### Gazan civilians are shockingly helpless

#### By Matin Jamshidi

TEHRAN - The sufferings of Palestinian civilians in Gaza are heartrending. It seems the world is largely ignoring the tragedy the Gazans are facing. The civilians are being butchered in Gaza like the chickens in a slaughterhouse

The silence of the world in the face of the horrific crimes against Gazans and the intimidation and humiliation of the Palestinians in the West Bank is disgraceful.

Like all other people around the world, the Gazans are human beings. Probably their only sin is that they are being born in their native

What happened to civilians in Beit Lahiya on Oct. 29 is just one example of more than a year of indiscriminate killings, collective punishment, displacement, horror, starvation, grief, mourning, etc.

### Naim Qassem is known for his encyclopedic knowledge

#### By Sondoss Al Asaad

BEIRUT - Hezbollah's Shura Council announced on Tuesday the election of Sheikh Naim Qassem as the new Secretary-General of Hezbollah, succeeding its martyred leader Sayyed Hassan Nasrallah.

In his first speech after the martyrdom of Sayyed Nasrallah, Sheikh Qassem reassured the Hezbollah loyalists of the goals being sought by the Resistance movement.

He underscored the jihadist - moral and religious- responsibility of Hezbollah to protect achievements.

Naim Qassem highlighted the experience of the Resistance movement in facing all challenges and overcoming all difficulties under the inspiring guidance of the previous leaders over long years.

# Hezbollah bombs Israeli military base

#### By Wesam Bahrani

TEHRAN- Hezbollah has continued to strike military sites deep inside Israel as Tel Aviv directs its attacks against civilians in Lebanon

The Lebanese resistance launched an attack on Wednesday with a squadron of attack drones on the Israeli Tirat Carmel base south of Haifa, "hitting the target with

According to the Israeli Broadcasting Authority a drone launched from Lebanon exploded in the industrial zone in Nahariya and struck a factory that produces components for drones.

In another operation Hezbollah said it targeted Krayot in northern Haifa with a salvo of missiles.

The Lebanese resistance also targeted gathering of "Israeli enemy soldiers" at the Shebaa Gate.

### State of disaster declared in Beit Lahiya amid Israeli carnage

TEHRAN - The Israeli bloodbath in northern Gaza goes unchecked nearly a month into the regime's new brutal offensive in the area.

A medical source told Al Jazeera that Israel has slaughtered 1,250 Palestinians in northern Gaza since the start of the offensive on October 5.

Israel has laid siege to northern Gaza obstructing the delivery of fuel, food and

It has also issued forced evacuation orders for Palestinians in northern Gaza while its troops have opened fire on people who flee

The regime's army has battered the towns of Jabaliya, Beit Hanoun and Beit Lahiya.

On Wednesday morning, the Municipality of Beit Lahiya declared a state of disaster in the town.

Iran condemns

Israeli obstruction

Palestinian refugees

TEHRAN - The Iranian ambassador to the United Nations, Amir Saeid Iravani, has condemned Israel's recent actions aimed at hindering the operations of the United Nations Relief and Works Agency (UNRWA) for Palestine refugees in the occupied territories. Addressing the UN Security Council on Tuesday, Iravani described UNRWA as the "foundation for all humanitarian efforts in Gaza," a region he described as facing "an unyielding wave of destruction and hardship"

UNRWA, established in 1949, provides

essential services to Palestinian refugees, including education, healthcare, and social services. The agency operates primarily in

the occupied Palestinian territories, Leb-

anon, Jordan, and Syria, with a significant

of UNRWA aid to

operations, warns DM

TEHRAN - The Iranian Defense Minister has said Israel's Saturday attack against Iran did not diminish the country's military capabilities, adding that Tehran can repeat its April and October operations against the re-

"Iran can launch dozens of retaliatory operations like Operation True Promise," Brigadier General Aziz Nasirzadeh told reporters

Elsewhere in his remarks, Nasirzadeh roundly refuted rumors that Israel had managed to enter Iran's airspace. He also dismissed reports claiming that a military site in Iran's northern city of Shahrud was damaged by Israeli missiles fired from a northern

"The enemy tried to damage our offensive and defensive system but did not achieve much success because we had passive defense measures in place [in advance]," he

#### By Hossein Khanbagi

TEHRAN - Since October 7th, the Israel-Iran conflict has been teetering on the edge of escalation. Israeli Prime Minister Benjamin Netanyahu's strategy seems increasingly desperate, as he pushes the region toward what could become a full-scale conflagration in West Asia.

The consequences of such a conflict could not only harm Israel's security, but also ripple across the globe, affecting energy markets, global security, and the very fabric of the international order. ▶ Page 2

#### VP attending Family, Contemporary Megatrends conference in Doha

TEHRAN -Zahra Behrouz-Azar, the Vice President for Women and Family Affairs, is participating in a global conference on 'Family and Contemporary Megatrends', commemorating the 30th Anniversary of the International Year of the Family (IYF).

Organized by Doha International Family Institute, the conference is being held on October 30-31 in Doha, Qatar, IRNA reported.

It has brought together many policymakers, experts, and thought leaders to explore megatrends including demographic Change, migration, urbanization, technological advancement, and climate change that are affecting the family

The conference will also discuss familyfriendly policies, best practices, and strategic partnerships to promote family welfare and social development. ▶ Page 7

#### Leader's commentary praises Roosevelt Street Station book as 'accurate account of history'

TEHRAN - The Leader of Islamic Revolution has written a commentary on the book "Roosevelt Street Station: A Documentative Narrative of Seizing U.S. Embassy in Tehran", commending the author's efforts and emphasizing the importance of accurately recounting history, especially regarding pivotal events during the Islamic Revolution.

The text of the Ayatollah Seyyed Ali Khamenei's commentary is as follows:

"In the Name of God, the Compassionate, the Merciful,

This book provides a solid and valuable report on a crucial incident in the history of the Revolution: the takeover of the U.S. Den of Espionage in 1979. This work fills a significant media and propaganda gap. ▶ Page 3

### **Roosevelt Street Station: revisiting** 'Hostage Crisis' through Iran's perspective

#### By Mohammad Mahboubi

TEHRAN - One of the most controversial episodes in Iran-U.S. relations is the takeover and detention of American Embassy staff in Tehran in November 1979.

Known in Western discourse as the "Iran Hostage Crisis," it is commonly referred to in Iran as the "Seizure of the U.S. Espionage Den." This incident was so polarizing that debate and analysis continue in academic and political circles even today, with some Western international relations experts linking the current state of U.S.-Iran relations directly back to it. ▶ Page 3

## -TEHRAN PAPERS-

## Miscalculation of the enemy

In the following column, we take a look at some important contents and views in yesterday's Iranian newspapers.

In a note, Sobh-e-No addressed the Zionist regime's miscalculations. It wrote: To create insecurity and tension inside Iran, the Zionist regime carried out airstrikes with the cooperation of the United States, but this action did not produce the result due to wrong calculations and failure to understand Iran's defense and social power.

This approach of the enemy showed failure to truly understand the Iranian society and its defense power. The enemies thought that by using military force they could weaken the moral of the Iranian public and undermine national unity.

But this miscalculation not only failed but also strengthened the cohesion and solidarity between the people and the country's armed forces. The people of Iran realized the power of their country in the two operations of True Promise, and the foreign opposition groups found out about Iran's military power and realized that Israel is not considered as a rival or opponent for Iran. In addition to the opposition, Iran's regional rivals also realized the strength of our country.

#### Jam-e-Jam: The Zionist regime's neglect of Iran's capabilities

In a commentary, Jam-e-Jam dealt with the lack of recognition of Iran's capabilities and said: It seems that one of the most important miscalculations of the Zionist regime is that it does not know the will of the nation and the authorities of the system to defend the territorial integrity of the Islamic Republic of Iran. Iran enjoys efficient deterrence capability and has the necessary courage to use its weapons against its enemies. The Islamic Republic of Iran does not believe in a long and comprehensive war, but when it comes to defense, it has great capabilities.

As the Leader of the Islamic Revolution said, without exaggerating or downplaying the power of the enemy, the authorities will take the necessary measures to deal with the action committed by the Zionist regime and will give an appropriate response to it. For this reason, it seems that the Zionist regime and its supporters must receive our message and refrain from any action that causes the war to expand, otherwise it is the other side that will suffer.

#### Javan: Zionists' fear of Iranian warning

In an article, the Javan newspaper addressed the concerns of the Zionist regime and its supporters about Iran's response and wrote: The West and the Zionists are using all their energy to dissuade Tehran from reacting to Tel Aviv's attack on Iranian soil. But Iran's diplomatic and military officials have made it clear that Iran will not forego its right to respond to the occupying regime. Josep Borrell, the European Union foreign policy official, has insisted the need to use all communication channels to reduce tensions as a vital matter and called for Iran's self-restraint. The Zionist media have expressed concern that it is possible that Iran would fire hundreds of ballistic missiles toward the occupied territories in response to Israel's attacks, and quoted some informed sources to report that Israel wants to end the direct conflict with Iran. However, Iranian officials emphasize that they will respond to the attack of the Zionist regime.

## Kayhan: America is source of regional instability

Keyhan wrote that the current war and killings in the West Asia region started on the order of Biden even though some tried to make him look different from Trump and introduce him as a person who favors diplomacy. Now it has become clear that Biden and Trump, who respectively represent the Democrats and Republicans, are common enemies of the countries in the region. They pursue a common goal in the region; one party signs the JCPOA and the other withdraws from it! That is, the JCPOA and withdrawal from it were not designed against Iran but against all countries in the region. Therefore, the starting point of the current developments in the region should be considered within the framework of the American withdrawal from the JCPOA. America and Israel were looking to commit crimes after failing to realize their wish for a new Middle East. This issue shows that both Biden and Trump were trying to put Iran between physical elimination of the resistance groups and an armed conflict. But it seems that Tehran has consciously chosen the second path without looking for negotiation. Iran has made the battleground a good support for diplomacy. The direction of diplomacy will ultimately be determined in the battleground.

# Iran welcomes Sheikh Naim Qassem as new Hezbollah leader

TEHRAN – Iranian officials conveyed their congratulations on the election of Sheikh Naim Qassem as Hezbollah's new leader through formal messages

The Iranian President expressed congratulations to Naim Qassem in his message, asserting, "I am confident that your leadership, as a distinguished figure and a seasoned fighter, will bolster the resolve in the resistance and continue the noble legacy of the esteemed martyrs of this front."

Masoud Pezeshkian remarked, "In this critical historical moment, it is of utmost importance to defend Lebanon's sovereignty and territorial integrity, as well as the noble ideals of the resistance front and the oppressed people of Palestine. Your leadership, as a distinguished figure and a seasoned fighter, will undoubtedly enhance the commitment to resistance and carry forward the honourable path of the martyrs."

The chief commander of the Islamic Revolution Guards Corps (IRGC), Major General Hossein Salami, expressed condolences for the martyrdom of late Hezbollah leader Seyyed Hassan Nasrallah, highlighting that the election of Naim Qassem as his successor ensures the unwavering trajectory of the esteemed Islamic Resistance in Lebanon.

Salami noted, "This election conveys a powerful message to the forces of Global Arrogance and Zionism, affirming that the ideology and principles fostered by the noble sacrifices of martyrs, along with the legacy of historic resistance leaders trained in the teachings of Islam, remain indomitable."

Major General Mohammad Bagheri, chief of staff of the Iranian Armed Forces, conveyed in his message, "I commend the historic election of Naim Qassem as the secretary-general of Hezbollah during this crucial time, which showcases the strength, readiness, and growing capabilities of the proud resistance front and the heroic Hezbollah of Lebanon to navigate crises and ultimately prevail

against the ruthless Zionist enemy."

Also, Seyed Abbas Araghchi, Iran's Minister of Foreign Affairs, congratulated Sheikh Naim Qassem on his election as secretary-general of Hezbollah Lebanon, expressing confidence, "He will serve as a worthy successor to the esteemed martyr Seyed Hassan Nasrallah."

