Rainfall increases Lake Urmia level

TEHRAN – Recent rainfall has increased the level of Lake Urmia to 1,275 meters, a step closer to its ecological level of 1,274 meters. The water level between West Azerbaijan and East Azerbaijan provinces is in northwest Iran, is one of the largest salt-water lakes in the Middle East.

However, demands of Iran’s president Ebrahim Raisi and the Ministry of the Interior in the women’s division. Fatemeh Mirian was held in Karaj, Alborz Province.

Coach Dragutin Skocic meets Croatian football chief Davor Suker

Iran’s next budget bill has been set to be reined in soon. The State Revenue and Urban Development Minister and Deputy Parliament Speaker Hisham Al-Sudani said that the budget bill is not compatible with the country’s current economic conditions.

The first and most important objection to the budget bill is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The second objection is the unrealistic numbers for oil sales, which the budget bill starts on March 20, stating that the bill is not compatible with the country’s current economic conditions.

The third objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The fourth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The fifth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The sixth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The seventh objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The eighth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The ninth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The tenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The eleventh objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The twelfth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The thirteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The fourteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The fifteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The sixteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The seventeenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The eighteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The nineteenth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.

The twentieth objection is the unrealistic estimations of the country’s oil strategies for compensating a probable decrease in oil sales. In this connection, Iraqi activist Alaa al-Khatib, a former member of Iraq’s parliament, said that the budget bill is not compatible with the country’s current economic conditions.
Iranian Navy’s 66th fleet berth at Jakarta port

**POLITICAL**

TEHRAN — The public relations of the Iranian Navy announced on Tuesday that the 66th Iranian Naval Fleet has arrived at the Indonesian port city of Jakarta.

The statement said that after 25 days of non-stop sailing and hoisting Iran’s flag in international waters, the fleet berthed at Jakarta. In the meantime, Captain Ehsan Naeini, the fleet commander, said that the fleet will stay in Jakarta port city for three days.

He added, “Holding meetings with the senior Indonesian navy commanders and making reciprocal visits regarding the friendly relations of the fleet with the fleet of the friendly navy are among purposes of the fleet during its stay in Jakarta.”

The fleet, including Khaleh Helicopter-carrier and Rayan destroyer, left the Iranian port city of Bandar Abbas in early February.

In recent years, Iran’s naval forces have increased their presence in international waters to ensure safe and secure routes and protect merchant vessels and oil tankers from pirates.

In line with international efforts to combat piracy, the Iranian Navy has been operating off the coast of the Gulf of Aden to safeguard the vessels involved in maritime trade, especially ships of oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tankers or oil tanker...
Zarif: Coronavirus, like terrorism, knows no bounds 

**TEHRAN** — Foreign Minister Mohammad Javad Zarif has said like other viruses, including terrorism, coronavirus knows no borders, calling for more regional cooperation to combat it. “Like other viruses - incul terrorism - #COVID19 knows no borders and doesn’t distinguish ethnicities or religions or anyone,” Zarif said on Tuesday in a tweet.

“Let’s combine our wills, let us cooperate to get rid of the coronavirus,” he added. “This epidemic is a public health problem, not a political one.”

Meanwhile, the head of the Iranian Ministry of Health Ali Bandari said that the JCPOA Joint Commission meeting of the JCPOA Joint Commission would be convened on the 26th of February at the level of political directors, according to Sputnik.

The meeting that is going to be held on Wednesday, February 26, will be a regular and periodic session of the JCPOA Joint Commission that will be convened at the level of deputy foreign (foreign) ministers and political directors,” he said, the Foreign Ministry website reported.

The official website of the European Union first announced the meeting. “A meeting of the Joint Commission of the Joint Comprehensive Plan of Action (JCPOA) will take place in Vienna on 26 February. The Joint Commission will be chaired on behalf of the EU High Representative Josep Borrell by EU Secretary General Helga Maria Schmid and will be attended by representatives of China, France, Germany, Russia, United Kingdom and Iran,” said on Monday.

“More recently in December, Iran’s international resolve to overcome the coronavirus outbreak, noting that negotiation will be undertaken under control over the next weeks.

The Pakistani diplomat also has the experience of working at the Organization of Islamic Cooperation (OIC) and the UN.

It was also announced in January by the Munich Security Conference, according to AP.

For his part, Khan called Iran and Pakistan brotherly countries and said that the Wednesday meeting of the JCPOA was an opportunity to stop the escalation of tensions surrounding the Iran nuclear agreement.

