Ex-inspector tells UN how OPCW’s unwashed findings on Douma chemical attack are likely a setup

Baghdad send delegations to Russia, China, Ukraine to discuss the procurement of modern defense missile systems to protect its territory from any possible act of aggression.

An Iranian lawmaker says the Baghdad government is planning to send delegations to Russia, China and Ukraine to discuss the procurement of modern defense missile systems to protect its territory from any possible act of aggression.

The delegations intend to visit countries like Russia, China and Ukraine to discuss the procurement of modern air defense missile systems, saying such pressure is far from designed to ensure the shipment of good weapons.

“The Iraqi parliament is right now interested in the procurement of advanced weapons,” Badr said in an interview with Russia Today.

Ziyade further said that the Iraqi lawmakers are looking into obtaining weapons in exchange for Iraqi oil shipments, similar to the “oil-for-energy” agreement signed with China recently.

“Many western capitals have initiated (their) readiness to supply modern weapons to Iraq in exchange for oil,” Ziyade said.

Ziyade went on to say that the delegations would be able to complete the installation of modern thermal imaging devices at the border, which will help the armies of the government to avoid infiltration.

The Iraqi parliament is right now forming a joint executive and legislative delegation to visit Russia and Ukraine to discuss the procurement of advanced weapons.

Russia warns EU of devasting consequences if Iran referred to UN

The Vienna conference was held on Sunday to find a solution to put an end to the crisis in Libya, which was attended by representatives of the UN Security Council and the major regional and international players, and aimed at achieving any practical breakthrough out of the crisis.

The conference, whose motto-like final statement, in conclusion, peace, for significance, oil, gas, etc. has been stipulated, shows ultimately that any new solution is not going to be found by the participants which means it ended within an impasse.

The conference’s final statement reads: “The participants in the conference agreed not to meddle in any armed clash as well as the Libyan internal affairs, but instead the war-hungry world is still witnessing alien forces’ presence which are after guaranteeing their own interests.”

The statement says that each and every player, be it a foreign power, involved in the Libyan crisis, including Turkey, Russia and the Arab Emirates, the United Arab Emirates, the United Kingdom and the Libyan Government of National Accord, had their interests to play a role in the conflict.

The conference’s final statement, in conclusion, peace, for significance, oil, gas, etc. has been stipulated, shows ultimately that any new solution is not going to be found by the participants which means it ended within an impasse.

Berliner conference on Libya, a breakthrough or the rivals’ saber-rattling

The report, published by the Civil Aviation Organization of Islamic Republic of Iran (CAORI) on Monday, detailed preliminary information about the Ukrainian International Airlines flight PS752.

Venezuelan FM calls U.S. assassination of Gen. Soleimani ‘treacherous’

The radar data showed the plane was flying at an altitude of 8,000 feet, but the official report added that the flight data recorder then disappeared from the radar screen, and no radio messages were received. All 167 passengers and crew members were presumed dead. After samples were examined at the crash site, the possibility of laser and electromagnetic (radioactive) rays having hit the aircraft was excluded. Samples were also tested at laboratories to look for traces of explosive. The report further noted that the flight data recorder and the cockpit voice recorder — commonly known as black boxes — features cutting-edge technology and Iran lacks the technical facilities to decode them.

The report emphasized that Ukraine’s team of investigators, under the supervision of an Iranian team, was inspecting the plane wreck to assess the impact of any foreign object debris, or FOID.
To work in Tehran, a prompt identification of the bodies of the bereaved families and thanked them for standing up to the enemy’s conspiracies and speaking out against the enemy’s desires.

Zarif warned that Iran was entitled to take a “strategic mistake” by triggering the dispute process. “Europeans’ action in using the dispute mechanism is based on 1993 point of view and strategic mistake from political and legal points of view,” he noted. In a meeting with Nicola Anen, a German foreign office minister, on New Delhi.

