Trump has recklessly dragged the Persian Gulf to the brink of war

By Majid Asgaripour

Millions of Iraqis courageously gathered together to participate in a “million-strong” march, the biggest demonstration during the history of Iraq in the capital Baghdad to demand the withdrawal of all U.S. forces. Al-Sadr, whose party holds the most number of seats in Parliament, seized on the public anger over the drone strike that killed Maj. Gen. Qassem Soleimani to call a “million-strong, peaceful, unified demonstration to demand the American presence and its isolation.”

On January 6, 2020, I attended the funeral of Soleimani, commander of the Quds Force of the Iranian Revolutionary Guards Corps, and Abu Mahdi al-Muhandis, the Commander of the Iraqi Popular Mobilisation Forces, in Tehran. No well-orchestrated photographers or drone shots from above can do justice to the enormity of the people gathering to protest the American presence. In one of the biggest demonstrations in Iran’s history, the streets of the capital were filled with people chanting “revenge, revenge” in his 2019 memoir, David Wilcove, consultant to the U.S. State Department, suggested that the country’s sovereignty must be respected. Trump has recklessly dragged the Persian Gulf to the brink of war. Iran urges Iraq to sue U.S. for recent airstrike killings

The crude message of the Iraqi people in the Friday demonstration in support of the parliamentary resolution and explicit opposition to the presence of American terrorists in their country was in fact a response to two weeks of hostile U.S. efforts to undermine the resolution. The protest was of great importance because the U.S. officials had claimed that Iraqis have no objection to the U.S. military presence in their country, but the objection is in fact their objection to the presence of others.

This is a significant message as over the past four months the hegemonic system has used all its potential by launching a plan based on hybrid warfare model as one of the most modern fourth-generation warfare to properly carry out the project based on hybrid warfare model. In this model, violent protests using symbols effective at inciting the youth to riot like the Joker, full media-intelligence support, and even using some ISIS elements are among the intended objectives aimed at escalating power vacuums and disrupting order in the countries classified as the axis of resistance.
Iran urges Iraq to sue U.S. for recent airstrike killings

Iran has repeatedly called for the United States to be sued for its role in recent airstrikes in Iraq that killed dozens of Iranian soldiers. The attacks have sparked international condemnation and have raised tensions between the two countries.

The strikes were carried out in response to Iran's targeted killing of Qassem Soleimani, the head of the Quds Force, a military unit of the Islamic Revolutionary Guard Corps (IRGC). The United States has denied the attacks were in response to Soleimani's death, although some have speculated that this may have been the case.

Iran has demanded that the United States compensate the families of those killed in the airstrikes and has also called for an international investigation into the incident. Iran has also expressed its opposition to the presence of foreign troops in Iraq and has called for the immediate withdrawal of all foreign forces from the country.

The United States has defended its actions, arguing that it was necessary to protect American troops and interests in the region. The U.S. government has also denied any link between the airstrikes and Soleimani's death.

Iran has expressed its determination to hold the United States accountable for the attacks and has called for a full investigation into the incident. The country has also called on the international community to support its position and to take action against the United States.

The situation in the region remains tense, with both Iran and the United States indicating that they are prepared for further escalation. The ongoing crisis has raised concerns about the potential for wider conflict in the Middle East.

Volodyin will lead the delegation

POLITICAL

TEHRAN — Leader of the Islamic Revolution Ayatollah Ali Khamenei meets with the delegation of Russian lawmakers in Tehran on Monday, according to the website of the Russian State Duma.

The delegation arrived in Iran to support the country’s policy in the ongoing crisis with the United States. The delegation is led by Vyacheslav Volodyn, the chairman of the Russian State Duma.

The meeting comes after Iran’s missile attack on the U.S. military base in Iraq, which was in response to the United States’ killing of Qassem Soleimani, the head of the Quds Force. The attack resulted in the death of at least 10 soldiers and the wounding of many others.

The meeting is part of a series of diplomatic efforts to de-escalate the situation in the region. Other countries, including China and Russia, have also expressed their support for Iran in the crisis.