“Tomorrow, Vienna should be the meeting of the Joint Commission of the JCPOA. It is a chance, although not a 100 percent one, but still a chance to stop the tension and part of the instruments in this process,” Larry said on Tuesday at the Disarmament Conference in Geneva, according to the state news agency IRNA.

Coronavirus outbreak will be controlled next weeks; civil defense chief

Rabiei pointed out that outbreak of coronavirus is a health emergency and warned that the disease is continuing.

He said people should help the health sector more than ever and observe health protocols.

He added, “I have called on the entire political parties, groups and media outlets to refrain from publicizing coronavirus outbreak.”

“If we want the Iran nuclear deal to survive, we need to ensure that the JCPOA is in place. If it returns to full compliance, “he wrote in an article in the Project Syndicate published on February 18.

Iran’s government has put in place a set of contingency plans, including the temporary shutdown of schools, universities and cultural centers, to curb the coronavirus outbreak that by Tuesday afternoon had claimed at least fifteen lives in the country.

Refuting U.S. claims that its anti-Iran sanctions do not cover supply of medicine, the official added that the U.S. claims that basic needs such as pharmaceutical and commodities are not sanctioned, access to the most basic human needs are blocked due to the sanctions imposed on international financial transactions and banking.

Pakistan envoy submits credentials to Zarif

**TEHRAN** – Pakistan’s new ambassador to Iran presented his letter of credence to Foreign Minister Mohammad Javad Zarif, said Foreign Ministry spokesperson Abbas Mousavi.

The Pakistani diplomat also has the experience of working at the Organization of Islamic Cooperation (OIC) and the UN.

Earlier this month, the Pakistani ambassador said Prime Minister Imran Khan has stressed the importance of fraternal ties with Iran.

"Pre-departure call on PM (Imran Khan)P1. He stressed the importance of enhancing our ties which are rooted in history, culture and society. As Ambassador to Iran, I would be my earnest desire to take our bilateral ties to greater heights," was the Tweet.

Prime Minister Khan visited Tehran on October 13. He met with Leader of the Islamic Revolution Ayatollah Ali Khamenei and President Hassan Rouhani.

His trip was intended to mediate between Tehran and Washington.

According to a source, Iran has never initiated a war “but anyone starts a war against Iran will undoubtedly regret.”

Earlier, Ayatollah Khamenei described Iran-Pakistan relations as brotherly and added importance to expansion of ties and promotion of security in border.

For his part, Khan called Iran and Pakistan brotherly countries and said that Islamabad seeks to expand relations with Iran.

Pakistan considers Iran an “important partner” especially in economic area, the prime minister said.
ECONOMY

Kong, wrote in a note. Lu, chief China economist at Nomura International in Hong Kong, said policymakers are looking to “more flexibility” in monetary easing.

Cutting the reserve requirement ratio, using lending facilities and allowing banks to issue short-term bills could support growth, which has been 2.5% annually since 2014.

Global warning that a prolonged public health crisis could cause financial strain on households and businesses, as the coronavirus epidemic has reduced global economic growth.

China signals more easing to the economy, as the coronavirus crisis has reduced growth this year through fiscal and monetary policy, as the coronavirus outbreak has reduced global economic growth.

The authorities will keep liquidity sufficient and continue to support the economy, which has been 2.5% annually since 2014.

Xi told attendees that the outbreak is the “most rapid, wide-spread and extensive” that China has seen in the past decade, and the authorities will support the economy.

The rosy figures sparked optimism that the euro area economy would grow.

Economic analysts believe that excessive issuance of treasury bonds means creating more liquidity which consequently results in more inflation.

Why Majlis rejected the budget bill?

Latest, new data showed that the eurozone economy had slowed more than expected.

Economists believe that the eurozone economy is likely to slow down this year.

Japan warned that the outbreak could cause financial strain on households and businesses, as the coronavirus epidemic has reduced global economic growth.

The Japanese government will support the economy, which has been 2.5% annually since 2014.

Irjan’s gas output to hit record high by mid-March: Zanganeh

By Hamid Ghaemi

**OPEC hasn’t run out of ideas, Saudi energy minister insists as oil prices slide**

Minister of Energy and Mineral Resources Abdulaziz bin Salman Al Saud said Tuesday that OPEC+ producers will continue to bump against oil production limits, offering the recent steep falls in crude prices and the prospects of further declines are not sufficient to signal the end of OPEC+ cooperation.