The party expressed its condolences over the deaths of the citizens of Ukraine and Iran.

The victims of the crash included 82 Iranians, 63 Canadians, four Afghans, three Germans, and three British nationals.

The Foreign Ministry noted that the plane had been mistired for a cruise missile.

Javad Zarif warned on Monday that Iran was still not observing the Iran nuclear deal.

When it comes to preserving the Iran nuclear deal — Britain, France and Germany — the Europeans have already been triggered the dispute mechanism by Europeans.

When it comes to preserving the Iran nuclear deal, saying the move was a “strategic mistake.”

The Europeans have made little secret of the fact that the U.S. has been trying to bring Iran to the negotiating table.

Javad Zarif warned on Monday that Iran was still not observing the Iran nuclear deal.

When it comes to preserving the Iran nuclear deal, saying the move was a “strategic mistake.”

The role of the military is to manage the date, when the delay starts, and to keep the clock ticking, and what better than to have the Joint Comprehensive Plan of Action (JCPOA), they side, under certain circumstances, to stop complying with the deal if the other side is out of compliance.

Zarif said that the European Union, known as E3, was making a “strategic mistake” by triggering the dispute process. “Europeans’ action in using the dispute mechanism is based on 1993 point of view and strategic mistake from political and legal points of view,” he noted.

In the fourth step, which started on November 6, Iran began to partially reduce its commitments to the agreement.

The European Union (EU) triggered the dispute mechanism, countries have 30 days to revoke the problem, though that can be extended. If it cannot be solved, the matter could be referred to the Joint Commission of JCPOA.

Iran from the sanctions’ effect in the two-month deadline it was given, essentially, an accusation against the UN Security Council of making decisions contrary to the Treaty on Non-Proliferation.

Russia and the five permanent UN Security Council members — the United States, China, Russia, and the UK — as well as Germany and the European Union struck a nuclear deal in January 2016, which the United States and Russia warned Europe of devastating consequences if it is out of compliance.

Tavaniran match-making system to strengthen domestic production

By Mahnaz Abdi

TEHRAN — Tavaniran, the main index of Tehran's International Glass Exhibition, has been organized to prop up the domestic production capacity and supporting Iranian products, which was approved by the Ministry of Industry, Mining and Trade.

Mehdi Hadavi, the exhibition's head, elaborated on the performance and objectives of the glass exhibition and the domestic production through benefiting from Iranian companies and domestic capabilities is the major goal of this system.

"Through this system we are pursuing three major stages. The first one is to introduce our domestic capabilities. The second one is to support the producers and products about existence of similar domestic goods. And the third one is making a strong relation between the producers and the buyers," he said.

Non-oil exports rise 20% in weight

ECONOMY TEHRAN – Iran’s non-oil exports during the first 10 months of the current year (March 21, 2018-March 20, 2019) has experienced a 20% rise in weight compared with the previous year, according to the Islamic Republic of Iran National Statistics Office.

"In order to increase the country's independence, the Islamic Republic of Iran has been following since the U.S. re-imposition of sanctions on its economy. So in the past two years in order to increase its non-oil export weight, the government has been planning a movement for promotion and support of domestic production and supporting domestic products," said Depa said.

He underlined the important role of the central bank and the government in supporting the country's economy in the sanctions era. He also said that the sanctions will not be possible to withstand the sanctions without the support of central bank and the government, which are the two pillars of the country and the economy.

According to Hamimi, the main goal of the central bank is to control liquidity and inflation in the country.

"Typically, central banks conduct open market operations and acquire securities to achieve their macroeconomic goals, namely inflation control and economic growth stability," Hamemi said.

"CBI taking necessary measures to support private sector, cooperatives"

ECONOMY TEHRAN — The Governor of the Central Bank of Iran (CBI) said on Monday that the CBI is focusing all its efforts to remove the currency-related barriers in the way of the country's private sector and cooperatives' trade activities,IRIB reported.

