Why Israel Fiercely Opposes this ignorance and provocations are at the heart of the dispute. Such provocations are closely monitored by China’s military. Over the years U.S. wars, and on occasion those from Washington’s allies such as the United Kingdom and Canada, have sailed through the strait. Pelosi made her provocative visit to the Taiwan region a month ago showing total disregard to China’s warnings not to go ahead with the trip and disrespecting the one-China principle. Page 5

Iran concludes study of EU response to EU nuclear deal by Friday report

TEHRAN – At least until the end of Friday, Iran will conclude a review of the United States’ response to the European Union’s draft text intended to revive the 2015 nuclear deal, a news website close to Iran’s Supreme National Security Council said in a tweet on Sunday.

Nour News said the detailed examination of the U.S. response is going on at expert levels. EU foreign policy chief Josep Borrell submitted its text, which was described as final, on August 8. Iran gave its response to the text on August 15, which was described as “reasonable” by Borrell.

However, the U.S. gave its response on August 24. Iran received the U.S. response through the EU.

Signing agreements worth $700m, result of Iran’s presence in MIMS Automobility Moscow

TEHRAN – The head of Iran’s Trade Promotion Organization (TPO) said that signings agreements worth $700 million was the result of Iran’s presence in MIMS Automobility Moscow 2022 (held at Moscow Expo Center during August 21-23)."Alireza Peyman-Pak has considered Iran’s presence in the Moscow automobile exhibition as a serious start for great cooperation between Iran and Russia in the field of automobile manufacturing and more importantly in the fields of supply and export of automobile parts. The international exhibition’s inaugural ceremony had been attended by Deputy Minister of Industry and Trade of the Russian Federation Albert Karnov, Iranian Minister of Industry, Mining and Trade Reza Fatemi-Amin, and Iranian Ambassador to Russia Zareh Alavi. According to Peyman-Pak, “Automobile sector, auto parts” and “automobile value

Libya sees deadly clashes

Deadly fighting broke out between what is strongly believed to be forces loyal to rival governments in Libya; raising fears a bigger conflict breaking out eleven years after NATO attacked the country. According to medical officials, at least 32 people have died in the latest bout of violence and some 109 others have suffered injuries during the unrest.

Iran intends to launch 100-500-kilogram satellites soon

TEHRAN - Commander of the Iranian Air Defense Force has emphasized the Islamic Republic’s great capacity and asserted that the Air Defense Force can track even the smallest moves of supersonic flying objects within a range of 3,000 km.

Brigadier General Alireza Sabahifard said the Air Defense Force is now outfitted with radars with a range of 3,000 kilometers, which is unique in the globe.

“The Air Defense Force of the Islamic Republic of Iran has taken significant steps in recent years to strengthen national security, General Sabahifard stated.

The senior commander went on to say “Now we have reached a point where we can declare that all the equipment and systems are employed by brilliant Iranian youngsters and we do not use any equipment from elsewhere”.

The enemies could never have imagined Iran’s deterrence strategy and sabre-rattling, he said, adding that any breach of Iranian airspace will result in a reaction that can be described as “the response of government by government”.

“Any adversaries could strike us, we would render the Islamic Republic of Iran’s airspace insecure, but they never can,” Sabahifard pointed out.

Article 91 of the military’s ability to discourage potential attackers and its arsenal of weapons.

The top commander pointed out that Iranian drones are capable of being equipped with armaments of high-explosive rate needed to attack the targets.

Iranian military authorities emphasize that Teheran’s ability to repel its adversaries has caused them to be more circumspect in their moves and that all of their assets are within the range of Teheran’s defense eye.

The IRIADF pointed out that if an Irvine had malicious intentions, it was capable of attacking the enemy’s sensitive and important interests anywhere.

A key factor of the military’s success is the capability of its forces to destroy the enemy and create tension between the two sides, the commanders said.

The IRIADF emphasized the necessity for nuclear powers to provide security guarantees to non-nuclear states. However, it issued a warning against the three nuclear armed nations of NATO - the US, the UK, and France - for dominating the nuclear arms race.