Mr. Al Saud said that the production cuts in the alliance are still needed and will continue and will not be reconsidered. He said that the new production cuts offered by Russia will not be considered.

He added that OPEC+ producers will continue to bump against oil production limits and that the alliance has a long-term strategy of reducing oil production and increasing oil demand.

The current prices are still at a record level and the alliance will continue to bump against oil production limits. He added that the alliance is committed to stabilizing oil prices and ensuring the stability of the global energy market.

The energy minister said that the recent oil price declines are due to the coronavirus outbreak and the impact of Iran’s sanctions on oil production.

He said that the alliance has a strategy to reduce oil production and increase oil demand, and that the alliance will continue to work on this strategy.

Mr. Al Saud said that the alliance has a clear strategy for the future and that the current situation is just a temporary phase.

He added that the alliance is committed to reducing oil production and increasing oil demand, and that the alliance will continue to work on this strategy.

Nine years after Bahrain’s uprising, its Human Rights crisis has only worsened

By Ayat Maghbool

It’s been nine years since Bahrain’s February 2011 uprising, an event that has reshaped the political landscape throughout the region, but the crisis in Bahrain continues to this day. In 2012, human rights activists and local journalists documented the government’s continued crackdown on its citizens and the imposition of unjust detentions and torture. The Bahraini regime has been embroiled in a series of human rights violations, including the detention of peaceful protesters and the use of excessive force by security forces.

In July, the authorities executed two men and sentenced another 11 to death, in what the United Nations described as “a failed system of justice.” The Human Rights Watch has reported that Bahrain’s penal code is so vague and broad that it allows for arbitrary detention and imprisonment. It has called on the government to review its laws and practices to ensure respect for human rights.

The United Nations has repeatedly called on Bahrain to release all prisoners of conscience and to put an end to the use of torture and other forms of ill-treatment. However, the government has failed to respond to these calls.

Despite these international calls, the Bahraini regime has continued to crack down on its citizens, arresting and detaining thousands of peaceful protesters. It has also imposed strict controls on the media and communications, limiting the ability of citizens to express their views.

The situation in Bahrain is a stark reminder of the ongoing human rights crisis in the region. It highlights the need for a comprehensive strategy to address the root causes of these violations and to hold perpetrators accountable. The international community must take action to ensure that human rights are respected in Bahrain and throughout the region.

Countdown for the establishment of new Iraqi cabinet: Washington political pressures

By Saleh Ali

The countdown for the establishment of the new Iraqi cabinet continues as political pressures increase in Washington. The US government is applying pressure on the Iraqi political leaders to form a cabinet that is more inclusive and representative of the diverse population of the country. The US has been critical of the slow pace of the negotiations and has threatened to impose sanctions on individuals and entities that obstruct the process.

The US government has been particularly concerned about the inclusion of the Kurdistan Regional Government (KRG) in the new cabinet. The KRG has been a source of tension in Iraq, and the US is concerned about the possibility of a KRG-dominated cabinet that could undermine the unity of the country.

The situation in Iraq is a reminder of the ongoing political crises in the Middle East. It highlights the need for a comprehensive strategy to address the root causes of these crises and to promote stability and reconciliation. The international community must take action to ensure that the new Iraqi cabinet is inclusive and representative of the diverse population of the country.

The FATF blacklist and its reverse impact on stock market

The FATF (Financial Action Task Force) is an intergovernmental organization that monitors and combat terrorism financing. The FATF has placed Iran on its blacklist due to the country’s failure to meet the required standards for combating money laundering and terrorist financing. This has had a significant impact on the country’s economy, with the imposition of financial sanctions and the freezing of assets.

The FATF’s decision has also had a reverse impact on the stock market. The imposition of financial sanctions has led to a decline in foreign investment in Iran, which has had a negative impact on the stock market. However, the government has taken measures to mitigate the effects of the sanctions, including the introduction of the new IRANdex stock market.

The FATF’s decision is a reminder of the ongoing political crises in the Middle East. It highlights the need for a comprehensive strategy to address the root causes of these crises and to promote stability and reconciliation. The international community must take action to ensure that the new Iranian government is able to combat terrorism financing and to promote stability and reconciliation in the region.
One billion-year-old green seaweeds unearthed in China

Scientists have found evidence that seaweeds were proliﬁc in Earth’s oceans several hundred million years before modern plants began colonizing dry land. The billion-year-old micro-fossils, tiny imprints left behind by the algae species Protocladalea antiqua, comprise the oldest evidence of green algae on Earth.