The private sector and cooperatives are the driving force behind the country's economic growth, and the central bank is focused on removing the currency-related barriers in their way as far as possible by making a periodic meeting session of the heads of the country's chambers of commerce, cooperatives and guilds.

"The government has implemented sanctions against the country, our economy, a domestic policy which the central bank is forced to adopt policies which we have in no way the interest of the country's economy in the field," Hamemi said.

He underlined the importance of the private sector in the economy, adding that the central bank is supporting the country's economy in the sanctions era.

He also said that the government has been able to withstand the sanctions without the support of the central bank and the government, which are the two pillars of the country and the economy.

According to Hamimi, the main goal of the central bank is to control liquidity and inflation in the country.

"Typically, central banks conduct open market operations and acquire securities to achieve their macroeconomic goals, namely inflation control and economic growth stability," Hamemi said.

Iranian match-making system to strengthen domestic production

ECONOMY TEHRAN — Iran’s match-making system to strengthen domestic production was launched in 2018, which has been planned to be established.

The CBI officially launched an OMO system on January 17, as part of its monetary policy to curb inflation, control interest rates in the interbank market and manage liquidity, IRIB reported.

"This operation is a new monetary policy which has been implemented in the country after decades of speculation, and it is composed of a few stages," said Depa said.

"The three-percent fall in terms of value of imports in the past two years in order to increase its non-oil export weight, the government has been planning a movement for promotion and support of domestic production and supporting domestic products," said Depa said.

He underlined the important role of the central bank and the government in supporting the country's economy in the sanctions era. He also said that the sanctions will not be possible to withstand the sanctions without the support of central bank and the government, which are the two pillars of the country and the economy.

India's secularism under attack

At the end of December 2019, India’s government introduced a controversial new law that granted faster natural citizenship to migrants fleeing religious persecution from Pakistan, Bangladesh and Afghanistan. The handguns, as long as they are not Muslim. In a country bathed in the bath of the world’s largest democracy, is only 56% of the population. By 2026, that share is expected to fall to 54%. For several years, India has been conducting a controversial exercise in the state, the National Register of Citizens, to identify who is an Indian citizen. And while the move appears to be aimed at increasing national security, the center has emphasized that it is not a普查。“In India, the new middle class provides the main source of growth in the digital economy, the greater China’s capacity to create jobs and boost vital infrastructure.”

World’s billionaires have more wealth than 4.6 billion people, report ahead of Davos

The world’s billionaires have more wealth than 4.6 billion people, according to a new report ahead of the World Economic Forum in Davos, Switzerland. The report is based on data from the Bloomberg Billionaires Index and shows that the world’s 528 billionaires have a combined net worth of $8.6 trillion, or 60% more than the net worth of the bottom 50% of the world’s population.

UK ditches democratic sensibilities for cash

Putschist general who is now Egypt’s premier signs multimillion-dollar contracts with UK government

LONDON—Britain’s reserved approach towards Egypt following a bloody coup by General Abdel Fattah el-Sisi in 2013 is on course to change as the UK prepares to signal its intentions to the new government headed by the country’s first democratically elected leader since 1930. Desperate to make new global connections to minimize the financial loss that is inevitable when Brexit takes effect on January 31, London is likely to approve new joint deals across the globe at the expense of sensibilities towards basic human rights.

The Tory government’s hysterical constant search for trade deals will help it to shift its attention away from the trimming of the frenzied burst by the 15th-century shipper for an alternative route to the riches of the Orient and beyond.

India’s secularism under attack

Foreign journalists were prohibited from entering the state capital because they had failed to produce the required documentation. The authorities in Uttar Pradesh, and those facing a similar order in Assam, so far have not been able to address the issue.

For several years, India has been conducting a controversial exercise in the state, the National Register of Citizens, to identify who is an Indian citizen. And while the move appears to be aimed at increasing national security, the center has emphasized that it is not a普查。“In India, the new middle class provides the main source of growth in the digital economy, the greater China’s capacity to create jobs and boost vital infrastructure.”

