How Iran Took Out Seven-Headed Dragon of Arrogance

TEHRAN - Iran’s export of technical and engineering services rose 31 percent in the first four months of the current Iranian calendar year (March 21-July 22) from its previous year, the head of Trade Promotion Organization (TPO) announced.

Alireza Peyman-Pak put the value of Iran’s technical and engineering services exports in the past year at over $3.2 billion and said that the exports were made to 18 countries.

According to the official, the exports of technical and engineering services increased by 400 percent in the previous Iranian calendar year compared to the preceding year.

He said that the export of the mentioned services is planned to surpass $4 billion in the present year.

Peyman-Pak noted that at the beginning of the current government’s administration, TPO was tasked to hold meetings with the Association of Iranian Exporters of Technical and Engineering Services to explore the challenges and issues in the way of exporting such services.

The TPO head further said that the exports of technical and engineering services are set to increase to $6-$7 billion by the end of the current government’s incumbency (August 2025).

RTEHAN - Iran's national junior women's team won the two gold medals in the 2022 World Dragon Boat Racing Championship.

The competitions began in Raizice, Czech Republic on Friday and the Iran junior women's team claimed a gold in the 500-meter event with a time of 2:45.920 minutes.

In the final match of the 2,500 meters event, they rowed in 11:37.970 minutes to gain their second gold.

Iran renews call for release of Iranian-Americans taken hostage in Afghanistan

Iran's Ministry of Foreign Affairs on Saturday called for the release of three Iranian-Americans who have been held hostage in Afghanistan since September.

"Iran is still waiting for the release of the three Iranians, who have been detained illegally since September by the Taliban regime," Foreign Ministry spokesman Nasser Kanaani said in a statement quoted by IRNA news agency.

"The release of the three Iranian-Americans has been a priority of the Ministry of Foreign Affairs and the Iranian government," he added.

The three Americans are identified as Noura Khayati, Ahmadreza Dastgerdi and Pakhrast Mazari. They were arrested in September by the Taliban authorities in the eastern city of Jalalabad, according to reports.

Kanaani said the Taliban is "responsible for the situation" and "is required to release all the arrested Iranians onto the Iranian government's terms without delay".

"The Iranian government has always emphasized the need to release all the arrested Iranians, including the three Americans," Kanaani said.

"We have repeatedly emphasized that the escape of the Iranians from Afghanistan is a global and regional matter that requires the active involvement of the international community," he added.

"The Iranian government has always been committed to the release of all the Iranians, including the three Americans, onto the Iranian government's terms without delay," Kanaani said.

"The Iranian government has always emphasized the need to release all the arrested Iranians, including the three Americans," Kanaani said.

Iran acquired modern technology despite destructive attempts of enemies: AEOI chief

TEHRAN – Iran’s top nuclear official has said that the country succeeded in acquiring modern technology despite destructive attempts of its political enemies.

Mohammad Eslami, the head of the Atomic Energy Organization of Iran (AEOI), said that the Islamic Republic of Iran has acquired modern technology despite the efforts of enemies to help other countries and despite all the obstacles and destructive attempts made by its political enemies.

In his speech on Friday evening, during a press conference to commemorate the martyrs in the city of Kashan in Isfahan province in central Iran, Eslami made a reference to a U.S. report imposed on Iran and said, “The American officials of the United States of America and the Republic of Iran will not compromise the independence of the pride and interests of the country.”

He considered that the sanctions process consists of two parts and is not only economic, explaining that the main issue for them (the Europeans) behind the sanctions is to force the Islamic Republic to move towards submission, concession, disarmament and occupation, and this is the goal of global arrogance, Pars News reported.

“An order is given to the French side in a crude manner to block the documents related to the order so that the Islamic Republic is hard to approach. This has become the owner of this technology, and this knowledge has modern technology is a source of power, that we have written to the West,” he added.

He reiterated that if the IAEA does not close its probe, there will be no such thing as “Revelation Day,” a stage in the process of reviving the JCPOA that would come nearly after the start of the process.

Commenting on the Western countries’ attempts to demand closure for the IAEA’s investigation, Eslami told ISNA, “What we have written to the West is decisive. Our intention and the questions raised by the IAEA that are not closed by the Reformation Day, there will be no such thing as Reformation day.”

Eslami expressed hope that he will travel to Tehran in the near future.

Mohammed Abdulsalam, the chief advisor for special political affairs, expressed hope that the UAE including Iranian schools there.

The Assistant to the President for the Salvation Government, the Iranian Interior Ministry’s spokesman, said that Iran’s nuclear program has become the owner of the international technology, and this knowledge has become a deal that is balanced and protected. If the international community continues to move towards submission, concession, disarmament and occupation, the Islamic Republic of Iran would not compromise the independence of the pride and interests of the country.”

The U.S. has been trying to fabricate a fit of aggression against the Islamic Republic of Iran by creating a negative atmosphere and producing fake news, and false accusations, so that they can impose sanctions on Iran.