Russia, China, India, and others have voiced their opposition to the nuclear arms race.

The latest developments in the aerospace sector will be revealed in the future, according to President Ebrahim Raisi. He said during the cabinet meeting that “the nation will see unprecedented space accomplishments in the future.”

Military technology steps up Iranian deterrence: Parliament speaker

Qalibaf, a former military commander who has been the last founder of the Islamic Republic’s defense is based on the people’s unity, and the cái desirers of the nation are well aware that the military’s power that derives from the close bond between the establishment and the people.

Iran’s defense and military sector has once again, reiterated the public’s support and spirit during the recent floods which the Islamic Republic of Iran’s military forces successfully and without any casualties passed through and helped the Islamic Republic of Iran and the population of Pakistan to manage to successfully reach a sizable audience.

The study only is the most thorough evaluations to date of a covert, pro-U.S. influence campaign, according to UK experts.

Raisi says Iran ready to help flood-hit Pakistan

Raisi said Iran ready to help flood-hit Pakistan at once and has a range of 450 kilometers (284 miles).

Later, the IRIADF presented the Kashf-98 (Destroyer-99) 3D phased-array radar system, which can see tiny flying objects.

According to reports, Kashf-99 has a range of 12 kilometers and can simultaneously track hundreds of targets (744).

Shahid-e Fars (Persian Gulf) and Miragoph (Observe), two new defense and scientific phased-array radar systems, were launched on April 4, 2023 at the presence of President Ebrahim Raisi, the commander of the Iranian Army.

The long-range and strategic Shahid-e Fars radar is a 3D phased-array system. It can detect both conventional and radar-evading objects, as well as ballistic missiles, and has a detection range of more than 800 kilometers (497 miles).

Miragoph can track small targets at low and intermediate altitudes, as well as fixed and mobile targets.
Iranian deputy FM meets Qatari counterpart

Iranian Foreign Minister Amir Hosein Coreisi met with Qatari Deputy Foreign Minister for Regional Affairs Mohammad bin Abdul Aziz al-Khulaifi and his accompanying delegation on Saturday evening.

The Iranian foreign ministry said the meeting focused on bilateral ties in addition to regional and international developments.

Bagheri Kani pointed to the incumbent tentative situation in the region and the need for a successful one-year experience in pursuing the neighborhood policy and said, “The second step in the neighborhood policy is promoting multilateral and regional cooperation.”

The Iranian diplomat highlighted the satisfaction from the already excellent Tehran-Doha relations, especially over the past year, saying “We welcome Qatar’s effective role in advancing the second phase of Iran’s neighborhood policy and bolstering multilateral regional cooperation.”

Moreover, the deputy foreign minister for political affairs said, addressing the issue of Palestine is a human and humanitarian issue, the shoulder of all regional countries and region and for this reason, multilateral and regional arrangements depend on the realization of the Palestinian rights.

Bagheri Kani also pointed to attempts by some Arab and Muslim countries to impose a regime to wipe Palestine off the political geography of the region and the weight of this issue on the region is the key to the region’s stability and lasting security. Therefore, any initiative that fails to give attention to the Palestinian nation’s rights will be an obstructing factor and will disrupt regional stability.

For his part, the Qatari foreign minister said in a statement that the meeting also included discussions on the talks in Vienna over revising the 2015 nuclear deal officially known as the Joint Comprehensive Plan of Action (JCPOA) with the United States, as well as a number of issues of common interest, the Qatari foreign ministry said in a separate statement.

The statement added that the Qatari diplomat “stressed the importance of the JCPOA for the relations between the two countries and emphasized the importance of maintaining and accelerating bilateral relations between the two countries.”

He described meetings and conversations between Foreign ministers of the two countries as effective in efforts to boost mutual relations.