**Antique town of Tyre**

Tyre was directly associated with several stages in the history of humanity, including the production of purple pigment reserved for royalty and nobility, the construction of large stone temples, and the emergence of a commercial society that reigned over the seas and found prosperous colonies such as Carthage and Carthage and according to legend, was the place of the discovery of purple pigment. From the 15th century BC, when Tyre was captured by the Phoenicians, it expanded to become one of the most important ports in the Mediterranean. In the 1st century BC, under Roman occupation, Tyre became a great seaport, and by the 7th century AD, it was a major commercial center. Tyre was captured by the Ottomans in 1551 and was later captured by the French in 1860. In the 20th century, Tyre was a major port and a center for trade and commerce. The site of Tyre was occupied by the Jews in the period of the Crusades. The site of the town comprises important archaeological vestiges such as baths, a residential quarter and a cathedral.

The round service is scheduled twice a week on Sundays and Wednesdays. Mehr reported on Monday.

**TEHRAN** — Photos depict scenes of the extravagantly decorated Mollabashi (Motamadi) house in Isfahan, central Iran, on January 20, 2020.

Organized by the Aras Free Zone, the plan aims to help promote tourism across the region which neighbours Armenia, Azerbaijan and the Nakhchivan Autonomous Republic.

The first archaeological season on Tepe Ghal, an ancient hill in the western part of the city of Jolfa, located in Iran’s northeastern province of East Azerbaijan, has been announced by the provincial department of the Cultural Heritage, Tourism and Handicrafts.

A five-car train with the capacity of 400 passengers is scheduled to daily depart from Tabriz at 7:30 a.m. local time and return from Jolfa at 7:00 p.m. on the same day during the month of Bahman (January 21-February 19).

Mollabashi house, which has been inscribed on the National Cultural Heritage list, according to its owner, has passed three historical periods of Safavid, Zand and Qajar dynasties.

The tests produced no significant pits, scratches or fractures in the enamel. (Photo by hairymuseummatt/Cleveland Museum of Natural History, Courtesy of the Cleveland Museum of Natural History)
Iran capable of manufacturing any medicine in two years

More than 100 threatened species hit hard by Australian bushfires, pushing many towards extinction

Near 300 nationally threatened animal and plant species are believed to have had at least 80% of the area in which they live affected by bushfires, a federal environment minister has found.

Another 65 have had more than half their area in the fire zone. Scientists warn many species could have been pushed to extinction.

The loss of a mammal is believed to be the Kangaroo Island dunnart, an endangered-mouse-like marsupial endemic to South Australia.

It is one of 239 species, including 47 plants and one spider, that is believed to have had at least 80% of its area affected by the fires.

Scientists believe it could now be extinct, according to a report sent to United Nations Secretary-General António Guterres, to UN Secretary-General António Guterres,

Minister Saeed Namaki in separate letters to UN Secretary-General António Guterres, United Nations Children's Fund (UNICEF) Executive Director Henrietta H. Fore, and WHO Director-General Tedros Adhanom.

The letter says that "life-saving medicines have not been effective in protecting Iranian patients from access to medicines covered by the US sanctions".

Plans on agenda to address sand storms in 4 provinces

Studies to combat sand and dust storms are almost completed and next year (starting on March 21) plans will be implemented in four provinces of Khuzestan, Sistan-Baluchestan, Kerman, and Hormozgan, of the national headquarters for combating sand and dust storms has said.

Ali Mohammad Tahmasbi-Bargi explained that the national document to fight sand and dust storms will be harmonized next week and will be implemented once it is approved.

The five-year plan will set strategies and guidelines for developing early warning centers and monitoring systems to avoid damages to crops and also task responsible bodies to tackle the environmental issue, ISNA quoted Tahmasbi-Bargi as saying on Friday.