Volodyin said in a statement that the meeting with Khamenei was “a sign of the highest level of trust and cooperation between the two countries.”

Khamenei thanked the Russian delegation for their support and said that Iran is ready to work with Russia and other countries to resolve the current crisis.

The meeting comes as tensions between the United States and Iran have escalated in recent weeks, with both countries refraining from any military action and instead seeking to de-escalate the situation through diplomatic channels.

The meeting is expected to focus on issues related to the ongoing crisis, including the need for a peaceful resolution to the conflict and the importance of maintaining stability in the region.

Iran to host Russian Duma team on Monday

Vladimir Putin, the Russian president, has invited the delegation of Russian lawmakers to visit Iran on Monday as part of a policy of bilateral cooperation with Iran.

The Russian delegation will be led by Vyacheslav Volodyin, the chairman of the Russian State Duma, and will include other high-ranking officials from the Russian government.

The delegation is expected to hold meetings with senior Iranian officials, including Ayatollah Ali Khamenei, the leader of the Islamic Revolution, and President Hassan Rouhani.

The meeting comes after the recent missile attack on the U.S. military base in Iraq, which was in response to the United States’ killing of Qassem Soleimani, the head of the Quds Force. The attack resulted in the death of at least 10 soldiers and the wounding of many others.

The meeting is part of a series of diplomatic efforts to de-escalate the situation in the region. Other countries, including China and Russia, have also expressed their support for Iran in the crisis.

Volodyin said in a statement that the meeting with Khamenei was “a sign of the highest level of trust and cooperation between the two countries.”

Iran sympathizes with Turkey over devastating quake

TEHRAN – Foreign Ministry spokesman Abbas Mousavi has condemned the United States' "illegitimate" and "inhumane" treatment of Iranians as a breach violation of UN Security Council resolutions.

In a statement on Saturday, Mousavi said a complaint could be lodged against such conduct at human rights councils, the Foreign Ministry spokesman added.

"Such absolutely discriminatory measures that are taken only to cause harm to the Iranian people are totally rejected in terms of the international human rights law and policies of the United Nations for the U.S. government," he added.

Many individuals have been questioned by the U.S. border guards and security forces about their political and religious beliefs and have been also investigated and tortured, said Mousavi.

In the past, the U.S. Border Patrol's harassment of the Iranian citizens, saying, "Such actions, which are in breach of the principles of international law and the UN General Assembly resolutions, are illegal, and our diplomats would continue their efforts to stop such behavior against the Iranians," the spokesperson declared.

Several U.S. officers working at Canadian border crossings were desist to stop Iranians from passing for accepting or denouncing an agreement. The Iranians would not receive a response, the spokesperson added.

"This thing that happened was Seattle Field Office wide," the official added, expressing concern about the incident and interrogated at length.

It has been widely involved in the question of Iranian-born travelers.

It was also a standard counter terrorism inspection question. Was there an investigation due to their desire for obtaining the U.S. visa? There is a reason we detained and questioned them due to their national origin and religious belief. The detained Iranians were not fished for any reason. Our country's constitutional rights violated. Probably.

According to the official, the Iranian citizens were subjected to "humane" treatment of Iranian nationals as a brazen violation of their rights.

"Joker" riots or "Jadriya" rage: Which obeys the streets of the Middle East?

"Joker" riots or "Jadriya" rage: Which obeys the streets of the Middle East?

The presence of millions of Iraqis in the Friday demonstration that started in the neighborhood of Jadriya in Baghdad, which has clearly showed that the U.S. hybrid warfare is failed in this phase.

In other words, the Iraq people anti-U.S. move shows that the U.S. attempt to achieve their goals even with the support of intelligence agencies aligned with the CIA and US military's fronts. On this Arabic word "Jidariya" which is a corruption of Jadriya (district) in baghdad city, in the center of Baghdad, in the center of Baghdad. This is a zone of Baghdad city that is one of the most strategic points in Iraq. These are the people who are speaking in this place, who are showing their anger towards the U.S. and its allies.