Mohammad Baqer Qalibaf, speaker of the Iranian Parliament, also shared his thoughts in a message, "I congratulate the wise choice of your esteemed self, who, thank God, embodies a dedicated and combatant spirit, along with the experience, commitment, and adherence to the principles and objectives of the resistance front and Hezbollah Lebanon"

The Iranian speaker of Parliament concluded by offering prayers for Sheikh Qassem's continued success during these critical and historic times for the region and the Islamic world, seeking blessings from the Almighty God.

Additionally, in a message honouring the martyrs, including Sayyed Hassan Nasrallah, Seyyed Hashem Safieddine, and other Axis of Resistance leaders, the Iran-Lebanon parliamentary friendship group expressed its congratulations to Sheikh Qassem for assuming the leadership of Hezbollah.

The statement of the parliamentary group highlighted Hezbollah's significant role in the historical struggle against occupation and oppression, noting its confrontation with the criminal Zionist regime in defence of the oppressed Palestinian people, particularly the women and children of Gaza, which has come at a considerable cost.

On Tuesday, October 29, Sheikh Naim Qassem was appointed as the new leader of Hezbollah, succeeding Sayyed Hassan Nasrallah, who was martyred in an Israeli airstrike on Beirut on September 27.

# Iran can hit Israel with dozens more operations, warns DM

From page 1 Nasirzadeh was also quoted by an Iranian lawmaker as saying that Iran will be responding to Israel.

"Whenever the airspace of a country is violated, that country will be entitled to respond to the violation and act of aggression.

Even if the Zionist regime shoots an arrow at our country, Iran would not forgive it and it would surely respond," he allegedly said.

Another top Iranian military official highlighted Iran's resolve to respond to Israel's attack on Wednesday. Rear Admiral Habibollah Sayyari, the Coordinating Deputy of the Islamic Republic of the Iranian Army highlighted the significance of Iran maintaining deterrence.

Alluding to an earlier command from the Leader of the Islamic Revolution, Sayyari added: "Iran needs to be fortified in all aspects so that no foreign adversary considers plotting against the Iranian nation."

The strong assertions of Iran's senior commanders did not go unnoticed by the American government. Pentagon spokesman Patrick Ryder told reporters on Tuesday that "we must be ready

Photo shows Iranian Defense Minister Brigadier General Aziz Nasirzadeh

for all possibilities. If Iran takes any action against Israel, we are committed to defending Israel."

Since October 2023, West Asia has faced persistent waves of Israeli aggression which have devastated Gaza, displaced a significant portion of Lebanon's population, and resulted in over 46,000 civilian casualties.

Further escalating the tensions in the early hours of Saturday, Israeli warplanes used Iraqi airspace to launch long-range ballistic missiles at Iran's military installations, causing minimal damage to some radar systems.

Iran promptly restored these systems to full operational capacity but the aggression resulted in the martyrdom of four Army personnel and one civilian.

Israel's attack against Iran came 25 days after Iran launched a volley of ballistic missiles at military positions inside the occupied territories.

The offensive dubbed Operation True Promise II was a response to the regime's killing of Hamas' Ismail Haniyeh in July and Hezbollah's Seyyed Hassan Nasrallah in September. A highranking IRGC commander lost his

life alongside Nasrallah.

Iran directly attacked Israel for the first time in April, after the regime struck its embassy in Damascus.

'Iran's air defense surprised Israel'

There has not been much detail on how Iran managed to successfully fend off Israel's Saturday assault. The Iranian defense minister has only said that Tehran was fully prepared for the attack.

According to former MI6 officer Alistair Crook, Iranian air defense systems were more successful than expected.

"The [Israeli] aircraft were supposed to destroy the air defenses both in Iraq and Syria on the way and then to do that in Iran so that the second and third waves would come in with Conventional Weapons to destroy the targets [in Iran.]," he said during a discussion on YouTube.

Crooke revealed that the supposed second and third waves of attacks were never carried out, because Israelis were met by an unknown air defense system operating from inside Iran.

### Why Netanyahu's desperation for war with Iran could backfire

From page 1 At the core of Netanyahu's actions lies a strategy rooted in power politics. Israel has long felt existentially threatened by Iran's growing influence across West Asia, particularly through its allied groups in Lebanon, Syria, and Gaza. In response, Israel has adopted a doctrine of preventive war. Netanyahu's goal is clear: neutralize threats before they fully materialize

However, as Professor John Mearsheimer has extensively argued, the decapitation strategy—targeting the leadership of organizations like Hezbollah and Hamas—has consistently proven ineffective. Historical precedent shows that eliminating leaders rarely results in the collapse of movements. More often than not, new leaders emerge, sometimes more capable than their predecessors. Israel's airstrikes and targeted assassinations, while temporarily weakening its enemies, do little to address the deeper structural issues at play.

Nowhere is this clearer than in Israel's ongoing conflict with Hezbollah in Lebanon. Since the 2006 war, Hezbollah has evolved from a guerrilla force into a highly sophisticated military organization. With Iranian support, Hezbollah has built an extensive military infrastructure, including precision-guided missiles, antitank weapons, and underground bunkers in southern Lebanon. A full Israeli ground invasion into Lebanon, should it occur, would be perilous-facing a better-armed and better-prepared adversary than during the 2006 conflict.

Adding to this complexity, Hezbollah's close ties with the Islamic Revolution Guard Corps (IRGC) introduce a layer of asymmetric warfare, which could extend the conflict beyond the occupied territories and involve other Resistance groups in the region. The risk of entangling other nations in the conflict remains ever-present.

# Netanyahu's domestic political calculations

Israel's military challenges pale

in comparison to Netanyahu's political motives. Beset by corruption charges and growing public discontent over judicial reforms, Netanyahu is under immense domestic pressure. By amplifying the Iranian threat, Netanyahu can consolidate his political base, distracting from Israel's internal strife and offering a rallying point for unity. In this sense, his personal political survival is tied to the perpetuation of conflict, even if it does not align with Israel's long-term strategic interests.

This creates a dangerous paradox: while Israel might benefit from a more measured diplomatic approach to regional conflicts, Netanyahu's political ambitions seem to demand continued escalation. The consequences for Israel's international standing, and indeed for the wider region, are profound.

Netanyahu's political ambitions seem to demand continued escalation, which could bring about devastating outcomes for the region and the world

# Global energy implications of an Iran-Israel war

The implications of a potential all-out war between Iran and Israel stretch far beyond West Asia. Any escalation could disrupt global energy markets, sending shockwaves through the global economy. West Asia remains the heart of the world's energy supply chain, and the Strait of Hormuz—through which a third of the world's liquefied natural gas and 20% of its oil passes—becomes a flashpoint in this conflict.

Iran has previously threatened to blockade the strait in retaliation for Israeli and U.S. actions. Such a move would cause oil prices to skyrocket, potentially triggering a global recession akin to the 1973

OPEC crisis. Energy-dependent regions like Europe and China would be hit hardest, with Europe already grappling with energy shortages exacerbated by the war in Ukraine. A further spike in energy prices could lead to economic paralysis in Europe and severe disruptions to global supply chains.

China, the world's largest importer of oil, would face an acute economic crisis if the conflict expanded. With supply chains tightening and inflation already high, the global economic fallout would be immense, potentially causing cascading effects on global financial stability.

#### U.S. strategic distraction

From a U.S. perspective, Netanyahu's actions are particularly problematic. For the past decade, Washington has sought to pivot away from West Asia and toward the Indo-Pacific, where the South China Sea and competition with China are seen by Americans as the defining strategic challenges of the 21st century.

However, Israel's ongoing conflicts—and the prospect of a full-scale war with Iran—are pulling U.S. resources back into the West Asian quagmire. While the U.S. initially sought to reduce its military commitments in the region, the endless cycle of violence involving Israel keeps dragging American foreign policy back into West Asia. This prevents the U.S. from focusing on its long-term strategic goal: countering China's rise in the Indo-Pacific.

## Economic and demographic costs for Israel

The financial cost of Israel's war is already staggering. Estimates suggest the current conflict could cost Israel over \$70 billion, driving a significant economic deficit. But perhaps the more critical threat to Israel's future lies in its demographic trends.

Unlike Iran, which has weathered decades of sanctions and economic hardship without significant demographic decline, Israel faces the risk of a population outflow.

Many Israelis hold dual citizenship, particularly in Europe and North America, and are increasingly opting to leave the region amid rising insecurity. This exodus poses a long-term threat to Israel's sustainability as a "nation-state", weakening both its economy and its military preparedness.

#### The nuclear dilemma

As Israel continues to escalate the conflict, it may inadvertently push Iran toward reconsidering its nuclear strategy. Thus far, Iran has avoided nuclear armament. However, sustained Israeli provocations could lead Tehran to accelerate its nuclear ambitions, potentially sparking a nuclear arms race in the region. This scenario would be catastrophic for global security, and particularly for Israel's long-term safety.

Netanyahu's apparent desperation to draw Iran into an open war is a dangerous gamble. While it may serve his short-term political interests, the long-term costs—for Israel, for the U.S., and for the global order—are enormous. The risks to energy security, U.S. strategic interests, and Israel's very future cannot be overstated. As this conflict escalates, the question remains: Can this crisis be contained, or are we witnessing the beginning of a much larger geopolitical catastrophe?

#### Terrorist group dismantled upon arriving in Iran

TEHRAN – Iran's intelligence forces identified and arrested a group of terrorists that had entered the country through its Western borders on Wednesday.

The terrorists are said to have been members of a separatist

group residing in neighboring Iraq.

It appears that the individuals had infiltrated the borders, as one of the main members was killed during an armed confrontation with Iranian forces. The rest of the terrorists are now in custody.

Terrorists and separatists have ramped up their activities in and around Iran in recent years, with the majority of the outfits receiving funds and arms from the Israeli regime.

Iran has been on a quest to tighten security measures at its

borders, with Tehran and Baghdad signing a security pact last year that required Iraqi authorities to move terrorists away from the two countries' shared borders. Iran's intelligence forces say more efforts are underway to neutralize terror centers.

# Leader's commentary praises Roosevelt Street Station book as 'accurate account of history'

TEHRAN – The Leader of Islamic Revolution has written a commentary on the book "Roosevelt Street Station: A Documentative Narrative of Seizing U.S. Embassy in Tehran", commending the author's efforts and emphasizing the importance of accurately recounting history, especially regarding pivotal events during the Islamic Revolution.

The text of the Ayatollah Seyyed Ali Khamenei's commentary is as follows:

"In the Name of God, the Compassionate, the Merciful.

This book provides a solid and valuable report on a crucial incident in the history of the Revolution: the takeover of the U.S. Den of Espionage in 1979. This work fills a significant media and propaganda gap. We have not paid enough attention to the war of narratives in global conflicts, allowing our enemies to exploit this neglect, often distorting many events. The author's careful and valuable efforts in addressing this critical area deserve appreciation. The book's prose is smooth and expressive, with research and analysis that are logical, sincere, and convincing. The title chosen for the book is excellent."

Roosevelt Street Station delves into U.S. embassy spy activities both before and after the Revolution, detailing its interventions post-Revolution, which ceased following the historic takeover of the U.S. embassy. This event, significant not only for Iranians but also for Americans, prompted the U.S. to craft its own perspective on the episode.

The Leader's commentary was unveiled on Wednesday, at a ceremony at the Islamic Revolution Research and Cultural Institute. The event was attended by the book's author, experts, contemporary Iranian history researchers, and individuals involved in the 1979 U.S. embassy takeover in Tehran.

The book's launch ceremony today was accom-

panied by a speech from Hojjatoleslam Ahmad Khazaei, the publisher, who recounted the process of creating and publishing Roosevelt Street Station. Khazaei mentioned that in 2022, the Leader remarked to a group of nurses that critical aspects of the U.S. embassy takeover and its documents remained unclear, particularly for younger generations. This inspired the Institute to produce a comprehensive research work, leading to Roosevelt Street Station, a result of two years of intensive work, including the analysis of approximately 10,000 documents. "With proficiency in English, the author, Mohammad Mahboubi, meticulously reviewed primary sources and English-language memoirs for an in-depth analysis." he added.