Signing agreements worth $700m, half of Iran’s presence in MIMS Automobile Industry Moscow

From page 1 - According to the official, the Islamic Republic’s natural gas refining capacity has also reached 1300 billion cubic meters in the past 10 months and new kilometers of new gas pipelines have also been constructed to transfer fuel to seven power plants.

Operator of the biggest natural gas network in West Asia, NIGC continues to expand this network into the country’s most remote areas so that currently over 96 percent of the Iranian population enjoys natural gas through this huge network.

With a total length of over 36,000 kilometers Iran’s gas network is also among the world’s most modern networks and it is the most modern and updated measuring, transmission, and pressure boosting instruments and equipment.

This vast network of pipelines is growing bigger and larger every year as NIGC tries to increase the coverage of the national network to nearly 100 percent.

According to NIGC data, Iran currently producing over 870 mcm of natural gas daily from 1.444 million on Sunday (the second day of the Iranian calendar week).

On the sidelines of the event, knowledge-based Iranian automakers still were able to sign a deal with a Russian counterpart to jointly produce high-tech auto parts and equipment in Russia.

As reported, the mentioned deal has been signed for the joint production of engine control units (ECUs), immobilizers and ECU-related sensors such as oxygen sensors.

Meanwhile in a meeting with the President of Russian Export Center Veronika Nikitina in Moscow on Wednesday (August 24), representatives of the sidelines of MIMs Automobile Moscow Photomaker also urged Russia to agree on measures for signing an agreement on Automatic Guarantee Fund of the Supervision and Inspection of Trade Credit Insurance (EXIM) in the coming weeks.

This agreement is signed, Iran’s trade companies will be able to sell insurance.

This agreement is a good opportunity for Russian traders to benefit from the two countries capacities to the fullest and it will be a driving force for the development of Iran and Russia’s trade," the TPO head stated in the mentioned meeting.

He expressed hope that this document would be finalized and ready to be signed in the coming weeks so that the obstacles in the way of the businessmen of the two countries can be removed.

Payam-Pak also announced Iran’s readiness to establish banking relations with 7 banks of Russia and emphasized that Iran is ready to use all the banking capacities of the two countries in order to facilitate the financial transactions between the two sides.

Nikitina for her part welcomed the Iranian side’s proposals, saying “We gladly join the action that are being made because we want to create acceptable conditions for expanding business in a competitive financial environment.

TEHRAN - The main index of Tehran Stock Exchange (TSE) dropped 9,949 points to 14,444 points on Sunday (the second day of the Iranian calendar week).

As reported, over 6,485 billion securities worth 9,300 trillion rials (about $178.35 million) were traded at the TSE.

The first market’s index dropped 4,938 points, and the second market’s index lost 10,224 points.

According to the official, four Iranian companies traded in the mentioned projects includes 452 trillion rials (about $15.7 billion) plus $250 million as well as €44 million and the projects will create employment for 23,000 people.

According to the official, Khorasan Razavi province with 39 projects will have the biggest share of the inaugurated projects in the current Iranian calendar year 1401 (ends on August 23, 2022).

According to Touraj Saremi, the government has paid over 145 billion rials (over $500,000) of facilities to producers in this sector within the framework of rules and regulations.

As IRNA reported, Iranian beekeepers managed to catch over 1,122,000 tons of honey in the previous Iranian calendar year.

Mordad (ended on August 22).

Saremi noted that Agriculture Ministry has defined a five-year development plan to reform the structure of the country’s beekeeping industry and increase the quantity and quality of honey production during the Iranian calendar year 1401 to 1405 (begins in March 2023).

The implementation of this program requires the necessary support for production inputs, implementing educational-training programs, and providing facilities to beekeepers to provide apiaries with insurance coverage to reduce the risks and to ensure sustainable production,” he said.

In addition, the ministry is also pursuing opening a credit line to be able to establish a group of productive producers in this sector in the framework of rules and regulations.

Europe’s electricity prices hit record high as Russian supply cuts begin to bite

European electricity prices soared to new records on Friday, pegging a better winter as Russia’s invasion of Ukraine Ferguson heightens concerns about the continent. The year-ahead contract for electricity reached 995 euros ($1,077) per megawatt hour, while the French equivalent surged past 1,100 euros -- more than tenfold increase in both countries from last year.

