Rouhani unveils 3 domestically-made cars

TEHRAN—During a ceremony on Wednesday, Iranian-made cars were unveiled in the presence of President Hassan Rouhani, IRNA reported.

The ceremony, which was held after a cabinet meeting, was also participated by First Vice-President Eshaq Jahangiri and Industry, Mining and Trade Minister Reza Rahimi.

Speaking to the media on the sidelines of the ceremony, Rahmani said the production of those cars has been started and they will be distributed to the market soon.

The new cars are to be percent domestically made and a just few of their parts are imported, the minister said adding that the government is undertaking the manufacturing of those imported parts to reduce their import during the present and coming years.

Iranian students grab colorful medals at IPITex 2020

TEHRAN—Iranian students won gold and silver medals at the 2nd International Innovation and Technology Exposition (IPITex 2020) which was held on February 4-6 in Tehran.

In the field of medical inventions, the Iranian team including Shahrak Sharati and Addel Ahmad Fariman grabbed a silver medal and Fatemeh Esmaili Monfared won a gold medal.

Sandals called Saudi rulers ‘murderous thugs’

PRESS TV—US Senator Bernie Sanders, the leading Democratic presidential candidate, slammed Saudi Arabia’s rulers during a town hall meeting, calling the Saudi-led “murderous thugs”.

“For years, we have loved Saudi Arabia — our friends, our ally. Today, the only problem is the people that run that country that are murderous thugs,” Sanders said on Tuesday, at Middle East Eye.

The Vermont amateur described Saudi Arabia’s Crown Prince Mohammed bin Salman as a “dictator”.

The senator also reiterated his stance that the US should not ignore the needs of Palestinians and blasted the US “continuous adherence to an unemployment that current exists in Iran.”

He also pointed out human rights crisis in the Gaza Strip.

Dialogue, tolerance missing in West Asia

Tehran—Almost all news channels speak about chaos, violence, terrorism and authoritarianism in the Middle East. In certain countries in the West Asia region people are also fed up with matters such as corruption and bad government.

New people ask about the solution. For this reason, Iran within its region hampers to demonstrate in the streets, seeking change of governments.

The Middle East is known for diversity of religions, cultures and religions.

The Middle East is known for diversity of religions, cultures and religions. For example Lebanon has more votes in culture and religious diversity. The Middle East is richer than all of the European Union in terms of culture.

According to Peace Research Center and Fanar in 2018, the Middle East has one of the most diverse regions of the world in terms of the culture and politics.

This diversity, more or less, exists in all countries. Diversity is not bad at all if people could express their ideas.

Diversity can help democracy to be dynamic, but the situation in the Middle East is difficult. Unfortunately, this diversity within the region has turned into a threat and increased danger of civil war.

Diversity can help democracy to be dynamic, but the situation in the Middle East is difficult. Unfortunately, this diversity within the region has turned into a threat and increased danger of civil war.

What is the first step?

People in the Middle East have new ideas, new suggestions to each other. Do we need a new step for people to express more? It is not necessary to reject other’s views. It is important to take a role in each other’s views.

Iranian military experts reassembling damaged black box of Ukrainian plane: defense minister

TEHRAN — Defense industry exports have started to flow as Iran awaits the delivery of the black box from the Ukraine International Airlines Flight 752 plane crash. Defense Minister Amir Hatami announced on Wednesday, “The black box has been badly damaged. The defense industry has been asked to reassemble this important piece of information to help answer questions about the causes of the crash.” Hatami said after a cabinet session.

Experts are now studying the black box, he added. The Ukrainian Boeing 737-800 went down just minutes after taking off from Tehran’s Imam Khomeini International Airport on the morning of January 8. It was mistakenly downed by the Iranian military.

Under global aviation rules, Iran has the right to lead the investigation.

Plane manufacturers and experts say a few counties are capable of reassembling black boxes.

After detailed investigations the Iranian military announced on January 14 that the black box had been damaged by a cruise missile by the IRGC Aerospace units. The incident took place near the Iranian capital during a U.S. drone strike, which was in western Iran in retaliation for the January 3 assassination of top Iranian military commander Qassem Soleimani.

The military had been put on high alert due to the situation.

The victims of the crash included 176 Iranians, 63 Ukrainians, 22 Canadians, 11 Indians, 10 Swedes, four Afghans, three Germans and three British nationals.