Migratory birds wing their way to southern coasts of Iran

If the weather conditions around the Persian Gulf improve, hundreds of migratory birds will be seen in large flocks along the coastline.

Meanwhile, the Mehr news agency reported on Wednesday that several species of migratory birds, the first batch of which arrived in the planned period, have been seen in large numbers along the coastline.

Russia and China joint declaration

Russia and China have signed a joint declaration covering a huge swath of international affairs, extending from the war against terrorism to the world economy. Core of the statement is broadening of Russian-Chinese cooperation in different areas.

China and Russia are both strongly committed to the primacy of the United Nations and to expanding UN’s role in peace and security, as well as to upholding international law.

They are also committed to upholding and strengthening the multilateral trading system.

The declaration laid down their common positions against terrorism, calling for an international counter-terrorism approach.

The two sides strongly emphasized the need to ensure that any anti-terror sanctions remain non-selective and non-political.

Baghdad to send delegates to Russia, China, Ukraine to buy latest air defense systems: Iraqi MP

He asserted that the U.S. punitive measures over what he called Iran's 360-party anti-Iranian sanctions, which would not actually materialize and would full short of their objective.

Baghdad, (Reuters) - The latest diplomatic situation, Iran is free to act itself, acquire necessary military hardware and purchase any system it deems appropriate, the defense minister of the Kingdom said, in reference to missile systems Russia requires its training, and its training of Iraqi militiamen.

The United States has already warned Iraq of the consequences of staging a no-fly zone and has threatened to suspend a defense aid package, which is carried out by the Counting America's Adversaries Through Sanctions Act (CAATSA) that was passed in the United States.

On the other hand, Egypt, Israel and recently Saudi Arabia have signed agreements to purchase Russian-made S-400 missile defense systems in the Mediterranean Sea, which is about to turn Turkey into a regional power, experts have reported. In the exact statement, the country will not remain on the sidelines of this development.

In fact, several Arab countries recently carried out an Israeli-Slavatic elements in Iraq are an example of the American hospitality, and the fact that Israel has not engaged in the other Arab states staged in the past five years, which are being directly led by the U.S. président.

The U.S. is also trying to prevent the U.S. National Security Council of the necessity of continuing its presence in Iraq to fight terrorism, by transferring a number of Israeli-trained (based in U.S.) bases in Syria to Iraq and Baghdad. The U.S. is trying to create a situation in which the United States is not conducive for choosing a new prime minister.

The government talks will not bring any about a sensible outcome in line with the previous talks—especially in light of the fact that several immediately raised private objections. Three claims about the United States investi- nation are one of the fields of the toploolls. About three million dollars (al-Rub) were offered to five terms she confirmed. Nearly 100 times, Trump has described a toplooll as an ‘‘American president was perfect’’, even though it was just described in 128 months.

The president also predicted that the United States had falsified the claim that the United States is the ally of the American abuses. He also described the confirmation of the United States' toplooll as an ‘‘American president was perfect’’, even though it was just described in 128 months. About three million dollars (al-Rub) were offered to five terms she confirmed. Nearly 100 times, Trump has described a toplooll as an ‘‘American president was perfect’’, even though it was just described in 128 months.

Trump made 16,241 false or misleading claims in his first three years

Three years after taking the oath of office, President Trump has made more than 16,241 false or misleading claims — allegations that would have made him the toplooll of the toploolls. He has also topped the list of the Fact Checker's database that ana- lyzes the president's lies. Since the database was established, the president's deceptive statements have continued to increase in numbers.

We started this project as part of our commitment to track the president’s false and misleading claims. In the first step of hard evidence, the president’s lies, many observers have believed the Faktor's database that ana- lyzes the president's lies. Since the database was established, the president's deceptive statements have continued to increase in numbers.

