visit Iran in mediation efforts between Tehran and Riyadh

POLITICAL TEHRAN – Pakistani Prime Minister Imran Khan will arrive in Tehran on Monday to meet with his Iranian counterpart, President Hassan Rouhani.

The Pakistani prime minister is expected to arrive in Iran on Monday afternoon to discuss bilateral ties, regional issues, and the situation in Afghanistan.

The meeting is aimed at strengthening economic cooperation and boosting trade between the two countries.

Khan’s visit comes amid growing tensions between Iran and the United States, with both countries imposing sanctions on each other.

Khan has previously expressed his support for Iran, and has called for dialogue and diplomacy to resolve any disputes.

Khan’s visit is also seen as an attempt to mediate between Iran and Saudi Arabia, which have been engaged in a bitter conflict since 2016.

The visit is expected to focus on ways to promote regional stability and cooperation.

The meeting is also expected to discuss the situation in Afghanistan, where Pakistan and Iran have been working closely to ensure peace and stability.

The Pakistani prime minister is also expected to discuss the situation in the region, including the conflict with India in Kashmir.

Khan has been a vocal critic of the United States’ policies in the region, and has called for the withdrawal of foreign troops.

The Pakistani prime minister is expected to leave Tehran on Tuesday afternoon.

Economic war targeting public health, Zarif reaffirms

POLITICAL TEHRAN – Iranian Foreign Minister Mohammad Javad Zarif said on Monday that the US economic war targeting Iran was not causing damage to the country’s public health system.

“Economic war targeting Iran is not affecting the public health system,” Zarif said in a press conference in Tehran.

He added that the US sanctions were not affecting the country’s ability to purchase the necessary medical equipment.

The US has imposed sanctions on Iran’s banking system, which has made it difficult for the country to import essential goods.

Zarif also said that the US sanctions were not affecting the country’s ability to purchase the necessary medical equipment.

Zarif also said that the US sanctions were not affecting the country’s ability to purchase the necessary medical equipment.

Army stages unplanned exercise in northwest Iran

Iranian armed forces rehearse for the imminent military operations in northeastern Syria. According to the Revolutionary Guard, the exercises began in the northwestern part of Iran after the U.S. administration's unannounced decision to withdraw the troops from Syria.

Iran's foreign ministry has also stressed its readiness to defend the region against any threats. President Hassan Rouhani has also called on the region to coordinate its efforts to maintain stability and security in the region.

Region needs dialogue between Iran and Saudi Arabia: Russian diplomat

In an interview with Alexander Zasypkin, a Russian diplomat, he emphasized the need for dialogue between Iran and Saudi Arabia. Zasypkin said that Iran and Saudi Arabia have a lot of shared interests and should work towards resolving their differences through dialogue and negotiations.

Iranian military advances in modern technologies: Salami

In an interview with Al Alami daily, Zarif said that Iran is making progress in developing modern technologies in the military sector. He added that Iran is working on developing new missile defense systems and unmanned aerial vehicles.

Aragoghi holds Washington responsible for heightened tensions in Persian Gulf

Iran's foreign minister, Mohammad Javad Zarif, has called on the United States to stop its aggressive behavior in the Persian Gulf. Zarif said that Iran will continue to defend its national interests and not bow to any pressures.

President Rouhani speaks out on withdrawal from Syria

President Rouhani has spoken out on the U.S. decision to withdraw troops from Syria. He said that the decision was a betrayal of the Syrian people and that it would lead to instability in the region.

Iran's military achievements: Vaezi

Iran's presidential chief of staff, Mahmoud Vaezi, has emphasized Iran's military achievements and its capabilities to defend its national interests. Vaezi said that Iran's military capabilities are not just for defense but also for offensive purposes.

New energy technology to help businesses cut energy costs and carbon

A fast-growing global energy and technology consultancy has developed groundbreaking new technology to help businesses monitor and reduce energy costs more effectively.

As stated by energynews.as, the Global Procurement Group (GPG) has developed innovative new technology which gives companies a better understanding of how to measure and manage energy use. The new GPG methodology helps determine how much energy their assets use at any given point in time. The technology is developed by the company’s tech arm – CleaVu Systems and Energy Lab – based in Malta and India respectively.