Roosevelt Street Station also addresses questions surrounding the embassy takeover. During the event, researcher and writer Hossein Mohammadi

Seerat discussed the book, noting its departure from a typical narrative and its balanced tone. He acknowledged some gaps in the text but praised the book's importance in today's context, which highlights how the Revolution dealt a significant blow to the United States. Mahboubi explained that the book aimed to bridge internal and competing narratives, avoiding Western biases while steering clear of overly propagandistic tones. He consulted over 40 English and 45 Persian books, noting the painstaking process of reconciling sources over a nearly two-year period.

Every year on November 4, Iranians commemorate the day of seizing the U.S. embassy as the National Day of the Fight against Global Arrogance with rallies across the country, marking a day of resistance against the West's imperialism and a tribute to Iranian students' vigilance.

# Roosevelt Street Station: revisiting 'Hostage Crisis' through Iran's perspective

From Page 1 American and European writers have published numerous books and articles on the subject. Some are memoirs by people directly involved, like American officials or detainees, while others are second-hand accounts based on available records and documents.

A common theme across these works is their singular focus on the American perspective, often framing Iranian actions as irrational within an Orientalist view of "Iranian Muslim barbarians."

In response, "Roosevelt Street Station: A Documentative Narrative of Seizing U.S. Embassy in Tehran" aims to challenge these Western stereotypes. By critiquing such Orientalist analyses, it offers a perspective on the event from an Iranian point of view.

One of the most notable aspects of the book Roosevelt Street Station is its diverse range of sources. Unlike similar works that rely exclusively on American sources—such as government documents and the memoirs of

American political figures—this book draws from a wide array of materials.

It examines Iranian organizational records, correspondence between Iranian officials at the time, and even internal documents from the Muslim Student Followers of the Imam's Line –Iranian student group that seized the U.S. embassy in Tehran on November 1979– for the first time, offering a unique perspective on the event and its aftermath. Additionally, interviews with several individuals involved in the incident provide a clearer view of the Iranian standpoint.

Through the study of these Iranian sources, a distinctly different account of the U.S. embassy seizure in Tehran emerges. For example, we see that the beginning of the Iran-U.S. conflict, which persists today, was not the embassy takeover itself. Instead, the November 1979 incident was a response to decades of American involvement in Iran, especially the CIA-led coup against the legitimate government of Mohammad Mossadegh in 1953.

After the Islamic Revolution in February 1979, U.S. embassy activities in Tehran took on a new direction, aimed primarily at opposing—or at least reshaping and undermining—the revolution forces. Iranian society understood this antagonistic stance toward its revolution and feared a repeat of a coup like the one in 1953.

'The takeover of the American embassy in Tehran was a preemptive measure aimed at preventing plots like the 1953 coup'

Iranian society's view of the U.S. embassy's activities in Tehran was neither a paranoid delusion nor an "Iranian Sèvres syndrome."

Documents later retrieved from the U.S. embassy and the CIA station in Tehran confirmed this perspective. These CIA documents made it clear that the U.S. embassy was not merely "gathering information as part of its mission"; it frequently conducted "operations within its mission scope."

Activities included forming political alliances through CIA officers, funding specific political groups, attempting to re-establish electronic surveillance bases known as Tacksman in northeastern Iran, and even organizing military officers for a potential coup—all actions undertaken by the U.S. embassy in Tehran in the months following the Islamic Revolution.

In this light, contrary to the dominant Western narrative that labels the November 1979 event an "illegal attack on the U.S. diplomatic mission in Iran," Iranians saw it as a "preemptive operation." The Iranian public, aware that the U.S. embassy was working to counter the Iranian Revolution and potentially repeat the 1953 coup, took preemptive action to protect the survival of their Revolution.

# Iran condemns Israeli obstruction of UNRWA aid to Palestinian refugees

From Page 1 • UNRWA's mandate stems from the ongoing plight of Palestinian refugees displaced following the Nakba in 1948.

Iravani's statement also highlighted that Israel is waging a "genocidal campaign" against the Palestinian population in Gaza, specifically citing the current siege of the northern Gaza Strip and the obstruction of humanitarian aid.

He emphasized that the Israeli regime is violating international humanitarian law and intentionally weaponizing starvation against the civilian population.

The Iranian ambassador further criticized the international community, particularly the United States, for providing unwavering support to Israel, enabling its continued aggression in the radion

"The unchecked impunity exhibited by Israel for its widespread and systematic violations

in the Gaza Strip, coupled with the unwavering political, military, and economic backing it receives from certain Western allies, particularly the United States, has only strengthened its aggressive and expansionist strategies throughout the region," the envoy said.

He also condemned Israel's recent strikes in Lebanon, noting that it poses a significant threat to regional and global peace and security. "Israel has ignored the provisional measures set forth by the ICJ to cease its unlawful actions. It persists in its atrocities in Gaza and Lebanon, actions that amount to war crimes, crimes against humanity, and potentially genocide."

Elsewhere in his remarks, Iravani urged the UN Security Council to take decisive action to halt Israeli military aggressions and avert further violence and aggression.

"The UN must either take decisive action to

halt the Israeli military operations and avert further genocide, war, and aggression or allow these atrocities to persist."

The Israeli regime passed a law on Monday banning the U.N. Palestinian refugee agency UNRWA from operating in the occupied territories – a move that is also expected to significantly impact its work in war-torn Gaza.

The Israeli officials who drafted the law cited what they described as the involvement of some UNRWA staffers in Operation Al-Aqsa Storm on southern occupied territories and staffers having membership in Hamas and other Resistance groups. None of the Israeli claims have been proven so far.

# Tehran urges international response to escalating humanitarian crisis in Sudan

TEHRAN – Iranian Foreign Ministry Spokesperson has called on the global community, particularly international humanitarian organizations, to respond urgently to Sudan's worsening humanitarian crisis.

Esmail Baqaei made the remarks

on Tuesday, highlighting the alarming conditions as the civil conflict in Sudan continues to devastate the population.

Addressing ongoing reports of civilian casualties and mass displacement, Baqaei expressed deep concern about the prolonged violence and de-

teriorating humanitarian landscape. He described the conditions as "deeply troubling," underscoring the need for immediate action to alleviate the suffering of affected communities across Sudan. Baqaei urged international humanitarian agencies to increase efforts to halt the violence

and provide essential aid. Emphasizing the critical importance of international solidarity, he appealed for a coordinated response to deliver urgent assistance to displaced persons and those most in need.

Straight Truth
TEHRAN TIMES

**SPORTS** 

#### Wrestling World Championships 2024: Geraei wins gold

TEHRAN – Mohammad Ali Geraei claimed a gold medal at the Wrestling World Championships 2024 Tuesday night.

In the 82kg final, Geraei was not to be denied in his first chance at world gold, as he stormed to a 9-0 victory over a shell-shocked Erik Szilvassy from Hungary.

Geraei, normally a 77kg wrestler who was competing at the heaviest weight of his career, encountered no problems handling the extra bulk against Szilvassy, a winner of international tournaments this year in Zagreb and Budapest.

Geraei, who finished fifth at the Tokyo Olympics but missed the Paris Games due to a suspension, then completed a snap-down, go-behind takedown to finish the match in 1:35 and add the world gold to the bronzes he won at 71kg in 2017 and at 77kg in 2019 and 2021.

# Mosimane's mission: Can he turn Esteghlal's fortune around?

TEHRAN - South African tactician Pitso Mosimane faces a stern test as he prepares to lead Esteghlal against Tractor in the Iran's Persian Gulf Professional League on Thursday.

The former Al Ahly and Al Ahli Saudi FC manager is tasked with reviving the fortunes of one of Iran's most storied clubs, a challenge that has proven daunting for many.

Since taking over the reins at Esteghlal, Mosimane has been working tirelessly to instill a winning mentality within the squad. His arrival followed a disappointing 3-1 defeat to Kheybar, a result that underscored the depth of the challenges facing the Tehranbased club.

The South African has been keen to address the underlying issues plaguing the team, focusing on tactical discipline, mental fortitude, and a collective desire to succeed.

Mosimane's training sessions have been characterized by intense focus and attention to details

The coach has been working closely with his players, both individually and collectively, to ensure they are fully prepared for the physical and mental demands of the league.

His hands-on approach and meticulous planning have injected a renewed sense of optimism into the Esteghlal camp.

The upcoming match against Tractor is shaping up to be a crucial one for Mosimane. Tractor are a team known for their physicality and tenacity under the tutelage of Dragan Skocic, former head coach of Iran national team.

Mosimane is well aware of the challenges posed by his opponents and has been studying their recent performances extensively.

"We know that Tractor are a tough team to play against, but we are prepared," said Mosimane. "We have been working hard on our tactics and our fitness, and I believe that we are ready to compete."

All eyes will be on Mosimane as he seeks to guide Esteghlal back to the top of the Iranian football pyramid.

A positive result against Tractor would be a significant step forward in his mission to restore the club to its former glory.

#### Iran football chief Taj meets FIFA president Infantino

TEHRAN – Head of Iran football federation Mehdi Taj met FIFA President Gianni Infantino in Seoul.

Taj has traveled to Seoul, South Korea to attend the AFC Annual Awards Seoul 2023.

On the sidelines of the ceremony, Taj met Infantino and AFC President Sheikh Salman bin Ebrahim Al Khalifa.

Iran stalwart Saeid Ahmad Abbasi was named the 2023 AFC Futsal Player of the Year on Tuesday.

#### Dad Marz snatches silver at Wrestling Worlds 2024

TEHRAN - Poya Dad Marz of Iran seized a silver medal at the Wrestling World Championships 2024 Tuesday night.

In the 55kg final, Eldaniz Azizli of Azerbaijan defeated 2023 bronze medalist Dad Marz for the fourth time in four career meetings, but this one was the closest as he won 1-1 on last-point criteria after each received a passivity

It was an ironic defeat for Dad Marz, who had been on the winning end of the same scoreline in his two previous matches. In their most recent encounter at the Budapest Ranking Series in June, Azizli had bested the Iranian 6-1

Romanian Denis Mihai and Emin Sefershaev S(AIN) won bronze medals.

#### Sepahan runners-up at 2024 Paravolley Asia Oceania Club Cup

TEHRAN – Iran's womens' Sepahan club finished in second place at the 2024 Paravolley Asia Oceania Club Cup.

Sepahan lost to Shang Hai 3-1 (25-22, 27-25, 26-28, 25-14) in the final match.

Chinese side Jiang Su defeated Japan in the bronze medal match.

Iran's sitting volleyball league champions Mehr Molana were supposed to participate in the competition but withdrew from the event.

The competition was held in Hangzhou, China from Oct. 22 to 30.

#### Geraei truly happy by winning gold at 2024 Wrestling Worlds

TEHRAN - Mohammad Ali Geraei expressed his joy and gratitude for claiming a gold medal at the Wrestling World Championships 2024 Tuesday night.

In the 82kg final, Geraei defeated Erik Szilvassy from Hungary to win a gold medal.

"After eight years, I finally got to experience the world finals," Geraei said.

"I'm truly happy from the bottom of my heart because I could make my fans and family happy, especially my dear wife, who stood by me in tough times and understood me, as well as my parents and all my fans.

"I'm grateful to them; they have always been there for me and supported me, and I dedicate this medal to them."

"I thought this competition would be really tough, but thank God it ended up being easy," Geraei said.

"These past two or three years have been difficult for me, and due to certain circumstances, I couldn't participate in the Olympics and missed out on it.

But I hope with this medal I won, I can pave my way to the [next] Olympics and achieve the best medal and my dream,"

#### Annual exports of nano-products up 110%

TEHRAN—Secretary of Iran Nanotechnology Innovation Council Emad Ahmadvand said that the country's export of nano-products in the previous Iranian calendar year (ended on March 19) increased 110 percent compared to

As IRIB reported, Iranian producers exported \$145 million of nanotechnology products in the mentioned year, according to Ahmadvand.