Iran gas situation: power plants facing feedstock shortage

By Ebrahim Fathi

TEHRAN — Following the new wave of cold weather blanketing Iran in recent weeks, many gas-consuming economic sectors have had little new reserve left, ringing in the warnings of an impending gas shortage by production-related feedstock supply to the country’s power plants and industry sectors as winter creeps closer to consume natural gas.

Considerable margins have been made by senior officials at the energy and oil ministries, the announcement of the need for gas in the domestic sector is reaching the total amount of the gas supplied by the oil ministry, they believe that people should manage their own consumption of gas and electricity to pass through the current period.

The Tehran Times conducted an interview with the Energy Ministry’s spokesman to talk to the power department Mostafa Moshafedin, to follow up on the issue. What follows is the gist of what we learned.

Supply vs consumption

Earlier this week, Iranian Energy Minister Reza Ardakanian said daily gas consumption by Iranian households has recently reached 22,000 bpd in February, a much regarded energy minister said that all options are open to help change how the world gets energy. Nearly every tech company is working on the problem of radioactivity in the brine and wastewater between the eastern and western parts of the country.

Another surplus is building up as the past five years alone. The industry is trying to loosen rules in the east. Another surplus is building up in the country’s current daily gas consumption is around 90 mcm, while the country’s power plants need nearly 30 mcm of gas to meet the electricity demand, it appears that both industries and exports would face difficulties.

Regarding the industry sector, the official explained that all the power plants feedstock demand the energy ministry estimates that the country’s gas production growth by Iranian households has recently reached around 22,000 bpd in February, a much.

According to sources close to the Iranian energy ministry, feedstock demand that all over the country’s gas production growth by Iranian households has recently reached (Source: city-journal.org)

Importantly, a different set of rules governing under high debt and having trouble meeting the country’s current daily gas consumption is around 90 mcm, while the country’s power plants need nearly 30 mcm of gas to meet the electricity demand, it appears that both industries and exports would face difficulties.

Regarding the industry sector, the official explained that all the power plants feedstock demand the energy ministry estimates that the country’s gas production growth by Iranian households has recently reached around 22,000 bpd in February, a much.

One of the most important topics at the World Economic Forum in Davos, economy; today’s democratization of AI will do the same.

The pattern-learning phase alone for one AI application has already flagged AI as a “major culprit” in the annual report of the United Nations Framework Convention on Climate Change (UNFCCC).

Oil bears are back as demand fears go viral

WTI fell below $35/bbl in early trading on Friday, and Brent was testing the $40/bbl threshold. Panicked is back, and there is a danger of prices sliding further. Saudi Arabia says “all options are open” at March meeting. Saudi energy minister said that all options are on the table for March meeting, hinting at further production cuts to head off another market meltdown.

The latest IEA Drilling Productivity Report shows all oil producers, China included, fell to 22,000 bpd in February, a much.

Another surplus is building up in the country’s current daily gas consumption is around 90 mcm, while the country’s power plants need nearly 30 mcm of gas to meet the electricity demand, it appears that both industries and exports would face difficulties.

He further pointed to the organizing Extraordinary General Assembly meeting of the company on Dec. 29, 2019, in which its capital has increased by 30 percent and added: “the current and registered capital of the company stands at 7,800 billion toman, the rate of which will be cut to 10,140 billion toman with 30 percent proposed capital increase of 2,340 billion toman.

At the end, Chief Executive of the National Iranian Copper Industries Company (NICICO), Ardeshir Sa’ad Mohammadi said that his company paid 110 toman DPS for each stock of the company in the first nine months of the current year, showing a 55 percent hike as compared to the same period of last year. Dr. Kiyarash Mehrani Deputy CEO of the company for Economic and Financial Affairs was the next speaker who pointed to the organizing the Extraordinary General Assembly Meeting of shareholders of the company and added: “The aim of increasing capital was to increase the company’s capital and its assets as well as to use the resources and profits obtained with the aim of increasing capital.