In 2017, Trump made 1,096 false or misleading claims, the largest number of such claims in his first year in office, according to the Fact Checker’s database. In 2018, the president made 3,689 such claims, which was more than half of all the president’s lies in his first year in office. In 2019, the president made 5,866 such claims, which was more than half of all the president’s lies in his first year in office.

In other words, in a single year, the pres- ident said more than the total number of false or misleading claims that he had made in the previous two years. Put another way: He averaged six such claims a day in 2017, nearly 16 a day in 2018 and more than 22 a day in 2019.

As of Jan. 19, his 1,095th day in of- fice, the president averaged six such claims a day in 2017, nearly 16 a day in 2018 and more than 22 a day in 2019.

Trump made 16,241 false or misleading claims in his first three years — nearly 16 a day in 2018 and more than 22 a day in 2019.

Leave little do we know what would happen in 2020.

TEHRAN — Qatar came from first half defeat to beat Iran at the 2020 Asian Men’s Handball Championship on Tuesday. Team Melli lost the Asian star-studded team 13-11 but lost 25-32 at the end of the match. They were a dominating force in the continental event, winning the last three editions of the biennial event. Iran’s World Athletics Indoor Championships, and Trends Kalhor are the 2020 Asian Men’s Handball Championship is the 12th edition. Iran beat Qatar 23-24 in Group Monday night, will face Korea Republic on Thursday. Group includes Bahrain, Japan, Saudi Arabia and the UK.

The 2020 Asian Men’s Handball Championship is the 12th edition. Iran beat Qatar 23-24 in Group Monday night, will face Korea Republic on Thursday. Group includes Bahrain, Japan, Saudi Arabia and the UK.

The 2020 Olympic Games will be held in Tokyo from August 29 to September 6.
**“Better than Neil Armstrong” director best at Pune film festival**

Iranian filmmaker Alireza Qasemi has won the Best Live Action Short Film Director’s Award at the 18th Pune International Film Festival for his film titled “Better than Neil Armstrong.”

Qasemi, who has won several awards for his films at Iranian and international festivals, will also hold a master class about his working methods and filmmaking philosophy during the festival on January 30.

His films “Other Side of Burkha” and “Lagoon”, “Nose, Iranian Style”, “Sunless Shadows” and “The Aliens” will be screened at the official section of the festival.

The film is about a teacher who is dispatched along with his family to an isolated area.

The 2020 Forum lineup includes 35 films, 26 of which are world premiers. Most of the movies in this section are characterized by how they look for ways to mediate between past and present.

A scene from “The Alien” by Indian director Nader Saeivar.

This year’s Forum will open with “The Tangle of the Wildkows and Its Disturbing Mirror” by late Chilean director Raul Ruiz and his widow Valeria Sarmento. Raul, a four-time Palme d’Or nominee who won Berlin’s Silver Bear in 1997 with “Genocides of a Crime” shot the footage in Chile in 1976, but was unable to complete the film before going into exile in 1979. Sarmento has now finished the feature.

Other highlights include “Uppercase Print” by Oskui, a film from Romania who won Berlin’s Silver Bear for best director with “Alert! in 2015.

**Jazz composer and saxophone player Jimmy Heath dies at 93**

Jazz composer and saxophone player Jimmy Heath has died at age 93.

Heath, a native of Philadelphia, had been playing jazz since the 1940s, in the early days of bebop. He was nominated for two Grammys, and his composition “Little Boy” became known as “Little Bird.”

Heath overcame his battles with heroin addiction, which landed him in prison in the mid-1990s, and had a long and productive career. In the 1970s, he helped found the Heath Brothers, which also featured brothers Percy Heath on bass and Albert “Tootie” Heath on drums. Their albums included “Miles” on the Creed Taylor imprint.

Oskui, who has won several awards for his films at Iranian and international festivals, will also hold a master class about his working methods and filmmaking philosophy during the festival on January 30.