Iran had exported \$69 million worth of

nanotechnology products between March 21, 2022, to March 21, 2023, he noted.

The official said the total value of Iran's nano-products in the previous year stood at \$1.62 billion, of which about 91 percent was sold in domestic markets and only nine percent was exported.

Ahmadvand further pointed out that sales of nano-made products in Iran in 2023 increased by 104 percent compared to 2022.

The nano-coating technologies, nanocomposites, and nano-catalysts accounted for the major share of the domestic market,

Presently, Iranian-made nanotechnology products are exported to 49 countries in the world, of which about 60 percent is exported to Iraq, Syria, India, China, and Turkey, the secretary of Iran Nanotechnology Innovation Council pointed out.

### **Exports from mining sector** surpassed \$6b in H1

TEHRAN – Iran exported 30.477 million tons of minerals and mining products worth \$6.33 billion in the first six months of the current Iranian calendar year (March 20 - September 21), IRNA reported.

Based on the data released by the Iranian Mines and Mining Industries Development and Renovation Organization (IMIDRO), the

Islamic Republic exported 30.492 million tons of such products worth \$6.396 billion during the previous year's corresponding period.

Steel and steel products were the top exported commodities in this sector, followed by aluminum and its byproducts, and copper related items, as well as other downstream

### ICCIMA holds meeting on industrial development strategy

TEHRAN - Iran Chamber of Commerce, Industries, Mines and Agriculture (ICCIMA) held the fist meeting of the Industrial development strategy on Wednesday with experts and scholars from various industrial sectors in

As reported by the ICCIMA portal, investigating industrial policies in Iran, discussing past experiences and future requirements were the main focus of the mentioned meeting.

In this meeting, the heads of the ICCIMA Industry and Information and Communication Technology Committees were also present.

Speaking at the gathering, Hojjat Mirzaei, head of the ICCIMA Research Center, said that Article 48 of the seventh National Development Plan emphasizes the formulation of new industrial development strategies with the participation of the Ministry of Industry, Mining and Trade and the private sector.

#### TEDPIX up 4,400 points on Wednesday

TEHRAN- TEDPIX, the main index of the Tehran Stock Exchange (TSE), rose 4,420 points to 2,056,089 on Wednesday, which is the fifth day of the Iranian calendar week.

TSE is one of the four Iranian stock exchanges, and the most important one. The other three ones are Iran Mercantile Exchange (IME), Iran Energy Exchange (IRENEX), and Iran's over-the-counter (OTC) market, known as Iran Fara Bourse (IFB).

In mid-September, the head of Iran Securities and Exchange Organization (SEO) said the entity will take the necessary measures to ensure that the direct and indirect interests of the stock market are considered in next year's budget bill.

"We are taking special measures in relation to the budget bill and issues that directly or indirectly affect the capital market," Hojatollah

He has also said that improving the stock market's efficiency is the main priority of the SEO in the current government administration

"In the 14th government, our mission is to protect the rights and interests of shareholders, facilitate the formation of capital, and improve the efficiency of the market which is the priority of the SEO programs," Seyedi underlined.

"The capacities of the capital market are huge and I believe that this market has room for a leap and now we are on the threshold of that leap," the official further noted.

"Now, in addition to great capital and capabilities of the companies, we have powerful workforces, investors competent managers in the market, so there is no reason why our capital market should not develop and reach at least 300 to 400 billion dollars of gross domestic product," he

Emphasizing that big steps should be taken in this regard, the official continued: "I have decided to work to this end with high motivation to play a small role in the development of the country."

The head of the Securities and Exchange Organization pointed to the capital market as a regulatory and supervisory body and said: "In this regard, our mission is to protect the rights of shareholders, promote market efficiency and facilitate capital formation, which are connected to each other like the sides of a triangle. But the question is, which of these factors can be the driving force as a more independent variable?"

"The important variable is the improvement of market efficiency, that is, the formation of more capital, which, in addition to increasing capital, also preserves the rights of shareholders," he finally said.

In late January, the deputy governor of the Central Bank of Iran (CBI) stressed the need for diverse financing tools in the country, noting that such tools are currently being provided by the stock market.

"To reduce the speculative and profitseeking activities of dealers in the country, financing tools should be diversified," Mohammad Shirijian said.

"The capital market is an institution that directs capital to production in an efficient manner. Now, to accelerate the process of resource transfer and high productivity, the financing should be directed to the enterprises," the official explained.

# 'Iran, Turkey play significant role in regional transit as bridge between Asia, Europe'

TEHRAN - Iran and Turkey play a fundamental role in regional transit and freight transportation as the bridge between East and West, Iranian Minister of Transport and Urban Development Farzaneh Sadegh said at an event organized in Tehran on October 29 on the occasion of Turkey's Republic Day.

According to her, the geographical position of Iran and Turkey acts as a link between Asia and Europe, opening up a priceless chance to boost regional and international freight and transit networks.

Sadegh noted that collaboration between Iran and Turkey across all domains will bolster peace and stability in the region.

Iran consistently endeavors to enhance its connections with Turkey across political, economic, cultural, scientific, and security fields, she said.

The minister considered the recent meetings between the high officials of the Islamic Republic of Iran and the Republic of Turkey as an expression of the good political relations and the strong will of the two countries to develop cooperation.

While emphasizing the readiness of the Ministry of Transport and Urban Development, as the Iranian chairman of the Iran-Turkey Joint Economic Committee, to benefit from all available capacities in order to develop bilateral relations, she wished the two great nations of Iran and Turkey, health, prosperity, happiness, security and

To note, during seven months of the current Iranian year (from March 20 through October 21, 2024), more than 13.2 million tons of cargo were transited through

Transit via Iran increased by 42 percent during seven months compared to the same period last year (from March 21 through October 22, 2023).

Iran exported non-oil goods worth \$2.4 billion to Turkey in the first half of the current Iranian calendar year (March 20-Septemebr 22). As reported,

Iranian Transport Minister Farzaneh Sadegh (R) and Turkish Ambassador to Tehran Hicabi Kirlangiç attend an event held on the occasion of Turkey's Republic Day in Tehran on October 29.

destination of Iran among its other neighbors during the six-month period.

As reported, Turkey was the fourth export destination of Iran among its other neighbors during the six-month period.

Iran also imported commodities worth \$5.1 billion from Turkey, which made the country the third source of import for Iran in the first half of the year.

During a meeting between a delegation of Tehran Chamber of Commerce, Industries, Mines, and Agriculture (TCCIMA) and the senior directors of the Turkish Exporters Union (TiM), the two sides explored the ways to improve and develop trade relations between the private sectors of the two countries.

In the meeting, held at the place of TiM in Istanbul, in the first week of September , the areas of development of commercial cooperation between the private sectors of the two countries were discussed and the use of advantages and capacities in the fields of tourism, food, textile and pharmaceutical industries was emphasized, the TCCIMA portal reported.

In this meeting, TCCIMA Head Mahmoud Najafi-Arab referring to the trade balance of 1.6 billion dollars between the two countries, which is also positive for Turkey, mentioned the re-export of some Iranian products through this

Turkey was the fourth export country as one of the opportunities to optimize the trade relations between the two countries.

> Recalling that Turkey has great power and experience in the field of tourism, he mentioned the use of the capacity of Turkish tourism companies to cooperate with the Iranian tourism industry and to increase the attraction of foreign tourists to Iran as another area of development of relations between these two neighboring countries.

> Najafi-Arab also pointed to Iran's high power and knowledge in the textile industry and said that by setting up a joint cooperation program, the global expertise of Turkish companies can be used to strengthen the branding of Iranian products in international markets.

> The TCCIMA head then pointed to the technical knowledge and expertise of Iranian companies in the pharmaceutical industry, especially in biotech drugs and probiotic industries, and emphasized on strengthening cooperation between the two countries in these sectors.

> Addressing the same meeting, TiM Deputy Ahairman Ahmet Gulec explained about this large Turkish private sector union and reminded that currently 150,000 Turkish exporters are members of this union and 61 export associations of this country also form the body of this large entity.

According to him, this union covers 27 product groups in the agricultural, industrial, mining and service sectors, and supporting Turkish exporters for their greater presence in the world markets is one of the main goals of the union.

He further put the export value of Turkey in 2023 at \$357 billion and the import value at \$410 billion, and reminded that the country plans to rise the value of products export to \$375 billion and the value of services export to \$200 billion by 2028.

He called the joint investment and the construction of Turkish factories in Iran and vice versa, among the capacities of joint cooperation and reminded that the TiM is ready to cooperate and interact with the TCCIMA to strengthen and develop the exports of the companies of the two countries.

In early July, Director of Asia and the Pacific Office of the Iran Chamber of Commerce, Industries, Mines and Agriculture (ICCIMA) International Affairs Department Niloufar Asadi said a Free Trade Agreement (FTA) between Iran and Turkey should replace the previous trade agreements between the two countries to boost economic exchanges.

In a meeting with the Consul General of Iran in Istanbul, Asadi referred to a previously reached preferential trade agreement between Iran and Turkey under the framework of the Group of Eight Developing Islamic Countries (D8) and said: "Considering the shortcomings of the previously signed preferential agreement and the necessity to improve and develop it, I suggest that a free trade agreement between the two countries replaces the previous agreements."

The trade exchanges between Iran and Turkey in the first five months of 2024 reached \$2.3 billion, showing a five percent increase compared to the same month last year.

According to the latest figures released by the Turkish Statistical Institute (TURKSTAT), Iran's trade with the neighboring country stood at \$2.189 billion in January-May 2023.

## Iran, Japan stress boosting cooperation in transport, technology development

Iranian Transport Minister Farzaneh Sadegh (L) and Japan's Ambassador to Tehran Tamaki Tsukada

TEHRAN - In a meeting between Iranian Transport and Urban Development Minister Farzaneh Sadegh and Japan's Ambassador to Tehran Tamaki Tsukada on Tuesday, the two sides stressed cooperation in transportation. infrastructure, and technology development, the portal of Iran's Transport Ministry reported.

Speaking in this meeting, Sadegh underlined Iran's geopolitical position as the link between East and West and said: "Japan can reach countries in the region, including Central Asia and the Caucasus, through Iran."

She further noted that the two countries can expand their cooperation in areas such as intelligent transportation systems, safety, transportation infrastructure technologies, and smart and earthquake-resistant urban construction technologies.

The minister invited Japanese officials to visit Iran to get familiar with the capabilities and capacities of the Islamic Republic of Iran, including the country's unique bridges and tunnels, and to discuss the areas for cooperation.

Another important issue discussed in this meeting was the need to establish direct flights between Iran and Japan, which was emphasized by both parties.

Sadegh also suggested that a meeting be held between the port officials of the two countries in order to examine the areas of cooperation in the field of maritime transportation.

The Japanese ambassador also pointed to the long-standing and historical relations between Iran and Japan and said: "The thousandyear history of the relationship between the two countries has provided a good basis for deepening joint cooperation in the field of human settlement, exchange of knowledge, technology and holding training courses."

He expressed satisfaction with the progress achieved in this field and called for further development of such cooperation.

## Honey production in West Azarbaijan anticipated to rise 10%

TEHRAN- Production of honey in West Azarbaijan province, in the northwest of Iran, is expected to increase by 10 percent in the current Iranian calendar year (ends on March 20, 2025), according to a provincial official.

Parviz Bostanchi, the deputy head of the province's Agriculture Department for improving livestock products, referred to the activity of 6,561 apiaries with 1,509,262 colonies in the province, and said: "It is expected that more than 26,000 tons of honey will be produced in the province this year, which will increase by 10 percent compared to last year."

West Azarbaijan produces 22 percent of honey and accounts for 13 percent of the honey bee colonies in the country, and in this respect, it ranks first nationwide, he further noted.

As announced by an official with Iran's Agriculture Ministry, the country's honey production per capita stands at 1.415 kilograms.