The algae imprints were discovered in rock slabs recovered near the city of Punan, in southern China. After dying in the shallow seas where they lived, the green seaweeds sank to the sea bed and were fossilized, the researchers say.

“Molecular clock and biomarker data indicate that chlorophytes – a group of green algae containing the chloroplasts that are the evolutionary ancestors of the land plants – diverged in the Mesoproterozoic or early Neoproterozoic, followed by the arrival of the first land plants,” said Weng Fei, lead author of the study.

“Trees, grasses, food crops and bushes all evolved from these early green seaweed species, members of the Chlorophyta phylum,” said Fei. “Our study shows that green seaweeds evolved no later than 1 billion years ago, pushing back the record of green seaweeds arriving on dry land. The latest ﬁndings suggest green algae anchored Earth’s food chains for the 350 million years leading up to the advent of land plants.”

“Our study shows that green seaweeds evolved no later than 1 billion years ago, pushing back the record of green seaweeds by about 200 million years,” said Xiao. “What kind of seaweeds supplied food to marine ecosystems?”

Most geobiologists estimate Protocladalea antiqua and its relatives adapted to land over the course of a few hundred million years. Trees, grasses, food crops and bushes all evolved from these early green seaweed species, members of the Chlorophyta phylum.

“Molecular clock and biomarker data indicate that chlorophytes diverged in the Mesoproterozoic or early Neoproterozoic, followed by their subsequent phylogenetic diversiﬁcation, multicellularevolution and ecological expansion in the late Neoproterozoic and Paleozoic,” researchers wrote in their paper.

Scientists have long searched for fossil remains of green plants that ﬁrst evolved in rivers and lakes and only later made their way to the land. The thousands of seaweed species found on Earth are divided into three classes, brown and green. Scientists have found fossil evidence of red seaweed, Rhodophyta, dated as far back as 550 million years.

“Some are modern: green seaweeds that look very similar to the fossils that we found,” said Xiao. “A group of modern green seaweeds, known as siphonoclades, are particularly similar in shape and size to the fossils we found.”

The 1-billion-year-old micro-fossils, tiny imprints left behind in the shallow seas where they lived, are the oldest evidence of green seaweeds found to date, the researchers said. The discoveries were made by researchers at the Shanghai Institute of Geology and Geophysics.

Mourenas earlier this month announced the country will follow up on the issue of visa-free travel for municipal tourists with Russia at the upcoming (25th) edition of the Moscow International Travel & Tourism Exhibition (MITT), which will be held from March 17 to 23.

“The Russian visa is a very important [issue] that we should handle with the utmost influence in this exhibition…”

One of the major issues is to pursue and finalize visa cancellation for Iran and Russia group tours, Mourenas said.

In December, Mourenas announced that Tehran was considering to allow Russian tourists to visit-free entry into the country to boost tourism after it granted the same privilege to other countries, including China and Oman passport holders.

Iranian President Hassan Rouhani and his Russian counterpart Vladimir Putin vowed to boost bilateral tourism in 2017 for certain tourist groups during their meeting in Sochi.

Based on the agreed tour groups of 5 to 50 people heading to easternmost parts of Russia from Iran or vice versa were granted a visa-free stay of up to 15 days. Iran welcomed some 4.5 million foreign nationals last year, achieving 5.5 percent increase year on year.

The country expects to reap a bonanza from its资源优势 tourist spots, including 132 ones that have been placed on the UNESCO World Heritage list. Under the 2015 Tourism Vision Plan, the country aims to attract as many as 20 million tourists annually from 4.8 million in 2014 to 20 million in 2025.

A billion-year-old green seaweed fossil

The new fossils were discovered in southern China, near the city of Punan. The fossils, which were found in rock slabs recovered near the city of Punan, in southern China, are the oldest evidence of green algae on Earth. The researchers dated the fossils to be at least 1 billion years old.

The researchers said the discovery is significant because it pushes back the evidence of green algae anchoring Earth’s food chains by about 200 million years. The researchers suggested that green algae could have provided food to marine ecosystems for the 350 million years leading up to the advent of land plants.

Mourenas earlier this month announced the country will follow up on the issue of visa-free travel for municipal tourists with Russia at the upcoming (25th) edition of the Moscow International Travel & Tourism Exhibition (MITT), which will be held from March 17 to 23.

Iranian President Hassan Rouhani and his Russian counterpart Vladimir Putin vowed to boost bilateral tourism in 2017 for certain tourist groups during their meeting in Sochi.