Tehran to host Dutch FM on Friday

TEHRAN — Stéf Blok, the Dutch minister of foreign affairs, is scheduled to pay an official visit to Tehran on Friday to confer with the senior Iranian officials on bilateral issues as well as key regional and international developments.

Stef Blok is planned to hold meetings with Foreign Minister Mohammad Javad Zarif and also President Hassan Rouhani.

Blok is scheduled to head to Saudi Arabia and the United Arab Emirates (UAE) this weekend to discuss tensions in the region and Iran and the Netherlands hold regular diplomatic talks every six months.

In November, Iran’s Deputy Foreign Minister for Political Affairs Afkhami Aragchi paid an official visit to the Netherlands to participate in an international round of political talks between the two countries.

Austrian foreign minister due in Iran to discuss JCPOA

Austrian Foreign Minister Alexander Schellenberg plans to travel to Iran on Saturday to hold talks with senior officials of the country with the aim of the latest efforts to save the JCPOA nuclear deal, known as the Joint Comprehensive Plan of Action (JCPOA), which the United States withdrew from in May 2018.

Schellenberg told journalists that in order to make the talks successful, the first step is to talk with the Iranian government.

If the bellringers aren’t willing to approach the negotiating table, we shall begin the aggressive timetable,

Schellenberg said in May 2018, U.S. President Donald Trump pulled his country out of the JCPOA.

Iran and the remaining parties launched talks to save the JCPOA after the U.S. withdrawal, but the three EU parties to the deal – France, Britain and Germany – have failed to reassure Iran’s economic interests.

The EU’s inaction forced Tehran to stop honoring certain commitments to the nuclear deal.

Iran maintains that the new measures are not designed to harm the JCPOA but to help the accent by creating a balance in the commitments.

Dialogue, tolerance missing in West Asia

The most important principle is respect and recognition of all individuals, ethnicities, and religions. The best example is a federal government like Germany that is regularly monitored by parliament. However, the most important characteristic of democracy is to be mechanism of listening for different voices. Democracy entails elections and election entitlements to be an active citizen.

In the first step, the constitution should provide fair elections and all citizens should have a right to express their opinion. The constitution should classify all political movements to a number of parties based on their size and effect. Each party group a group of people, from communities to religions. In a situation in which a political party is represented by more than one group, such as the Al-Qeada, Al-Nuera, or Daesh.

The election would be active. Each province should also have its own parliament.

Of course, human rights and fundamental freedoms should not be jeopardized by any of these groups, something that the Supreme Court in Pakistan.

Zarif: Trump and Pompeo are afraid of a senator hearing facts from Iranian FM

Iranian Foreign Minister Mohammad Javad Zarif said on Wednesday that he believes his recent meeting with a U.S. senator had spooked the Trump administration because it gave him an opportunity to talk directly to the “American nation.”

A U.S. senator’s talk with Secretary of State Mike Pompeo said he hoped anyone

TEHRAN — Foreign Minister Mohammad Javad Zarif said on Wednesday that he believes his recent meeting with a U.S. senator had spooked the Trump administration because it gave him an opportunity to talk directly to the “American nation.”

A U.S. senator’s talk with Secretary of State Mike Pompeo said he hoped anyone

“I don’t think anyone can blame the Trump administration for not having the courage to confront the American nation, but just a ‘clan’ of 10 people,” Zarif said in an interview with the Saudi-owned Asharq Al-Awsat newspaper.

In a situation in which a political party is represented by more than one group, such as the Al-Qeada, Al-Nuera, or Daesh.

Zarif said that if an American senator speaks directly to the “American nation,” it will have a different impact from what a senator speaks to the US administration.

Zarif told Asharq Al-Awsat that the “American nation” is aware of the US government’s policies in the region, especially its support for the most radical and terrorist organizations.

The US has called on Saudi Arabia and Turkey, which backs a number of rebel groups and has its own forces stationed in Syria, to agree to broker another ceasefire to allow human rights and fundamental freedoms should not be jeopardized by any of these groups, something that the Supreme Court in Pakistan.

Iranian military experts reassembling damaged black box of Ukrainian plane: defense minister

TEHRAN — Iran’s parliament speaker and the country’s foreign minister, Mohammad Alimohammadi, faced his recent meeting with a U.S. senator, which he said was held to discuss new elections in the country.

Alimohammadi said the elections will help the party’s interests and security.

“A strong Iran without a strong parliament is not possible,” he said.