Mohammad-Ebrahim Hassan-Nejad, the deputy minister for livestock products affairs, also put the country's honey consumption per capita at 1.397 kilograms.

He has also said that 155,000 people are working in the apiaries of the country, adding this number of people are working in 94,932 apiaries.

Based on the data released by the United Nations Food and Agriculture Organization (FAO), Iran is the third-largest producer of honey in the world.

The chairman of the Animal Science Research Institute has said that the amount of honey production in the country should be increased by three to four

kilograms per colony.

Mohajer Mokhtar the Seventh "According to National Development Plan (2022-2026), the amount of honey production should be increased by at least three to four kilograms per colony according to the diversity of plants and the area of pastures that we have in the country".

He announced that 8,300 kilograms of royal jelly, 406 tons of pollen, 2,536 tons of beeswax, 247 tons of propolis, and 3,917 grams of bee venom are produced annually in the country.

# Hezbollah ready for a long war

By Shahrokh Saei

TEHRAN- Hezbollah's newly-elected Secretary-General Sheikh Naim Qassem has vowed to follow in the footsteps of his predecessor who was assassinated by Israel more than a

Delivering his first speech as the Hezbollah chief on Wednesday, Qassem said the Lebanese resistance group will keep fighting a war with Israel while adhering to the same strategy laid out by Sayyed Hassan Nasrallah.

Qassem was elected as Hezbollah's leader on Tuesday, succeeding Nasrallah who was martyred in an Israeli airstrike on Beirut's suburb of Dahieh on September 27.

US media acknowledged that Israel used American-made 900kg (2,000-pound) bombs in the strike that killed Nasrallah and levelled residential buildings in Dahieh.

Hezbollah also announced last week that Sayyed Hashem Safieddine, the head of the movement's Executive Council, was martyred in an Israeli airstrike on Beirut in early October.

"My agenda is to follow Nasrallah's agenda in all aspects," Qassem said, adding, "We will continue our war plan.'

Hezbollah leader vows to inflict "absolute defeat" on Israel.

Stressing that Hezbollah's capabilities are great and compatible with a long war, he promised to inflict "absolute defeat" on Israel.

Qassem noted that Nasrallah was like a brother to him and Safieddine was a man upon whom Nasrallah could heavily rely on.

He further touched upon the West's role in enabling Israel's warmongering, saying the movement is facing an "American, European and global war to put an end to our resistance."

#### Hezbollah's support for Gaza

Qassem also referred to Israel's genocidal war on Gaza, saying Hezbollah will continue to support Palestinian people in the besieged territory and "confront the danger Israel poses for the whole region."

Hezbollah and Israel began trading fire a day after Prime Minister Benjamin Netanyahu declared war on Gaza on October 7, 2023. Netanyahu issued the order after Hamas conducted Operation Al-Aqsa Storm, a surprise military attack in southern Israel which dealt a severe blow to the regime.

Hezbollah has carried out attacks on Israel in

Sheikh Naim Qassem has promised to uphold the legacy of martyr Sayyed Hassan Nasrallah.

solidarity with Palestinians in Gaza.

Tens of thousands of people have been displaced in northern Israel and southern Lebanon amid the exchanges of fire between Israel and Hezbollah over the course of the Gaza war which has so far left more than 43,000 Palestinian people dead.

Israel launched a massive bombing campaign in Lebanon on September 23 this year which was later followed by a ground invasion of the country's south a week later.

Israel has killed about 2,800 people in Lebanon and injured more than 12,700 others since October last year.

#### Countering aggression

In response to Israel's air and ground assaults on Lebanon, Hezbollah has intensified its retaliatory attacks.

The movement has hit strategic military sites deep inside Israel. It has targeted these facilities in Tel Aviv and Haifa.

Hezbollah has also struck serious blows to the regime's military on the battlefield in southern Lebanon.

The Israeli army has acknowledged that 33 soldiers have been killed in southern Lebanon

Israeli opposition leader Yair Lapid said Monday that around 12,000 Israeli soldiers have been either injured or killed since the beginning of the Israeli genocidal war on the Gaza Strip,

which has expanded to Lebanon.

"Eleven thousand soldiers were injured and 890 others killed," Lapid told Israeli Channel 12, underscoring that the number of dead and injured soldiers in the Israeli army will continue to increase if Netanyahu "doesn't do anything."

Lapid emphasized that the military conceals the true casualty numbers.

#### Israel exhausted

More than a year into the war of genocide on Gaza, the Israeli army's reservists are exhausted and it is struggling to recruit soldiers, according to AFP.

Periods of reserve duty have been extended, and some reservists complain they are unable to continue their normal lives.

According to the Israeli army, some 300,000 reservists have been called up since the start of the Gaza war, 18 percent of them men over 40 who should have been exempted.

As Israel is running out of soldiers, Hezbollah has put up stiff resistance on the battlefield.

Hezbollah's military capabilities, in particular its drones, have become Israel's recurrent nightmare. On October 19, a Hezbollah drone hit Netanyahu's residence in Caesarea in northern Israel spreading panic in Tel Aviv and beyond.

The Hezbollah chief promises steadfast support for Gaza in the face of Israel's genocidal war.

Such attacks indicate that the decapitation of Hezbollah leadership has been ineffective.

Over the past decades, the movement has become stronger although Israel has assassinated its leaders and commanders.

Qassem's first speech has also made it clear that such assassinations have failed to undermine the indomitable will of Lebanese people in defending their country against Israel's ag-

# Beit Lahiya amid Israeli carnage

State of disaster declared in

INTERNATIONAL

**OCTOBER 31, 2024** 

Straight Truth

TEHRAN TIMES

TEHRAN - The Israeli bloodbath in northern Gaza goes unchecked nearly a month into the regime's new brutal offensive in the area.

A medical source told Al Jazeera that Israel has slaughtered 1.250 Palestinians in northern Gaza since the start of the offensive on October 5.

Israel has laid siege to northern Gaza obstructing the delivery of fuel, food and med-

It has also issued forced evacuation orders for Palestinians in northern Gaza while its troops have opened fire on people who flee

The regime's army has battered the towns of Jabaliya, Beit Hanoun and Beit Lahiya.

On Wednesday morning, the Municipality of Beit Lahiya declared a state of disaster in

"We declare that the city is a disaster area due to the Israeli war of extermination and siege, and it has no food, water, hospitals, doctors, services, or communications," it said

The municipality called on the international community and organizations to pressure Israel to stop its attacks and allow entry of humanitarian aid, fuel, civil defense equipment, and vehicles to help open the roads and remove ruhhle

An Israeli airstrike on a building in Beit Lahiya killed more than 100 Palestinians on Tuesday.

A spokesperson for the Palestine Red Crescent Society in Gaza has called the situation in northern Gaza "catastrophic".

Oxfam has said it is unable to reach people in the north, accusing Israel of using starvation as a weapon.

Sam Rose, senior Gaza deputy director of the UN Relief and Works Agency for Palestine Refugees, called conditions in northern Gaza "absolutely desperate"

Israel has killed nearly 43,200 Palestinians in the Gaza Strip since declaring war on the territory in October last year. More than 101,000 others have also been injured.

## Naim Qassem is known for his encyclopedic knowledge

From page 1 ▶ For example, he said, the inspiring speeches of these successive leaders Sayyed Abdul Hussein Sharaf al-Din, Sayyed Musa al-Sadr. Sheikh Ragheb Harb, Sayyed Abbas al-Moussawi, Sayyed Hassan Nasrallah - were characterized with firmness, rationality, and steadfastness in confronting the disastrous imperialism.

Sheikh Qassem was born in 1953. His study of chemistry at the Lebanese University coincided with his seminary studies under Lebanon's prominent religious scholars. As a young man, he was highly influenced by Martyr Sayyed Musa al-Sadr.

He then contributed to the founding of Hezbollah in 1982. In 1991, he was elected as deputy secretary-general of Hezbollah and led its parliamentary bloc.

Known for his encyclopedic knowledge, Sheikh Qassem has published about 20 books in different fields that have been translated into several languages. His most important work is "Hezbollah: Methodology, Experience, and the Future". It embodies the essence of his Islamic political philosophy.

Among his other notable books are "Imam Khomeini: Authenticity and Renewal"; "Society of Resistance: The Will to Martyrdom and Making Victory"; and "Youth, a Flame that Burns or Lights".

Sheikh Naim Oassem also believes that the Zionist occupation regime needed Washington to fuel several wars in the region to perform its functional colonial role. This mission, he said, was done in partnership with major powers and the Security Council. Naim Oassem said Israel

pursued this policy since its establishment

"The goal of the American project is to expand the Zionist entity, legitimize it and harness the capabilities of the region to serve it," Sheikh Oassem stated.

He added, "Since Lebanon and its resistance constitute a permanent state of concern for it (Israel), due to its effective resistance that defeated it in May 2000, Lebanon's power must be neutralized."

Sheikh Qassem was referring to Hezbollah's success in forcing Israel to withdraw from southern Lebanon in May 2000.

The basis of the American project, according to Sheikh Qassem, is to disarm Hezbollah as a pivotal supporter of the Palestinian cause.

He noted. "Whoever thinks that Lebanon's fate will be orchestrated based on what America decides and what comforts Israel is

The Hezbollah official added, "The road is long. Lebanon's complexities cannot be sim-

This logic fully applies to the current reality.

In conjunction with the heroic operations and diplomatic steadfastness of Hezbollah fighters, undoubtedly, the upcoming days will witness achieving a new historical victory for the entire Lebanese nation.

This will bring more misery to the ill-fated Netanyahu and other Zionist bloodsuckers. And with the policies that Sheikh Naim Qassem will follow the Zionists' inevitable end will accelerate.

## Hezbollah bombs Israeli military base

From page 1 ▶ Khallet al-Asafir in the town of al-Khiam, the Wati Al-Khiam (southeast of the town) twice, the Wazzani Spring, Khallet al-Asafir, Yaqousa, Amra (twice), Fatima Gate and other areas with rocket barrages.

The regions are all on the Lebanese border. The Israeli occupation forces have been trying to infiltrate the border over the past

Intense confrontations with Hezbollah fighters have halted the Israeli ground invasion of Lebanon.

Israeli warplanes continue to bombard residential areas inside Lebanon, killing many civilians and displacing over one million others. Israeli missiles landing in Lebanon have killed an average of two children per day over the past month, according to experts.

Meanwhile, footage emerged on Wednesday of injured Israeli soldiers being treated following the launch of a rocket from Lebanon toward the Metula settlement in the upper Galilee.

Israeli media published videos of military helicopters transferring the casualties to Rambam Hospital in the city of Haifa. Hebrew media also reported that Hezbollah does not need many missiles to bring a large number of residents into fortified areas.

Hezbollah has declared that "within the framework of the warning issued by the Islamic Resistance (Hezbollah) to a number of settlements in the north, the Islamic Resistance fighters bombed the following settlements with rocket salvos: Kiryat Shmona, Nahariya, Dalton, Ma'alot-Tarshiha, Kfar Vradim, Kabri, Meron, Rosh Pinna, Even Menachem."

Hezbollah bombs nine Israeli areas after issuing evacuation orders to settler to leave "for your own safety"

This week, Hezbollah issued evacuation orders for dozens of areas in northern Israel and the occupied Golan. Hezbollah warned the residents to "evacuate for your own safety" noting that "your military is using your settlements to launch attacks on Lebanon."

Speaking to reporters, Hassan Fadlallah, a Hezbollah-linked legislator, said, "After a month of confrontations, the Israeli enemy has not been able to establish any foothold within Lebanese territo-

He emphasized, "The Israeli occupation's threats to kill or assassinate resistance leaders will not be effective; rather, they will reinforce our commitment to defend our country and uphold our legitimate rights.

The Labanese member of parliament highlighted that "Hezbollah is united as one courageous force, dedicated to defending the nation on all fronts. Its leadership, headed by Sheikh Naim Qassem, is solely responsible for managing all aspects of the war and making decisions."