In Britain, energy regulator Ofgem said it would increase the emergency price cap on new contracts from October 1 to an average £2,830 per household. Ofgem blamed the increase on the spike in global wholesale gas prices after Russia invaded Ukraine because of the energy crisis. Unlike a previous warning, there is no known legal, and procedural issues of the Chinese government to the United Nations. This resolution made clear and settled once and for all the political, and legal, procedural and issues of the representation of the whole of China. Taiwan included, in the United Nations. It also made it clear that there is only one seat representing the Chinese people and there is no such thing as “Taiwanese seat” or “one China, Taiwan”.

China says the sovereignty and territory of the country has never been divided and wars will never be allowed to be divided meaning Taiwan’s status as part of China’s territory never change and will never be allowed to change. There are other resolutions by various UN agencies as well as Communiqués and agreements between Beijing and Washington that have thus far allowed the Chinese to be recognized as the only legitimate representatives of China to the United Nations.

Prime Minister Sharmba Sharif says 33 million people have been impacted by the floods -- about 15% of Pakistan’s whole population -- and blames “the horrors of climate change” for the natural disaster.

The guided-missile cruiser Antietam in the Taiwan Strait on Sunday, in a photo provided by Taiwan. China said that its own forces “remain on high alert.”

Flash floods triggered by heavy monsoon rains across much of Pakistan have killed hundreds and displaced millions since mid-Juneutsche officials said this weekend.

Pakistan floods: A thousand dead, millions affected by horrors of climate change

President Zelensky has called on the West to withdraw its forces in Ukraine, warning that “recession is probably unavoidable” because of the soaring energy prices.

The twin 103-meter tall (338-feet) cooling towers were covered with white plastic sheeting on Monday, ahead of the demolition work. Safi said there was concern of further rising temperatures, which could affect the demolition work.

“We preempted the situation and warned and evacuated thousands of people, including an iconic hotel. This would have been a major water control system at the Swat River, leading to flooding in the districts of Kalam Valley in Khyber Pakhtunkhwa and one of the areas most affected by the floods,” she added.

The United Nations General Assembly established the one-China policy on December 25, 1971, which was observed by the international community in 1971, the United Nations General Assembly adopted Resolution 2758, which undertook “to restore all its rights and its legitimate representatives of China to the United Nations.” This resolution made clear and settled once and for all the political, and legal, procedural and issues of the representation of the whole of China. Taiwan included, in the United Nations.

Tourism ministry seeks ways to reduce cost of traveling

TEHRAN—Cultural, Heritage, Tourism and Handicrafts Ministry is looking to help reduce the cost of traveling for domestic tourists.

“We are looking for cheap tourism as traveling is everyone’s right,” IRNA quoted the tourism chief, Esfandiar Zarghami as saying on Saturday.

“Over the past year, we have recognized 20 obies of national parks in the country. By strengthening domestic tourism, we would be able to boost employment and improve the national economy,” Zarghami explained in a televised speech.

“Domestic travels constitute up to 80 percent of the tourism industry in many developed countries. Domestic tourism causes the distribution of wealth; when domestic tourism is strengthened, production, employment and wealth are strengthened,” Zarghami said.

As mentioned by Zarghami, Iran has regained its pre-coronavirus status when it comes to domestic travel. “According to the forecasts of the World Tourism Organization, global tourism will return to the normal status (before the coronavirus pandemic) by the end of 2024. However, we returned to normal earlier than the forecasts, the international organizations, the minister said.

“Domestic travel has achieved some 46 percent compared to the pre-coronavirus period,” Zarghami said earlier this month.

According to available data, more than 56 million passengers used buses for their overland journeys across the country during the past Iranian calendar year (ended March 20).