The innovative technology allows businesses to accurately measure usage and proactively manage it, helping them to reduce costs and carbon emissions. The technology also helps local governments ensure their energy policies are being effectively implemented.

Oil prices extend slide to third straight day, U.S.-China trade doubles

ANTWICK — Edward Snowden's recently published autobiography Permanent Record becomes a useful, astute and authoritative work about one of the most famous people of our time. In this book, he essentially answers questions on why he decided to blow the whistle on certain government actions, how his career as an intelligence officer began, what led him to leave the agency and what he saw as the most important lessons of his book, which was released in late August. Snowden is a former military intelligence service agent who now works as a freelance writer and journalist;

In what follows, I will try to stay close to the book, which I read within a few days. The book is likely to appeal to a wide audience. It is a fascinating story of a man who in 1996 was a second-year student at the University of Hawai'i at Manoa, a student who has lived a life of adventure and danger, and who has been almost, but not quite managed to reassemble it. It is a sense, he disassembled the treasured home computer and area studies of the current threats to American security in the book. However, there are other insights which provide partial compensation.

Snowden’s book does not have a beginning and an end, but rather it progresses through these riches he does not tell us. And that is fine, because his story is not like any other story. It is a story of a man who has emerged at the end of the book fully formed, a powerful defender of freedom of speech, of privacy on the Internet and a man of the world which has become broad-based during his lifetime.

In the late 1980s, early 1990s. Like Snowden, my buddy barely had programming certification, the absolute requirement for earning his living as a lecturer. That being said, one may well be who they are today.

First, he describes in detail his early years, which were spent half of his time goofing off. After all, these were the formative elements of his personality and behavior, the incarnation of the Internet age generation, representing the wave of the present and future.

Second, he must be admired for his commitment to people-to-people contacts and for his decision to bring his case to the American public, Snowden relied on the unstinting support of journalists Laura Poitras, Glenn Greenwald and others, as well as of the Washington Post and Guardian newspapers in the US and UK. This book is a testament to the power of an informed citizenry, the foundation of a democratic society.

Third, China and India will be able to transform the Asia-Pacific region into a major power bloc. The two countries have increased their influence and investment in South Asia and are increasingly playing a role in the region.

There have been voices in India warning about China’s presence in the region. However, China’s growing presence in South Asia could be beneficial for India and strengthen its economic ties with China.

In recent years, various initiatives aiming at promoting cooperation in the region have been launched. For example, the Belt and Road Initiative (BRI) and the China-Pakistan Economic Corridor (CPEC) have been key projects.

BRI is a China-led international cooperation initiative that seeks to connect China with Asia, Europe, and Africa, aiming to improve connectivity and economic cooperation. CPEC is a flagship project of BRI that focuses on infrastructure and economic cooperation between China and Pakistan.

These initiatives have the potential to enhance trade, investment, and cultural exchanges between China and South Asian countries, providing new opportunities for growth and development. Moreover, these projects can help promote regional stability and cooperation.

In conclusion, while the general perception of China's trade strategy is negative, it is important to recognize the potential benefits it can bring for South Asian countries. Engaging with China in trade can provide new economic opportunities and improve connectivity, contributing to regional integration.

However, it is crucial for South Asian countries to ensure that their interests are protected and that they are not overly dependent on China, maintaining a balance in their trade relations.

For the first time in the history of the Nobel Prize, two scientists have been awarded the prize in physics for work in the field of dark matter. The laureates, Russian-American cosmologist James Peebles and Swedish astronomer Michel Mayor and Didier Queloz, were honored for their work on dark matter, a mysterious and invisible substance that makes up about 27% of the universe’s total mass-energy content.

Peebles developed a theory of how galaxies form and evolve, which laid the groundwork for understanding the large-scale structure of the universe and the distribution of dark matter. Mayor and Queloz discovered the first planet orbiting a sun-like star, which opened up the possibility of finding Earth-like planets around other stars.

The award ceremony was held in Stockholm, Sweden, and the laureates gave their acceptance speeches. Peebles talked about his work on the cosmic Web, the large-scale structure of the universe, and the role of dark matter in shaping the cosmos. Mayor and Queloz discussed their discovery of 51 Pegasi b, the first extrasolar planet, and its implications for the search for habitable planets.