Fadlallah also underlined, "The resistance will not allow the Israeli enemy to impose its conditions on our country. The occupation has been trying for days to advance towards the town of Khiyam, where the resistance fighters are confronting it with strength and steadfastness."

Experts say Hezbollah is thwarting all Israeli troops' attempts to infiltrate Khiyam, and is directing its missiles from south of the Litani River towards the occupation forces behind the border.

Hezbollah bombs nine Israeli areas after issuing evacuation orders to settler to leave "for your

## Gazan civilians are shockingly helpless

From page 1 ▶ They have been fleeing from one place to another in the tiny, besieged enclave, and wherever they go fighter jets hover over their heads to bury them under the rub-

They have been left alone and helpless and the insatiable wolfs are tearing them apart.

The world will surely feel shameful for being so unjustifiably passive in the face of all these tragedies against the Gazan civilians. Unfortunately, there is no trust in interna-

tional organizations to bring the perpetrators of these indescribable crimes to justice. Even those who have been aiding and abetting the perpetrators of these horrible crimes in Gaza have unbelievably started a campaign against the International Court of Justice and the International Criminal Court.

# TOURISM

#### National handicrafts exhibit inaugurated in Kermanshah

TEHRAN- An exhibition of Iranian handicrafts and traditional arts was inaugurated in Kermanshah on Tuesday.

The exhibit is showcasing traditional arts and crafts from 30 provinces across Iran, CHTN re-

During the opening ceremony, Kermanshah province's tourism chief Dariush Farmani stated that completing the value chain, promoting handicrafts, and supporting production are critical approaches we have adopted in the handicraft

He added that due to the rich history of handicrafts in Kermanshah, the cities of Harsin in the field of kilim weaving, Dalahu in the tambourine craft, and Nodesheh in the production of traditional footwear of giveh, along with the village of Fash in Kangavar as a national village for traditional instrument making, have been registered as national cities and villages

Farmani also highlighted their planning efforts to complete the value chain for several handicraft sectors in the province, noting that they have already begun necessary actions for enhancing the value chain of kilim weaving.

"Given the positive growth and the presence of distinguished artists in the fields of enamel work and woodcraft in the province, we are also prioritizing the completion of the value chain for these two sectors," he remarked.

He emphasized the activities undertaken in the area of handicraft education within the province, mentioning that over the past two years, free handicraft training has been provided to more than 500 individuals across Kermanshah.

Farmani noted the high enthusiasm for handicraft training in Kermanshah, adding that with the necessary funding, they can extend training sessions not only in urban areas but also in small towns and villages.

To ensure that the training provided to enthusiasts is practical, he explained that during the handicraft education, learners are also instructed in packaging, advertising, marketing, and sales by experienced instructors in the field.

Regarding support for handicraft production in the province, Farmani disclosed that last year, 480 billion rials (\$800,000) in loans were allocated for home-based handicraft jobs, creating employment for approximately 480 individuals.

He further mentioned that there are currently around 1,000 more people seeking funding, and approximately 500 have been introduced to banks.

Emphasizing the identification of around 1,000 handicraft artists in Kermanshah over the past 18 months who need government support for social security insurance and bank loans, Farmani underscored the importance of this initiative.

The 14th Handicrafts and Traditional Arts Exhibition in Kermanshah features the participation of 220 handicraft artists from across the country and will come to an end on Friday.

Iranian handicrafts boast a rich history, deeply embedded in the country's cultural and artistic heritage. From intricate Persian carpets and porcelains to decorative pottery, metalwork, and textile arts, Iranian crafts are renowned worldwide for their artistry and intricate designs. Each province carries its own distinct styles, materials, and techniques, reflecting the cultural and environmental diversity.

Currently, a selection of 13 cities and three villages in Iran have been registered by the World Council of Handicrafts as "world cities of handi-

Kermanshah, formerly Bakhtaran, the capital of Kermanshah province, was founded in the 4th century CE by Bahram IV of the Sasanian dynasty. Conquered by the Arabs in 640, the town was called Qirmasin (Qirmashin). Under the Seljuk rule in the 11th century, it was the chief town of Kordestan. The Safavids (ruled 1501-1736) fortified the town, and the Qajars repulsed an attack by the Turks during Fath Ali Shah's rule (1797-1834). Occupied by the Turkish army in 1915 during World War I, it was evacuated in 1917. The construction of a road in the 1950s over the age-old Khorasan track added considerably to the importance of the

### 81 valuable manuscripts donated to **Tabriz Central Library**

TEHRAN- The descendants of benefactor Haj Hossein Nakhjavani, one of the founders of the National Library of Tabriz, have donated a remarkable collection of 81 manuscripts and printed works to the Tabriz Central Li

Nakhjavani's grandchildren Fereydoun, Farrokh, and Rana have contributed 70 exquisitely crafted manuscripts, five lithographed books, and six lead-printed volumes to the Tabriz Central Library, the Iran Public Libraries Foundation's public relations office reported.

Among the valuable donated works are notable manuscripts including "Geography of Lands and Seas" from the 8th century AH, "Diwan-e Mahyar," "Diwan-e Malham Tabrizi," "Nozhat al-Qulub" "History of Alam Arai Abbasi," and "Sahifa Sajjadiyya."

The Central Library of Tabriz boasts the richest collection of manuscripts, lithographed, and lead-printed books within the public libraries of the country, housing a total of 3,422 volumes. Of these, 1,163 volumes were donated by Haj Mohammad Nakhjavani. while his brother Haj Hossein Nakhjavani contributed 863 volumes.

## Archaeology breakthrough as student discovers huge Mayan city in Mexican jungle by accident

A student has discovered a huge Mayan city centuries after it disappeared in a Mexican jungle by accident.

Luke Auld-Thomas, a PhD student at Tulane university in the U.S., was analyzing publicly available data when he found the buried world, which has since been named "Valeriana".

The hidden city was uncovered using Lidar, a remote sensing method that is used to examine the surface of the earth. Archaeologists use the technology to try and identify previously unrecorded sites.

As these surveys are normally quite expensive to conduct, researchers need to priorities areas where Mayan settlements are already known to exist.

However, Auld-Thomas and his team realized they could use data from a 2013 Lidar survey initially commissioned for monitoring carbon levels in Mexican forests.

"I was on something like page 16 of Google search and found a laser survey done by a Mexican organization for environmental monitoring," Auld-Thomas told the BBC.

Processing the data which he found on the internet, the student found what others had missed - a huge ancient city filled with over 6,700 structures, including pyramids, sports fields, and amphitheaters.

It is believed that the sprawling city dates between 250 to 900AD and had a population of 30,000 to 50,000 people at its peak.

# Exploring Iran's natural treasures: three national parks to visit

nowned for its rich culture and stunning landscapes.

It offers a diverse range of natural attractions, including majestic mountains, vast deserts, and lush forests.

With 24 national parks, each showcasing unique beauty and diverse ecosystems, it can be challenging to decide where to start your adventure.

Among them, three of Iran's most significant national parks are Lut Desert National Park, Golestan National Park, and Lar National Park.

Each of these parks presents a captivating combination of natural beauty, adventure opportunities, and biodiversity, inviting visitors to immerse themselves in Iran's ecological treasures.

#### **Lut Desert National Park**

Lut Desert National Park, located in Kerman province, is one of Iran's largest and most beautiful national parks.

This park features a variety of landscapes, including deserts, valleys, mountains, and dry riv-

Known for its stunning scenerv. Lut Desert is a popular destination for nature lovers and adventure seekers.

One of the park's highlights is the Lut Desert itself.

It encompasses parts of one of the most expansive and challenging deserts in the world.

Visitors can marvel at the arid landscape, which features vast plains, rugged hills, and salt flats.

The park is also home to unique wildlife, including species like wild goats and camels. beautiful springs, rivers, and

A view of Golestan National Park

Nature enthusiasts will be delighted by the rich biodiversity. Visitors to Lut can enjoy a range of adventure activities, such as off-road driving, camping, hiking, and biking.

The area is known for its clear night sky, providing excellent views for stargazers.

The remote location makes it possible to see the stars and celestial events without light pollution.

Additionally, the surrounding regions have historical sites, enriching the visitors' experience with insights into Iranian culture.

#### **Golestan National Park**

Golestan National Park is the oldest and most famous park in

Established in 1956 and recognized as a UNESCO Biosphere Reserve in 1976, it is located mainly in northern Golestan province and extends into Semnan province.

This park is known for its dimountainous terrain, wetlands.

In terms of flora and fauna, Golestan is rich with various plant species, including junipers, plums, and berries.

The park is also home to significant wildlife, such as leopards, brown bears, and many bird spe-

The diversity of plants and animals makes Golestan a popular spot for ecotourism.

Visitors can enjoy hiking along its beautiful trails, taking in the stunning natural scenery. The vibrant forests and majestic mountains provide a perfect backdrop for photography and relaxation.

The cultural significance of the area also adds an extra layer of interest for visitors looking to experience local traditions.

#### Lar National Park

Lar National Park is located between Tehran and Mazandaran, nestled in the southern slopes of the Alborz mountain range. Since its recognition in 1975 and subsequent classification as a wildlife sanctuary, it has become known for its varied ecosystems.

The park includes the picturesque Lake Lar, which enhances the beauty of the area.

The park features various plant species, such as mountain pinks and wild chamomile.

The diversity of flora supports a rich animal population, including Persian gazelles, leopards, and different bird species. This variety makes the park an ideal spot for wildlife observation.

Lar National Park offers numerous outdoor activities, including hiking and camping. Visitors can explore the diverse landscapes, from green forests to impressive mountains.

The area around Lar Lake is especially popular for picnicking and enjoying the tranquil surroundings.

Iran's national parks, including Lut, Golestan, and Lar, are not just beautiful landscapes but also important ecosystems. Each park showcases a unique aspect of Iran's geography and invites visitors to enjoy nature and engage in outdoor activities. Whether you're looking for thrilling adventures, peaceful scenery, or wildlife watching, these parks offer something for

#### Whales 'relentlessly pestered': tourism boom sparks new rules in French Polynesia

Lisette Muratore swam with humpback whales for the first time off the coast of Mo'orea, an island in French Polynesia, as part of a guided tour. She describes the experience as "overwhelming."

"You have a sudden realization of the immensity of these creatures ... seeing their wild beauty, it's almost like there's something sacred about them. When the baby [humpback whale] looked straight into my eyes it felt almost like I was looking at a god."

A handful of Pacific Islands allow tourists to swim with humpback whales and in recent years, French Polynesia and Tonga have become increasingly popular destinations for

The marine mammals, which can grow to around 16m in length and weigh up to 36 tons, travel through the islands' warm waters every year to give birth, rest and nourish their young before their long migration down to Antarctica.

Whale-watching tourism generates over \$2 billion in revenue, according to the International Whaling Commission - and the Pacific industry is growing.

In French Polynesia, the number of certified whale-based tourism operators rose from 60 in 2023, to 90 in 2024, according to Tahiti

But their growth has raised concerns over the potential harm to the animals. In April, a report by French Polynesia's government said "increasing pressure on whales from human activities poses a considerable risk to these

It said due to the rising number of whalebased tourism operators, "cetaceans can be relentlessly pestered throughout the day."

In response, French Polynesia plans to introduce new rules to reduce risks to whales, but some in the industry say they don't go far

"The government just keeps giving new [whale watching] permits," says Temoana Poole, a founder of whale-based tourism operator WildMa.

Poole says boats in Mo'orea have been increasing year after year - and estimates there are more than 50 working on his island alone. "They need to put a quota on it," he says.

#### Guardians of the sea

In Polynesian cultures, humpback whales are sacred animals, often seen as guardians or ancestors. Earlier this year, Indigenous leaders from French Polynesia, New Zealand and other Pacific islands signed a treaty granting whales legal personhood in a combined effort to protect them.

French Polynesia is home to one of the world's largest marine sanctuaries for whales, and all marine mammals are protect-

The local tourism industry offers whale watching and swimming-with-whales tours.

There are rules in place, including that operators must have a permit and tourists must swim with a certified guide.