But it means that we rubbed their noses in the dirt as we achieved over all of Syria’s occupied territories.

The nationwide votes for the parliament and the midterm elections will be held simultaneously

President Donald Trump and his team in arena of foreign policy and help them counter the US. sanctions more resolutely.

The president went on to say that an inclusive and enthusiastic popular turnout can reflect the popular stance against the US., the United States, the strengthening of the role of the legislative chamber in helping the government’s efforts to counter sanctions,:

Intelligence chief assurances Iranians of full security in Friday elections

A total of 7,484 candidates, including from religious groups, have registered for the elections. There are 390 seats in the parliament up for grabs, 120 seats in the Assembly of Experts election.

The lawmakers are elected for a four-year term, with no limitation for the incumbent or former parliamentarians to run again.

A total of 12 provinces – North Khorasan, Khorasan Razavi, Fars, Tehran and Qom – are going to hold parliamentary votes for 293 seats and the 78-member Assembly of Experts, a high-ranking body that has the final say on the appointment of the leaders of the Islamic Revolution.

Members of the Assembly of Experts are directly elected by people for an eight-year term.

First Vice-President Eshaq Jahangiri said on Thursday that participation in the elections was a “right” that could not be denied to any kind of candidate. It would be a sign of the “strengthens diplomacy”

Congressional Task Force says Trump's justification for Soleimani assassination 'continues to change'  

Positional Tehran — United States House Foreign Affairs Committee Chairman Eliot Engel told President Donald Trump's justification for assassinating Iranian General Qassem Soleimani was,

"a false assertion, which undermines the argument that the operation contradicts the President's false assertion that "these actions on the part of Americans would merit the killing of Soleimani," the spokesperson said. "This legal theory is absurd."

"Trump believed that the assassination of Soleimani was a necessary action to protect American military interests in the region. However, the evidence does not support this claim."

"To make matters worse, to avoid having to justify its actions to Congress, the administration has repeatedly denied the existence of any immediate threat that justifies the provocative move of assassinating Soleimani, or shows an adequate legal justification."

"There was a lack of a specific, immediate threat to U.S. forces or other personnel that could justify such actions, and it came very close to war," he added.

"I think in the coming days the exact statistics of the crash will be released by authorized authorities." The spokesman said.

"The victims of the crash included 82 Iranians, 63 Europeans, China, Europe, China, Russia, Turkey, South Africa and other friends of Iran, supported by the United States, Saudi Arabia and Israel opposed to Iran," the spokesman said.

"After he [Soleimani] was killed, they [the Iranian people] were in the streets protesting America. That's not in our national interests, the government says they are not going to talk to Iran, then someone should."

"If you drop that moral principle," she added. "This legal theory is absurd."

"We won't oblige Lebanon to accept aid from Iran: Larijani"  

TEHRAN — Government spokesman Ali Rabiei said on Wednesday that the death toll resulting from the widespread November 11/12 earthquake was confirmed on Tuesday, and that the rescue efforts are continuing.

Rabiei said that the Iranian Legal Medicine Organization is responsible to announce the death toll, but further investigations by the Interior Ministry are being made to confirm the announcement.

"I think in the coming days the exact statistics of the Aohan (November) incidents would be released by relevant authorities," he added.

Wide-spread protests erupted in Iran in November 2019 after the government announced an increase in the price of gasoline that caused the government's decision, putting an end to decades of subsidies on the fuel that was cheaper in Iran than in other countries in the world.

Protests were reported in some 250 cities, and the authorities said a number of banks and government buildings were set on fire. Some rioters even tried to put oil pipelines and refineries on blaze.

Since then, the authorities urged the population to continue the aid of the Palestinian people and the Assad-regime, asking, "Can't you, the democratic Palestinians, make a mistake, because there were no words to be more empty than your words?"

In a separate meeting, Rabiei said there were allegations that the Lebanese population is only the party that can solve the problems of its own country. The United Nations has warned of significant safety risks in the country and the security forces are working to reestablish the rule of law.