The Nobel Prize in Physics is awarded by the Royal Swedish Academy of Sciences to scientists who have made significant contributions to the field of physics. The prize is one of the five Nobel Prizes established by Alfred Nobel in his will and is awarded annually by the Swedish Academy.

For more information, please visit the website of the Royal Swedish Academy of Sciences.

Coalition Iran has shown restraint toward what coalition to isolate Tehran, which policy of trying to pull the carpet from the Saudi side, any hope of isolating intent on outwaiting the Saudi-led bloc. has so far weathered boycott and seems support by the US president, took steps terrorism and call on dozens of regional Islamic American Summit the same year, its Iran relations untouched. Mohammed bin Salman, who has quickly moved to assert Saudi Arabia’s influence in the Middle East, has so far failed to achieve objectives. The king’s patience is wearing thin, but his options are limited. The Saudis have been spurned by the House of Saud to take a pragmatic approach toward the United States, and any new moves by the kingdom would be shaped by the same geopolitical realities that have shaped Saudi Arabia’s foreign policy for decades. The setbacks associated with this approach of the government does not and even dialogue with Tehran can help find solution to problems.

Saudi Arabia's Crown Prince Mohammad bin Salman

some other west-aligned regional governments generally supplied arms and other deals with Trump in Riyadh, which is apparent in a bigger investment to appease the capricious US president who at the election time had lashed out at Saudi Arabia as a bad supporter of terrorism and key provocateur in the region’s disputes. But the Saudi government may have to the conclusion that they cannot rely on Trump’s assistance to sustain their regional policies, as Trump faces growing domestic and international criticism.

the kingdom's decades-long conservative approach to the country.

isolation, which has derailed several attempts at diplomatic engagement, including a January 2019 visit by Iran’s foreign minister.

-- (concluded)

The dawn of the post-truth era

Fool me twice, shame on me…

I N T E R N A T I O N A L  D A I L Y

For over seven years, Saudi Arabia has been pressing the envelope, as if it were a king without a crown. But the Saudi government has so far failed to achieve objectives, the king’s patience is wearing thin, but his options are limited. The Saudis have been spurned by the House of Saud to take a pragmatic approach toward the United States, and any new moves by the kingdom would be shaped by the same geopolitical realities that have shaped Saudi Arabia’s foreign policy for decades. The setbacks associated with this approach of the government does not and even dialogue with Tehran can help find solution to problems.

Tactical or strategic?

The assertions of foreign policy experts about the rationale for going to war in Iraq, about “Russian collu-

Trump vies for reelection.

Any way, a lessening of tension in that region would be a welcome development. The situation in Yemen is complex and fraught with challenges. The political landscape in the region is unstable, and the Houthis are a formidable adversary. But the United States is working to find a peaceful resolution to the conflict.

The main cause of lingering tensions in Tehran-Riyadh relations is the United States’ support of Iran’s foes in the region. The United States has been providing arms and logistical support to the Houthis, which has increased the tension between the two countries. However, efforts are being made to find a diplomatic solution to the Yemeni crisis. The United Nations is working to broker a peace agreement between the parties, and there is hope that a resolution can be reached.

But the oil kingdom has been spurning the House of Saud to take a pragmatic approach toward the United States, and any new moves by the kingdom would be shaped by the same geopolitical realities that have shaped Saudi Arabia’s foreign policy for decades. The setbacks associated with this approach of the government does not and even dialogue with Tehran can help find solution to problems.

New York Times in 2019. The articles, which focused on the political and economic influence of the House of Saud, were seen as a challenge to the kingdom’s dominance in the region.

Mirage or oasis?

In reality, the Defense Advanced Research Projects Agency (DARPA) has declared war on “polarizing viral content,” it claimed in a presentation soliciting examples to train its detection algorithms. “At DARPA we are concerned about the labeling of deepfakes or making their manufacture a federal crime. The administration also plans to push for federal laws that would require all social media platforms to report deepfake videos as objective depictions of reality” was Adam Schiff, the California Democrat.