In 2025, French Polynesia will tighten some regulations for whale-based tourism.

It will introduce a quota, with only three boats permitted to approach a whale at the same time. It will restrict whale-watching operators to one boat for each company, and private boats will have to stay at least 300m

But in a move that seems at odds with improving protections, divers will be able to swim closer to whales from next year, when the current limit of 30m from the mammals will be dropped to 15m.

The government says the new limit still means swimmers will be a "safe distance"

"The reality on the ground shows that at 30m you can't see much, and the animal often approaches out of curiosity anyway.

But it's still important to keep a safe dis-

tance, which we've set at 15m," says Fanny Martre, spokesperson for the environment

Dr Mark Orams specializes in marine tourism and studied whale-based tourism in Tonga. He says allowing swimmers to get within 15m of a humpback whale is "dangerous."

"These whales are 15 meters in length.

You get within 15 meters and you are in immediate proximity of their biggest weapon which is their tail ... I would be really concerned if there were approaches at that sort of length," says Dr Orams.

He adds that we probably shouldn't be swimming with whales – especially not with mothers and their calves.

In a study he co-authored, researchers found that swimming with whales had a negative effect on the behavior of mothers and calves in Tonga.

#### 'Brings light into the world'

Dr Agnès Benet, marine biologist and founder of the not-for-profit group Mata Tohora, has been campaigning for mandatory "quiet periods" during the day, without any boats or swimmers, to allow marine mammals to rest.

"In the second biggest sanctuary for marine mammals in the world, we might expect to have a period of time without human activity, to fulfil the original purpose of having a 'sanctuary," says Benet.

WildMa's Poole wants tourists to be sold "whale watching" experiences rather than whale swimming or diving.

Getting in the water depends on the conditions being safe for the whales - and if that

does happen it's "the cherry on the cake." But experts and locals agree that whalebased tourism can be done ethically and re-

Poole says that a portion of their earnings goes back into funding whale research and conservation, and supporting the local com-

He says when it's done properly, whale tourism "brings so much light and love into the world, and to the people."

# DOE stresses need for enhancing ties with UN

TEHRAN – The Department of Environment (DOE) has underscored the need to expand cooperation with the United Nations.

Fortunately, close cooperation in various fields indicates the determination of Iran and the United Nations to enhance and strengthen their relations to promote stability and security in the region and the world, Mehr news agency quoted Jila Mehdi-Aqaei, a senior advisor to the head of the DOE, as saying.

The official made the remarks on the occasion of the 79th anniversary of the UN, the UN Day.

Unfortunately, unfair sanctions have imposed significant challenges on all sectors, particularly the environment, limiting access to modern technologies and financial support from international communities, she said.

However, the friendly and long-standing relations between Iran and the UN should not be affected by the attitude of arrogant powers, she added.

"We are looking forward to expanding environmental ties and developing multilateral collaborations with the United Nations in different sectors," the official noted.

She went on to say that joint projects have been implemented to preserve Iran's wetlands and save Persian cheetah and biological diversity. The two sides have also adopted a resolution on dealing with sand and dust storms in the 6th United Nations Environment Assembly.

Hence "we seek to foster cooperation toward building capacity and transferring modern technologies for waste management, protection of wetlands, dealing with sand and dust storms, and managing pollution and climate

other critical issues.

Referring to the increasing

change impacts," the official stressed.

#### Main environmental policies

President Masoud Pezeshkian's administration has offered a program with a focus on the preservation of the environment and the stability of the country.

The program is structured around six axes: moving towards a green economy; managing and improving various quantitative and qualitative dimensions of environmental imbalances (such as economy, energy, and water); effectively protecting biological resources (including natural resources and biodiversity); achieving good environmental governance; addressing public demands in the field of environment, and enhancing international bilateral or multilateral cooperation in the field of environment.

To compile the program, general environmental policies, Article 50 of the Constitution, and other national policy documents have been taken into account.

Moreover, the president-elect has highlighted the necessity of observing environmental considerations in development plans.

Pezeshkian believes that no

tems such as national parks and national natural monuments has been highlighted.

Also, preventing the extinction of endangered species including cheetah, and bustard will be a top priority.

#### **UN Day**

During a ceremony held in Tehran on the occasion of the 79th anniversary of the United Nations, the Iranian deputy foreign minister for legal and international affairs, Kazem Gharibabadi said that Iran, as one of the founders of the UN, stands committed to promotion of multilateralism and efforts aimed at fostering the culture of global peace, justice, cooperation and coexistence based on international law and principles of the UN Charter, Press TV reported.

"Resolution of existing regional and international crises and challenges is not possible without the collective efforts of all countries and nations," the Iranian diplomat said.

United Nations Day recognizes the founding of the United Nations (UN) in 1945. The celebration is observed annually on October 24th.

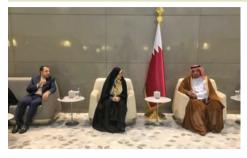

The mission of the United Nation is to maintain international peace and security.

The UN also sets terms for protecting human rights around the world. In 1948, they created international law with a Universal Declaration of Human Rights.

The member nations deliver humanitarian aid to populations in crisis. The first aid delivered was an immediate response to the devastation following World

Another aim of the international organization is to promote sustainable development.

## VP attending Family, Contemporary Megatrends conference in Doha

From page **1** One of the main objectives of the conference is to shape a future in which every family can flourish.

#### Demographic changes affecting family well-being

This year, the International Day of Family, celebrated annually on May 15, provided an opportunity to reflect on social, economic, and demographic changes that affect the structure and stability of families.

It aimed to raise awareness of how climate change impacts families and the role families can play in climate action.

Climate change negatively impacts the health and well-being of families through increased pollution, while extreme weather events exacerbated by climate change, such as hurricanes, droughts, and floods, often

lead to forced displacement and loss of livelihoods for families and individuals.

OCTOBER 31, 2024 Straight Truth

TEHRAN TIMES

Such events impact agricultural productivity and access to water, intensifying hunger and vulnerability.

They cause economic disruption in industries sensitive to climate impacts such as agriculture and fisheries.

Empowering families through education, changing consumption habits, and advocacy is critical for meaningful and effective climate action.

Through family and community initiatives, we can foster climate action with education, access to information, training, and community participation.

Families pass values across generations, so instilling sustainable habits and climate awareness in families from an early age is important.

Integrating circular economy principles into early childhood education can help build a sustainable economic model based on minimizing waste and regenerating natural re-

Families as consumers and advocates can drive the transition to a circular economy.

#### Ranger Day registered on national calendar

TEHRAN – The eighth day of Aban – the 8th Iranian calendar month, which falls on October 29, has been registered on the national calendar as the 'Ranger Day'.

Rangers and environmental defenders are at the forefront of protecting wildlife, natural resources, and ecosystems, sometimes sacrificing their lives to preserve nature.

The day aims to honor these officials' key role in safeguarding natural resources and biodiversity.

In the country, there is currently one ranger for every 30,000 to 40,000 hectares of protected areas, while usually there should be one ranger for 1,000 to 3,000 hectares.

Over 100 species of vertebrates in the country are in danger of extinction, and about 160 species are protected.

In order to protect the country's environment well, the number of rangers should increase by 10 times, Hassan Akbari, the former deputy head of natural environment and biodiversity of the Department of Environment, said in September 2022.

Some species such as the Asiatic cheetah, great bustard, and fallow deer are at risk of extinction and are in a more critical situation, some species such as the Persian zebra have limited habitats, and some such as the bustards are damaged by trafficking, on the other hand, the habitats of some animals that have a large territory such as leopard are occupied, each of them faces specific problems and each of them needs its own methods, and packages for protection, Akbari highlighted.

He went on to note that illegal hunting

takes place in the protected areas, especially the prohibited hunting areas, to a small extent and to a significant extent in the free areas, where there are not enough forces to protect them.

#### World Ranger Day

World Ranger Day is observed annually on the 31st of July and is celebrated by the International Ranger Federation's (IRF's) member Associations worldwide.

World Ranger Day both commemorates Rangers killed or injured in the line of duty and celebrates the critical work Rangers do to protect the world's natural and cultural treasures.

The first World Ranger Day was observed in 2007 on the 15th anniversary of the founding of the IRF

# Pelicans wintering at Anzali wetland

TEHRAN –Anzali Wetland in the northern Gilan province is playing host to the first group of migratory birds, especially pelicans.

Covering more than 19,000 hectares, the Wetland is located near the Caspian Sea.

Every year, hundreds of white and gray pelicans land in Anzali Wetland to spend the winter, IRIB reported.

The grey pelican is known to be among the threatened species.

#### Main wintering habitat in West Asia

Iran is the most important country in West Asia in terms of housing migratory birds in winter as around two million birds fly each year to spend winter in the country's wetlands, according to an official with the Department of Environment (DOE).

Encompassing numerous wetlands, reservoirs, and diverse water bodies, Iran welcomes millions of migratory birds every year.

The country has also emerged as the most important stopover for migratory birds in their flight route from Siberia to the Nile as sixteen percent of them select to spend the winter in the country, ISNA quoted Hassan Akbari as saying.

He made the remarks on the occasion of World Migratory Bird Day which is celebrated on May 11 to raise awareness about the importance of migratory birds and the need to protect them.

A diverse array of migratory birds fly to the country, with more than 160 species of aqua and waterside birds identified in Iran which is a significant number.

Despite limited water resources in the domestic habitats of the country, the study of the migratory bird population trend shows that the abundance and diversity of the birds that enter the country have not decreased. The majority of them have flown to the coastal areas of the Caspian and the Persian Gulf, though.

Iran hosts more than five percent of the world's migratory birds in 450 sites in winter, Akbari said.

"Every year some 30 to 40 million birds are counted all over the world and the related statistics are recorded in the International Waterfowl Census (IWC) database," he added.

The collected data and related analyses have significant scientific value in protecting wetlands, beaches, and biodiversity, he noted.

Iran joined the international census of wintering water birds as the first West Asian country at the same time as European countries in 1976.

In the early years, the counting of water birds was limited to the species that could be hunted including swans, geese, ducks, and common terns. Since 1987, other aquatic birds have been added to the list.

Pointing out that in the past 6 decades, the counting of wintering water birds in Iran has been a priority of the Department of Environment, he added, "Thanks to favorable geographical conditions, climatic diversity, wetlands, and aquatic habitats, including the Caspian Sea in the north, the Persian Gulf and the Oman Sea in the south, Iran hosts millions of migratory and wintering water birds yearly."

The annual census for migratory birds in Iran begins in the middle of the Iranian calendar month of Dey (December 22-January 20) and ends in the middle of the month of Bahman (January 21-February 19) in more than 450 sites in 30 provinces with the help of headquarters, provincial experts and professional birdwatchers of non-governmental organizations.

In the last three decades, over 8.1 million birds were counted on average, which is about five percent of the world's population of migratory birds and more than 16 percent of the population of migrant birds taking the route from Siberia to the Nile.

In 2015, the DOE initiated an effort with the United Nations Development Program (UNDP) aiming to preserve and revive the country's wetlands.

In the next phase in 2017, the government of Japan supported the project focusing on the sustainable management of water and soil resources around Urmia Lake as well as Shadegan and Bakhtegan wetlands.

It is a five-year plan, voluntarily supported by Japan, to take advantage of both their financial and technical assistance, ISNA quoted Mojtaba Zoljoodi, an official with the Department of Environment, as saying. Three years have passed since the implementation of the project, he added

"To implement the program in the remaining two years, we are consulting with the government of Japan and other governments that are willing to cooperate with Iran to be able to implement the project properly.

The plan to conserve Iran's wetlands is one of the good practical projects that, if continues, can help not only the wetlands of Iran but also the wetlands of other countries."

The results of the implementation of the project in 200 villages concerning water consumption have shown that a good amount of water in the agriculture sector has been saved. In addition, productivity, quality of the products, and the economic income of the family have increased.

# Iran finds herbal medicines effective in COVID-19 treatment

Two herbal drugs that are effective in healing the symptoms of COVID-19 have been permitted to be produced domestically.