For the purpose, the National Iranian Copper Industry Company intends to increase its capital from 7,800 billion toman to 10,140 billion toman, showing a 30 percent hike. He pointed to the accumulated profit as one of the internal resources that companies use in order for increasing their capital. He went on to say that NICICO needs about 2,500 billion toman in new capital for advancing and implementing its development Plan. Large companies adopt various methods for financing, one of these methods is the use of reserves and profits obtained with the aim of increasing capital.

Copper Industry is one of the leading industries which can materialize most economic objectives of the company, he said, adding: “the current and registered capital of the company is high, exceeding 50 percent, and can play a leading role in economy of the country.”

National Iranian Copper Industry Company (NICICO) on the path of development and carrying out development projects in companies is one of the best methods for increasing wealth among shareholders. Experiences show that those companies which have failed to carry out development projects have been sidelined and marginalized from the world economic competition.
KASHMIR — Two recent issues have once again shown cracks in United Nations Security Council (UNSC) machinery which has been characterized as one of its some permanent members namely China, Britain, France, and Russia. Kashmir and the second, assassination of Iranian General Qassem Suleimani by American armed forces who has become a HERO in the Muslim World.

In a famous hadith, mother of believers, A’isha (RA) narrated that the Prophet (S) used to have a severe stomachache from which he used to suffer, but this persisted during a short period (barely three days). This made me sad.”

In the name of Allah Who has created you and guided you and brought you to a secure place. O my daughter! that was entrusted to me was taken back from me. Now I have to take care of you always and will not be able to commit any sin. I am tired of your company. I wish I had it to the end of my life but you are resting upon my breast and your head was lying in my lap. I am sorry that my better days are finished, but I will cherish all the tender and loving memories to its grave. Goodbye O you both, a heart which will cherish and will carry your memory forever. I will keep you more aware of the Qur’an than my father and my mother. Please, keep me safe.

FDA to penalize manufacturers producing unlabeled GM foods

Iran’s Food and Drug Administration (FDA) will penalize food manufacturers who have not labeled genetically modified (GM) food products, Vahid Mofid, the caretaker of the FDA department, announced.

All food products containing ingredients derived from GMOs must be labeled, including soybean and corn oil, rapeseed and cottonseed. Otherwise, they would be considered adulterated.

He went on to say that eight laboratories in addition to the Energy & Power Industries Laboratories Company can test the products in terms of containing GM organism. Labeling the products is merely done out of respect for the consumers and the environment, while it helps in preventing the use of such products and for the purpose of health and safety.

SPECIAL PLAN PREPARED TO ATTRACT OVERSEAS IRANIAN RESEARCHERS

The Vice Presidency for Science and Technology has prepared a special plan to attract scientists and researchers living abroad, IRNA news agency reported on Saturday.

The project aims to promote “supporting technological activities and startups,” “postdoctoral facilities,” “supporting employment in innovation centers and accelerators as a trainer and consultant,” “providing facilities for opportunity studies,” “providing employment in reputable domestic companies,” “support for lectures and specialized workshops,” and “support for cooperation as invited and appointed professors.”

It is estimated that about one percent of all Iranian students are studying abroad, which is not above the international average of around 3 percent. Before the Islamic revolution in 1979, some 170,000 students were studying in the country and 100,000 students abroad. According to official statistics, the number of students studying in the country has reached over 4.5 million while there are currently 48,000 students studying in other countries.

Iran examining 38 cities to pick as 2020 Book Capital

Director Ashkan Khatibi to restage “The Good Doctor”

A poster for “The Good Doctor” by Director Ashkan Khatibi. The play is based on plays by English actor and playwright Michael Frayn, and directed by Ashkan Khatibi and Khosroshahi. Both parts will remain on stage for two weeks.

Iranian director Ashkan Davudnejad acts in a scene from Mohammad Kart's “Butterfly Stroke.”

Shahrod Rohani hopes Iranian music moves towards peace and friendship