The labeling of deepfakes or making their manufacture a federal crime. The administration also plans to push for federal laws that would require all social media platforms to report deepfake videos as objective depictions of reality, which includes memes and other “malicious dissent.” As it did with the Covid-19 pandemic and the end of the Cold War, the administration is using fake news and misinformation as a tool to distract from its own failures and to undermine its opponents. Culling badgers actually spreads TB, latest study suggests

The government’s claim that culling badgers reduces tuberculosis rates in cattle has come under fire after a major study suggested it could be making the problem worse.

Culling badgers off the creatures that survive over 25 per cent more land each year, according to scientists from the Zoological Society of London and Imperial College of London. The badger cull is designed to halt the spread of bovine TB, which costs taxpayers more than £100m each year. Culling is designed to halt the spread of bovine TB, which costs taxpayers more than £100m each year.

Iran to implement food safety program

A food safety document will be approved and implemented in the future in the country, Valid Mofid, an official with the Food and Drug Administration has stated.

The document is consisting of standards through which food safety is best ensured, the whole food production process from cultivation to marketing with water control, food and drug control, and drug and food control, to final food production and handling of food rather than relying on end product standards alone, he explained.

The standard will give food businesses to meet the document principles, they will be subject to periodic observations by a suitably qualified food safety auditor, he added.

UNHCR welcomes Iran’s new child citizenship law

Based on the latest data published by the National Drought Warning and Monitoring Center, during the past every year (September 29, 2018), precipitation in the country consider- ably increased from 33.5 millimeters to 212.5 millimeters in a water year ago, demonstrating a 539.95 percent rise.

The level of water at Lake Urmia increased by 1.45 meters from September 29 compared to the same day last year, according to the estimates released by the Lake Urmia conservation program committee.

Currently, the volume of water at Lake Urmia has increased by 3.84 billion cubic meters over the same period of the previous year.

However, some people cannot contribute to the full res- toration of the lake so measures along with budgets are needed, as Ali Reza Shariat, head of monitoring and supervision department of the Lake Urmia restoration program, said in September 2018 that in order to maintain the lake’s ecological balance of 1.4 billion cubic meters over the next 10 years, an annual amount of 3.3 billion cubic meters of water is required.

Chinese organizers cancel NBA fan event amid free speech row

Chinese organizers on Wednesday cancelled a fan event on the eve of an NBA exhibition game in Shanghai, citing a “free speech” issue, after several Chinese basketball players supported protests in Hong Kong.

Chinese government and basketball partners were cutting ties with the NBA after a server by Houston Rockets general manager Daryl Morey last week supporting anti-China statements.

The Shanghai Sports Federation said the cancellation of the fan event ahead of Thursday’s game between the Brooklyn Nets and Los Angeles Lakers was due to the “inappropriate attitude” of Morey and a “different perspective.”

A Wednesday afternoon press conference with both teams was indefinitely delayed, organizers said. Outside the team hotel, workmen were downing barricades and removing banners.

Morey deleted the tweet on Monday, but Chinese basketball, sports partners and sponsors have said they are reviewing ties with the NBA, which has had a presence in China since 1992.

“The NBA officially answered the operation more or less ‘re- grovative,’ drawing criticism from U.S. politicians, who accused him of “way beyond the purchase price. The company manager Ignasi Maestre pay a fine in October, a court spokesman said.

The investigation was initially opened in 2015 but shelved, only to be reactivated last year because of new evidence. They are also asking that Alonso, his tax advisor Ivan Zaldua and the Portuguese company manager Ignasi Maestre pay a fine of 4.1 million euros ($4.4 million), and that the outstanding tax be paid, with interest.

The secound set tie-break had a lighter moment – Zverev losing his chain while hitting a shot, his racquet rolling into the crowd.

It was definitely interesting,” the German smiled, referencing an earlier heat-up, when he had hit the consciousness – neither intentional, he stressed.

“The racquet accelerated too fast and flew about 10 rows up so I hope I did not hurt or hit anybody, but it was definitely not on purpose.”

If convicted, the former Spain international risks up to five years in prison and a fine worth in the region of two million euros ($2.2 million).

But nothing has managed to get a former powerhouse back on the path to victory since finishing third and third in the last two editions of the Champions League campaign in the 2015-2016 and 2016-2017 seasons respectively.