The Food and Drug Administration has approved four domestically produced herbal medicine effective in the treatment of COVID-19 and has issued a production license for two of them. Kianoush Jahanpour, the spokesman for the Food and Drug Administration, told IRNA on Monday that "none of these drugs are a cure for COVID-19, but they have effects to reduce the symptoms of this disease and should be further investigated." The first herbal medicine in this collection is an oral spray containing six herbal essential oils, and according to the results of a clinical trial presented, if used, it helps to improve the pulmonary complications of coronavirus, including shortness of breath, cough, and arterial oxygenation, he explained.

#### تولید دو داروی گیاهی موثر در درمان کرونا در ایران

سازمان غذا و داروی ایران چهار فرآورده طبیعی تولید داخل با اجزای گیاهی برای بهبود علایم کوویده ۱ را تایید کرده و مجوز تولید را برای دو مورد آنها صادر کرده است.

کیانوش جهانپور سخنگوی سازمان غذا و دارو روز دوشنبه در گفت وگو با ایرنا گفت: هیچکدام از این داروها داروی درمان کووید۱۹ نیستند اما اثراتی برای بهبود علایم این بیماری داشته اند و باید مراحل بررسی بیشتر را طی کنند.

وی گفت: اولین داروی گیاهی از این مجموعه یک اسپری دهانی حاوی ۶ اسانس گیاهی است و با توجه به نتایج کار آزمایی بالینی ارائه شده در صورت مصرف به بهبود عوارض ریوی کووید ۱۹ شامل تنگی نفس، سرفه و اکسیژن رسانی شریانی کمک می کند.

### "11 Lives: Stories from Palestinian Exiles" available in Persian

TEHRAN-The Persian translation of the book "11 Lives: Stories from Palestinian Exiles" compiled and edited by Muhammad Ali Khalidi has been released in the bookstores across

Soore Mehr Publication has published the book in 336 pages with a translation by Habib Yousefzadeh, Mehr reported.

Written by the refugees themselves, this highly original anthology of Palestinians forced to live outside their homeland brings together stories of what it means to be exiled, reflections on the events that led to being displaced, and the raw experience of daily life in a camp.

The 11 lives given voice in the book are unique, each an expression of the myriad displacements that war and occupation have forced upon Palestinians since the Nakba of 1948. At the same time, they form a collective testament of a people driven from their homes and land by colonial occupation. Each story is singular; and each tells the story of all

As Edward Said argued in 1984, the object of Israel's colonial warfare is not only material seeking to minimize Palestinian existence as such—but is also a narrative project that aims to obliterate Palestinian history "as possessed of a coherent narrative direction pointed towards self-determination."

Through the book, Palestinian refugees narrate their own histories. The product of a creative-writing workshop organized by the Institute for Palestine Studies in Lebanon, "11 Lives" tells of children's adventures in the alleyways of refugee camps, of teenage martyrs and ghosts next-door, of a UNRWA teacher's dismay at the shallowness of her colleagues, and of the love, labor, and land that form the threads of a red keffiyeh.

What unites these 11 stories is "the inadmissible existence of the Palestinian

people" highlighted by Said. Their words persist, as one contributor writes, "between the Nakba and the Naksa, throughout defeats and massacres, love affairs and revolutions." The stories of Palestinians in exile are also open-ended, and will continue to reverberate across borders until Palestine is free.

The book contains contributions by Nadia Fahed, Intisar Hajaj, Yafa Talal El-Masri, Youssef Naanaa, Ruba Rahme, Hanin Mohammad Rashid, Mira Sidawi, Wedad Taha, Salem Yassin, Taha Younis. and Mahmoud Mohammad Zeidan.

Born in Lebanon to a Lebanese mother and a Palestinian father, Muhammad Ali Khalidi is a Palestinian philosopher. He holds a Ph.D. in philosophy from Columbia University.

He is the Presidential Professor of philosophy at CUNY Graduate Center, where he teaches and publishes in the philosophy of science. He has also served as a professor of philosophy at York University in Toronto and taught at the American University of Beirut, University of Nevada at Reno, and (as a post-doc) at the University of Chicago and Columbia University.

His main areas of research are in the philosophy of science (with an emphasis on cognitive science) and the philosophy of mind.

He has been particularly focused on analyzing mental phenomena such as: memory, concepts, and innateness, and what role they play in contemporary cognitive science. He is also interested in scientific classification schemes and in the means of distinguishing artificial categories from real ones in both the natural and social sciences.

He has written on various aspects of the question of Palestine, including Palestinian refugee rights. He has also translated a wide range of texts from Arabic into English including the collection "Medieval Islamic Philosophical Writings".

#### hosting six feature films from Iran TFHRAN-Six feature films from Iran are present at the 12th Asian Film Festival Barcelona (AFFBCN), which was launched in the Spanish city on October 24.

The Iranian films include "A Childless Village" directed by Reza Jamali, "Green Plum Season" by Ali Bayat, "Junks and Dolls" by Manijeh Hekmat, "The Ropewalker Memories" by Hamed Rajabi, "Waltz for Three" by Arman Zarrinkoub, and "When You Were Not Here" by Kaveh Sajjadi Hosseini, ISNA reported.

"A Childless Village" is a film-infilm comedy about a small village, where no children have been born for a while and all the men assume that it is the fault of the women.

Two decades ago, old filmmaker Kazem came to this remote rural village to make a documentary about the barrenness of the village women. But the village women wanted to protect their dignity, so they stole and burnt the footage.

By today, the villagers have found out that the men are sterile and there is nothing wrong with the women. With the help of his assistant, Kazem tries to record some interviews with the infertile men to unfold the truth in a new movie, but this turns out in many ways to be a Mission: Impossible.

"Green Plum Season" tells the story of Ata, who after resigning from his position as a judge, retreats to his family's villa in the countryside, only to be met with a chilly reception from his son, Farhad, who has recently been released from prison.

As Ata's wife, Giti, files for divorce, tensions escalate, and the family is thrown into turmoil. However, their already strained relationships are further complicated when a car accident claims Farhad's life and leaves Giti paralyzed. In the aftermath of the tragedy, Ata finds himself caught in a web of lies as he tries to shield Giti from the truth. Meanwhile, Farhad's girlfriend, Vida, becomes increasingly suspicious of the circumstances surrounding his death.

"Junks and Dolls" revolves around a couple, who is destined to build up their life in the heart of a waste depot in the heart of Iranian north forests. They begin to make different things with the junks they find and to make friends with the

other people... but what remains of the people who are determined to fight their nature?

Asian Film Festival Barcelona

"The Ropewalker Memories" is about a young man and his father, whoshareacloselivingarrangement in the same apartment. Despite his son's objections, the father invites sex workers into their home. One day, he brings home a woman who refuses to leave. Both father and son join forces to persuade her to depart. However, when she finally departs of her own accord, her absence becomes unbearable for the two men.

"Waltz for Three" is a psychological drama filled with mystery and tension. The story follows Mahmoud, who returns home after a long absence. His return coincides with a disturbing event: Fakhri, his mother, receives a call from the psychiatric hospital that will change their lives forever. As they try to maintain an appearance of normalcy, a police officer bursts into their home, intent on investigating the family's past. Gradually, dark family secrets begin to surface, unleashing a series of revelations that will challenge their familial bonds.

"When You Were Not Here" offers a demystified and contemporary reading of the epic poem, the "Odyssey". Marziyeh, a young mother, has been taking care of and providing for her children during the years that her husband, Farhad, has been away. He fled illegally programming director. After leaving

to Australia with his landlord's son. One night, after five years of disappearance, Farhad returns home and spends the night with Marziyeh, but, against all odds, the next morning he disappears again. This time, Marziyeh begins to actively and desperately search for him. In addition to the screening of films from Iran, two Iranians are present as jurors in the main section of the festival. Kamyar Mohsenin and Nastaran Molavi are serving on the jury panel of the official competition.

The festival will award a total of 18 prizes to the winners in different categories, as chosen by a jury of directors, film critics, and writers.

This year, the festival incorporates a course dedicated to Asian cinema, a series of round tables, in addition to presentations and discussions with guest directors.

The 12th edition of the Asian Film Festival Barcelona will conclude on

## Palestinian artists' works on display at London gallery

An exhibition of artworks by Palestinian artists is underway at the P21 Gallery in London, England, and will be open to the public until December 21.

Titled "Art of Palestine - From the River to the Sea," it is a unique showcase that aims to share the vibrant culture, heritage, and struggles of the Palestinian people through various artistic

According to the gallery website, the exhibit features a diverse range of talented Palestinian artists, including those currently living in Gaza. The exhibition is the second project at the P21 Gallery by Palestine Museum US.

Over 25 Palestinian artists are participating in the exhibit. Notable works include pieces by renowned abstract artist Samia Halaby, West Bank-based Nabil Anani, and muralist Taqi Spateen.

The exhibit also showcases works by Gaza residents Maisara Baroud and Mohammed Alhaj, along with art from recently evacuated

A special display features artwork by Gaza children depicting their experiences during previous attacks. Additionally, this exhibit will highlight a selection of relevant embroidery panels from The Palestinian History Tapestry, marking its first showing since the merger with the Museum.

This exhibition serves as a platform for Palestinian artists to express their experiences, identities, and narratives through art. Through paintings, sculptures, installations, and other forms of artistic creations, these artists shed light on the rich cultural tapestry and the challenges faced by the Palestinian people.

From traditional motifs to contemporary interpretations, the "Art of Palestine" exhibit offers a glimpse into the collective memory

and resilience of the Palestinian people. Each artwork tells a story, reflects a perspective, and invites viewers to engage with the complexities of Palestinian life, history, and aspirations.

The showcase not only celebrates the creativity and talent of Palestinian artists but also provides a critical space for dialogue, reflection, and awareness about the Palestinian culture and heritage. It aims to foster understanding, empathy, and solidarity with the Palestinian people, highlighting their vibrant artistic expressions as a form of resistance and resilience in the face of occupation, apartheid rule, and the Gaza genocide.

Art enthusiasts, cultural aficionados, and advocates for social justice are invited to visit the "Art of Palestine" exhibition and immerse themselves in the beauty, depth, and significance of Palestinian art. Through this showcase, attendees can deepen their appreciation for Palestinian culture, support Palestinian artists, and contribute to a greater understanding of the Palestinian narrative.

The Palestine Museum US is the first museum in the Americas dedicated to the rich heritage and history of Palestine. Located in Woodbridge, Connecticut, the U.S., the museum seeks to promote dialogue, understanding, and appreciation of Palestinian culture through its diverse exhibitions and educational programs.

Health authorities in Gaza said Monday that the confirmed death toll in the coastal enclave has surpassed 43,000 while over 101,000 others have been injured. The majority of the dead are women and children.

Israel's war on Gaza has displaced nearly the entire civilian population amid an ongoing blockade that has led to severe shortages of food, clean water, and medicine.

Mediation efforts led by the U.S., Egypt, and Qatar to reach a cease-fire and prisoner swap agreement between Israel and Hamas have failed over Israeli Prime Minister Benjamin Netanyahu's refusal to halt the war.

Israel also faces a genocide case at the International Court of Justice for its actions in the Palestinian enclave.

More women and children have been killed in Gaza by the Israeli military over the past year than the equivalent period of any other conflict over the past two decades, new Oxfam analysis has found.

As hostilities and tragic loss of life spread in Lebanon and the West Bank - including East Jerusalem - the regional escalation underscores the urgent need for an immediate and permanent ceasefire.

Throughout the last year, Israel has committed serious violations of IHL at a level which may rise to the level of crimes against humanity. This includes a level of destruction observed which is indicative of Israel's use of disproportionate force in relation to military objectives and a failure to discriminate between military targets and the civilian population. Israeli military has relentlessly targeted infrastructure indispensable to civilian survival. Civilians have been forcibly displaced dozens of times to so-called safe zones that fail to meet humanitarian obligations and have also been regularly bombed or attacked.