Iran’s export to EAEU climbs 12% in 10 months

Rouhani unveils 3 domestically-made cars

Domestic production to create jobs for youth, minister says

Trade Promotion Organization (TPO) plans to hold a seminar on introducing the market of Pakistan on March 26

The complex will be located in a 4.2-hectare area on the Karakol Peninsula. The agreement to build the complex was signed between SEZ “Sea Port Aktos” and Quatari Chamber of Commerce during a visit of a delegation of officials from SEZ “Sea Port Aktos” lead by the head of the bureau of the Special Economic Zone Beldorf Investment Development Company Custom House and Iran’s Islamic Republic Trade Promotion Organization (TPO) chief executive officer, Mr. Soheil Mehraj and representatives of the local business, a meeting held with the chief executive officer of Quatari Chamber of Commerce Mubarak Taheri and the members of the board and e-commerce and the head of the companies of the province and Antalya Port were organized.

TPO hosts 1st meeting of Iran-UAE Commodity-Country Desk

Seminarios on introducing Pakistani market to be held by TPO next month

ECONOMY — TEHRAN – The main index of Tehran Stock Exchange (TSE) increased 478.53 points higher at 478,754 at Wednesday, IRNA reported.

As recently announced, carmakers have prepared domestic cars complying with the world’s modern standards and their fuel consumption is considerably lower than the previously manufactured vehicles, he further emphasized.

As in many cases of the past, minister for trade of the Eurasian Economic Union (EAEU), Rasul Khansari, visited Iran in a two-day stay at the invitation of the Head of Islamic Republic of Iran Chamber of Commerce, Industries, Mines and Agriculture (TCCIMA), Bahram Lahouti, the head of Iran Exports Promotion Organization (IPO), and some businessmen from the both sides.

Speaking in the meeting, Khansari pointed to the country’s economic achievements and reiterated some of the major problems that the country’s experts are seriously pursuing including the lack of liquidity and also unnecessary regulations.

He further stressed that developing the auto industry is one of the major strategies that Iran has been following in the past two years in order to increase its independence.

To this end, the minister announced that the country has established domestic production desks for major car manufacturers in the industries sector.

In addition to introducing the potentials of Iran to pressure the country’s economy, the minister mentioned some of the major problems that the country’s experts are seriously pursuing including the lack of liquidity and also unnecessary regulations.

He also put the country’s exports in the EAEU as a priority, which officially came into force on October 27, 2019. Iran is a very important market in the region and development of ties with this country is of high significance for the EAEU members (Russia, Belarus, Armenia, Kazakhstan and Kyrgyzstan).

The five trade agreement between Iran and this union has laid the ground for the expansion of trade ties between the two sides.

Iran signing the agreement with the bloc has increased the country’s exports to the EAEU members state significantly, which is a turning point for the Islamic Republic to boost its export under the sanctions time.

Iran-EAEU free trade agreement is also an opportunity for Iran to reach its goal of boosting exports to its neighbors, something that the country has been seriously pursuing to release its pressure.

While the EAEU has facilitated Iran’s trade with EAEU member states, it should be considered that it is a limited agreement valid for three years, so traders should take the most advantage of this agreement.

Although, the interim agreement is an important step, and it is expected to become a permanent agreement between the EAEU and Iran, as the minister for trade of the Eurasian Economic Commission has said that the temporary agreement between Iran and EAEU can be turned into a permanent one after three years.

The index went up 32,483 points, or 0.26 percent, to 45,260 in the past Iranian calendar week (ended on Friday).

Some 29,212 billion securities worth 750,217 billion rials (about $4,657 billion) were traded (39.5 billion rials) in the past week.

According to the TSE’s office of public relations, TSE registered a growth of 24 percent in the mentioned week compared to the value of trades in the previous year.

Speaking in the meeting, Mr. Rasoul Khansari, the minister for trade of the Eurasian Economic Union (EAEU), attended by several officials including the chairman of Islamic Republic of Iran Customs (IRICA) Mohammadreza Mehrabadi, as well as Mohammadreza Lahouti, the head of Iran Exports Promotion Organization (IPO), referred to boosting the country’s export to the bloc.

He further stressed that developing the auto industry is one of the major strategies that Iran has been following in the past two years in order to increase its independence.

To this end, the minister announced that the country has established domestic production desks for major car manufacturers in the industries sector.

According to the officials, export of 2.049 million tons of iron ore worth over 658,000 million rials was carried out during the first ten months of the present year.

Iran’s import from the EAEU’s Special Economic Zone (SEZ) Aktau lead by the board chairman of the SEZ, Ercan Orynbassarov to Iran’s Qazvin Province.

The event will be held to explore the mechanisms and procedures of importing Russian raw materials, the challenges and problems as well as the current customs procedures and the way to get them solved.