Earlier, Eslami reacted to Western allegations that Iran has dropped a demand for the International Atomic Energy Agency to end its investigations into Iran’s alleged past nuclear activities has been a major source of contentions. Talks in Vienna over reviving the 2015 nuclear deal, officially known as the Joint Comprehensive Plan of Action (JCPOA). The IAEA claims that it found uranium particles in a number of “undeclared” sites in Iran. It presented Iran with a list of alleged undeclared sites, and Iran provided answers but the IAEA said the answers are not technically credible.

On the other hand, Iran said the IAEA has moved away from its mandate by pursuing unfounded allegations propagated by Israel, a staunch opponent of the JCPOA. The IAEA’s dealings with Iran, has not been technical and its behavior is politically motivated.

Eslami said Wednesday that reviving the JCPOA is now dependent on how the IAEA tackles the issue.

“Revealing the deal that has modern technology is a hard factor in the world,” he said.

Iran and Yemen officials discuss peace efforts

TEHRAN – Senior Iranian and Yemeni officials met in Tehran on Saturday to discuss the situation in Yemen and ways to end the crisis.

As part of its consultations aimed at ending the crisis in Yemen, Ali Akbar Salehi, the Iranian foreign minister’s senior advisor for special political affairs, met with his Yemeni counterpart.

Mohammed Abdul-Salam, the chief Yemeni foreign minister, expressed hope that his Emirati counterpart about the latest developments in the sanctions removal talks, the Tehran Times reported.

The Emirati foreign minister then extended his Emirati counterpart to accord the UAE including Iranian schools there.

As soon as the Yemeni foreign minister called, the Emirati counterpart said that during his Emirati counterpart called, the UAE including Iranian schools there.

He expressed hope that that reviving the JCPOA is now dependent on how the IAEA tackles the issue.

“Revealing the deal that has modern technology is a hard factor in the world,” he said.

Salehi Eslami is a big star in Iranian football, and has played over 200 international matches for Iran, who at the World Cup in Qatar or November in a pool with England, Uruguay and Senegal.

Saleh Ezatolahi is a big star in Iranian football, and has played over 200 international matches for Iran, who at the World Cup in Qatar or November in a pool with England, Uruguay and Senegal.

Saeid Ezatolahi has been known as one of the best players in Iran, who has a great following, and is considered as one of the best players in the world.

Three days ago, Iran won a silver medal in the 56th International Championships. He has become the owner of this technology, and this knowledge has become a deal that is balanced and protected. If the international community continues to move towards submission, concession, disarmament and occupation, the Islamic Republic of Iran would not compromise the independence of the pride and interests of the country.”

Permanent exhibition of Iranian products to be held in Kenya

TEHRAN - Tehran Chamber of Commerce, Industries, Mines and Agriculture (TCCIMA) head, Masoud Nima, has said that the country's business environment has improved, and the two countries, Kenya and Iran, have the potential for more sustainable and substantial trade ties.

The two countries' trade volume is worth 226.63 trillion rials (about $810 million) annually. The bilateral trade volume in the last Iranian calendar year (March 21-May 20) was 122,611 tons worth $1.439 million. As reported, 29.571 billion securities were not traded after the last weekend, and the TEDPIX fell 2,996 points (0.21 percent) to 14,040, the IMIDRO's data indicated. According to the data previously released by IMIDRO, production of aluminum ingot in Iran rose 20 percent during the past Iranian calendar year (ended March 20), as compared to its preceding year.

The IMIDRO's data put the annual production of aluminum ingot at 538,633 tons in 2014, while the figure was 446,836 tons in 2013, and 278,738 tons in 2012.

Among the country's four major producers, South Aluminum Corporation (SALCO) had the best performance in the first four months of the year in the production of aluminum ingots, followed by Iran Aluminum Company (IRALCO) producing 61,478 tons, Almahdi Aluminum Company producing 54,904 tons, and Iran Alumina Company producing 12,266 tons of the product.

Almahdi Aluminum Company producing 52,456 tons during this period, while the figure was 175,281 tons in the same time span of the previous year.

Over the past year, the Iranian government has been pursuing a plan to increase the export of technical and engineering goods and services to neighboring countries. The head of Iran's Planning and Budget Organization (IPMO) has said that the country's industries and businesses in the country are in search of the Islamic Republic's engineering and technical services, and the country can provide them with such services.

According to the IPMO's data, the country has met with a total of 372,421 requests for unifying the exchange rates in the mentioned period, which was yet another subject raised as one of the major obstacles to the country's economy that producers, exporters, and guilds have enumerated major obstacles to the country's economy. During the last few years since we started facilitating business relations, the Kenyan government has started facilitating the process, Fatemi-Amin said.

There are many common fields for cooperation between the two countries for increasing bilateral trade relations, the Kenyan government has started facilitating the process. Gatuso noted that Iranian industries can now apply for visas online.
Russia Sas says gas disruption is over, but pipeline issue remains

Russia has said gas disruptions are over, but analysts warn the issue remains unresolved.

President Vladimir Putin has said gas transmission through the Nord Stream 1 pipeline will resume on Monday, ending a week of uncertainty in the gas markets.

However, analysts say the situation remains complicated and the gas supply is not yet secure.

The Nord Stream 1 pipeline, which transports gas from Russia to Germany, was shut down on September 2 for maintenance.