Data compiled by the Road Maintenance and Transportation Organization indicated that 103,364,000 passengers used overland public transportation during the past Iranian year 1400. Some half of the figure, which counts 56,453,000 passengers, opted to travel by bus for their domestic journeys, the organization said.

The Islamic Republic generated 2.55 billion dollars in international tourism revenue over the past 12 months, mainly driven by holdomakmen from the neighboring states. In addition, traveling and tourism accounted for 3 percent of GDP in 2020, while the number hit 4.2 percent in 2019.

Holidays are among the most important events for/foreign tourists arriving during the period. Last September, the country initiated preliminary steps for a bus-on-a-string, restarting the issuance of tour visas following a 20-month gap due to the COVID-19 protocols for fully vaccinated passengers.

Furthermore, the ministry seeks to develop tourism ties with neighboring countries. “Our priority is to strengthen relations with neighboring countries and now we are pursuing the project of cheap overland travels with neighboring countries,” Zarghami said.

Travelers from Iraq and Afghanistan were the main source of tourism for Iran from October 23 to December 22, 2021. Over the past couple of years, neighboring Iran has been one of the main destinations for tourism and pilgrimage. In January, the deputy tourism chief announced that Iran has introduced arrangements to facilitate travels for Iraqi nationals. “For Iraqi tourists visiting Iran, a new system has been launched to ensure their safety and comfort.”

Before the pandemic, Iran’s tourism had constantly been growing, reaching more than eight million visitors in the Iranian calendar year 1399 (started March 21, 2020). However, tourism helped to become unprecedented.

Iran’s iran-truck card is that the country benefits from a wide variety of travel destinations ranging from seascapes and lush green woods to towering mountains and harsh deserts. As a wallet-friendly destination for hospitable people, Iran has long been a desired haven for nature lovers, powder chasers, culture devotees, pilgrims, musicians, film directors, and medical travelers, to name a few.

Experts believe that mass-COVID-19 vaccinations in the country are a stepping stone for foreign tourists to arrive, traveling procedures, and fresh strategies, altogether, suggest Iran is a desirable destination for travel operators, traveling procedures, and fresh strategies, altogether, suggest Iran is a desirable destination for travel operators, tourists and foreign tourists with a greater reliance on its numerous tourist spots from 26 eco-lodge units World Heritage, and above all, its welcoming people.

Ecotourism village to make debut in Gilan

TEHRAN—First ecotourism village is planned to be set up in the northern Gilan province, its tourism chief said on Sunday.

With 50 eco-lodge units and several traditional and old houses, the village will hold the potential to attract eco-tourists to the region, the official added.

Gilan is divided into a coastal plain, including the large delta of Sefid Rud and adjacent parts of the Alborz mountain range. As a four-season country with pristine and beautiful nature in different parts of the country, Iran has a lot to offer nature lovers and ex-tourists.

Gilan sits on a crossroads of three continents: Asia, Europe, and the Middle East. Besides, the province is surrounded by the Caspian Sea, which poses a significant value in the region.

In recent years, several traditional homesteads and rural houses across the country have been equipped with eco-lodge units to attract more domestic and foreign tourists.

The houses represent the indigenous culture, local customs, traditions, and stories, while the guests are served delicious food with local ingredients.

The growing tendency of tourists to experience indigenous and local cultures has made them want to go closer to natural and indigenous living in the most diverse landscapes of the life, considering that staying in these eco-lodge units is much cheaper than other accommodation centers.

Having a very diverse natural setting, Iran offers oriented ecotours to nature lovers. Sightseers may live with a nomad or rural family or enjoy an independent stay. The country is home to abundant historical mansions, caravansaries, bathhouses, madrasas, and other massive monuments, which can buttress its tourism and hospitality sectors if managed appropriately and refurbished properly.

Seman seen UNESCO tag for its stepped village

The scenic village of Masouleh is famed for its Lego-shaped northern houses built on another’s roofs. Home to some of the most stunning landscapes in the country, Masouleh is one of the most impressive destinations to find around the city, especially in Kurdish and around Mahabad. The village has been built on a hill so steep that the roof of one house is the pathway for the next.