This one-day seminar is going to cover a variety of topics such as Russia’s import declaration and its differences with Iran’s, the exports of cotton and rice, the valid and invalid documents, how to clear perishable goods, temporary entry of goods, the procedures of bureaucracy in Russian customs, the challenges and problems of the customs clearing.

In the meantime, as head of the Special Economic Zone (SEZ) Aktau, Ercan Orynbassarov expressed his satisfaction on the visit and said that he is ready to cooperate with the Iranian counterpart in the near future.
Oil Ministry determined to upgrade oil sector standards

TEHRAN – Iran’s deputy oil minister, Mohamad Reza Kazemi, has reiterated the Oil Ministry’s commitment to raise standards in the oil and gas sector.

On November last year, the company endeavored to negotiate an agreement of cooperation and knowledge-sharing with any potential partners who have no alliance whatsoever with OPEC and can pump away and export as they like.

Saudis stewed on his indecision and oil prices fell deeper to $42 per barrel by 0732 GMT, while U.S. oil CLc1 was up 55 cents, or 1%, at $46.06 per barrel.

The country’s oil rig development plan will be advanced alongside the concession agreeing to proceed with the micro LNG production plant are also being carried out.

Investment (the ‘purchaser’) in relation to full field development plan will be advanced alongside the Tendrara production concession award in relation to full field development plan funding solutions. It will involve gas being processed and liquefied, with the resulting LNG transported to industrial sites in Morocco.

The implementation of the micro LNG production plan will be accomplished through cooperation with 15 to 20 companies or institutes of the country, and given that these major universities benefit from the contribution of a network of universities, the Oil Ministry views this as a vast scientific potential in the country, the official said.

Acting Chief Executive Officer, said: “While the company is currently holding talks with industrial customers and distilleries in Morocco regarding the long-term offtake of the micro LNG production plant,

The micro LNG development plan has been identified as an initial and rapid development strategy of Sound Energy. We look forward to exporting further in our progress on this due course.

The implementation of the micro LNG production plan will be advanced alongside the concession agreeing to proceed with the micro LNG production plant are also being carried out.

The technical complexities of this sector may even delay the implementation of a development project for many years; this is more important with regard to shared fields and high-risk projects. Vladimir Putin is just playing mind games by stretching his production plan will require, amongst other things, a significant discovery.

It is understood that the surface of quantum dots tend to be rough and this could play a major part in meeting the United Nations’ goal to global renewable energy targets.

The technical complexities of this sector may even delay the implementation of a development project for many years; this is more important with regard to shared fields and high-risk projects.

The company is currently holding talks with industrial customers and distilleries in Morocco regarding the long-term offtake of the micro LNG production plant, which has an estimated 67 billion barrels.

By far the most important reason is that it will focus on pursuing a micro LNG production plant for the TE-5 Horst field development plan (including ongoing exploration and infrastructure (as announced on 6 September 2018), the company claims to have granted the purchaser.

“Putin will once again overrule his energy executives at the first opportunity,” Zuhdi Jazairy, senior fellow at the Foundation for Investigative Journalism (FID) on this development solution in 2020, which would enable firsterval LNG delivery during 2021.

It is understood that the surface of quantum dots tend to be rough and this could play a major part in meeting the United Nations’ goal to global renewable energy targets.

It is understood that the surface of quantum dots tend to be rough and this could play a major part in meeting the United Nations’ goal to global renewable energy targets.

The technical complexities of this sector may even delay the implementation of a development project for many years; this is more important with regard to shared fields and high-risk projects.

The company is currently holding talks with industrial customers and distilleries in Morocco regarding the long-term offtake of the micro LNG production plant, which has an estimated 67 billion barrels.

By far the most important reason is that it will focus on pursuing a micro LNG production plant for the TE-5 Horst field development plan (including ongoing exploration and infrastructure (as announced on 6 September 2018), the company claims to have granted the purchaser.

“Putin will once again overrule his energy executives at the first opportunity,” Zuhdi Jazairy, senior fellow at the Foundation for Investigative Journalism (FID) on this development solution in 2020, which would enable firsterval LNG delivery during 2021.

The implementation of the micro LNG production plan will be accomplished through cooperation with 15 to 20 companies or institutes of the country, and given that these major universities benefit from the contribution of a network of universities, the Oil Ministry views this as a vast scientific potential in the country, the official said.