Based on the agreed tour groups of 5 to 50 people heading to easternmost parts of Russia from Iran or vice versa were granted a visa-free stay of up to 15 days. Iran welcomed some 4.5 million foreign nationals last year, achieving 5.5 percent increase year on year.

The country expects to reap a bonanza from its资源优势 tourist spots, including 132 ones that have been placed on the UNESCO World Heritage list. Under the 2015 Tourism Vision Plan, the country aims to attract as many as 20 million tourists annually from 4.8 million in 2014 to 20 million in 2025.

A view of Bazaar-e Vakil (Vakil Bazaar) in Shiraz

Shiraz, the city of poetry, passion and love

In constructing the bazaar include plaster, brick and lime, and some of the arcades are embellished with medallion designs. In Shiraz, between Hamidieh and the Old Bridge, most of the buildings are constructed from yellow sandstone. In the frontage of the shop which is generally a domed arch and four bazaars perpendicularly connected, the bazaar are some of Shiraz’s souvenirs. While in the bazaar, don’t forget to eat Shiraz’s falafel with humus and juice and buy some Shiraz’s famous orange and apricot juice.

The best time to visit Shiraz is during spring when butter oranges blossom and give the city a taste of orange juice. There is also an alcohol restaurant by the bazaar where you may try local Shirazi cuisine including Kalsaz Polo (rice and chicken) with Bu- rashad Salad, Aluellopis (lamb-in-rice) and Dughtesh (Pomegranate and onions).

The country has put in place a set of contingency plans, including the tempo- ry closure of its borders with foreign countries, and cultural centers, in an effort to curb the virus and eventually end the outbreak. So far, 95 people in the country have been infected with the virus, of whom 15 died.

The foreign ministers meeting here have found consensus: if something is coherent, it is clear and easy to understand. It is easy to read and sing from the same song sheet; being so hostile, like two enemies who are about to fight with knives; it is easy to be in complete agreement.

E-motorbikes come to curb air pollution in metropolises

The first phase of electric motorcycle development project will be implemented aiming at reducing air pollution in Tehran and other metropolises, IRNA news agency reported. Energy Minister Reza Ardakanian said on Tuesday that electric motorcycles will be promoted in big cities in collaboration with the Ministry of Industry, Mining and Trade.

E-motorbikes, in addition to electric motorcycles being manufactured and marketed from now on, existing motorcycles will also change to use electricity sources.

**Rainfall increases Lake Urmia level**

The lake is expected to reach its ecological level within 10 years by completing the restoration plans which started after 2003.

Farhad Sardarzadeh, head of the Lake Urmia Restoration Organization, said: “It is clear that the lake’s level is now 0.08 meters higher than it was last year.”

According to the latest monitoring, the lake’s water volume is estimated at more than 3.6 billion cubic meters. However, if the lake surface area reached 6,800 square kilometers, adding that the figure is increased by 58 square kilometers per year, this situation is expected to be maintained.

Although the ecological level of the lake is defined as 1.274 meters, the lake will also have favorable conditions for aquaculture and tourism and the area of the lake will be 6,900 square kilometers and in UAE ecological balance of 1.4 billion cubic meters over the next few years, it is expected that the lake will reach 1.274 meters of water is required.

The sharp rise in precipitation rates over the past crop year since now has raised hopes for total restoration of the once world’s largest salt lake.

This is a while, deputy environment chief Masoud Tafti told Khabaronline in July 2019 that rainfall is not the only reason behind Lake Urmia coming back to life. Thus, restoration measures turned out to be effective and unlike the previous years of high rainfall poured over the lake but did not last long.

The effort put intoproperly dredging and clearing of water pollution in river bars as way came efficient in the lake conservation, he added.

**Facts being ignored on coronavirus status in Iran’s neighbors**

Since the outbreak of the coronavirus in the Chinese, Turkish airlines confirmed transporting passengers from the country and did not say anything about the necessity of checking temperatures and passengers from the region originating from China. At the same time, reports of providing Turkish hospitals with advanced equipment that can detect covid-19 in 60 minutes were reported in Turkish media.

Now we must ask Turkish authorities whether or not any tourists with a history of travel after the arrival of a huge number of Chinese tourists.

Those who have been to Turkey admit the substantial presence of Chinese tourists in the country and believe that Turkey is unlikely to prevent the arrival of Chinese nationals due to maintaining tourism markets and its benefits, nor will they inform Turkish people properly regarding the possibility of coronavirus infection.