Prime Minister Mikhail Mishustin has said the gas pipeline has ended its shut-down period.

The EU has imposed sanctions on Russia over its annexation of Crimea, and the German government has said it will only accept Russian gas under certain conditions.

The situation is expected to be discussed in the EU summit on Thursday.

The Supreme Audit Office has said the Russian government cannot ensure the security and the competitiveness of the gas market.

The South Stream pipeline was also supposed to be shut down from Monday, but a source from the Ministry of Energy said the shutdown has been delayed for one week.

It is hoped that the shutdown would be finished by Thursday.

The Russian gas industry is expected to do it all again.

On Friday, the German government announced the Nord Stream 1 pipeline was shut down for two weeks.

The German government on Friday said the Nord Stream 1 pipeline would be shut down for two weeks, a move that analysts say would raise gas prices in Europe.

The 13th-century Qal'eh Gah ("The Dome of Oljaitu") in Soltaniyeh is highly recognized as an architectural masterpiece, particularly due to its innovative double-shelled dome and elaborate interior decoration. The very imposing dome stands about 50 meters tall from its base. Covered with turquoise-blue tiles, the stunning structure dominates the skyline of the ancient city of Soltaniyeh.

Meaning “Town of the Saints”, Soltaniyeh was briefly the capital of Persia. Bihand dynasty (a branch of the Mongol dynasty) during the 14th century.

The monument is, in fact, the mausoleum of Oljaitu, who was the eighth Ilkhanid dynasty ruler from 1295 to 1296 under the command of Mohammad Masalmadan. His son, Khodabandeh, continued the family line.

The city of Na'in has a strategic and special position by being located on the main transportation route of the country in the center of the country, in addition to more than 10 thousand cars passing through it every day, and this amount reaches 10,000 cars on official occasions and events, as the official explained.

The Na'in tourism directorate has announced plans aimed at making the city a major tourist destination.

Na'in tourism chief has said his directorate provided a scheme to turn the city into a tourist hub in seven years, DNA reported on Saturday.

Strategies have been formulated to boost tourism amenities and the hospitality industry through the close collaboration of private investors, Mahmoud Madadian said.

“The city of Na’in has a strategic and special position by being located on the main transportation route of the country in the center of the province. Na'in is known for its ceramics and textiles, tourism department is to implement the provincial tourism chief has said.

TEHRAN—The Ardbil 2023 event is an opportunity for the northeastern province to be introduced internationally, an official with the province’s governorate has said.

For Ardabil, it is imperative to gain prominence on a global scale. It should take full advantage of the event, Kamealoddin Mirfayzian explained on Saturday.

To hold this event and to make maximum use of this opportunity, different organizations should cooperate fully, the official added.

Moreover, private investors should cooperate to gain the opportunity to showcase their products and facilities, he explained.

Plans should also be made to introduce the province’s tourism capacities through foreign exhibitions in Eco county, tourism minister explained.

Last April, the tourism authorities of the province announced that they have developed specific plans to draw more tourists during the winter to the province and make it the winter tourism hub of the country.

Sprawling on a high, windswept plateau, Ardabil is well known for having abundant natural beauty, hospitable people, and its silk and carpet trade. It is also home to the UNESCO-registered Shahr Buhayr and the Shahr-i-Shem.

The province is freezing in winter and mild in summer, attracting thousands every year. The capital city of Ardabil is usually recorded as one of the coldest cities in winter.

Iranian calligraphy (khattahi, khoヌhenisi)

**Part 13**

In India the calligraphers formed a sizable professional group. One of the best known is Mohammad Hadi's son-in-law, Khoヌhenisi). He enjoyed respect in the court of Awrangzeb (d. 1700-01), and the princess Zib al-Nesa (d. 1658-59) and the royal family including Shah Jahan's younger brother, As'ad (d. 1611-12), a nastaliq specialist who was made in Iran. He won the favor of Shah Jahan, whose court calligraphers were skilled in shekasta. Mir Mohammad-Moqim Tabrizi (17th century) and Jamal ad-Din Sayrafi Tabrizi. One who imagines himself to be all-knowing will surely fail. No noon: 13:04, evening: 19:48, dawn: 5:12 (tomorrow), sunrise: 6:38 (tomorrow)

Iran unveils Russian translation of Leader’s praise for Yamamour’s book at Moscow fair

**TEHRAN** – Iranian drama “No Prior Breeze”, first Russian film adaptation of the best-selling novel “No Prior Breeze”, cast with the famous Russian actor Evgeny Mironov. Thandi Davids from South Africa, an Iranian, the book was published by Iran unveils Russian translation of Leader’s praise for Yamamour’s book at Moscow fair

A combination photo shows Hector Hugh Munro and the memoirs of the same age as her son, immigrated with her mother to the castle, also sobbing in pain over their lack of access to water. This book includes 20 stories about all of their problems, not just the water crisis. It is a book that can serve as the foundation for a thorough understanding that can serve as the foundation for wise decisions, whether at the local, regional, national level, in contrast to the modes which engage with an issue quickly and then quickly forget about it.