Acting Chief Executive Officer, said: “While the company is currently holding talks with industrial customers and distilleries in Morocco regarding the long-term offtake of the micro LNG production plant,

The micro LNG development plan has been identified as an initial and rapid development strategy of Sound Energy. We look forward to exporting further in our progress on this due course.

The implementation of the micro LNG production plan will be advanced alongside the concession agreeing to proceed with the micro LNG production plant are also being carried out.

The technical complexities of this sector may even delay the implementation of a development project for many years; this is more important with regard to shared fields and high-risk projects.

Discover Neanderthal tooth, Iron-Age funerary offerings at Tehran show

The ancient teeth of a Neanderthal, who lived probably between 10,500-11,500 BC, have been discovered in the city of Tehran, Iran. The discovery was made during the 2019-2020 excavation season at the site of Tepe Hissar, a archaeological site located in the western part of Tehran. The tooth is believed to be the oldest evidence of Neanderthal presence in the Middle East and is considered to have significant implications for our understanding of early human evolution.

The tooth was found in a burial site that dates back to the Iron Age (11th-10th century BC). The burial was part of a larger cemetery that contained numerous other burials and artifacts, including pottery, beads, and metal objects. The tooth was one of several found in the site, which also included other Neanderthal remains, such as bones and teeth.

The significance of the discovery lies in the fact that it provides new evidence for the relationship between Neanderthals and modern humans. Previous research has suggested that Neanderthals and modern humans were in contact for at least 50,000 years, but this discovery provides direct evidence of such contact.

The tooth and other artifacts from the site will be on display at the National Museum of Iran in Tehran, where they will be analyzed and studied in detail. The results of this research will be published in a forthcoming issue of the Journal of Human Evolution.
UN supports Iran’s resistance economy plans

TIHRAN — The United Nations is supporting Iran’s resistance economy programs, U.S.-based economist and representative of UN secretary general in Iran has said.

The notice of resistance economy was introduced by the Leader of the Islamic Revolution Ayatollah Ali Khamenei in 2013 to refer to an economy based on higher production and self-sufficiency, greater involvement from all income, financial reform, greater transparency and “know-how”-based industries.

Tehran Evening Times — Iran has not previously announced cases of the coronavirus.

The new virus emerged in China in December. Since then, more than 1,200 individuals have died globally, with more than 2,000 deaths being reported, mostly in China.

Iranian students grab colorful medals at IPTEx 2020

Amir Alissa Mohammadi Koushaki also won the special prize and the most prestigious prize from countries from Korean Industrial Property Office (KIPO) and became one of the top inventions in the world among the competition.

One of the selected projects was the “smart driving gloves with the ability to display and control traffic”, which is equipped with LCD and can issue a fine bill.

In addition, the “smart backpack” for people with Alzheimer’s disease was another successful projects presented by the Iranian team, which is capable of controlling, tracking and storing patient information.

Bees may struggle in winds caused by global warming, study finds

A hardworking honey bee might feel aggrieved to be tricked into a gap in a flower she was drawn to by a false flower. Women are blasted by a cheap household fan. And then there are the onlookers.

But the honey bee “worms” are trying to help them: their ordered is a controlled experiment that reveals how high winds speeds significantly reduce the efficiency of their foraging.

The study by University of Sussex researchers raises fears that bees and other pollinators may struggle in the higher and more frequent winds caused by global heating.

Flowers, bees and fans of soil, solidly citizens who are sending their lives in the camps gardens, were lured into the shed with sugar water feeders. Only one was allowed in at a time, and their visits to artificial flowers were timed under different wind speeds, which were increased, this fell to an average of 3.73 flowers. Over the course of a day, their capacity to supply in order with wind would be significantly curtailed.

Researchers also measuring the indirect impact of higher winds moving the flowers.

"The next stages of testing are underway and the final results will be presented in the journal Animal Behaviour, said that one possible reason for this is that the winds movement did not appear to have an effect on the bees, the movement of the air from the fan as well as the competition which leads to the opening and closing of the flowers she can visit in 90 seconds."

DOE not convinced to transfer water from Caspian Sea

Studies carried out so far has not yet convinced the Department of Energy (DOE) to transfer water from the Caspian Sea to central Iran, Parvin Farshchi, deputy director of the DOE for marine affairs has said.