It should be noted that currently, Chinese nationals can book flights to Istanbul at https://trip.com/flights/ shanghai-to-istanbul/airlines-sha-iai/, while Iranian flights to Turkey have been canceled.

**Protecting people’s lives or political revenge?**

The charter of the Turkish border with Iran and the cancellation of flights from Iran to Turkey are carried out amid new hostilities in the region. Turkey recently occupied some parts of Syria apparently for the fight against terrorism and this led to some sort of tension with Iran and Russia.

Turkish officials appear to exaggerate about the spread of coronavirus in Iran, seeking revenge on Tehran over Syria since they canceled the trip of a Turkish delegation to Tehran seemingly due to covid-19 infection, as Tehran hosted top European authorities on Feb. 23.

A German delegation which was supposed to sign a memorandum of understanding with regard to Tehran Book Fair reportedly canceled their flight to Iran.

**The situation in other neighboring countries of Iran**

Other neighboring countries of Iran have not been immune to the coronavirus outbreak; as of Feb. 19, at least 82 cases of infection were reported in the UAE.

Sources in UAE have reported the death of 82 cases of infection into the health sector. So far, about 50 cases have been diagnosed in UAE. Official sources in UAE have so far refused to publish those figures.

The Turkish health minister is inter- resting. While most countries have moved their own nationals out of Iran, Pakistan showed no sign of doing so.

**The new phase of Iranophobia**

Iran, a different story. Iran has created a new opportunity for the countries and media outlets opposing Iran to launch a massive offensive against the Islamic Republic. These countries reported the news of the virus in a way if Iran was the primary source of infection, not China.

Exaggerating the problems of one country with the aim of hiding the same issues elsewhere is a situation we observe these days. If it is not the novel coronavirus outbreak that will end in Iran, and then those countries must immediately acknowledge it must be seen if the rulers of neighboring countries will ignore Iranian tourists during the New Year’s holidays simply forget the dangers of coronavirus.

One should bear in mind the huge propaganda against the coronavirus and the situation it created between Iran and neighboring countries. Moreover, it gives rise to the necessity of taking the issue to undermine the Chinese economy.

**Conclusion**

We defend the health workers worldwide combat of the disasters.

The world’s accountants want to put the climate crisis at the forefront of their work to spur global companies to adopt green polices and strategies, in turn reducing risks, according to the Institute of Chartered Accountants in England and Wales (ICAEW) and other industry groups. There are 5,000,000 professional and public accountants, representing more than 2.5 million businesses, who use their skills to help companies prepare for a climate emergency.

The groups want all members of the Accounting for Sustainability Project (A4S) network to integrate climate risk into their companies’ audits to drive comprehensive and comprehensive plans are underway to get rid of the novel coronavirus, known as COVID-19, in the country.

EU Iraq meeting (March 19, 2020)

European Union foreign ministers are meeting in Brussels to prepare for what looks likely to be a difficult summit meeting of EU leaders later this week. This report from our Europe correspondent is about the situation in Iraq. There is a real sense of gloom and frustration in Brussels. The EU ban on Libyan diplomatic divisions’hires in 2019 on Iraq. There is, said the external relations commissioner, Chris Patten, a lot of broken eurocracy on the floor, and we’re going to have to break it together.

But their disagreements about Iraq are well-documented and the EU has done that, more than once, as senior officials have repeatedly said that the EU is doing the job. This is the EU’s biggest and most important EU countries which are at daggers drawn. If the EU is to form any kind of coherent foreign policy, it needs Franco and Britain singing from the same song sheet. But their disagreements about Iraq are well-documented and increasingly serious.

The foreign ministers meeting here have found consensus: if something is coherent, it is clear and easy to understand. It is easy to read and sing from the same song sheet; being so hostile, like two enemies who are about to fight with knives; it is easy to be in complete agreement.

**Conclusion**

The political fallout of a war in Iraq will haunt Europe for years.

**DICTIONARY**

**-agog, -agogue**

-agog: a tendency to seek or avoid danger, or to inspire others with confidence, enthusiasm, or occasion for action.

-agogue: an apparatus or device for playing music, or for producing sounds.

**Meaning:** leader

**Example:** for a person who was a pedagogue whose classroom lessons consisted entirely of reading, directly from the textbook in a monotone.

**Phrasal Verb**

**put something back**

**Explanation:** if you doudge a bullet, you narrowly avoid a very serious problem or a disaster.

**Example:** for I dodged a bullet when I missed the plane. It resulted just take off after.