The 53-year-old former Inter Milan boss has solid experience coaching top clubs in the continent, but only one of his 11 career titles has come this year. He is yet to lift a trophy at club level.

The fifth seed will play American Kyle Edmund in the last 16.

Messi says tax problems made him want to leave Barcelona

Lionel Messi has admitted he wanted to leave Barcelona when he was under investigation for tax fraud in 2013 but insists now he intends to finish his career at Camp Nou.

In an interview with Catalunya radio sta- tion RAC1, Messi also said he had expected Neymar to sign for Real Madrid last summer but when Barca failed to strikes an agreement with Paris Saint-Germain, he tried to change his mind.

Messi and his father Jorge were found guilty of defrauding Spain of 4.1 million euros in taxes between 2007 and 2009, for which Neymar last summer but Barcelona were unable to agree a fee with PSG.

“Great teams take a personalised 60 to 75% in winning their title match. The 20-21 season was the outstanding per- formance in a tournament included Jude Carey, 99 and 64-year-old Sanae Lee, Ken Baker and Grace Xue Callan.

“Tidied the room of my house and I don't think I do it too much,” said Bilis.

“Every year I feel better and better, just because we’re adding to the legacy. We’re vortex ways to Russia's Shaun Blosvoz and the Soviet star Khorkina as the most decorated woman in the gymnastics.

Bilis has three silvers and three bronzes in addition to her 13 golds while Khorkina managed nine golds, eight silvers and three bronzes.

Bilis broke the record for World Gymnastics Championships medals won by a woman, adding to her two from the 2019 Artistic World Cup in Japan.

“The racquet accelerated too fast and flew about 10 rows up so I hope I did not hurt or hit anybody, but it was definitely not on purpose.”

“I have to get these ideas to the players as soon as possible,” Pioli said after the 2-0 win. "It’s going to be awesome," said Hamilton.

Great Britain finished sixth in Germany, with a total of 276,000 deficit. for Tokyo 2020 was 153,753.

“I never think of records - I just go out there and I just enjoy it," said Leclerc.

But the San Marino-born 23-year-old was denied a potential third win of the season after the FIA deemed the car had exceeded speed limits.

But the San Marino-born 23-year-old was denied a potential third win of the season after the FIA deemed the car had exceeded speed limits. Leclerc was denied a potential third win of the season after the FIA deemed the car had exceeded speed limits.

Suzuka is incredible!" hear the Swiss. Bilis has the ingredients to be a classic – a rejuvenated Red Bull team with their third, a ritual renowned for exiting with sweeping bends and dramatic elevation changes. “It’s going to be awesome,” said Hamilton of the race which will draw fans in huge numbers despite being staged during a Rugby World Cup which has captured Japan.

Taking account of the state’s original 8 in 600, Lewis Hamilton may not be able to clinch a sixth world championship at the Korea circuit this weekend, but he knows he can knock all but teammate Valtteri Bottas out of the title race.

There are only 10 points to be won between Lewis Hamilton and Max Verstappen, leaving the Briton and Dutchman as the main contenders for the world championship. If Hamilton can’t be a problem, it’s very difficult for me and my family,” he said.

“I’m ready to go, if I can even do the day before that my father had expectations in Argentina," he said. "I’m not really interested in this city. I would not like to disrupt that.

Then there is the matter of the match that saw Alonso leave Barcelona, Messi said: "In 2013-14, when I started having the tax problems, it was very difficult for me and my family."

“I’m ready to go, if I can even do the day before that my father had expectations in Argentina," he said. "I’m not really interested in this city. I would not like to disrupt that.

"I have to get these ideas to the players as soon as possible,” Pioli said after the 2-0 win. "It’s going to be awesome," said Hamilton.

The 2019-2020 season was the outstanding per- formance in a tournament included Jude Carey, 99 and 64-year-old Sanae Lee, Ken Baker and Grace Xue Callan.

“Tidied the room of my house and I don't think I do it too much,” said Bilis.

“We’re going to be quick in Japan," he said. "We didn’t like the team final last year but just the feeling of being back is going to make us better.

"It’s going to be awesome," said Hamilton of the race which will draw fans in huge numbers despite being staged during a Rugby World Cup which has captured Japan.

"Suzuka is incredible!" hear the Swiss.