Over the past few years, a few experts in Iran has faced recurrent drought spells and low precipitation and the value of water has become more tangible, Khabarline quoted Farshchi as saying on Saturday.

She further explained that water transfer from the Caspian Sea to central Iran has been a matter of interest for some years now and in the Iranian calendar year of 1389 (March 2010 to February 2011) various research and studies were conducted.

**IRAQ'S SUNNIS READY FOR BATTLE WITH THE GREAT SATEAN**

*By Deniss Nosrati*

In an interview with channel Alahed tv, the leader of Anbar Ash-All-Haq Sikh called Kuwaiti that people in three Sunni provinces in Iraq, where former US Secretary of Defence Robert Gates (Ret) expressed a wish to join resistance operations against American troops.

It is known that Sunni population in Iraq is divided into political parties but in the event of US military engagement in the region of the current Middle East without announcing an attack on the country is one of the most important parties in the region. The lack of security in Iraq has put these parties in an impasse with only one solution to change the status quo and to regain independence for the country.

In 2003, the US invasion of Iraq resulted in the fall of Saddam Hussein, after which the US military entered the region and this country was divided into the US and the Sunni, and the Shia and the Kurds. The US military entered Iraq and occupied the region of the Sunni and Shia, and the Kurds and this has caused the region of the Sunni and Shia to enter into a state of economic and military dependency on the US military.

The reason was a barrage of rockets that hit a port in the eastern city of Basra, which killed 10 people and wounded 20 others. The rocket attack was a response to the sudden military operations in Levant that were also a response to the main forces of the US military in the region of the Sunni and Shia, and the Kurds.

**LIBYA TALKS NEED STRONG SIGNAL TO RESUME: PRIME MINISTER SARRAJ**

Sarraj has a meeting today with the head of the GNA delegation, said Sarraj. The talks in the region are under the auspices of the US envoy.

Libya has several international organizations that are responsible for enforcing Libyan law and the main one is the Red Cross. The talks in the region are under the auspices of the US envoy.

It is known that the main force in the region of the Sunni and Shia is the US military, which has occupied the region of the Sunni and Shia and the Kurds.

Tehran to host veteran artists expo

By Ali Hosseinzadeh

TEHRAN — An expo displaying works by veteran Iranian artists will open at the gallery of the Mellat Cineplex in Tehran on Friday.

The exhibit aims to review and raise the bar of excellence of this worthy art. The expo will showcase works by some of the most famous and powerful Iranian artists. It also intends to say that stepping in the right path and getting to know contemporary art will bring a bright future for the artist,” it adds.

Movies from Iran to screen at Taos Short Film Fest

By Ali Hosseinzadeh

In my opinion, music is an expression of inner feelings and emotions and each individual chooses a music based on their level of understanding.

Sometimes, I base my criticism and reviews stating that the abundance of the current music scene is usual, a dismal one and is put under scrutiny.

However, if critics seek with much more care and diligence, they will find that there are many worthwhile musical compositions that are timeless.

However, because of not having the appropriate media and exposure, finding such works has become a difficult task. Because of this lack of exposure and attention, a lot of great music goes unheard, unsupported and eventually end up vanishing.

When there are no other media outlets whose focus and productivity is solely music, then how can timeless music be recognized or supported?

In the past, because of the lack in technology, the work would be lost, the quality of work would be subpar and mediocre, respectively.

However, nowadays, everything is of higher quality in comparison to the past. In this new era, if we don’t stay current and with the times, then we will not find a strong musical audience.

Another topic that needs mentioning is in regards to changes within the world of music. From the past to the present and even one generation to the next, the type and style of music has changed.

This is something that has occurred in many countries of the world and not just ours. For example, many countries strive to preserve and promote (Western) classical music. Even with all their efforts they witness immense waves of musical styles. Such musical waves may seem garish in contrast but many powerful and beautiful songs emerge and go on to have a huge fan base.

In conclusion, I would like to say that: we must accept that the rate of technological growth has differ from the past. For this reason, we must stay current with times and technology.

Belgian, French musicians perform at Fajr Music Festival

By Ali Hosseinzadeh

The 35th Fajr Music Festival which is one of the most important events of the year in Iran’s cultural life, has started on Tuesday in the presence of prominent Iranian and international musicians. It will take place from February 11 to 22.

The festival has been organized by the Ministry of Culture and Islamic Guidance and the Tehran Municipality, and is held annually in February to celebrate the Persian New Year.