So practically, all stopped villages in Iran have been able to keep their rural traditional and touristy touch to attract tourists from all over the world. Masouleh, Kang, and UNESCO-tagged Uramanat.

The village, located on the highlands of Mount Kordestan to host local food festival

Kordestan to host local food festival

TEHRAN—On Saturday, 20 local tourism projects, including scenic spots and recreation centers, were inaugurated in Gilan.

Gilan’s Governor-General Assadiolah Abbasi and a host of local officials, travel insiders, and private investors attended the inauguration ceremonies, including the first-ever eco-lodge unit inaugurated in Gilan.

The lush green province recorded some 17 million overnight stays last year. All those interested in purchasing the above-mentioned items can refer to observe them and purchase the auction documents – The deposit for participating in this auction is equal to 20% of the total amount payable by the winner/s for which, the winner/s must deliver three checks at the total amount payable by the winner/s for which, the winner/s must deliver three checks at the total amount payable by the winner/s for which, the winner/s must deliver three checks at the total amount payable by the winner/s for which, the winner/s must deliver three checks at the total amount payable by the winner/s for which, the winner/s must deliver three checks.
Flood incurs loss of $1.5bn nationwide

TEHRAN – Initial estimates indicate that flash floods that started on August 7 in many parts of the country have caused as much as 440 trillion rials (about $1.5 billion) in losses nationwide.

The flooding hit 133 counties and 1,344 villages in 24 provinces of the country, IRNA quoted Interior Minister Moham- med-Massoud Nami as saying.

A large number of villages were completely destroyed, he added. Also, rural homes were damaged and residents in 60 villages were relocated.

Moreover, a large number of urban areas were destroyed and more than 7,000 hous- es should be repaired, he noted.

The flooding also damaged agricultur- al lands, gardens, and farms, as well as roads, water and gas pipelines, and elec- tricity grids.

Unfortunately, the incident claimed the lives of 82 persons, he concluded.

Twenty percent of areas across Iran are highly prone to flooding, Khorasen Shaaban, former head of the Forests, Range, and Wa- ter Affairs Management Organization, said in January 2020.

According to statistics, the average rain- fall in the country in the last 50 years has been 270 mm, which has decreased by 230 mm, in other words, over the past 5 de- cades, the average rainfall has dropped by 40 mm.

According to the World Meteoro- logical Organization’s multianual forecast, in the next five years, Iran’s average rainfall will decline by 75 percent, and the temperature rises by 50-75 percent compared to the long-term average.

According to the World Meteoro- logical Organization, Iran’s average rainfall will decline by 75 percent compared to the long- term average.

However, the effects of climate change are uneven across countries and the world—even within a single community, the effects of climate change can vary between neighbor- hoods or individuals.

Long-term socio-economic inequalities can make disadvantageous groups, who often have the most exposure to risks and the least re- sources to respond, more vulnerable.

Iran and climate change

In the coming decades, the world will face an in- crease of at least 2.6 degrees Celsius in the average temperature and a 35% decrease in rainfall. Iran is the first country responsible for cli- mate change in West Asia and the seventh country in the world by emitting a total of 616.74 million tons of CO2.

Iran’s high-level share in greenhouse gas emissions is due to the rapid development and consumption of oil, and gas and rapid urbanization.

Climate change and challenges

Part 3

However, these future effects depend on the total amount of carbon dioxide we emit. Therefore, if we can reduce the emission of greenhouse gases, we may prevent some of the worst effects.

We think about climate change caused by human activity as something that will happen in the future, but this issue is a continuous process.

Today, ecosystems and societies around the world are affected by climate change. Climate change refers to something more than an increase in temperature and includ- ing sea level rise, changes in patterns, inten- sity, and recurrence of drought, water energy, transportation, wildlife, agriculture, ecosys- tems and biodiversity.

The effects of climate change on differ- ent parts of society are related. Drought can harm food production and human health. The effects of climate change are felt in all as- pects of the world in which we live.