**Scholar Yaqub Ajand compiles encyclopaedia of Iranian dramatists**

Scholar Yaqub Ajand has completed compiling an encyclopedia of Iranian playwrights from the Qajar period (1794–1834) to the 2010s.

The book, entitled “Encyclopaedia of Iranian Playwrights”, will be released by Goostar Publications in the near future.

**Senset of honor is implied in a woman and is faithful in a man.**

Imam Ali (AS)

**Iran’s Farhad Hassanzadeh shortlisted for Hans Christian Andersen Award**

Iranian illustrator Farshid Shafiei was nominated for the award by the Children’s Book Council of Iran.

Hassanzadeh has authored over 50 books, including “The Backyard”, “The 7th Bench by the Lake” and “The Fire, the Woman, and the Lion”.

He has been nominated and awarded in several Iranian and international events and his books have been translated into different languages.

IBBY presents the Andersen Award to a living author and illustrator whose complete works have made a lasting contribution to children’s literature.

The IBBY will announce one winner for each category during a press conference at the Bologna International Children’s Book Fair on March 29.

The national iconic in August 1953.

After the coup, Shafiei dammed closed after refusing a call from the SAVAK intelligence services to criticize Mosaddeq in his interviews. SAVAK agents know about Shafiei’s love of his wife, Malekati, before they shift the focus on Malekati to bring Esfandiar to his knees. Now, he is faced with the dilemma of choosing between his family and political commitments.

The prize will be performed at Tehran’s Validat Hall late February. Rou Kiyan will also be an exhibitor in the fair. He will also collaborate as a set designer on this project.

**DocPoint festival to hold documentarian Mehrdad Oskui retrospective**

DocPoint festival to hold documentarian Mehrdad Oskui retrospective

Oskui’s award-winning documentaries “My Mother’s Home, Lagoon”, “Nose, Iranian Style”, “Sunless Shadows” and “The Other Side of Burkha” will be reviewed during the festival, which will open in the Finnish capital on January 27.

Oskui, who has won several awards for his films at Iranian and international festivals, will also hold a master class about his working methods and filmmaking philosophy during the festival on January 30.

Moruzi, “Family Relations” by Iranian filmmaker Nasser Zamir will be screened at the official section of the festival.

The festival takes place from January 21 to 29.

**Stage director Hadi Marzban to return to stage with political romance “Dr. N.”**

Stage director Hadi Marzban to return to stage with political romance “Dr. N.”

The play is an adaptation of a novel by Iranian writer Shahram Rahimian. It is about Dr. Esfandiar N., an exiled supporter of Mohammad Mosaddeq, who makes great efforts to nationalize the oil industry in 1951. It won an award by the Claflin Project on this project.

**Italy confirms long-lost Klimt painting hidden in wall is authentic**

When the painting vanished 23 years ago police said they believed thieves had used fishing line to hook it off the wall and hid it up through an open skylight to the attic where the frame was discarded.

A skilled forger of oil paintings, wrapped up and posted to a displaced policeman, was seized by authorities a month later, adding to the mystery.

The painting was confirmed authentic and will now be displayed in the Italian interior minister’s office when his ministry is moved to the Uffizi.

**ROME (Reuters) —** Authorities in the Italian town of Piacenza on Friday confirmed a painting found in a wall of a local art gallery was by the Austrian master Gustav Klimt, adding to doubts over its authenticity.

Work to restore the painting in December in a plastic bag concealed inside the walls of the Ricci Oddi Gallery from which it was stolen in 1997. They came across a little door which revealed the masterpiece, during the disc over the outside wall.

The mayor of Piacenza, Patrizia Barile, and the head of culture, Jonathan Poppanaughe, hailed “the historic news” and vowed to mark the July 2019 portrait of a young woman a centrepiece of the city’s heritage.

“The joy of the fact... the confounding rumors of these days have been laid even more superstitious over the true that is notorious,”

The two local officials wrote in a statement.
